RCRA – Resource Conservation and Recovery Act

REC – Recognized Environmental Condition

USGS – United States Geological Survey

UST – Underground Storage Tank

EXECUTIVE SUMMARY

This report summarizes the results of the All Appropriate Inquiries (AAI) Phase I Environmental Site Assessment (ESA) of Block 18 (2205 and 2229 7th Avenue) in the Denny Triangle neighborhood in Seattle, Washington. Based on the results of this Phase I ESA, we did not identify recognized environmental conditions (RECs)[1] in connection with the subject property.

The following potential environmental concerns do not meet the ASTM definition of a REC based on available information, but are noted for redevelopment considerations:

- **Possible Past Use and Storage of Heating Oil and/or Waste Oil:** Although available and accessible historical information reviewed for this Phase I ESA study indicated that the 2229 7th Avenue building used natural gas heat, not oil-fueled heating systems, two chimneys in the building indicate possible past use of alternate heating fuels. Although there is no evidence that a UST was associated with the site, details of reported past use of the property as a "used oil collection site" could not be located during this study. These uncertainties result in a potential environmental concern for the site because unknown USTs or oil-contaminated soil could be encountered during future earthwork activities at the subject property.
- **Fill Material from an Unknown Source:** The subject property may have up to 20 feet of fill material overlying glacial deposits, based on subsurface explorations completed on adjacent and nearby property. The source of fill on the subject property is unknown, other than the fill material was placed during the Denny Regrade of the area prior to the 1930s. The fill on the subject property may be similar in nature to fill on adjacent properties; contaminants were not identified in subsurface explorations completed in 2012 at south-adjacent property. However, the potential for contaminants in fill results in a potential environmental concern.

In our opinion, the identified potential environmental concerns may pose a low to moderate potential risk of subject property impacts that may affect handling costs associated with excavation or dewatering for future redevelopment. Further evaluation of the potential environmental risk posed by these conditions would require subsurface environmental explorations, sampling or testing of soil, groundwater, and/or soil vapor.

This Executive Summary should be used only in the context of the full report for which it is intended.

[1] Recognized environmental conditions are defined in ASTM E 1527-13 as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property; (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not recognized environmental conditions."

1.0 INTRODUCTION

This report summarizes the results of our Phase I Environmental Site Assessment (ESA) of Block 18 (2205 and 2229 7th Avenue) in the Denny Triangle neighborhood in Seattle, Washington. Block 18 is the half-block bounded by 7th Avenue to the north, Blanchard Street to the east, an alley to the south and Bell Street to the west. This half-block is referred to herein as the "subject property." There are two buildings that are currently located on Block 18. Historic uses and activities at the subject property include a former auto parts store (2229 7th Avenue) and a former hotel (2205 7th Avenue). The hotel building was most recently used as a college dormitory by Cornish College. The subject property is shown relative to surrounding physical features on the Vicinity Map, Figure 1. The layout of the subject property and surrounding properties is shown on the Site Plan, Figure 2.

GeoEngineers previously completed Phase I Environmental Site Assessments (ESA) in June 2012 and November 2012 for Acorn Development, LLC for multiple city blocks within Seattle's Denny Triangle, which included Block 18. The results of these previous studies are discussed in Section 2.2.

This Phase I ESA was completed at the request of Lindy Gaylord of Seneca Group (Seneca). We understand that Acorn Development LLC (c/o Seneca Group) plans to purchase the subject property. We further understand that the results of this Phase I ESA will be used by Acorn Development LLC (Acorn) and Seneca as part of their evaluation of potential environmental liabilities associated with ownership of the subject property. This report has been prepared for the exclusive use of Acorn and Seneca. Because this environmental report is not intended for use by others, no one except the Acorn and Seneca should rely on this report without first conferring with GeoEngineers.

1.1. Phase I Scope of Services

The purpose of this Phase I ESA is to identify recognized environmental conditions[2] (RECs) in connection with the subject property. Our scope of services is in general accordance with ASTM International (ASTM) Standard E 1527-13 for Phase I ESAs and the U.S. Environmental Protection Agency's (EPA's) Federal Regulation 40 CFR Part 312 "Standards and Practices for All Appropriate Inquiries (AAI)," which are intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner or bona fide prospective purchaser (BFPP) limitations on liability under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). The ASTM standard outlines the practice that constitutes "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined by 42 U.S.C. §9601. Our services, described below, were completed in general accordance with our proposal dated December 4, 2015. These services were completed by, or under the direction of, an environmental professional as described in 40 CFR Part 312.

[2] Recognized environmental conditions are defined in ASTM E 1527-13 as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property; (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not recognized environmental conditions."

Our specific scope of services for this Phase I ESA was as follows:

1. Review readily available geotechnical reports, environmental reports and/or other relevant documents pertaining to environmental conditions at the subject property.
2. Review the results of a federal, state, local and tribal environmental database search provided by an outside environmental data service for listings of properties with known or suspected environmental concerns on or near the subject property within the search distances specified by ASTM. Our database and file review search also included a review of EPA and Washington State Department of Ecology (Ecology) websites for readily available information (publications and reports) concerning areawide soil and groundwater contamination on or adjacent to the subject property.
3. Review regulatory agency files regarding listed properties of potential environmental concern relative to the subject property.
4. Identify a key site manager with specific knowledge of past and present property use and request that the key site manager meet a GeoEngineers' representative on-site for an interview during the visual site reconnaissance and/or an interview by telephone if he or she is not available during the site reconnaissance. We also identified and interviewed others familiar with the use and history of the subject property, as available and appropriate, including representatives of current occupants that likely use, store, treat, handle or dispose of hazardous substances now or in the past.
5. Interview current owners or occupants of neighboring properties as necessary to gather information or fill property use data gaps regarding the subject property.
6. Interview past owners and occupants of the subject property as necessary to gather information or fill property use data gaps regarding property use history.
7. Interview a representative of the local fire department, health department and/or Ecology as necessary to gather information or fill data gaps regarding the history of the subject property and surrounding properties relative to the likely presence of hazardous substances.
8. Review historical aerial photographs, fire insurance maps, building department records, city directories, chain-of-title reports, and land use and tax assessor records, as available and appropriate, to identify past development history on and adjacent to the subject property relative to the possible use, generation, storage, release or disposal of hazardous substances. We attempted to identify uses of the subject property from the present back to the time that records show no apparent structures on the subject property, back to the time that the property was first used for residential, agricultural, commercial, industrial or governmental purposes, or back to 1940, whichever is earliest.
9. Review current United States Geological Survey (USGS) topographic maps to identify the physiographic setting of the subject property and provide a statement on the local geologic, soil and groundwater conditions based on our general experience and sources such as geologic maps and soil surveys.
10. Conduct a visual reconnaissance of the subject property and adjacent properties to identify visible evidence of RECs.
11. Identify the source(s) of potable water for the subject property and current heating and sewage disposal system(s) used at the subject property, if any, and their age if readily ascertainable.

12. Identify data gaps relative to the Phase I ESA study findings.
13. Provide a written summary of the Phase I ESA results and identified RECs along with our opinion and recommendations regarding the potential for contamination by hazardous substances at the subject property and any significant data gaps identified.

1.2. Special Considerations

Our scope of services did not include an environmental compliance audit or an evaluation for the presence of lead-based paint, toxic mold, polychlorinated biphenyls (PCBs) in light ballasts, radon, lead in drinking water, asbestos-containing building materials, urea-formaldehyde insulation in on-site structures or debris or other potentially hazardous building materials. Soil, groundwater, vapor, indoor air or surface water sampling was not part of our Phase I ESA services.

During our site reconnaissance we were unable to enter and observe locked spaces within the existing subject property hotel. However, this deviation does not adversely impact the objectives or conclusions of this study and is not considered a data gap because these spaces are unlikely to contain more than *de minimis* quantities of hazardous materials use or storage.

2.0 USER-PROVIDED INFORMATION

We did not receive any responses to a user questionnaire, a copy of which is provided in Appendix A. The questionnaire can be used to obtain user-provided information (for example, title records, environmental liens, specialized knowledge of the subject property, etc.) that may specify findings/conditions that may pose potential environmental concerns or RECs relative to the subject property. The absence of this information is a data gap that may pose an environmental concern to the subject property if the property has been subject to environmental liens, restrictive covenants, or other similar encumbrances.

2.1. Environmental Liens or Property Use Restrictions

Based on information in the previous reports, information provided by the User, and other Phase I ESA research findings, we did not identify recorded environmental liens in connection with the subject property.

2.2. Summary of Previous Reports

GeoEngineers previously completed two Phase I ESAs for multiple blocks in the Denny Triangle area, of which the subject property was a portion.

Phase I Environmental Site Assessment, Rufus 2.0, Denny Triangle, Blocks 14, 19, 20, 18 and 21, Seattle, Washington, dated June 7, 2012.

Phase I ESA Update, Rufus 2.0 Denny Triangle, Blocks 14, 19, 20, and portions of Blocks 18 and 21 dated November 30, 2012.

The 2012 reports were prepared as part of previous property due diligence activities. No RECs specific to Block 18 were identified in the 2012 reports, although RECs were identified for adjacent properties. Relevant historical information obtained from the 2012 reports has been integrated into subsequent portions of this report.

Other than the 2012 Phase I ESAs, one additional previous report for the subject property was identified:

> Terra Associates, 2007. Phase I Environmental Site Assessment, Schucks Parcel, 2229-7th Avenue, Seattle, Washington, prepared for Clise Properties, dated August 14, 2007.

The Terra Associates' 2007 Phase I ESA report is specific to the 2229 7th Avenue portion of the subject property. Terra Associates did not identify any RECs associated with the property. Historical information identified in the Terra report is generally consistent with historical information obtained for this report.

GeoEngineers completed a Phase II ESA for south-adjacent properties in 2012:

> Phase II ESA, Rufus 2.0 Development, Blocks 14, 19, and 20, Seattle, Washington, dated June 7, 2012

No contaminants of concern were detected in soil or groundwater samples from explorations on Block 19, located adjacent south of the subject property across Blanchard Street. Contaminants of concern detected in soil and groundwater samples from explorations on Block 20, located southeast of the subject property across the intersection of Blanchard Street and 7th Avenue, either are not located in close proximity to the subject property or based on their locations do not represent a potential risk of migratory contamination to the subject property in our opinion. Therefore, south-adjacent properties do not appear to present a REC to the subject property at this time. Samples of fill material in close proximity to the subject property did not contain detectable concentrations of contaminants of concern. Fill at the subject property may be similar to fill on the south-adjacent property because the sites were filled at the same time.

3.0 RECORDS REVIEW

3.1. Location and Setting

General information, property use(s) and environmental setting of the subject property area are summarized in Table I below. The location is shown relative to surrounding physical features in Figure 1. The current layout of the subject property and surrounding property uses are shown in Figure 2. Photographs of the subject property are shown in Figure 3.

TABLE I. SUBJECT PROPERTY INFORMATION

Topographic Map	USGS, 7.5 minute Seattle, Washington topographic quadrangle map dated 1983.
Quarter/Quarter, Section, Township and Range	NE quarter of Section 31, Township 25, Range 4 West, Willamette Meridian
Address	2229 7th Avenue (Lots 7-8) 2205 7th Avenue (Lots 9-12)
General Location	Subject property is bounded by 7th Avenue to the north, Blanchard Street to the east, an alley to the south and Bell Street to the west.
Tax Parcel Number	066000-0130 (Lots 7-8) 066000-0150 (Lots 9-12)
Approximate Area	0.9 acres

Existing Use(s)	Lots 7 Masonry slab-on-grade retail building (2229 Building) formerly used for auto parts sales, now used for bike rentals. Lots 9-12: Four-story, wood-frame hotel building (2205 Building), recently used as Cornish College dormitory, now vacant. The hotel building does not have a basement.
Geologic Setting	Puget Lowland glacial deposits (per Washington DNR Geologic Map of Washington, Northwest Quadrant, 2002)
Nearest Surface Water Bodies	Elliot Bay located approximately 0.5 miles to the southwest; Lake Union located approximately 0.75 miles to the north.
Approximate Surface Elevation	Approximately 105 feet above mean sea level (per King County iMAP)
Soil and Geologic Conditions	Based on previous reports for the subject property and recent explorations at nearby sites, the site is underlain by fill, recent granular and silt/clay deposits, and glacial soils. Fill may be up to approximately 20 feet thick in the vicinity of the subject property.
Depth to Groundwater	Based on previous explorations at nearby properties, the regional groundwater table is approximately between elevations 15 and 21 feet, which corresponds to depths of 60 to 95 feet bgs. It is possible that localized perched groundwater may be present at shallow depths beneath the subject property.
Inferred Direction of Shallow Groundwater Flow	To the northeast, based on surface topography.

Our knowledge of the general physiographic setting, geology and groundwater occurrence in the vicinity of the subject property is based on our review of the maps listed above (see References, Section 8), previous reports regarding the subject property, and our general experience in the area.

3.2. Standard Environmental Database Search

GeoEngineers reviewed the results of a search of pertinent environmental regulatory lists and databases for current or previous facilities listed at addresses located within ASTM-specified distances from the subject property. The search was performed on December 6, 2015. The information reviewed was provided by a subcontracted regulatory list search service, Environmental Data Resources, Inc. (EDR). The EDR report is presented in Appendix B. The report includes details regarding the listed facilities identified and maps showing the approximate locations of the listed facilities relative to the subject property.

GeoEngineers reviewed the search results for listings pertaining to the subject property. GeoEngineers also reviewed EDR's listing of database entries that could not be mapped by EDR because of insufficient addresses (orphans). Off-site facilities found within the specified distances from the subject property were evaluated for potential impact to the subject property.

3.2.1. Database and Regulatory Findings for the Subject Property

The subject property address of 2229 7th Avenue was identified on the RCRA NonGen regulatory database as "Seattle City Used Oil Collection 7th Avenue," for the years 1991 and 1996, reflecting used oil collection at the previous auto parts business in the building. We requested Ecology/EPA files for this listing (Section 3.3). The subject property address was not identified on EDR's proprietary databases of historic service stations, auto repair and dry cleaners.

3.2.2. Screening Criteria for other Listed Facilities

We screened the listed facilities within the ASTM search distances relative to the criteria described below. The results of the screening are presented in Section 3.2.3.

1. Adjacent Sites

    a. If adjacent sites were listed, they were retained for additional review. Any adjacent properties identified on EDR's proprietary databases of historic dry cleaner or automotive service station sites but not on regulatory databases are discussed in Section 3.4.

2. Non-Adjacent Sites

    a. Any non-adjacent sites included in the EDR report only by virtue of being listed in the RCRA, AST, UST, HMIRS, FINDS, ALLSITES, ICIS and/or NPDES databases (see list of acronyms on page iii) were not further reviewed because these databases are not indicative of known or suspected releases at a site. Sites listed in these databases only are considered low risk of contaminant migration and not potential RECs.

    b. Due to the large number of listed sites within the ASTM-defined search radii, and based on our knowledge of soil and groundwater conditions at the subject property, a screening radius of approximately ¼ mile was used to identify listed non-adjacent sites potentially warranting further review. Specifically, sites within approximately ¼ mile of the subject property **and** upgradient or cross-gradient that were listed in the Federal, State or Tribal Equivalent databases of CERCLIS, NPL, Hazardous Sites List (HSL), Confirmed and Suspected Contaminated Sites List (CSCSL), CSCSL No Further Action (CSCSL NFA), Voluntary Cleanup Program (VCP), Independent Cleanup Report (ICR), Solid Waste Landfill, Leaking UST (LUST), Clandestine Drug Lab (CDL), or Institutional Control Registries were further reviewed because these databases indicate a reported known or suspected release at a site. We requested Ecology files for listed sites on these databases.

    c. Sites that were not confirmed or suspected contaminated sites, not leaking UST sites or located outside a ¼-mile radius from the subject property were generally considered low risk of contaminant migration and not potential RECs.

3.2.3. Database Findings for Screened Listed Facilities

The following database-listed site(s) (Table II) met the screening criteria described above. We requested Ecology and/or EPA files for this site(s) (Section 3.3).

TABLE II. LISTED FACILITIES OF POTENTIAL CONCERN FOR CONTAMINANT MIGRATION

Listed Business	Listed Address	Distance from Site and Location	Type of Database and Database Information	Environmental Professional Opinion Based on Database Information
Seattle City Used Oil Collection	2229 7th Avenue	Subject property	RCRA-NonGen According to the EDR report, the site is listed only as a RCRA site that is not a generator of hazardous materials. No release to soil or groundwater is indicated and no violations were noted.	Ecology's files for the subject property are minimal as further discussed in Section 3.3.1.
Blanchard Plaza	2201 6th Avenue	Adjacent west (upgradient)	RCRA-NonGen According to the EDR report, the site is listed only as a RCRA site that is not a generator of hazardous materials. No release to soil or groundwater is indicated.	This site listing does not represent a REC in our opinion because this database is not indicative of known or suspected releases.
Frederick Cadillac	2301 6th Avenue	Approximately 100 feet northeast across the intersection of 6th Avenue and Bell Street (upgradient)	UST According to the EDR report, one UST of less than 1,100-gallon capacity was removed from the site in 1996. The database entry does not indicate that leaks or spills were associated with the UST system.	This site was recently redeveloped with a large apartment building. Based on distance and because there are no database indications of releases, this listing does not represent a REC in our opinion.
Frederick Pontiac Buick (aka Old British Motorcar)	2300 7th Avenue	Approximately 100 feet north across the intersection of Bell Street and 7th Avenue (crossgradient)	UST; CSCSL NFA; ICR; RCRA-NonGen According to the EDR report, two USTs of unspecified size were removed from the site in 1989. The site was granted NFA status based on owner-provided cleanup information in October 2011. The site is listed as a RCRA site that is not a generator of hazardous materials.	Based on cross-gradient location and cleanup status, this site does not represent a REC in our opinion.
Toyota of Seattle	2121 8th Avenue	Approximately 100 feet east across the intersection of Blanchard Street and 7th Avenue	RCRA-CESQG According to the EDR report, the site is listed only as a RCRA site that is a small-quantity generator of hazardous materials. No release to soil or groundwater is indicated.	This site listing does not represent a REC in our opinion based on the distance to this site and because this database is not indicative of known or suspected releases.

3.3. Regulatory Agency File and Records Review

3.3.1. Review of State Regulatory Agency Files

GeoEngineers recently requested reasonably ascertainable, pertinent records from Ecology for the subject property and sites listed in Table II. As of the completion of this report, Ecology has not responded to our recent request for information. However, we had reviewed Ecology's files for the subject property in 2012 (as described below). The lack of response from Ecology to the recent request is not considered a significant data gap because based on information in the EDR report and Ecology's website, Ecology files do not appear to include any newer information for these listed sites compared to available information in Ecology files as of 2012.

Subject property file information obtained during 2012 Ecology file review is presented below.

- **Seattle City Used Oil Collection (subject property) -** Ecology files for the subject property were limited to RCRA database entries for 1993. According to the RCRA database entry information, the used oil collection site was likely offered in connection with the former auto parts business in operation at this address. The auto parts business was not considered a generator of regulated waste. No violations are noted on the RCRA forms. No information regarding USTs, spills or releases is indicated in the Ecology files for the subject property. Inclusion of a site on a RCRA list identifies potential for waste handling activities at a site only and does not imply a release to the environment. Evidence of past used oil storage and handling activities on the subject property is considered a potential REC if the used oil was stored or handled in such a way that there could have been a release at the site into the structure or the ground.

3.3.2. Review of Local Regulatory Agency Files

Seattle Fire Department did not have any records regarding USTs or hazardous materials at the subject property during our 2012 Phase I ESAs. As of the completion of this report Seattle Fire Department has not responded to our recent request for records of USTs and hazardous materials at the subject property (Section 5.0) but this data gap is not considered significant because it is unlikely Seattle Fire Department will have any new responsive records for the subject property.

3.3.3. Areawide Contamination

We also conducted a search of Ecology and EPA websites for readily available information (publications and reports) that may concern areawide soil and groundwater contamination on or adjacent to the subject property. Areawide contamination reports pertaining to the subject property vicinity were not identified.

3.4. Historical Resources

Our understanding of the history of the subject property is based on a review of the information from the historical resources listed in Table III. Selected historical research documents are included in Appendix C.

TABLE III. HISTORICAL RESOURCES REVIEWED

Description	Provider or Interviewee	Dates of Coverage or Dates of Knowledge of the Property	Date Reviewed or Contacted	Comment (See Section 3.4.1 for findings)
Historical Aerial Photographs[1]	EDR Search	1956, 1965, 1969, 1977, 1980, 1985, 1990, and 2006	December 8, 2015	Photos obtained from 2012 report.
Historical Aerial Photographs[1]	Aerometrics, Inc. in Tukwila, Washington	1936, 1946, 1956, 1960, 1969, 1974, 1985, 1995, and 2000	December 8, 2015	Photos obtained from 2012 report.
Historical Aerial Photographs[1]	King County iMAP	1936, 1998, 2000, 2002, 2005, 2007, 2009, 2012, and 2013	December 14, 2015	--
Historical Fire Insurance Maps	EDR search of Sanborn maps	1893, 1905, 1949, 1950, and 1969	December 6, 2015	--
Historical Topographic Maps[1]	EDR search of USGS topographic maps	1895, 1897, 1909, 1949, 1968, 1973, and 1983	December 8, 2015	Maps obtained from 2012 report.
City Directory Search	EDR	Approximate 5-year intervals, 1920 to 2013	December 7, 2015	--
Archived Tax Assessor Records	Puget Sound Regional Archives	1938 to 1973	December 8, 2015	Obtained from 2012 report
County Assessor Records	King County iMAP	Recent	December 14, 2015	--
Building Department Records	Seattle Department of Planning and Development (DPD) Microfiche Records	Early 1900s to recent	December 8, 2015	Obtained from 2012 report
City Sewer Cards	DPD Side Sewer Program Website	1940s to recent	December 14, 2015	--
Health Department Records	Seattle-King County Health Department (SKCHD)	2012	December 14, 2015	Obtained for 2012 Phase I ESA

Notes:

[1] The scale of the maps/photographs reviewed allowed for an interpretation of general property development/configuration, such as identifying most structures, roadways and clearings. However, the scale of the maps/photographs did not allow for identification of specific property features, such as fuel pumps, wells or chemical storage areas on the subject property, if any.

3.4.1. Historical Property Ownership and Use Summary

The first identified development of the subject property is small houses shown across the subject property in the 1893 and 1905 Sanborn maps. The small houses were demolished or removed prior to the regrading of the area between the 1910s and 1930s. The subject property appears undeveloped in the 1936 aerial photograph. Beginning in the 1940s, the development of the north and south portions of the subject property began to differentiate, as discussed below.

Lots 7 and 8 (2229 7th Avenue)

Lots 7 and 8 currently contain a retail building (2229 7th Avenue), now used by Pronto bike rentals. The 2229 building was vacant at the time of our 2012 Phase I ESA. According to archived tax assessor property record cards, the existing building was built in 1940 and originally used gas heating units. Two chimneys are noted on the property record cards but their purpose is unknown. The property was used by Schuck's Auto Supply for retail auto parts sales from 1940 through 2007. Fastenal Company (a hardware store) occupied the building in approximately 2008 until 2011. The building was vacant from 2011 until approximately 2013, when it was occupied by the Pronto bike rental company. No evidence was identified to indicate that auto repair activities or USTs were located at the property. The property was apparently used as a used oil drop-off location at some point in the past, based on review of regulatory database information (Section 3.0). This type of drop-off location typically stores used oil temporarily in above-ground drums or tanks prior to removal and recycling by a third-party waste company, however the specific type of used oil storage associated with the subject property was not included in the available historic resources.

SKCHD records dated 1997 indicate that taxi cabs conducted vehicle maintenance (oil-changing) activities in the site parking lot. Maintenance activities were reported to be limited to oil changes, using oil purchased at the subject property store. Used oil was reportedly put into the used oil collection tank. SKCHD records do not include any indications that oil spills occurred in connection with these activities. Because no USTs or significant staining has been identified at the site, and because no releases or spills have been identified at the site, the past use as a used-oil drop off location and location for minor taxi service activities is not currently considered a REC.

Clise Properties purchased the 2229 building from Schucks LLC in 2007. Schucks had owned the subject property back to at least the 1950s.

Lots 9 through 12 (2205 7th Avenue)

The subject property portion of Block 18, Lots 9 through 12, currently contains a former hotel building (2205 7th Avenue) now vacant but most recently used as a dormitory by Cornish College. This portion of the subject property was developed with four narrow, rectangular buildings visible in a 1946 aerial photograph. These narrow buildings were identical to temporary government housing buildings that were located to the southwest across 6th Avenue. This portion of the subject property appears vacant in the 1949 and 1950 Sanborn maps. The existing hotel building was constructed in 1958. The hotel operated as the Towne Motel from construction until the early 1990s, and as the Days Inn from the mid-1990s to 2000s. And as a Cornish College dormitory from the early 2010s to 2015.The building has used electric heating units since construction. Many cosmetic renovations and small additions have been completed at the building over time. No evidence that dry cleaning activities have been conducted at the building have been identified in the available historical resources.

SKCHD records for this portion of the subject property dated 2010 indicate that residents may have disposed of fluorescent tube bulbs in a dumpster at the site, rather than through proper recycling procedures. SKCHD advised a residence hall advisor in proper procedures. The possibility that tubes were disposed of in a dumpster is unlikely to present a risk to site soil and groundwater and is not considered a REC.

Clise Properties has owned the 2205 7th Avenue property under a variety of entity names since approximately the 1900s.

3.4.2. Adjacent Properties

Adjacent properties generally were developed for commercial and residential uses by the 1890s, but some properties to the northwest were regraded as part of the removal of Denny Hill in the 1910s and 1920s.

North. Properties to the north across Bell Street have primarily been used for used and new auto sales since the 1940s and 1950s. These sites include Ecology-listed Frederick Cadillac and Old British Motorcar, discussed in Section 3.2. These properties have been used for parking and retail purposes since at least the 1990.

East. A government office building and the existing Hurricane Café building are visible on the property to the east across 7th Avenue in the 1946 aerial photograph. A paint company was located in the Hurricane Café building in the 1940s. The existing commercial building at 2200 7th Avenue was built in 1953. Tax archive documents and DPD building plans indicate the building was originally constructed as Nash Automobile sales and service. Many renovations of this building were completed over the years for a variety of tenants including guitar sales, US West telecommunications, Lifespan Biosciences, and most recently Budget Rent-A-Car.

South. New office buildings are currently under construction on properties to the south across Blanchard Street (Block 19). The closest portion of this property was used as a used car sales lot from at least the 1950s until the 1960s, and subsequently as a pay parking lot. Auto fueling facilities were formerly located on Toyota of Seattle land to the southeast across the intersection of Blanchard Street and 7th Avenue.

West. The west-adjacent office building and parking garage were built in 1968. The parking garage is unheated and the office building is heated by natural gas and electric heating units.

No additional adjacent properties are listed in EDR's database of historic dry cleaner or automobile repair and services facilities.

4.0 SITE RECONNAISSANCE

4.1. Subject Property Observations

A representative of GeoEngineers (Ali Cochrane) performed a visual reconnaissance of the subject property on December 9, 2015. Jim Shadley, Clise Properties Property Manager, was identified as a "key site manager" with knowledge of property use and was interviewed by telephone on December 15, 2015. Our interview with Mr. Shadley is summarized in Section 5.0.

The subject property was accessed from adjacent streets. The subject property consists of two buildings and an asphalt-paved lot. We entered and observed representative and accessible spaces within the buildings. Our visual reconnaissance focused on the areas where hazardous substance use, storage and/or disposal was likely, based on our experience.

Table IV below summarizes conditions observed during our site reconnaissance. The approximate locations of the observed features discussed in this section are shown in Figure 2. Photographs of the subject property were taken to document observations made during our reconnaissance. Selected photographs are presented in Figure 3.

TABLE IV. SUMMARY OF SITE RECONNAISANCE OBSERVATIONS

Features	Observed		Comment
	Yes	No	
Current Uses and Existing Structures	X		Former hotel building (2205 building), now vacant but most recently used as a Cornish College dormitory. Retail warehouse building (2229 building) currently used by PRONTO bike rentals. An asphalt paved parking lot is located south of the 2229 building.
Evidence of Past Uses and Former Structures	X		The layout of the 2205 building confirms the former use as a hotel.
Heating/Cooling System	X		Electric heating units in both buildings.
Floor Drains, Sumps or Drywells	X		Janitorial and sanitary drains in former hotel building. The drains are connected to the municipal sewer system. No drains are located in the 2229 building.
Aboveground Storage Tanks (ASTs)		X	
Underground Storage Tanks (USTs) or Evidence of USTs		X	
Drums or Other Containers	X		Two 55-gallon drums of hydraulic oil stored on the floor in the former hotel building boiler room.
Identified Hazardous Substances and Petroleum Products (other than drums noted above or *de minimis* quantities of cleaning products)		X	
Unidentified Substances or Containers		X	
Evidence of Leaks, Spills or Releases Surrounding ASTs, USTs and/or Chemical Storage Areas	X		Used sorbent sheets are located in a bucket in the former hotel building boiler room.
Stained or Corroded Floors, Walls or Drains (other than the above or apparent water stains or minor oil stains on pavement from parked vehicles)	X		Corrosion was visible on former hotel building boiler room and janitorial sinks, most likely from years of janitorial and maintenance uses.

Features	Observed		Comment
	Yes	No	
Hydraulic Hoists		X	
Oil/Water Separators		X	
Electric or Hydraulic Equipment Containing PCBs		X	
Discolored, Stained, or Stressed Soil or Vegetation Potentially from Hazardous Substances		X	
Solid Waste		X	
On-site Septic or Sewage Disposal System	X		Municipal sewer system connection.
Potable Water Supply	X		Municipal water system connection.
Standing Water or Other Pooled Liquids		X	
Catch Basins, Stormwater Drainage, or other Wastewater Discharges	X		Stormwater catch basins in site paved areas drain to the municipal storm drain system. No evidence of oil/water separators was observed in the catch basins.
Pits/Ponds/Lagoons		X	
Strong, Pungent or Noxious Odors		X	
Water Wells (agricultural, domestic, monitoring)		X	
Other Conditions of Environmental Concern		X	

4.2. Adjacent Property and Vicinity Observations

We viewed properties located adjacent to and surrounding the subject property on December 9, 2015 from accessible public rights-of-way and the subject property. We did not enter adjacent properties or buildings. The subject property generally is situated in an area that is heavily developed with commercial uses. Table III below outlines adjacent land uses and pertinent observations with respect to conditions that could pose a REC on the subject property. Any visual evidence or indications of prior uses of adjacent properties that would be considered a REC are noted in the table below. Figure 2 shows adjacent property uses and locations in relation to the subject property.

TABLE V. ADJOINING STREETS AND ADJACENT PROPERTIES OBSERVATIONS

Direction	Adjoining Street	Position Relative to Subject Property1	Adjacent Property and Use	Comments
North	Bell Street	Crossgradient	Parking Lot	--
South	Blanchard Street	Crossgradient	Office building under construction	--
East	7th Avenue	Downgradient	Vacant former Hurricane Café and Budget Rent-A-Car	--
West	Alley	Upgradient	Office building	--

Note:

[1] The inferred shallow groundwater flow direction in the vicinity of the subject property is toward the northeast, as described in Section 3.1.

5.0 INTERVIEWS

Our understanding of the history of the subject property presented in Section 3.4 is partially based on interviews with the individuals listed in Table VI. Pertinent historical findings from interviews have also been integrated into Section 4.0 above.

TABLE VI. PERSONS INTERVIEWED

Agency Description	Provider or Interviewee	Dates of Coverage or Dates of Knowledge of the Property	Date Reviewed or Contacted	Comment
Key Site Manager	Jim Shadley, Clise Properties	2000s to present	12/15/2015	See Section 5.1.
Interview	Seattle Fire Department	Recent	12/15/2015	See Section 5.2.

5.1. Interview with the Key Site Manager/Owner/Occupant

A GeoEngineers representative (Chris Brown) interviewed Jim Shadley, Clise Properties property manager, by telephone on December 15, 2015. Mr. Shadley is considered a "key site manager" for the purposes of this Phase I ESA. Mr. Shadley stated that Clise has owned the hotel property for approximately 100 years and that the hotel was built in the 1950s to support the 1962 World's Fair. Clise purchased the 2229 building in the 2000s. Mr. Shadley stated that he does not have specific knowledge of oil collection activities or former oil heat use at the 2229 building. Mr. Shadley he noted that the 2229 building has two chimneys that could have been associated with former coal or oil burning heating systems. Mr. Shadley stated that he has no knowledge of USTs, spills, releases, or other use or storage of hazardous materials at the subject property.

5.2. Interviews with Local Government Officials

Seattle Fire Department did not have any records regarding USTs or hazardous materials at the subject property during our 2012 Phase I ESAs. As of the completion of this report Seattle Fire Department has not responded to our recent request for records of USTs and hazardous materials at the subject property

(Section 5.0) but this data gap is not considered significant because it is unlikely Seattle Fire Department will have any new responsive records for the subject property.

6.0 EVALUATION

6.1. Findings and Opinion

The following general findings were identified in connection with the subject property:

- The first identified developed use of the subject property is several small houses in the late 1800s and early 1900s. All early houses were removed before the regrading of the Denny Hill area between the 1910s and 1930s. The subject property was filled to current grades by the mid-1930s.
- The north subject property building (2229 7th Avenue) was built in 1940 and was used for sales of auto parts (Shucks) from construction until approximately 2007. The building was originally heated by natural gas units, but the purpose of two chimneys in the building is unknown and could be evidence of other fuel use. No USTs are known to be associated with the building. The building address is listed on the RCRA database as a result of the apparent used oil collection site operations in the past. Although specifics regarding oil storage and handling at the site could not be determined through research performed for the Phase I ESA, no reported spills or releases were identified. No floor drains or significant staining was observed at the site during our site reconnaissance.
- The south portion of the subject property was developed as of 1946 by four narrow, rectangular buildings, likely temporary government housing buildings. The existing hotel building (2205 7th Avenue) was constructed in 1958. The hotel operated as the Towne Motel from construction until the early 1990s, and as the Days Inn from the mid-1990s to 2000s. The building has used electric heating units since construction. The hotel building was used as a dormitory by Cornish College from the early 2010s until 2015 and is currently vacant.
- Known or suspect contaminated sites on adjacent properties do not appear to present a risk for migratory contamination to the subject property at this time, based on our review of available regulatory information and results of previous studies, including 2012 Phase I and II ESAs for adjacent property.
- The subject property may have up to 20 feet of fill material overlying glacial deposits, based on subsurface explorations completed on for adjacent and nearby property. The source of fill on the subject property is unknown, other than the fill material was placed during the Denny Regrade of the area prior to the 1930s. The fill on the subject property may be similar in nature to fill on adjacent properties; contaminants were not identified in subsurface explorations completed in 2012 at south-adjacent property.

6.2. Data Gaps

One significant data gap was identified by this study:

- No reasonably ascertainable information was available to confirm the absence or presence of waste oil/heating oil use or storage at the 2229 7th Avenue building. Although available and accessible historical information reviewed for this Phase I ESA study did not indicate that the building used oil-fueled heating system, the purpose of the two building chimneys is uncertain and could have been used for alternate fuel systems. Similarly, although there is no evidence that the site was associated with a UST, details regarding the use of the property as a used oil collection site are not available.

6.3. Conclusions

GeoEngineers has performed a Phase I ESA in general conformance with the scope and limitations of ASTM Practice E 1527-13 of Block 18 (2205 and 2229 7th Avenue) in the Denny Triangle neighborhood in Seattle, Washington. Exceptions to, or deletions from, this practice are described in Section 1.2 of this report. This assessment has revealed no evidence of RECs in connection with the subject property.

The following potential environmental concerns do not meet the ASTM definition of a REC in our opinion based on currently available information, but are noted for redevelopment considerations:

- **Possible Past Use and Storage of Heating Oil and/or Waste Oil:** Although available and accessible historical information reviewed for this Phase I ESA study indicated that the 2229 7th Avenue building used natural gas heat, not oil-fueled heating systems, two chimneys in the building indicate possible past use of alternate heating fuels. Although there is no evidence that a UST was associated with the site, details of reported past use of the property as a "used oil collection site" could not be located during this study. These uncertainties result in a potential environmental concern for the site because unknown USTs or oil-contaminated soil could be encountered during future earthwork activities at the subject property.
- **Fill Material from an Unknown Source:** The subject property may have up to 20 feet of fill material overlying glacial deposits, based on subsurface explorations completed on for adjacent and nearby property. The source of fill on the subject property is unknown, other than the fill material was placed during the Denny Regrade of the area prior to the 1930s. The fill on the subject property may be similar in nature to fill on adjacent properties; contaminants were not identified in subsurface explorations completed in 2012 at south-adjacent property. However, the potential for contaminants in fill results in a potential environmental concern.

In our opinion, the identified potential environmental concerns may pose a low to moderate potential risk of subject property impacts that may affect handling costs associated with excavation or dewatering for future redevelopment. Further evaluation of the potential environmental risk posed by these conditions would require subsurface environmental explorations, sampling or testing of soil, groundwater, and/or soil vapor.

7.0 LIMITATIONS AND GUIDELINES FOR USE

These Limitations provide information to help you manage your risks with respect to the use of this report. Some clients, design professionals and contractors may not recognize that the geoscience practices (geotechnical engineering, geology and environmental science) are far less exact than other engineering and natural science disciplines. This lack of understanding can create unrealistic expectations that could lead to disappointments, claims and disputes. GeoEngineers includes these explanatory "limitations" provisions in our reports to help reduce such risks. Please confer with GeoEngineers if you are unclear how these "Report Limitations and Guidelines for Use" apply to your project or site.

7.1 Standard Limitations

This Phase I ESA has been prepared for use by Acorn Development LLC (Acorn) and Seneca Group (Seneca). GeoEngineers has performed this Phase I ESA of Block 18 (2205 and 2229 7th Avenue) in the Denny Triangle neighborhood in Seattle, Washington in general accordance with the scope and limitations of our proposal dated December 4, 2015 and ASTM International (ASTM) E 1527-13, Standard Practice for Phase I ESAs and EPA's Federal Standard 40 CFR Part 312 "Standards and Practices for All Appropriate Inquiries (AAI)." This report has been prepared for the exclusive use of Acorn, Seneca and their clients. This report is not intended for use by others, and the information contained herein is not applicable to other properties. Our report was prepared for the exclusive use of our Client. No other party may rely on the product of our services unless we agree in advance to such reliance in writing. This is to provide our firm with reasonable protection against open-ended liability claims by third parties with whom there would otherwise be no contractual limits to their actions.

Within the limitations of scope, schedule and budget, our services have been executed in accordance with the generally accepted environmental science practices for Phase I ESAs in this area at the time this report was prepared. No warranty or other conditions express or implied, should be understood.

Any electronic form, facsimile or hard copy of the original document (email, text, table, and/or figure), if provided, and any attachments are only a copy of the original document. The original document is stored by GeoEngineers, Inc. and will serve as the official document of record.

7.2. Special Limitations

GeoEngineers structures our services to meet the specific needs of our clients. For example, an environmental site assessment study conducted for a property owner or lessee may not fulfill the needs of a prospective purchaser of the same property. Because each environmental study is unique, each environmental report is unique, prepared solely for the specific client and project property. This report should not be applied for any purpose or project except the one originally contemplated. GeoEngineers considered a number of unique, project-specific factors when establishing the scope of services for this project and report. Unless GeoEngineers specifically indicates otherwise, do not rely on this report if it was:

- not prepared for you,
- not prepared for your project,
- not prepared for the specific property explored, or
- completed before important project changes were made.

If important changes are made to the project or subject property after the date of this report, GeoEngineers should be retained to review our interpretations and recommendations and to provide written modifications or confirmation, as appropriate.

GeoEngineers makes no warranties or guarantees regarding the accuracy or completeness of information provided or compiled by others. The information presented in this report is based on the above-described research and a single recent site visit. GeoEngineers has relied upon information provided by others in our description of historical conditions and in our review of regulatory databases and files. The available data do not provide definitive information with regard to all past uses, operations or incidents at the subject property or adjacent properties.

No ESA can wholly eliminate uncertainty regarding the potential for recognized environmental conditions (RECs) in connection with a property. Performance of an ESA study is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with a property. There is always a potential that areas with contamination that were not identified during this Phase I ESA exist at the subject property or in the study area. Further evaluation of such potential would require additional research, subsurface exploration, sampling and/or testing.

Some substances may be present in the vicinity of the subject property in quantities or under conditions that may have led, or may lead, to contamination of the subject property, but are not included in current local, state or federal regulatory definitions of hazardous substances or do not otherwise present current potential liability. GeoEngineers cannot be responsible if the standards for appropriate inquiry, or regulatory definitions of hazardous substance, change or if more stringent environmental standards are developed in the future.

This environmental report is based on conditions that existed at the time the study was performed. The findings and conclusions of this report may be affected by the passage of time (for example, a Phase I ESA report is typically applicable for 180 days), by events such as a change in property use or occupancy, or by natural events, such as floods, earthquakes, slope instability or groundwater fluctuations. If more than six months have passed since issuance of our report or work product, or if any of the described events may have occurred, please contact GeoEngineers before applying this report so that we may evaluate whether changed conditions affect the continued reliability or applicability of our conclusions and recommendations.

The equipment, techniques and personnel used to perform an environmental study differ significantly from those used to perform a geotechnical or geologic study and vice versa. For that reason, a geotechnical engineering or geologic report does not usually relate any environmental findings, conclusions or recommendations; e.g., about the likelihood of encountering underground storage tanks or regulated contaminants. Similarly, environmental reports are not used to address geotechnical or geologic concerns regarding a specific project.

GeoEngineers' Scope of Work specifically excludes the investigation, detection, prevention or assessment of the presence of Biological Pollutants. Accordingly, this report does not include any interpretations, recommendations, findings, or conclusions regarding the detecting, assessing, preventing or abating of Biological Pollutants and no conclusions or inferences should be drawn regarding Biological Pollutants, as they may relate to this project. The term "Biological Pollutants" includes, but is not limited to, molds, fungi, spores, bacteria, and viruses, and/or any of their byproducts. If Client desires these specialized services, they should be obtained from a consultant who offers services in this specialized field.

We appreciate the opportunity to be of service to Acorn and Seneca. Please call if you require more information or have questions regarding this report.

9.0 STATEMENT AND SIGNATURES OF ENVIRONMENTAL PROFESSIONAL

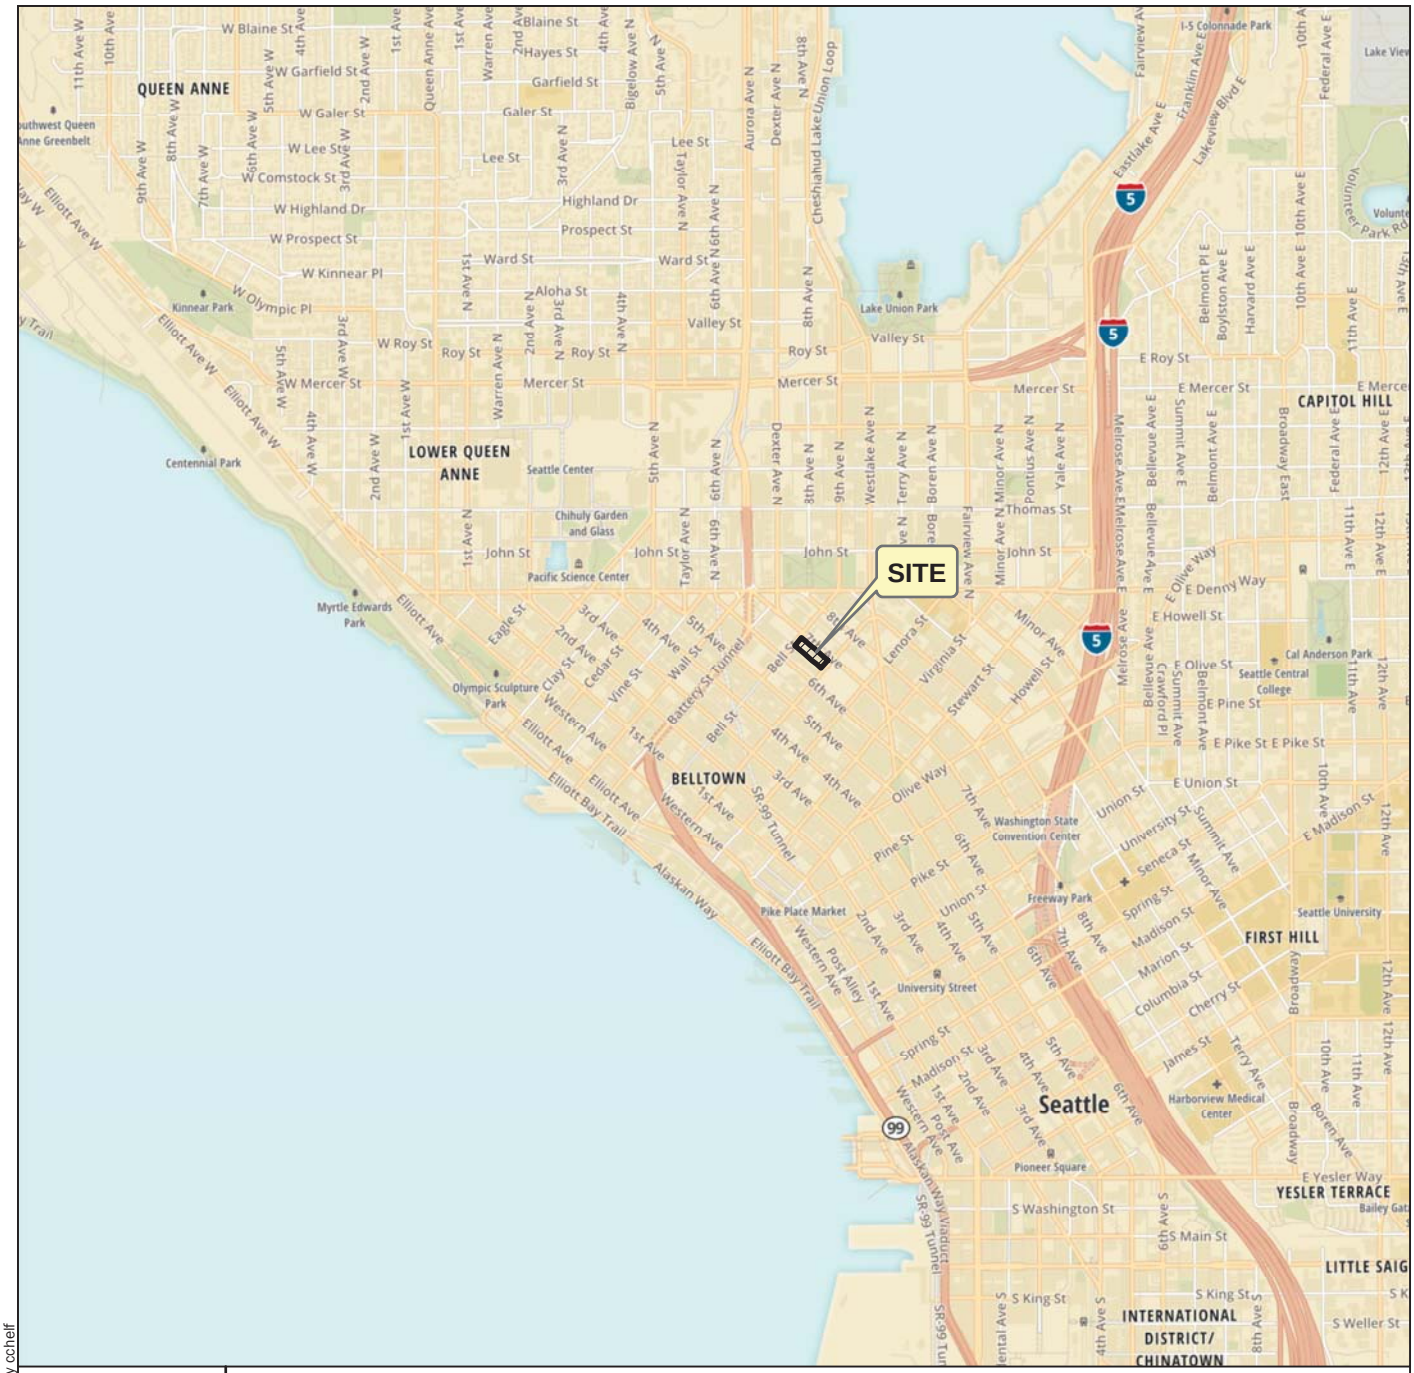
"I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Sec. 312.10 of 40 CFR Part 312."*

"I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312."*

**A person who does not qualify as an Environmental Professional may assist in the conduct of all appropriate inquiries in accordance with ASTM E 1527-13, if such person is under the supervision or responsible charge of a person meeting the definition of an environmental professional when conducting such activities.*

Jessica Robertson, LG
Environmental Geologist

David A. Cook, LG, CPG
Principal



9.1 Qualifications of Environmental Professional

Dave Cook is a licensed geologist (LG) in Washington (#346), a certified professional geologist (#CPG 11388) and has 20 years of experience completing and overseeing Phase I ESAs. Dave is an Environmental Professional per 40 CFR Part 312. Jessica Robertson is a licensed geologist (LG) in Washington (#2570) and has more than 10 years of experience doing Phase I ESAs. Jessica is an Environmental Professional per 40 CFR Part 312.

Resumes for Dave Cook and Jessica Robertson are presented in Appendix E.

APPENDIX A
User Provided Information and Completed User Questionnaire

PHASE I ESA USER QUESTIONNAIRE
2205 AND 2229 7TH AVENUE (BLOCK 18)
DENNY TRIANGLE NEIGHBORHOO
SEATTLE, WASHINGTON
FILE NO. 20434-001-29

In order to qualify for one of the federal landowner liability protections, and to enable us to fully address the objectives of the Phase I ESA, please complete the questionnaire below to the best of your knowledge and provide the additional information requested.

1. Are you aware of any environmental cleanup liens against the subject property that are filed or recorded under federal, tribal and state or local law?

   ☐ YES ☐ NO ☐ DON'T KNOW Explain:

2. Are you aware of any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the subject property and/or have been filed or recorded in a registry under federal, tribal, state or local law?

   ☐ YES ☐ NO ☐ DON'T KNOW Explain:

3. As the user of this Phase I ESA, do you have any specialized knowledge or experience related to the subject property or nearby properties? For example are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

   ☐ YES ☐ NO ☐ DON'T KNOW Explain:

4. Does the purchase price being paid for the subject property reasonable reflect the fair market value of the property?

   ☐ YES ☐ NO ☐ DON'T KNOW Explain:

   a. If you conclude that there is a difference and you answered NO above, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

      ☐ YES ☐ NO ☐ DON'T KNOW Explain:

5. Are you aware of commonly known or reasonably ascertainable information about the subject property that would help us identify conditions indicative or releases or threatened releases? For example,

   a. Do you know the past uses of the property?

      ☐ YES ☐ NO ☐ DON'T KNOW Explain:

   b. Do you know of specific chemicals that are present or once were present on the property?

      ☐ YES ☐ NO ☐ DON'T KNOW Explain:

   c. Do you know of spills or other chemical releases that have taken place at the property?

      ☐ YES ☐ NO ☐ DON'T KNOW Explain:

   d. Do you know of any environmental cleanups that have taken place at the property?

      ☐ YES ☐ NO ☐ DON'T KNOW Explain:

6. Based on your knowledge and experience related to the subject property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

   ☐ YES ☐ NO ☐ DON'T KNOW Explain:

User Questionnaire Completed By (Name and Organization): _____

_____

Date: _____

List of Requested Information, If Available

- Names and phone numbers of key individuals with knowledge of property use history.
- A map showing the boundaries of the subject property.
- Tax ID numbers for parcels included within the subject property.
- Copies of any past environmental site assessment and/or audit reports or risk assessment studies.
- Environmental permits.
- Registrations for underground and aboveground storage tanks (if any).
- Material data safety sheets for hazardous substances used or stored on-site (if any).
- Community right-to-know plans pertaining to the subject property.
- Safety plans pertaining to on-site facilities.
- Reports regarding geotechnical and/or hydrogeologic conditions at or near the subject property.
- Notices or other correspondence from any governmental agency relating to past or current violations of environmental laws with respect to the subject property or relating to environmental liens encumbering the property.
- Recorded Activity Use Limitations (AULs)

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERCLIS-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there are 2 CERCLIS-NFRAP sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 06/09/2015 has revealed that there are 2 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent NPL

WA HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

A review of the WA HSL list, as provided by EDR, and dated 02/19/2015 has revealed that there are 35 WA HSL sites within approximately 1 mile of the target property.

State- and tribal - equivalent CERCLIS

WA CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the WA CSCSL list, as provided by EDR, and dated 07/21/2015 has revealed that there are 141 WA CSCSL sites within approximately 1 mile of the target property.

State and tribal registered storage tank lists

WA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Ecology's Statewide UST Site/Tank Report.

A review of the WA UST list, as provided by EDR, and dated 08/19/2015 has revealed that there are 34 WA UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

WA CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the WA CSCSL NFA list, as provided by EDR, and dated 07/21/2015 has revealed that there are 54 WA CSCSL NFA sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/09/2015 has revealed that there are 38 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

FUDS: The Listing includes locations of Formerly Used Defense Sites Properties where the US Army Corps Of Engineers is actively working or will take necessary cleanup actions.

A review of the FUDS list, as provided by EDR, and dated 01/31/2015 has revealed that there is 1 FUDS site within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
WASHINGTON NATURAL G	815 MERCER ST	N 1/2 - 1 (0.506 mi.)	435	1489

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 41 EDR Hist Auto

sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and

operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No

LIFESPAN BIOSCIENCES (Continued) **1005445518**

Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

WA MANIFEST:

Facility Site ID Number:	47373868
EPA ID:	WAH000017913
NAICS:	54171
SWC Desc:	Not reported
FWC Desc:	D001, F003
Form Comm:	Not reported
Data Year:	Not reported
Permit by Rule:	False
Treatment by Generator:	True
Mixed radioactive waste:	False
Importer of hazardous waste:	False
Immediate recycler:	False
Treatment/Storage/Disposal/Recycling Facility:	False
Generator of dangerous fuel waste:	False
Generator marketing to burner:	False
Other marketers (i.e., blender, distributor, etc.):	False

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Facility Site ID Number: 82825487
EPA ID: WA8180090039
NAICS: 61111
SWC Desc: WT02
FWC Desc: D001, D008, D009, D018
Form Comm: 10A-1). This site is usually a Small Quantity Generator(SQG), but due to a clean-out of various Maintenance chemicals, and a one-time disposal of contaminated gasoline, for 2008 this site was a Medium Quantity Generator (MQG). It is not expected this site to be a MQG or LQG in the coming year(s), but should retain SQG status.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

RITE AID 5218 (Continued) **1001031565**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

SPCC

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Tank Status:	Temporarily Closed
Tank Status Date:	03/29/2010
Tank Install Date:	00/16/1986
Tank Closure Date:	Not reported
Capacity Range:	111 TO 1,100 Gallons
Tank Permit Expiration Date:	01/31/2014
Tank Upgrade Date:	04/17/1998
Tank Spill Prevention:	25 Gallons or Less
Tank Overfill Prevention:	25 Gallons or less
Tank Material:	Steel
Tank Construction:	Single Wall Tank
Tank Tightness Test:	Not reported
Tank Corrosion Protection:	Impressed Current
Tank Manifold:	Not reported
Tank Release Detection:	Weekly Manual Gauging
Tank SFC Type:	Not reported
Pipe Material:	No Piping Attached to Tank
Pipe Construction:	Not reported
Pipe Primary Release Detection:	Not reported
Pipe Second Release Detection:	Not reported
Pipe Corrosion Protection:	Other
Pipe Pumping System:	Product Removed by Reclaimer
Responsible Unit:	NORTHWEST
Dispencer/Pump SFC Type:	Not reported

Tank Name:	6
Tag Number:	A3649
Tank Status:	Operational
Tank Status Date:	08/06/1996
Tank Install Date:	00/25/1990
Tank Closure Date:	Not reported
Capacity Range:	5,000 to 9,999 Gallons
Tank Permit Expiration Date:	01/31/2014
Tank Upgrade Date:	04/17/1998
Tank Spill Prevention:	Spill Bucket/Spill Box
Tank Overfill Prevention:	Automatic Shutoff (fill pipe)
Tank Material:	Steel

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each

SEATTLE TIMES (Continued) **1000421873**

facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

KITS CAMERAS 1030 (Continued) **1000878395**

corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Facility ID: 933731
Data Year: 2011
Comments: I am receiving an error code that has "production process" listed in both "i" and "ii". These definitions are not the same as in the help menu, but the system will not let me submit. Error msg: The waste Source Code you reported in Section A-7 does not match the Origin Code you reported in Section A-9. Please correct the Source Code or the Origin Code. Wastes from production processes, service activities, routine clean-ups, and residuals from treating other waste streams are recurrent. Wastes from spill cleanups, production processes, services, and routine clean-up are non-recurrent. A chart showing Origin Codes and Source Codes in on the Annual Reporting Website at http://www.ecy.wa.gov/programs/hwtr/waste-report/index.html, and in the current "Dangerous Waste Annual Report Forms and Line by Line Instructions", Ecology publication number 03-04-018. (Rule ID: 199) The Help tab definition of "i" in the A-9 origin code section reads: i. The waste stream is recurrent: it was generated on-site from a production process, a service activity, or a routine cleanup (including off-specification or spent chemicals). This waste is from a routine Laboratory Analystical production process. I will use G19 in place of G22 in order to submit. Please let me know your preference. Thank you.

Comments: I am receiving an error code that has "production process" listed in both "i" and "ii". These definitions are not the same as in the help menu, but the system will not let me submit. Error msg: The waste Source Code you reported in Section A-7 does not match the Origin Code you reported in Section A-9. Please correct the Source Code or the Origin Code. Wastes from production processes, service activities, routine clean-ups, and residuals from treating other waste streams are recurrent. Wastes from spill cleanups, production processes, services, and routine clean-up are non-recurrent. A chart showing Origin Codes and Source Codes in on the Annual Reporting Website at http://www.ecy.wa.gov/programs/hwtr/waste-report/index.html, and in the current "Dangerous Waste Annual Report Forms and Line by Line Instructions", Ecology publication number 03-04-018. (Rule ID: 199) The Help tab definition of "i" in the A-9 origin code section reads: i. The waste stream is recurrent: it was generated on-site from a production process, a service activity, or a routine cleanup (including off-specification or spent chemicals). This waste is from a routine Laboratory Analystical production process. I will use G19 in place of G22 in order to submit. Please let me know your preference. Thank you.

Comments: I am receiving an error code that has "production process" listed in both "i" and "ii". These definitions are not the same as in the help menu, but the system will not let me submit. Error msg: The waste Source Code you reported in Section A-7 does not match the Origin Code you reported in Section A-9. Please correct the Source Code or the Origin Code. Wastes from production processes, service activities, routine clean-ups, and residuals from treating other waste streams are recurrent. Wastes from spill cleanups, production processes, services, and routine clean-up are non-recurrent. A chart showing Origin Codes and Source Codes in on the Annual Reporting Website at http://www.ecy.wa.gov/programs/hwtr/waste-report/index.html, and in the current "Dangerous Waste Annual Report Forms and Line by Line Instructions", Ecology publication number 03-04-018. (Rule ID: 199) The Help tab definition of "i" in the A-9 origin code section reads: i. The waste stream is recurrent: it was generated on-site from a production process, a service activity, or a routine cleanup (including off-specification or spent chemicals). This waste is from a routine Laboratory Analystical production process. I will use G19 in place of G22 in order to submit. Please let me know your preference. Thank you.

Comments: I am receiving an error code that has "production process" listed in both "i" and "ii". These definitions are not the same as in the help menu, but the system will not let me submit. Error msg: The waste Source Code you reported in Section A-7 does not match the Origin Code you reported in Section A-9. Please correct the Source Code or the Origin Code. Wastes from production processes, service activities, routine clean-ups, and residuals from treating other waste streams are recurrent. Wastes from spill cleanups, production processes, services, and routine clean-up are non-recurrent. A chart showing Origin Codes and Source Codes in on the Annual Reporting Website at http://www.ecy.wa.gov/programs/hwtr/waste-report/index.html, and in the current "Dangerous Waste Annual Report Forms and Line by Line Instructions", Ecology publication number 03-04-018. (Rule ID: 199) The Help tab definition of "i" in the A-9 origin code section reads: i. The waste stream is recurrent: it was generated on-site from a production process, a service activity, or a routine cleanup (including off-specification or spent chemicals). This waste is from a routine Laboratory Analystical production process. I will use G19 in place of G22 in order to submit. Please let me know your preference. Thank you.

Comments: I am receiving an error code that has "production process" listed in both "i" and "ii". These definitions are not the same as in the help menu, but the system will not let me submit. Error msg: The waste Source Code you reported in Section A-7 does not match the Origin Code you reported in Section A-9. Please correct the Source Code or the Origin Code. Wastes from production processes, service activities, routine clean-ups, and residuals from treating other waste streams are recurrent. Wastes from spill cleanups, production processes, services, and routine clean-up are non-recurrent. A chart showing Origin Codes and Source Codes in on the Annual Reporting Website at http://www.ecy.wa.gov/programs/hwtr/waste-report/index.html, and in the current "Dangerous Waste Annual Report Forms and Line by Line Instructions", Ecology publication number 03-04-018. (Rule ID: 199) The Help tab definition of "i" in the A-9 origin code section reads: i. The waste stream is recurrent: it was generated on-site from a production process, a service activity, or a routine cleanup (including off-specification or spent chemicals). This waste is from a routine Laboratory Analystical production process. I will use G19 in place of G22 in order to submit. Please let me know your preference. Thank you.

Comments: I am receiving an error code that has "production process" listed in both "i" and "ii". These definitions are not the same as in the help menu, but the system will not let me submit. Error msg: The waste Source Code you reported in Section A-7 does not match the Origin Code you reported in Section A-9. Please correct the Source Code or the Origin Code. Wastes from production processes, service activities, routine clean-ups, and residuals from treating other waste streams are recurrent. Wastes from spill cleanups, production processes, services, and routine clean-up are non-recurrent. A chart showing Origin Codes and Source Codes in on the Annual Reporting Website at http://www.ecy.wa.gov/programs/hwtr/waste-report/index.html, and in the current "Dangerous Waste Annual Report Forms and Line by Line Instructions", Ecology publication number 03-04-018. (Rule ID: 199) The Help tab definition of "i" in the A-9 origin code section reads: i. The waste stream is recurrent: it was generated on-site from a production process, a service activity, or a routine cleanup (including off-specification or spent chemicals). This waste is from a routine Laboratory Analystical production process. I will use G19 in place of G22 in order to submit. Please let me know your preference. Thank you.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
