DETERMINATION OF NONSIGNIFICANCE

Page 2 of 2

**ENTER DATE**

The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is not required under RCW 43.21C.030 (2)(c). This decision was made after review of a completed environmental checklist and other information on file with the lead agency. This information is available to the public on request. This is available at: [Hexcel Corp Structures - \(2624\) \(wa.gov\)](#)

This determination is based on the following findings and conclusions:

The Cleanup Action Plan (CAP) specifies the remedy for the non-source/residual contamination portions of Kent cleanup site. Ecology previously selected a remedy for the source area at BSB Diversified that has been already been implemented. This CAP specifies a remedy for the remediation of residual vinyl chloride in groundwater beneath the Hexcel Plant 1 facility. The selected remedy consists of monitored natural attenuation with a contingency for supplemental Enhanced In Situ Bioremediation. The CAP has been developed in accordance with the Model Toxics Control Act (MTCA) under Chapter 70.105D of the Revised Code of Washington (RCW) and Chapter 173 340 of the Washington Administrative Code (WAC).

The comment period for this DNS corresponds with the comment period on 08/26/2024 which will end on 09/25/2024.
