Ms. Wooten and Mr. Nye,

Stantec Consulting Services Inc. (Stantec), formerly Cardno, is the designated environmental consultant for Former Mobil Station 99D9T (Cleanup Site ID7601). On October 1, 2021, at the request of ExxonMobil Environmental and Property Solutions, on behalf of ExxonMobil Oil Corporation (ExxonMobil), Cardno's *Confirmation Boring and Statistical Evaluation Report* was submitted to the Washington State Department of Ecology (Ecology). The report and request for a No Further Action (NFA) determination was provided to Mr. Roger Nye, the assigned Voluntary Cleanup Program (VCP) project manager for the site (VCP ID NW3253). In the two years that has passed since the formal request for NFA, Stantec has repeatedly inquired with Mr. Nye on the status of the opinion from Ecology via phone and email communication. Each time, Stantec has been informed that Ecology intends to issue an NFA letter. Most recently, Stantec was informed by Mr. Nye that he intended to issue the NFA letter prior to his retirement.

Ecology's goal to provide written opinions in the VCP is within 90 days. ExxonMobil and the Property Owner have been exhaustingly patient. Stantec, on behalf of ExxonMobil, is requesting that Ecology provide an update on the issuance of a written opinion that no further action is necessary for the Site.

Please contact Mr. Bobby Thompson, Stantec Project Manager for this Site, at (206) 510-5855, or Mr. Jeff Johnson, ExxonMobil Project Manager for this Site, at (815) 860-7290 with questions.
