

DEPARTMENT OF ECOLOGY
Toxics Cleanup Program

Memorandum

August 1, 2023

TO: TCP File for Kimberly-Clark Worldwide

FROM: Frosti Smith, Toxics Cleanup Program, Central Region Office

SUBJECT: Reorganization of Sites and Files

Ecology's Integrated Site Information System (ISIS) database listed two cleanup sites associated with a single facility. After discussion with Andy Kallus, the site manager for the Kimberly-Clark site, it was determined that the sites should be combined into a single cleanup site with two cleanup units—one unit for the wood products manufacturing and one unit for the leaking underground storage tank release.

Ecology updated the ISIS database and site files to reflect the following single cleanup site:

Kimberly-Clark Worldwide

Also known as: Kimberly Clark Tissue Co Everett, Kimberly Clark Corp, Kimberly Clark Worldwide Inc, Scott Paper Co UST 5351, Kimberly Clark Corporation, Scott Paper Co Everett

Address: 2600 Federal Ave, Everett

Facility Site ID: 9

Cleanup Site ID: 2539

UST ID: 5351

LUST ID: 426

Site Status: Cleanup Started

Unit Statuses: Kimberly-Clark Worldwide (Sediments): Cleanup Started

Kimberly-Clark Worldwide (Upland): Cleanup Started

Scott Paper Co Everett (Upland): No Further Action

The following sites and files were merged into the above site file, with corresponding IDs removed from the system:

Scott Paper Co Everett, CSID 7329
