

Legend

- Groundwater Monitoring Well
- Decommissioned Monitoring Well
- GRO Results between 800 and 2,000 µg/L
- GRO Results above 2,000 µg/L
- Approximate Direction of Groundwater Flow

Approximate Lateral Extents of Dissolved GRO Above MTCA Method A CUL

- 800 - 2,000 µg/L
- >2,000 µg/L

Notes:

1. Gasoline Range Organics results are in micrograms per liter (µg/L).
2. GRO = Gasoline Range Organics.
3. Cleanup level for GRO is 800 µg/L.
4. MW-17 was an active monitoring well at the time of sampling.
5. Not detected results are shown in concentration charts as 50 µg/L, which is one-half the lowest typical laboratory reporting limit for GRO (100 µg/L).
6. Extents of GRO impacts to groundwater are inferred based on data collected since December 2019.
7. ND = Non Detect
