Subject: Question

Good morning

I was on the zoom call weds eve, and have a question that I thought might be covered in your presentation.

I'm wondering how the public could get involved in this project. I understand that comments are part of it, but is there something else?

I live on Beacon Hill, just up from Georgetown.

Thank you,
Betty Brooking

Hi Betty,

During the [Dawn Food Products](#) open public comment period (May 22 – July 5), the best ways to be involved would be by attending Ecology's May 31 outreach events (the open house and in-person/online public meeting) as well as reviewing the documents and submitting a comment. We can add you to the Lower Duwamish Waterway (LDW) email list for future public involvement updates for the area, if you want. You can also check our [LDW webpage](#) for area updates.

Would you like this question entered as a formal comment? If yes, we would include it in our response to comments document after the comment period ends.

Thanks,

Subject: Re: Question

Sure, you can enter the question as a formal comment. And I would like to be on an email list to be informed of future public involvement re: the lower Duwamish.

I tried to read the documents, but they were too challenging to read.

Thanks for your reply.

Betty

Hi Betty,

We'll get this entered as a formal comment and get you added to the LDW email list.

The documents can be quite complicated! Hopefully, the [fact sheet](#) provides a good high-level summary.

Thanks,
