Ecology Site No.: 51332889
VCP ID No.: NW 2270

Dear Ms. Liu,

Enclosed, please find an Additional Site Characterization Report for the above referenced property. This report presents additional data to delineate the extent of impact to groundwater beneath the site, and is intended to supplement the information previously submitted to Ecology with the Voluntary Cleanup Program application for this site. Please let me know if you have any questions, or need further information.

As we discussed in our recent brief telephone conversation, a sale of the property is pending. To facilitate the real estate transaction, we want to develop a work plan that describes the expected tasks to be performed under MTCA to obtain a No Further Action designation from Ecology. Brunswick Corporation, the current owner of the site, would like to request a meeting via teleconference with you to discuss site conditions and proposed future actions. Please let me know as soon as possible when you will be able to review all of the submitted data for the site, and when it might be possible to schedule a meeting.

Thank you in advance for your assistance. We look forward to working with you to address the environmental concerns at this site.
