Subject: Contractors Daily Report for 092817

Author: Anthony Bahnick

Date Created: 09.29.2017 10:03am

INSPECTOR'S DAILY JOURNAL

Journal Entry

For: 09.28.2017

Avg. Temp. Fereinheight: 74.00

Weather: Sunny

Wind Conditions: Normal (0-20 mph)

General Notes: Continue installations of Catch Basins, Storm Drain pipe southeast section of site - encountered concrete foundation obstruction

Deliver 1-1/4" permeable ballast material for gravel cover - set grade stakes for 12" gravel cover @ survey points. Deliver 1 load of pea gravel for catch basin / storm drain pipe installation

Shope deliver Catch Basin # 5 - basin, frame/grate and riser - under change order

Delays or Issues that Affected Progress: During installation of the storm drain line between CB 2 and 3, the marked gas line stub extension was at the same elevation as the storm drain pipe - since the gas line is made of flexible piping, a section of the gas line was excavated to the stub, so that it could be lifted and set above the storm drain line to resolve the conflict

During installation of the storm drain line between CB 2 and 3, a section of concrete foundations approximately 15' wide, and extending from just below the surface to at least 5 feet deep was encountered in the excavation for the storm drain line, obstructing placement of the storm drain. Under a change order, IOEI will mobilize an excavator with demolition hammer attachment of sufficient size to demolish a section of the concrete foundation so that the storm drain line can be installed at it's designed elevation and slope.

Comments related to environmental protection issues revealed upon site observations pertinent to SWPPP.

General

Continue installations of Catch Basins, Storm Drain pipe southeast section of site

Notes:

Deliver permeable ballast material for gravel cover - place geotextile fabric and gravel cover - Parcel 2/3

Bravo Environmental utilized their Vactor Truck to conduct 2 potholes to expose known utilities within the storm drain line installation locations adjacent to Chestnut Street and Jefferson Street, respectively.

Delays or Issues that Affected Progress:

The pothole within sidewalk on Chestnut street revealed that the existing gas line and sewer line depth/orientations obstructed installation of the 12" storm drain maintaining desired slope from CB-5 to the existing catch basin on Chestnut Street. Tyson Carpenter authorized utilizing 8" - SDR-35 pipe in place of the 12" pipe per specifications/plans, such that the smaller diameter pipe could fit between the gas line (above storm drain line) and the sewer line (below the storm drain pipe), thus mitigating the obstruction. IOEI rented a trailer from HERC to pickup the pipe since HD Fowler could not deliver it in time for the scheduled installation on the following day.

Comments related to environmental protection issues revealed upon site observations pertinent to SWPPP.

The pothole within sidewalk on Chestnut street revealed that the existing gas line and sewer line depth/orientations obstructed installation of the 12" storm drain maintaining desired slope from CB-5 to the existing catch basin on Chestnut Street. Tyson Carpenter authorized utilizing 8" - SDR-35 pipe in place of the 12" pipe per specifications/plans, such that the smaller diameter pipe could fit between the gas line (above storm drain line) and the sewer line (below the storm drain pipe), thus mitigating the obstruction. IOEI rented a trailer from HERC to pickup the pipe since HD Fowler could not deliver it in time for the scheduled installation on the following day.

Notes / Other Info:

Bravo Environmental utilized their Vector Truck to conduct 2 potholes to expose known utilities within the storm drain line installation locations adjacent to Chesnut Street and Jefferson Street, respectively.
