PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Ecology

Telephone: 360-407-6121

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

| • Ecology Contract HAR027 | | |
| ARCO 5544 – CSID 10741 | MIC J14F4300 | MIC J14F4 |
| • Ecology Contract HAR028 | | |
| ARCO 5363 – CSID 10930 | MIC J14F5300 | MIC J14F5 |
| • Ecology Contract HAR029 | | |

You are correct, your time in Central Records (CR) will be limited to 8am-2pm

I will alert Central Records of the day/date and your staff name(s) for the day of document review

In advance, I will go to CR and pull the files and prepare them for your review.

My only day in the office is Wednesdays 7-noon, and I would like to meet your staff and escort them to CR, and be available for questions.

Wednesday March 1, 2023, works for me.

When your staff arrives at my office, just give me a call using my cell# below so I can come down and escort them to CR

Subject: RE: Discussion about consultant

Hi Dale,

We are getting the EDRs for each project site this week. For the FOIA request for public records, I am wondering if we need to submit a formal request through the Ecology website or is this email chain sufficient? We can go through the website if needed.

I checked in with our team and we were going to have one or two people review and scan the hard copy reports. I understand that we have Wed (8a-2p) only to conduct this review. We can be at Ecology starting March 1st. Please let me know if this works or if we need to push out further.

Thanks,
Angie

Mike
Below will be the procedure for your staff reviewing documents in central records for sites under the Tier 1 contracts. I will need the name of who will be reviewing the documents.
Also, they should work with me to schedule for Wednesdays, as that is my normal in-office day.
8am-2pm

Subject: Discussion about consultant

Hi Dale,
I just want to verify that TCP has hired a consultant to look at 4 LUST sites.
So the process will be: You pull the files and place them on our review table with the consultants name on them. You set up a review time – Mon – Thurs 8-2 the person will need to be done by 2 as we all leave by 2:30. If you are in the office you can escort them out or we will. Also let them know that phone service is nill in our room 😞 It is also ok for them to scan.

Sally

Subject: Historic Designation for 5 Properties

External Email

Hi Michael,

I thought to reach out to you since you helped me last time, but please let me know if I should go through a different party.

I am looking into five properties to see if they are registered as historic. I checked on WISAARD and 4 of the 5 properties (listed below) did not have data regarding if they were placed on the historic preservation list. I am assuming not, but I wanted to get confirmation.

The 2nd property on Pacific Hwy had a “no determination” symbol on the WISAARD map.

The five properties are:

1. 401 Park Ave N, Renton, 98055 – Not listed, not inventoried, not 50 years old
2. 2200 4th Ave S, Seattle, 98134 – Not listed, Not inventoried, not 50 years old
3. 665 23rd Ave, Seattle, 98122 – Not listed, Not inventoried, not 50 years old
4. 13310 Interurban Ave S Tukwila, 98168 – Not listed, Not inventoried, not 50 years old
5. 13138 Interurban Ave S Tukwila, 98168 – Not listed, Not inventoried, not 50 years old

Any help would be greatly appreciated!

Thanks,
Angie

APPENDIX E
User Questionnaire

User Responsibilities Questionnaire

All Appropriate Inquiries Under ASTM E1527-13

Date: 10 March 2023

Subject Property Name: ARCO 5445

Address: 665 23rd Avenue Seattle, Washington

Prepared By: Dale Myers

In order to qualify for one of the Landowner Liability Protections (LLP) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the “Brownfields Amendments”), the user must conduct “All Appropriate Inquiry” (AAI), which includes consideration of the following information (if available). Though it is not required that this information be provided to the environmental professional for the completion of the ASTM E1527-13 Phase I Environmental Site Assessment, failure of the user to consider this information could result in a determination that AAI is not complete.

(1.) **Environmental cleanup liens that are filed or recorded against the Subject Property (40 CFR 312.25).**

Are you aware of any environmental cleanup laws against the Subject Property that are filed or recorded under federal, tribal, state, or local law? If yes, give a description and attach copies of the liens.

- **None**

(2.) **Activity and land use limitations that are in place on the Subject Property or that have been filed or recorded in a registry (40 CFR 312.26).**

Are you aware of any Activity and Use Limitations (AUL), such as engineering controls, land use restrictions or institutional controls that are in place at the Subject Property or have been filed or recorded in a registry under federal, tribal, state, or local law?

- **None**

(3.) **Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).**

As the user of this Phase I Environmental Site Assessment do you have any specialized knowledge or experience related to the Subject Property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the Subject Property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

- **Ecology is not involved with the business operations of the property, and does not conduct retail gasoline sales.**
- **My specialized knowledge of the site only deals with my review of Ecology’s site documents for the site.**

(4.) **Relationship of the purchase price to the fair market value of the Subject Property if it were not contaminated (40 CFR 312.29).**

Does the purchase price being paid for this Subject Property reasonably reflect the market value of the Subject Property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Subject Property?

- **None**

(5.) Commonly known or reasonably ascertainable information about the Subject Property (40 CFR 312.30).

Are you aware of commonly known, or reasonably ascertainable information about the Subject Property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

- (a.) Do you know the past uses of the Subject Property?
Historic gasoline retail sales

- (b.) Do you know the specific chemicals that are present or once were present at the Subject Property?
Gasoline range petroleum hydrocarbons and BYEX

- (c.) Do you know of spills or other chemical releases that have taken place at the Subject Property?
Ecology has confirmed that a release of Gasoline range petroleum hydrocarbons and BYEX has occurred at the site

- (d.) Do you know of any environmental cleanups that have taken place at the Subject Property?
There has been some cleanup and remedial investigations performed at the site

(6.) The degree of obviousness of the presence or likely presence of contamination at the Subject Property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

As the user of this Phase I Environmental Site Assessment, based on your knowledge and experience related to the Subject Property are there any obvious indicators that point to the presence or likely presence of contamination at the Subject Property?

Ecology has confirmed that a release of Gasoline range petroleum hydrocarbons and BYEX has occurred at the site
