PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Ecology

Telephone: 360-407-6121

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Wells

Source: Department of Health

Telephone: 360-236-3148

Group A and B well locations.

Water Well Listing

Source: Public Utility District

Telephone: 206-779-7656

A listing of water well locations in Kitsap County.

Ecology Well Logs

Source: Department of Ecology

Telephone: 360-407-7294

Point geodatabase with a record for each Ecology well report. Points are located by quarter quarter section centroid.

Points contain all well report types including water wells, resource protection wells, and decommissioned wells.

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Listing

Source: Department of Natural Resources

Telephone: 360-902-1450

Locations that represent oil and gas test well sites in Washington State from 1890 to present.

RADON

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Ramboll were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

SEATTLE, WA 98134
EDR Inquiry # 6213243.4

Client Name:

Ramboll
400 East Evergreen Blvd Ste 304
Vancouver, WA 98660
Contact: Devon Rowe

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Ramboll were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Sanborn® Library search results

Certification #: 55A2-45F0-9298

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Ramboll (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Revised 6/19/00
 k \asc\forms

This covenant executed this date in favor of the **City of Seattle/Grantee** (herein "City") by the undersigned **Owner(s)/Grantor** of the within/described real property (owner(s))

WITNESSETH

WHEREAS, undersigned is (are) the owner(s) of or has (have) a substantial beneficial interest in the real property addressed in the records of the Seattle Department of Construction and Land Use

as FULL LEGAL DESCRIPTION ATTACHED described in exhibit "A" (legal description) attached

and

WHEREAS, owner(s) has (have) obtained approval of land use and construction permits for the property from the City (# 2107320, 727802).

WHEREAS, the property is located in a "geologic hazard area" as defined in SMC Chapter 25 09, Regulations for Environmentally Critical Areas;

and

WHEREAS, SMC Chapter 22 800, the Stormwater, Grading and Drainage Control Code requires as a condition of the issuance of land use and construction permits that this covenant be signed, acknowledged, and recorded in the records of King county,

NOW, THEREFORE Owner(s) agree(s) as follows.

- 1 Owner(s) will inform his/her successors and assigns of the property described in Exhibit "A" that the property is in a geologic hazard area, that there may be risks associated with development thereon, of any conditions or prohibitions on development imposed by the City, and of any features in this design which will require maintenance or modification to address anticipated soils changes
- 2 Owner(s) on his/her own behalf and on behalf of his/her heirs, successors and assigns hereby waives any right to assert any claim against the City for any loss, or damage to people or property either on or off the site resulting from soil movement by reason of or arising out of issuance of the permit(s) by the City for development on the property except only for such losses that may directly result from the sole negligence of the City

20021205000086

August, 1964, pursuant to order of the Board of
County Commissioners of King County, Washington by and between
King County, a municipal corporation of the State of Washington,
as lessor, and ~~WESTERN WAREHOUSE, INC.~~, a Washington corporation,
as lessee,

WITNESSETH:

UTILITIES WAREHOUSE

Lessor does by these presents lease and demise unto lessee
the following described real estate situated in King County, Wash-
ington, to-wit:

727802

Beginning at the point of intersection of the east and
west center line of section 19, township 24 north, range 4
east, W.M., in King County, Washington, with the west
margin of Ohio Avenue as condemned by the City of Seattle
under Ordinance No. 46352, said point being 931.32 feet
south $89^{\circ}40'08''$ west from the east quarter corner of said
section 19; thence south $5^{\circ}40'09''$ west along the westerly
margin of Ohio Avenue as condemned by Ordinance 46352 for
a distance of 48.28 feet to the true point of beginning;
thence north $5^{\circ}40'09''$ east for a distance of 247.05 feet
to the point of intersection of said westerly margin of Ohio
Avenue with the southerly margin of a 20 foot wide alley
as condemned by the City of Seattle, under Ordinance No.
43273; thence north $79^{\circ}35'39''$ west along said southerly
margin for a distance of 851.09 feet to the easterly
margin of Commercial Waterway District No. 1 Duwamish
Waterway; thence south $19^{\circ}35'39''$ east, along said easterly
margin a distance of 284.28 feet; thence south $79^{\circ}35'39''$
east a distance of 729.35 feet to the true point of
beginning; ALSO

Beginning at the point of intersection of the east and
west center line of section 19, township 24 north, range
4 east, W.M., in King County, Washington, with the
westerly margin of East Marginal Way, said point being
774.59 feet south $89^{\circ}40'09''$ west from the east quarter
corner of said section 19; thence north $19^{\circ}36'23''$ west
along said westerly margin for a distance of 195.04 feet
to an intersection with the southerly margin of a 20 foot
wide alley as condemned by the City of Seattle under
Ordinance No. 43273; thence north $79^{\circ}35'39''$ west along
said southerly margin for a distance of 12.64 feet to an
intersection with the easterly margin of Ohio Avenue as
condemned by the City of Seattle under Ordinance No.
46352; thence south $5^{\circ}40'09''$ west for a distance of 187.49

20021205000086
Area = 204,599.37

591584

feet to an intersection with the east and west center line of said section 19; thence north $89^{\circ}40'08''$ east along said center line for a distance of 96.40 feet to the point of beginning, being the same property described in lease recorded January 16, 1930, under auditor's file No. 2581916.

727802

LESS THE FOLLOWING:

A portion of TL 43 in the northeast quarter of section 19, township 24 north, range 4 east, W.M., more particularly described as follows, to-wit: Beginning at the intersection of the south margin of that certain alley established by City of Seattle Ordinance No. 43273 with the east margin of Ohio Street as established by City of Seattle Ordinance No. 46352; thence easterly along the easterly production of said south margin of alley 12.7 feet, more or less, to the intersection thereof with the east line of said TL 43, said east line being also the west margin of East Marginal Way; thence southerly along said west margin 40 feet; thence westerly along a line at right angles to said west margin to the intersection of said last mentioned line with said east margin of Ohio Street; thence northerly along said east margin of Ohio Street to the point of beginning.

BILL OF SALE AND CONVEYANCE

Reference No.: 5975641
Grantor: Utilities Warehouse, a Washington partnership
Grantee: ICONCO, Inc., a Nevada corporation
Legal Description: Section 19, Twp. 24 North, Range 4 East, W.M., in King County
Tax Parcel Number: 192404-9051

Utilities Warehouse, a Washington partnership, in consideration of the sum of Four Thousand Dollars (\$4,000.00), in hand paid, does hereby grant, convey, bargain, sell, assign and deliver to ICONCO, Inc., a Nevada corporation, the following described leasehold improvements:

That certain warehouse building comprising approximately 64,800 square feet and appurtenant improvements located on the real estate legally described on Exhibit "A" attached hereto.

SUBJECT TO the rights of the County of King under a Lease recorded under King County Auditor's Recording No. 5975641, as amended.

In addition to the foregoing amount, ICONCO, Inc. agrees to pay any real estate excise tax due with respect to transfer of such leasehold improvements, and to indemnify and hold Utility Warehouse harmless from any liability therefore.

Utilities Warehouse covenants and warrants that it is the owner of the said leasehold improvements and has good, right and full authority to sell the same, and that it will warrant and defend the sale hereby made unto ICONCO, Inc., its successors and assigns, against all and every person or persons, whomsoever, lawfully claiming or to claim the same.

Dated this 27th day of May, 1999.

APPENDIX E
QUALIFICATIONS OF ENVIRONMENTAL
PROFESSIONALS

NICK WALCHUK

Principal

Nick Walchuk has 23 years of due diligence and site assessment experience in support of a diverse array of clients, including attorneys and financial institutions, small businesses and multinational corporations, as well as developers and private property owners. His broad range of experience includes the design and implementation of site characterization and remedial activities, development and evaluation of remedial cost estimates, performance of facility closure and similar evaluations, and strategic client support during negotiation with regulators, buyers/sellers, and/or third parties. He collaborates with Ramboll colleagues to evaluate vapor intrusion concerns, indoor and ambient air quality issues, and perform human health risk assessments. Nick is registered as a professional geologist in California.

EDUCATION

1996, **BA, Geology**, University of California, Berkeley, California

PROJECTS

- Serves as a regional manager of an environmental risk management program developed by Ramboll for a major real estate investment trust (REIT) containing more than 100 properties with 200 tenants throughout the western and eastern United States. Various services are provided under the umbrella of the program, including: 1) environmental site assessments; 2) soil, soil gas, and groundwater investigations conducted pursuant to property acquisition, financing, development, or divestiture; negotiations and correspondence regarding environmental matters with regulatory agencies on behalf of the client; 3) tenant environmental audits to evaluate biotechnology tenant operations and facility closure/decommissioning procedures; and 4) providing general consulting services to assist the client's risk management and construction groups regarding environmental and site development matters.
- Following management and completion of several ESAs for a prospective purchaser of properties within an area of commingled ground water contamination (chlorinated solvents) emanating from the subject site and two NPL (Superfund) sites, conducted soil, ground water, and soil gas data collection and associated evaluation and report preparation. Nick coordinated a subsequent human health risk assessment, and participated in calls and meetings between regulators, and sellers' and buyers' counsel to facilitate the implementation of land use restrictions at the sites, allowing Ramboll's client to proceed with the purchase of the site. Several years later, Mr. Walchuk assisted the same client with the sale of the property, a process which

CONTACT INFORMATION

Nick Walchuk

Ramboll
2200 Powell Street
Suite 700
Emeryville, CA 94608
United States of America

encompassed two years of strategic negotiation support involving the buyer, a third party responsible party, and state and federal environmental regulators regarding an appropriate investigative and remedial approach that could be implemented in conjunction with planned redevelopment of the site.

- Mr. Walchuk directed facility closure activities related to the closure of a former recycled paperboard mill and an adjacent paper packaging manufacturing facility. The client terminated operations at each site separately, followed by separate real estate transactions. Ramboll performed facility closure activities at each, including closure work plan preparation, environmental sampling in compliance with agency requirements and as part of seller due diligence, oversight of contractors during implementation of closure activities, interacted with regulatory agencies on the client's behalf, and prepared final completion reports for agency approval. Ramboll's work facilitated an efficient completion of the client's sale of each site soon after completion of facility closure.
- For a site impacted with chlorinated solvents that were discovered during acquisition due diligence, Mr. Walchuk directed the investigation, delineation, risk evaluation, and long term groundwater monitoring of the plume underlying the site. Following the sale of the property to a new owner that opted for a more active approach to resolving the matter, Nick directed the design and implementation of further delineation and remediation that included confirmation of plume definition to the satisfaction of the local oversight agency. Investigation methodologies included the use of membrane interface probe (MIP) technology and groundwater sampling from multiple groundwater bearing zones, and remediation included the installation of horizontal wells beneath an existing building and active soil vapor extraction to reduce contamination concentrations and risks related to vapor intrusion.
- Conducted or directed hundreds of environmental site assessments, numerous site investigations, and provided strategic support for implementation of remediation (where warranted) in combination with proposed redevelopment plans. Such projects often include considerable interaction and negotiation with local and/or state environmental regulatory agencies, and required the navigation of local regulatory programs such as the Maher Ordinance (San Francisco), voluntary cleanup programs (Santa Clara and San Mateo counties), the San Francisco Regional Water Quality Control Board's (RWQCB) Low-Threat Chlorinated Solvent Site guidance, and the state California Land Re-use and Revitalization Act (CLRRRA). As a result of work on such projects, Mr. Walchuk has established strong relationships with local city, county, and state regulators.
- For a multinational corporation at an orphan site in the San Francisco Bay Area, provided investigative and consulting services in support of regulatory case closure under the San Francisco Regional Water Quality Control Board's (RWQCB) Low-Threat Chlorinated Solvent Site guidance. The site was in long-term post-remedial monitoring status when the client took active responsibility for the site. Following development and implementation of soil gas and indoor air quality investigations and an evaluation of potential human health risks, the RWQCB rescinded the cleanup order for the site and issued case closure.
- Provides assistance to Habitat for Humanity and other non-profit organizations in support of site redevelopment for affordable housing and schools, including engagements on a pro bono basis. These projects have included environmental site assessment and reviews of historical information, evaluation of known and potential contamination concerns, site characterization and investigation including soil, soil gas, and groundwater sampling, design and implementation of remedial activities, and strategic support for state and local agency interaction prior to and during redevelopment.

DEVON ROWE

Senior Manager

Devon Rowe has more than 16 years of experience in geochemistry, hydrogeology and site assessment work. His project experience with Ramboll's Site Solutions and Due Diligence service areas has included Phase I and Phase II investigations, compliance audits, site characterization and feasibility studies, site remediation and hazardous material surveys throughout the western United States and Canada. Devon has provided litigation support for numerous projects involving geochemical data analysis, preparation and review of deposition materials, and design and maintenance of document, chemistry and GIS databases. He has authored several presentations and publications on applications of stable isotope geochemistry.

EXPERIENCE HIGHLIGHTS

Site Assessments & Characterization

- Supervision of soil gas surveys, soil boring and monitoring well installation (ground water and vapor), and development and sampling of monitoring wells throughout Southern California, Oregon and Washington. Devon has expertise supervising several drilling methods, including hollow-stem augers, direct-push ('Geoprobe'), bucket augers, mud rotary, and air rotary. He has also supervised downhole logging using traditional wireline methodology (induction, gamma ray, sonic, resistivity, etc.) and cone-penetrometer testing.
- Preparation of work plans submitted to the Regional Water Quality Control Board for Phase II Investigations at sites in Southern California. Investigations included installation of soil borings, monitoring wells, UST removal, and excavation of contaminated soil (hydrocarbons, asbestos, volatile organics).
- Managing environmental activities at several Voluntary Cleanup Program sites in Washington and Oregon. Responsibilities include ongoing project management, preparation of work plans and report submittals to the Department of Ecology/Department of Environmental Quality, and interaction with client and agency personnel.
- Evaluation of ground water geochemistry including stable isotope ratios (carbon, chlorine, chromium) to understand the occurrence of potential sources, identify attenuation processes, and evaluate potential feasibility of remedial alternatives an industrial site in southern California.

Litigation Support

Devon participated in a variety of tasks on several litigation support projects, including preliminary and in depth data analysis (hydrogeology and geochemistry), creation of document databases, conducting field investigations and preparation of a variety of reports and graphical materials for use in depositions.

Due Diligence

Assisting clients with pre-acquisition environmental due diligence at a wide range of industrial and commercial sites throughout the Pacific Northwest, including chemical manufacturing plants, aerospace manufacturing facilities, metal-working facilities, port terminals, food processing plants, distribution warehouses, retail and office spaces, biotechnology operations, and vacant land. Significant project experience related to the urban redevelopment of downtown Seattle (early 1920's era commercial/industrial properties being converted to mixed use commercial/residential use), and commercial/industrial redevelopment of agricultural/residential land in surrounding I 5 corridor. In addition, Devon has worked on several industrial sites located along the Willamette River evaluating potential upland and in-water contributions to impacts in the Portland Harbor Superfund Site. Many projects have involved interaction with state agencies (Department of Ecology, Department of Environmental Quality) to evaluate environmental risks associated with future redevelopment activities, and costs associated with site remediation.

Database Management

Created several project-specific databases to manage chemical and hydrologic data. Managed data entry and production of report tables and graphics. Familiar with design of customized reports.

AMY LANSDALE KEPHART, LG

Managing Consultant

Amy Kephart has over 14 years of professional environmental consulting experience. She has managed and performed site investigation and remediation activities at several industrial and commercial sites, and conducted numerous Phase I/II environmental site assessments (ESAs). Her experience also includes database management, geospatial analysis and visualization using EQiS, ESRI ArcGIS, and Google Earth Pro. She has also provided litigation support for several class action, civil action, and insurance recovery cases.

EXPERIENCE HIGHLIGHTS

Due Diligence

- Conducted and directed Phase I ESAs and environmental compliance audits of a variety of industrial and commercial properties, including former military aircraft maintenance hangar, manufacturing (e.g., cookware, aerospace parts, flexible food packaging, diesel engine parts), distribution, food processing, lumber processing, rock processing, energy research and development, marine construction, laboratory, medical building, warehouses, and office building sites.
- Provided environmental regulatory compliance assistance to a data center company. Conducted external audits and recommended corrective measures as part of voluntary corporate initiatives to ensure compliance with environmental regulations, including the Clean Air Act, Clean Water Act, Resource Conservation and Recovery Act (RCRA), Emergency Planning and Community Right-to-Know Act (EPCRA), Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), Safe Drinking Water Act (SDWA), and state and local regulations in Washington and Oregon. Provided recommendations to client on improving corporate policies and guidance so they are better aligned with regulatory requirements, industry best practices, available company resources, and facility-level compliance management.

Site Solutions

- Provided environmental consulting support for cleanup and redevelopment of a commercial property in San Carlos, California. Cleanup activities included excavation and removal of soils contaminated with polychlorinated biphenyls, lead, and total petroleum hydrocarbons. Additional site work will include vapor intrusion and groundwater investigations.
- Provided environmental consulting support for a multi-year soil amendment technology evaluation, which is ongoing. This program is designed to identify and field test a soil amendment technology or technologies that could appropriately and cost-effectively reduce the long-term potential for human exposure to lead in shallow soils in eastern Washington. The work is being completed in several phases and in collaboration with multiple stakeholders including the EPA and academic researchers.
- Supervised and conducted investigations and remediation to delineate petroleum hydrocarbons and volatile organic compounds in soil, groundwater, indoor air, and soil vapor at a flexible packaging facility in Washington and Oregon.

OSHA 40-Hour Hazardous
Waste Operations Training

- Conducted indoor air, sub-slab, and/or soil vapor sampling to assess potential for vapor intrusion at facilities in Washington, Oregon, California, Washington, D.C., and New Jersey.
- Conducted numerous Phase II ESAs of industrial and commercial facilities in seven states and the District of Columbia. Assessments included multimedia investigations with collection of field parameters (e.g., PID, XRF gun, etc.) and samples for analytical analysis.
- Performed field investigations for voluntary cleanup programs in three states (Pennsylvania, New Jersey, and Virginia) and under regulatory agency oversight in over six states including Washington, California, Ohio, Pennsylvania, New Jersey, Virginia and Maryland. Additionally, supervised and conducted investigation of potential impacts from petroleum underground storage tanks, including management of excavation activities, soil sampling and collaboration with client representatives and state oversight.

Litigation Support

- Provided litigation support for several class action, civil action, and insurance recovery cases including contaminant transport calculations for chlorinated solvents and petroleum components, and a critical review of site investigation documents. Additional work included deposition review, technical support for Expert Report preparation, Expert Report review and analysis, development of trial exhibits and presentations, and preparation for Expert witness' testimony.

Database Management and Visualization

- Created several project-specific databases to manage chemical and hydrologic data. Managed data entry and production of report tables and graphics.
