Subject: Chevron Queen Anne 211577 - Status Update_01102024

Hi Jing,

On behalf of Chevron Environmental Management Company (CEMC), the following is a progress update for the former Texaco (Chevron site 211577) ("Queen Anne") located at 631 Queen Anne Avenue North in Seattle, Washington. This update satisfies the requirements of Agreed Order No. DE 16537 associated with the site which indicates that quarterly progress reports be submitted to the Washington State Department of Ecology by the 10th of the month following the reporting period. This update summarizes activities completed from October 1 through December 31, 2023.

Description of Actions Taken to Comply with Agreed Order

- Groundwater samples were collected from new and existing wells December 27-30
- Despite repeated attempts to negotiate access agreements, and despite requests for access from Ecology, Arcadis and CEMC have not been able to secure access to the following properties:
 - 601 Queen Anne Avenue North
 - 119 W Roy Street

Summary of Deviations from Approved Work Plans

No deviations from the approved work plan were encountered during this quarter.

Description of Work Planned for First Quarter 2024 Reporting Period

- Given the continued access agreement delays, we are considering moving forward with the work at Bank of America. As previously communicated, we are also looking into potential alternative well locations.
- Arcadis will prepare and submit a summary of completed well installation, soil data results, and groundwater monitoring results in January 2024
- Arcadis will schedule the second mobilization, pending access agreements or agreement with Ecology on alternative locations, to install additional wells as proposed in the RIWP. Specific dates will be provided once the work is scheduled.
- Arcadis will conduct a 1Q 2024 groundwater monitoring event
- Arcadis will continue to prepare and submit quarterly updates to Ecology via email.

Please let me know if you have any questions.

Thank you,

-Ada
