

Serving the Northwest's commercial excavation needs since 1969.

To whom it may concern:

I, Ken Leingang, the owner of Leingang Excavating was contracted in late 1989 through 1990 to excavate, remove and replace contaminated soil from Mobile Fleet Service Inc. The owner at the time was Delmar Edler who contracted to PLSA engineering for the clean-up of the contamination from two underground tanks along with the tanks being removed, new soil was brought in. We estimate about 250 to 300 yards were removed and replaced. The tanks were taken to Chicago Junk in Yakima and the stock-piled soil was taken to the Anderson Pit in Yakima on West Summitview Avenue. This was the location in which contaminated soils were taken at the time referenced.

I have discussed this with the current owner of subject property at 2003 East Viola in Yakima, Delmar Edler's son, Doug Edler.

Ken Leingang
