Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Highlights:

(Note: Although this information was not captured from the Property Highlights section of the PPF, it was found in section 5a, Property History Information.) The Colman Building occupies the north portion of the 2200 block of East Union Street (from 22nd to 23rd Avenues) in the Capitol Hill area of Seattle. The building address is 2203 East Union Street, located in the northwest quarter of Section 33, Township 25 North, Range 4 East. The building suffered significant structural damage during the 2001 Nisqually earthquake. The vacant building was demolished in September 2004. The 24,141 sq. ft. building was constructed in 1923 on a 16,185 sq. ft. lot that covers the entire northern front of East Union Street between 22nd and 23rd streets. The property is located at an elevation of 320 feet above sea level. The northern portion of the building contained a second story. Building occupants over the years included a variety of business and retail operations. The building was heated by a fuel-oil burning furnace until 181, when the building was converted to natural gas. In 1989, the furnace underground storage tank (UST) was removed (Dames & Moore 1989). A follow-up soil removal project was performed in 1990 where additional petroleum contaminated soils were removed from the former UST excavation (MedTox 1990). The results of the confirmatory soil samples collected from the over excavated area reported concentrations of petroleum compounds below the State of Washington cleanup levels. Groundwater (gw) was encountered in the excavation at a depth of 14 feet below ground surface (bgs). The gw was not sampled or tested for petroleum. Based on the available data, additional investigation of this area was not recommended. The area of concern at the Colman Building is the former operations of Albert's Dry Cleaners from 1963-1973 (Clayton 2003a). Most likely, wastes discharged from this operation were contaminated with PCE. These wastes include both liquid and solid wastes. Liquid wastes were likely discharged to the city sanitary sewer system. Other potential liquid discharge destinations could have included the ground, storm sewers, and blind drains (where wastewater is discharged to a gravel filled pit to drain into the ground) (Linn et al. 2003). There was no evidence of blind drains at the Coleman building. Contaminated solid wastes (e.g., still bottoms, powder residues, spent filters, and lint) were likely included in the regular municipal wastes from the building. Before the existing building was removed, the plumbing at the most recent business (Ms. Helen's Soul Food) was sketched. The actual locations of the dry cleaning equipment and storage containers are not known. Photographs of the property prior to and during demolition and during the field sampling effort are available. An investigation of this property in 2003 revealed that soils beneath the former Albert's Dry Cleaners were contaminated with dry cleaning related chemicals (trichloroethene [TCE], PCE, and cis-1,2-dichloroethene [DCE])(Clayton 2003b). Subsurface soils consisted of silty sand with gravel or silty clay with s of organic debris and asphalt materials. Groundwater was encountered at 7 feet bgs. Groundwater flow is inferred to be northeasterly, consistent with the topographic gradient. Samples collected from six subsurface soil borings reported elevated concentrations of TCE, PCE, and DCE in soil and gw in selected locations. The elevated concentrations were reported in soils collected from depths of 3 to 6 feet bgs and in gw collected from a depth of 7 feet bgs. Samples were not collected from

deeper soils. The brownfields assessment collected additional soil and gw samples in the area where the former drycleaner operation was located. The brownfields investigation results reported elevated concentrations of TCE, PCE, and DCE in soil and gw at selected locations. Cleanup will be required for a limited area of soil and gw. Property Description:

Colman Bldg on N portion of 2200 block of E. Union St. Bldg structurally damaged during 2001 earthquake & demo'd 09/2004. 24,141sf bldg constructed in '23 on 16,185sf lot. Occupants included variety of bus. & retail, heated w/ fuel-oil furnace until '81 when converted to natural gas; UST removed '89. Soil removal in '90, additional petro contaminated soils removed from UST excavation. Soil samples reported concentrations of petro compounds below WA State cleanup levels. Groundwater encountered at depth of 14 ft bgs. Groundwater not sampled or tested for petro. Additional investigation of area not recommended. AOC at Colman Bldg is former dry cleaners (1963-73), likely used PCE as dry cleaning solvent, prior to RCRA. Wastes discharged probably contaminated with PCE. Liquid wastes probably discharged to sanitary sewer system. Other potential liquid discharge destinations could have included the ground, & storm sewers. No evidence of blind drains at the Colman Bldg. Contaminated solid wastes likely included in regular municipal wastes from bldg. 2003 investigation of site revealed soils beneath former dry cleaners contaminated w/ dry cleaning related chemicals. Subsurface soils consisted of silty sand w/ gravel or silty clay w/ layers of organic debris & asphalt materials. Groundwater encountered at 7 ft bgs. G/W flow inferred to be northeasterly, consistent w/ topographic gradient. Samples collected from 6 subsurface soil borings reported elevated concentrations of TCE, PCE, and DCE in soil & g/w in selected locations. Elevated concentrations reported in soils collected from 3-6 feet bgs & in g/w collected at 7 bgs. BF assessment collected additional soil & groundwater samples in area of former drycleaner & reported elevated concentrations of TCE, PCE, and DCE in soil & groundwater at selected locations. Cleanup will be required for a limited area of soil & g/w. Presently, parcel is cleared & surface is unpaved. Lot is temporarily fenced with chain link.

Property Description: Colman Bldg on N portion of 2200 block of E. Union St. Bldg structurally damaged during 2001 earthquake & demo'd 09/2004. 24,141sf bldg constructed in '23 on 16,185sf lot. Occupants included variety of bus. & retail, heated w/ fuel-oil furnace until '81 when converted to natural gas; UST removed '89. Soil removal in '90, additional petro contaminated soils removed from UST excavation. Soil samples reported concentrations of petro compounds below WA State cleanup levels. Groundwater encountered at depth of 14 ft bgs. Groundwater not sampled or tested for petro. Additional investigation of area not recommended. AOC at Colman Bldg is former dry cleaners (1963-73), likely used PCE as dry cleaning solvent, prior to RCRA. Wastes discharged probably contaminated with PCE. Liquid wastes probably discharged to sanitary sewer system. Other potential liquid discharge destinations could have included the ground, & storm sewers. No evidence of blind drains at the Colman Bldg. Contaminated solid wastes likely included in regular municipal wastes from bldg. 2003 investigation of site revealed soils beneath former dry cleaners contaminated w/ dry cleaning related chemicals. Subsurface soils consisted of silty sand w/ gravel or silty clay w/ layers of organic debris & asphalt materials. Groundwater encountered at 7 ft bgs. G/W flow inferred to be northeasterly, consistent w/ topographic gradient. Samples collected from 6 subsurface soil borings reported elevated concentrations of TCE, PCE, and DCE in soil & g/w in selected locations. Elevated concentrations reported in soils collected from 3-6 feet bgs & in g/w collected at 7 bgs. BF assessment collected additional soil & groundwater samples in area of former drycleaner & reported elevated concentrations of TCE, PCE, and DCE in soil & groundwater at selected locations. Cleanup will be required for a limited area of soil & g/w. Presently, parcel is cleared & surface is unpaved. Lot is temporarily fenced with chain link.

of the 2200 block of East Union Street (from 22nd to 23rd Avenues) in the Capitol Hill area of Seattle. The building address is 2203 East Union Street, located in the northwest quarter of Section 33, Township 25 North, Range 4 East. The building suffered significant structural damage during the 2001 Nisqually earthquake. The vacant building was demolished in September 2004. The 24,141 sq. ft. building was constructed in 1923 on a 16,185 sq. ft. lot that covers the entire northern front of East Union Street between 22nd and 23rd streets. The property is located at an elevation of 320 feet above sea level. The northern portion of the building contained a second story. Building occupants over the years included a variety of business and retail operations. The building was heated by a fuel-oil burning furnace until 181, when the building was converted to natural gas. In 1989, the furnace underground storage tank (UST) was removed (Dames & Moore 1989). A follow-up soil removal project was performed in 1990 where additional petroleum contaminated soils were removed from the former UST excavation (MedTox 1990). The results of the confirmatory soil samples collected from the over excavated area reported concentrations of petroleum compounds below the State of Washington cleanup levels. Groundwater (gw) was encountered in the excavation at a depth of 14 feet below ground surface (bgs). The gw was not sampled or tested for petroleum. Based on the available data, additional investigation of this area was not recommended. The area of concern at the Colman Building is the former operations of Albert's Dry Cleaners from 1963-1973 (Clayton 2003a). Most likely, wastes discharged from this operation were contaminated with PCE. These wastes include both liquid and solid wastes. Liquid wastes were likely discharged to the city sanitary sewer system. Other potential liquid discharge destinations could have included the ground, storm sewers, and blind drains (where wastewater is discharged to a gravel filled pit to drain into the ground) (Linn et al. 2003). There was no evidence of blind drains at the Coleman building. Contaminated solid wastes (e.g., still bottoms, powder residues, spent filters, and lint) were likely included in the regular municipal wastes from the building. Before the existing building was removed, the plumbing at the most recent business (Ms. Helen's Soul Food) was sketched. The actual locations of the dry cleaning equipment and storage containers are not known. Photographs of the property prior to and during demolition and during the field sampling effort are available. An investigation of this property in 2003 revealed that soils beneath the former Albert's Dry Cleaners were contaminated with dry cleaning related chemicals (trichloroethene [TCE], PCE, and cis-1,2-dichloroethene [DCE])(Clayton 2003b). Subsurface soils consisted of silty sand with gravel or silty clay with s of organic debris and asphalt materials. Groundwater was encountered at 7 feet bgs. Groundwater flow is inferred to be northeasterly, consistent with the topographic gradient. Samples collected from six subsurface soil borings reported elevated concentrations of TCE, PCE, and DCE in soil and gw in selected locations. The elevated concentrations were reported in soils collected from depths of 3 to 6 feet bgs and in gw collected from a depth of 7 feet bgs. Samples were not collected from deeper soils. The brownfields assessment collected additional soil and gw samples in the area where the former drycleaner operation was located. The brownfields investigation results reported elevated concentrations of TCE, PCE, and DCE in soil and gw at selected locations. Cleanup will be required for a limited area of soil and gw. natural gas; UST removed '89. Soil removal in '90, additional petro contaminated soils removed from UST excavation. Soil samples reported concentrations of petro compounds below WA State cleanup levels. Groundwater encountered at depth of 14 ft bgs. Groundwater not sampled or tested for petro. Additional investigation of area not recommended. AOC at Colman Bldg is former dry cleaners (1963-73), likely used PCE as dry cleaning solvent, prior to RCRA. Wastes discharged probably contaminated with PCE. Liquid wastes probably discharged to sanitary sewer system. Other potential liquid discharge destinations could have included the ground, & storm sewers. No evidence of blind drains at the Colman Bldg. Contaminated solid wastes likely included in regular municipal wastes from bldg. 2003 investigation of site revealed soils beneath former dry cleaners contaminated w/ dry cleaning related chemicals. Subsurface soils consisted of silty sand w/ gravel or silty clay w/ layers of organic debris & asphalt materials. Groundwater encountered at 7 ft bgs. G/W flow inferred to be northeasterly, consistent w/ topographic gradient. Samples collected from 6 subsurface soil borings reported elevated concentrations of TCE, PCE, and DCE in soil & g/w in selected locations. Elevated concentrations reported in soils collected from 3-6 feet bgs & in g/w collected at 7 bgs. BF assessment collected additional soil & groundwater samples in area of former drycleaner & reported elevated concentrations of TCE, PCE, and DCE in soil & groundwater at selected locations. Cleanup will be required for a limited area of soil & g/w. Presently, parcel is cleared & surface is unpaved. Lot is temporarily fenced with chain link.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

US EPA Assessment, Cleanup and Redevelopment Exchange System (ACRES) is an federal online database for Brownfields Grantees to electronically submit data directly to EPA.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit

Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:
 Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Waste Description:	SELENIUM
Waste Code:	D011
Waste Description:	SILVER
Waste Code:	D022
Waste Description:	CHLOROFORM
Waste Code:	D024
Waste Description:	M-CRESOL
Waste Code:	D035
Waste Description:	METHYL ETHYL KETONE
Waste Code:	F002
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F005
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	P012
Waste Description:	ARSENIC OXIDE AS2O3 (OR) ARSENIC TRIOXIDE
Waste Code:	U002
Waste Description:	2-PROPANONE (I) (OR) ACETONE (I)
Waste Code:	U010
Waste Description:	AZIRINO [2',3':3,4]PYRROLO[1,2-A]INDOLE-4,7-DIONE,

6-AMINO-8-[[AMINOCARBONYLOXY]METHYL]-1,1A,2,8,8A,8B-HEXAHYDRO-8A-MET
HOXY-5-METHYL-, [1AS-(1AALPHA, 8BETA, 8AALPHA, 8BALPHA)]- (OR)
MITOMYCIN C

Waste Code: U044
Waste Description: CHLOROFORM (OR) METHANE, TRICHLORO-

Waste Code: U058
Waste Description: 2H-1,3,2-OXAZAPHOSPHORIN-2-AMINE, N,N-BIS(2-CHLOROETHYL)TETRAHYDRO-,
2-OXIDE (OR) CYCLOPHOSPHAMIDE

Waste Code: U059
Waste Description: 5,12-NAPHTHACENEDIONE,
8-ACETYL-10-[(3-AMINO-2,3,6-TRIDEOXY)-ALPHA-L-LYXO-HEXOPYRANOSYL]OXY]-
7,8,9,10-TETRAHYDRO-6,8,11-TRIHYDROXY-1-METHOXY-, (8S-CIS)- (OR)
DAUNOMYCIN

Waste Code: U115
Waste Description: ETHYLENE OXIDE (I,T) (OR) OXIRANE (I,T)

Waste Code: U122
Waste Description: FORMALDEHYDE

Waste Code: U150
Waste Description: L-PHENYLALANINE, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) MELPHALAN

Waste Code: U154
Waste Description: METHANOL (I) (OR) METHYL ALCOHOL (I)

Waste Code: U188
Waste Description: PHENOL

Waste Code: U206
Waste Description: D-GLUCOSE, 2-DEOXY-2-[(METHYLNITROSOAMINO)-CARBONYLAMINO]- (OR)
GLUCOPYRANOSE, 2-DEOXY-2-(3-METHYL-3-NITROSOUREIDO)-,D- (OR)
STREPTOZOTOCIN

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

AIR MINOR

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:
 Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110005373611

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.
