

# Construction Alert

## Residential Yard Sampling and Cleanup Program

November 2021

The Department of Ecology met with 25 of your neighbors (see map) to plan soil removal work on their properties. You are receiving this notice because your neighborhood is going to see increased traffic from construction vehicles. This is part of Ecology's ongoing work to clean up arsenic and lead through the Yard Sampling and Cleanup Program. Heavy metals were carried by the wind from the former Asarco copper smelter and contaminated soil over a large area of Puget Sound.

### Construction Schedule

**Equipment operation hours: 8:00 A.M. - 5:00 P.M.**

Monday through Friday.

Saturdays with permission from Ecology.

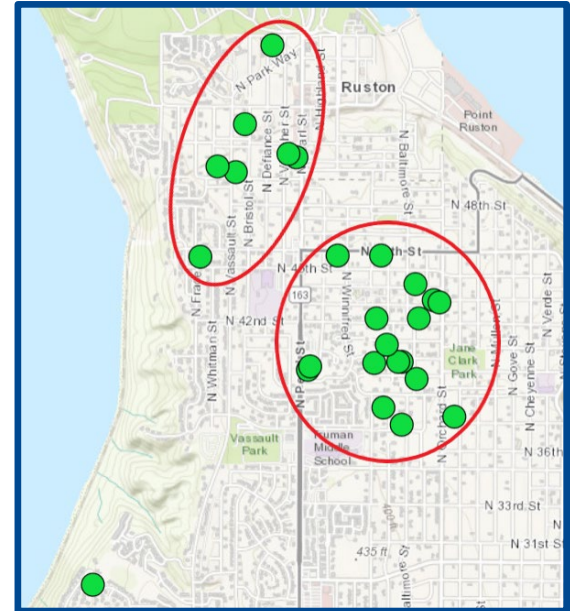

### Please call us if you see...

- Dust in the air from construction.
- Soil on the sidewalk or street.
- Mud or water running off the property.
- Dump trucks without covers.

### Questions?

Call the Tacoma Smelter Plume Project at **(360) 407-7688, press 2.**
