Time: _____ pm

Phone No: 861-6000

Call To: _____

Subject: Unocal Sta # 5919

Summary: Free product found in MW 1 =

1.4' - other wells did not have free product
and were sampled - awaiting results. This is
the first time consultant has been out since
finishing report dated 10/29/90.

Tanks were replaced in 1989 and some
contamination was left in W, H tank
areas and under sta. bldg. Sampling
in report of 10/29/90 did not indicate
any further problem, $\therefore$ free product is
more recent.

Unocal told consultant they intend to
test tanks this week.
