**Re: Ecology response to September 16, 2022 Request for Concurrence – Reduction in Monitoring Program Memo, D Street Petroleum Site, Ecology Facility Site Identification Number: 1207**

Dear Renee Knecht:

This letter is Ecology's response to the above referenced memorandum, which documents historic groundwater analytical results through May 2022 from monitoring wells on the D Street Petroleum Site. The memorandum proposes changes to the frequency of groundwater sampling from quarterly to semi-annually for monitoring wells B-31, B-25, B-34, HC-111, RW-5R, RW-8, E-22, FW-5R, FW-14, FF-1, RR-2, RR-4, RR-5, T-2, DMW-2, DMW-4 and FW-13. Ecology approves this request for reduced frequency of monitoring of these wells from quarterly to semi-annually.

Please feel free to contact me with any questions regarding this request at 360-485-3987 or [andrew.smith@ecy.wa.gov](mailto:andrew.smith@ecy.wa.gov).

Sincerely,

Andrew Smith P.E., LHG
