An independent remedial action (hereafter "Remedial Action") occurred at the property that is the subject of this Restrictive Covenant. The Remedial Action conducted at the property is described in the following documents, which are on file at Ecology's Northwest Regional Office:

14. Letter from Ecology to Former Forest Park Cleaners, Approval of the Long-Term Groundwater Compliance Monitoring Plan, January 14, 2004.

This Restrictive Covenant is required because, following the Remedial Action, residual concentrations of vinyl chloride (VC) remain in the groundwater exceeding the MTCA Method A groundwater cleanup levels established in WAC 173-340-720.

Lake Forest Park Associates makes the following declaration as to limitations, restrictions, and uses to which the Property may be put and specifies that such declarations shall constitute covenants to run with the land, as provided by law and shall be binding on all parties and all persons claiming under them, including all current and future owners of any portion of or interest in the Property (hereafter "Owner").

Section 1. The Property contains residual concentrations of vinyl chloride (VC) in the groundwater that exceed the MTCA Method A groundwater cleanup level of 0.2 ug/l. These concentrations have been detected in the southern portion of the site as shown in Figure 1 (attached), in groundwater monitoring well FPC-9S. The Owner will conduct groundwater monitoring as described in the Long-Term Confirmational Monitoring Plan approved by Ecology.

The Owner shall not take any of the following actions without prior written approval from Ecology: remove the existing structures; alter or modify the existing structures in a way that may result in the release or exposure to the environment of the residual VC-contaminated

groundwater that was contained on the site, or create a new exposure pathway; or conduct any other activity on the Property that may result in the release or exposure to the environment of the residual VC-contaminated groundwater that was contained on site, or create a new exposure pathway. Some examples of activities that are prohibited without prior written approval from Ecology include: drilling, digging, placement of any objects or use of any equipment which deforms or stresses the surface beyond its load bearing capability, piercing the surface with a rod, spike or similar item, bulldozing or earthwork.

Section 2. No groundwater may be taken from the Property for any use.

Section 3. The Property may not be used for residential, educational, or recreational purposes, nor for day cares, nursing homes, assisted living centers, or similar facilities.

Section 4. Any activity on the Property that may interfere with the integrity of the Remedial Action and continued protection of human health and the environment is prohibited.

Section 5. Any activity on the Property that may result in the release or exposure to the environment of a hazardous substance that remains on the Property as part of the Remedial Action, or create a new exposure pathway, is prohibited without prior written approval from Ecology.

Section 6. The Owner of the property must give thirty (30) days advance written notice to Ecology of the Owner's intent to convey any interest in the Property. No conveyance of title, easement, lease, or other interest in the Property shall be consummated by the Owner without adequate and complete provision for continued monitoring of the Remedial Action as specified in the Long-Term Confirmational Monitoring Plan approved by Ecology. Within fifteen (15) days after conveying any interest in the Property, the Owner shall notify Ecology of the name, mailing address and telephone number of the person or persons who acquired the title, easement, lease, or other interest in the Property.

Section 7. The Owner must restrict leases to uses and activities consistent with the Restrictive Covenant and notify all lessees of the restrictions on the use of the Property.

Section 8. The Owner must notify and obtain approval from Ecology prior to any use of the Property that is inconsistent with the terms of this Restrictive Covenant. Ecology may approve any inconsistent use only after public notice and comment.

Section 9. The Owner shall allow authorized representatives of Ecology the right to enter

the Property at reasonable times for the purpose of evaluating the Remedial Action; to take samples, to inspect remedial actions conducted at the property, and to inspect records that are related to the Remedial Action.

Section 10. The Owner of the Property reserves the right under WAC 173-340-440(12) to record an instrument that provides that this Restrictive Covenant shall no longer limit use of the Property or be of any further force or effect. However, such an instrument may be recorded only if Ecology, after public notice and opportunity for comment, concurs.
