---

Hello Frank,

Farallon prepared the following Expedited VCP Second Quarter 2023 Progress Report on behalf of Lakeside Industries, Inc. for the Asphalt Plant Site located at 2001 Johnson Road in Centralia, Washington. The Overlake Cleaners 24th Site was assigned Expedited VCP Project ID XS0014.

- Description and status of Site characterization or cleanup work (completed during past quarter or ongoing work).

Farallon conducted a groundwater monitoring event in May 2023. Concentrations of total petroleum hydrocarbons as diesel-range organics and as oil-range organics were less than the MTCA cleanup levels. Additional quarterly groundwater monitoring events are scheduled for August and November 2023.

- A list of pending opinion requests to Ecology and expected date for next request for Ecology opinion.

No opinion requests are pending at this time.

- Summary of dates and titles of documents submitted to Ecology for review in the last quarter.

The Cleanup Action Report, dated February 28, 2023, was submitted to Ecology with the VCP application.

- Type of documents and opinion requests planned for submittal to Ecology during the next quarter.

No opinion requests are planned for the next quarter.

- Any updates to the project schedule showing the previously mentioned activities and milestones.

There were no updates to the project schedule.

- A description of schedule delays or changes from the prior quarter and reasons for those changes.

There were no schedule delays or changes from the prior quarter.

- Changes in key project team personnel.

There were no changes to key project team personnel.

- Anticipated changes at the Site, such as property ownership, changes to potential future use, new or obsolete access restrictions, or anything that could affect the cleanup.

No anticipated changes to the site are noted at this time.

Please let us know if you have any comments or questions, or require an additional information.

Regards,

***Pete Kingston, Principal Geologist***
