Dale, here is the email I sent a couple of weeks ago. We will be submitting permit information to the City of Seattle. The city may need verification that you have received this material. In the mean time, we are not requesting any review letters. If anything comes up from your end, we would like to be brought up to date. Otherwise, we will continue down the road outlined in the interim action report we submitted.

I will have you be a cc for the Geotechnical Report.

**Subject:** Hogan's Corner

Dale,

In order to proceed with the interim action for Hogan's Corner, we need to get permits from the city of Seattle. One of the requirements of the city is that we demonstrate that Ecology is in the loop and knows of the plume and the plans. I think an email from you that you have received the draft interim action plan and have no objections is all we may need at this time. If you want to avoid any opinions at all, then just a simple email that you have received the draft interim action plan may be sufficient. We will keep you informed of our progress.

Thanks for your assistance.
