Ankur and Aditi Sood Whitty's LLC 672 South Main Street Colville, Washington 99114 aksood1@hotmail.com

SUBJECT: HISTORICAL SITE REVIEW

WHITTEN OIL #1

 $370~W.~5^{TH}$  AVENUE, COLVILLE, WA 99114 TETRA TECH PROJECT NO. 117-272135-24001

Dear Mr. Sood:

At the request of Whitty's LLC, Tetra Tech, Inc. (Tetra Tech) has completed a limited historical site review surrounding petroleum releases at the Whitten Oil #1 facility, an approximately 1.4-acre site consisting of a convenience store, a car wash, an RV dump, and a fueling station that is located at 370 W. 5<sup>th</sup> Avenue (also State Highway 395), in the northern downtown portion of the City of Colville, in Stevens County, in eastern Washington State 99114 (the site, property, or subject property). The purpose of this investigation is to gain an understanding of known and/or suspected releases at the site that can assist with further investigation and remediation. Please see **Figures** in **Attachment A**.

This historical site review includes completing a detailed site reconnaissance; acquisition and review of public records available from the Colville Building Department, Spokane Public Library (Northwest Room), Washington Department of Ecology (Ecology), Colville Fire Department, Stevens County Historical Society, and Environmental Data Resources (EDR, a Tetra Tech subcontractor); interviews with site personnel, and completion of a letter report. This work was completed from April through August of 2024. The results of our review are presented herein.

This report has been divided into the following sections:

- 1) General Site Information
- 2) Physical Setting
- 3) Historical Uses
- 4) Records Review and Releases
- 5) Site Reconnaissance
- 6) Conclusions and Recommendations

# 1. GENERAL SITE INFORMATION

The subject property is known as Whitten Oil #1, a bulk fuel storage, carwash, and convenience store facility situated along West 5<sup>th</sup> Avenue, a main thoroughfare in the northern portion of the City of Colville. The site occupies frontage along the 300 block of the northern side of busy West 5<sup>th</sup> Avenue, which is also a portion of Highway 395 (Business) that runs generally north and then west through Colville. The site includes six (6) lots that total about 1.4 acres in area (see **Tables 1 & 2**, below).

Table 1. Site Location and Description

Site Name	Whitten Oil #1 or Whitty's Chevron
<b>Ecology Site Notification ID</b>	7372
Ecology Cleanup Site ID	9440
Ecology Facility ID	49354234
Prime Address	370 West 5th Avenue, Colville, WA 99114
Lots and Size	6 lots comprising about 1.4 acres (see <b>Table 2</b> below)
Section / Township / Range	SW $\frac{1}{4}$ of NW $\frac{1}{4}$ , Section 9, Township 35 North and Range 39 East of the
	Willamette Meridian
Lat/Long	48° 32′ 56.45″ N, 117° 54′ 34.39″ W
Abbreviated Legal Desc.	Portions of Blk 2, Hammond's Add. and Blk 2, Spokane Add. to the City of Colville
Cross Streets	Site is bounded by N. Lincoln Street to west, N. Washington Street to east, W. 6 <sup>th</sup>
	Avenue to North, W. 5 <sup>th</sup> Avenue to South.
Zoning	General Commercial
Current Ownership	Mr. Ankur Sood
Improvements	Convenience Store ('97), Carwash ('87), Pump Islands (Var), Warehouse ('96).
Current Use	Whitty's Chevron (fueling station, convenience store, car wash)
Past Use	Fueling station, store, car wash, pump sales facility, other

The subject property currently includes six (6) parcels of real estate that comprise the subject block, which consists of portions of Block 2 of Hammond's Addition and Block 2 of Spokane Addition. The central portion of the site historically included petroleum storage and a service station, while west and east portions of the block had other owners and uses. Property on the west side of the site appears used as cabins in the 1940s and later as a triplex in the 1960s and 70s. Property to the east was once Fogle Pump, and now, after having been acquired in 2017, the area supports storage buildings and another pump island. Today the entire site supports uses as a fueling station, carwash, and convenience store. Please see **Table 2** below for parcel description details. The history of the site as uncovered through this records review process is documented further below.

Table 2. Parcel Description Details

County Parcel#	Approx. Location	Legal Description	Acres	Address	Buildings + (Yr Built)
0070900	Westernmost	COLVILLE HAMMOND'S LOTS 7-12 BLK 2	0.5372	380 W. 5 <sup>th</sup> Ave	Carwash (1987)
0070700	North Center	COLVILLE HAMMOND'S LOTS 4-6 BLK 2, Is S 100'	0.124	Not listed	Pump Island & UST (?)

<sup>\*</sup> Apparent error

### 2. PHYSICAL SETTING

The subject property rests within the historic northern end of downtown Colville. Colville rests at the junction of US Highway 395 and Washington State Highway 20. Colville is known as a mountain town, resting at the base of Colville Mountain to the north. The town rests at roughly 1,635 above mean sea level (AMSL). Colville has a population of about 5,000 residents.

Colville rests within the Colville-Chamokane Valley, which extends northward from the Spokane River in the southern part of Stevens County, to beyond Colville. From Colville the valley turns northwesterly to join the Columbia River Valley a few miles northeast of the old town of Marcus. The Colville-Chamokane Valley is generally flat-bottomed, north-south oriented, and ranges from one to three miles in width. The valley floor is made up of water-lain deposits of considerable thickness throughout its length. The sides of the valley slope gradually and appear weathered. The surrounding area is mountainous, with many peaks nearing 5,000 feet in elevation. Mining and timber production have been principal industries through Colville's history.

The subject Whitty's LLC property is located approximately 0.75 miles east of the meandering Colville River, which rests in a flat meadow where numerous historical oxbows demarcate prior pathways of the river. Between the site and the river is the approximately 100-acre Vaagen Bros Lumber Mill, which is the most prominent feature on the northern end of town.

According to the 1982 United States Soil Conservation Service Soil Survey of Stevens County (SCS; now the Natural Resources Conservation Service or NRCS), the local climate includes warm summers; hot in the valleys and cooler in mountains. Winters are cold in the mountains, but valleys are often colder than mountains because of cold air drainage. Average seasonal snowfall is 47 inches, and the average precipitation annually is about 18 inches. The average temperature in winter is 28 degrees F, the average summer temperature is 65 degrees F, and the average temperature overall is about 46 F. The average frost-free season is 100-125 days.

Soil on the subject property and vicinity is #59 – Colville silt loam, drained. This very deep, artificially drained soil rests on bottomlands. It formed in mixed alluvium. Slope is 0 to 3 percent. The native vegetation is water-tolerant (possibly hydrophytic) grasses, forbs, and shrubs. Typically, the surface layer is dark gray calcareous silt loam about 17 inches thick. The subsoil is mottled gray calcareous silty clay loam about 10 inches thick. The upper part of the substratum is mottled light gray calcareous silty clay loam about 27 inches thick. The lower part of the substratum is mottled, white silt loam to a depth of 60 inches or more. The permeability of this soil is moderately slow, and the available water capacity is very high. The effective rooting depth is limited by a high seasonal water table that is at a depth of just 2 to 4 feet during the months of February to June. Soil is subject to occasional flooding for long periods

during the months of February to May (SCS 1982). Historical accounts of the area suggest the vicinity of the subject property was likely artificially drained.

According to one prior report of the subject property, there is an average thickness of five feet of fill material across the subject property, below which rests native clay soils. The depth to the water table is shallow – roughly five feet on average. The direction of groundwater flow appears to be westerly or northwest (Delta 1990).

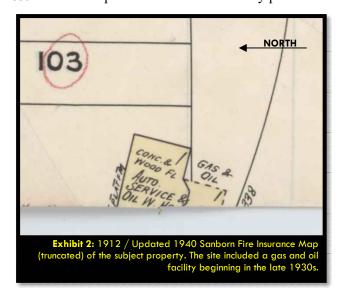

# 3. HISTORICAL USES AND RELEASES

The historical uses of the subject property were investigated back from the late 1930s through the current timeframe. Many resources used to document historical uses onsite are presented in **Appendix B** and **Appendix C**.

In 1825, the original Fort Colvile (the original spelling) was built near Kettle Falls a few miles west of the town of Colville (current and later spelling). By the 1840s, the Hudson's Bay company was processing thousands of local furs when the Canadian / American boundary was drawn at the 49<sup>th</sup> parallel. In 1853, the territory of Washington was established, and in 1859 the War Department ordered a military post built

just northeast of the present townsite. The post was called Harney's Depot at first, and later Fort Colville, which leads to confusion as there were two Fort Colvile/Colvilles. The town of Colville was later founded in 1882, after Fort Colville to the northeast of town was abandoned in favor of Fort Spokane to the south.

A 1929 USGS topographic map depicts the town plat of Colville with the subject property on its western or northwestern edge, proximal to a primary thoroughfare The north-south path of the Great Northern Railroad rests approximately 1,000 feet further west from the subject property at the time. Just northeast of the subject property at the time were numerous prominent homes.

Historic Sanborn Fire Insurance Maps (Sanborns),

historic Metsker's maps (Metsker's), and old USGS topographic maps suggest the subject property was likely a series of vacant lots from the earliest days of Colville (1850s) through the early 1900s. Sanborn Maps updated in 1940 also suggest a gasoline service station first appeared onsite during the 1930s (**See Exhibit 1**). On the map, an auto service & oil warehouse is depicted along the southwestern edge of the W. 5<sup>th</sup> Avenue curve.

The subject property was apparently built in the late 1930s as a bulk fuel plant and service station that supplied bulk fuel locally and supplied fuel for automobiles. A prior Site Hazard Assessment (SHA) report issued by Ecology indicates the site operated as a bulk fuel storage facility beginning in 1933 (Ecology 2013).

Records suggest the site was first constructed as a Signal Oil facility in the 1930s, where petroleum was stored in multiple tanks, some of which may have been aboveground. Also, several underground tanks served fuel from a dispenser along W. 5<sup>th</sup> Avenue. At the time, W. 5<sup>th</sup> Avenue was also known as the Colville – Kettle Falls Highway. Early on the facility occupied only the northern portion of Lots 4, 5, and 6 of Block 2 of the Hammond Addition. Records suggest the station and facility was apparently first operated and owned by Mr. Roy Inman.

<u>Historic Newspaper Archives.</u> The following is a chronology of site uses and events found within newspaper archives dating from the 1940s through the 1970s. Some of this information has been supplemented by other historical records to provide context:

- Spokane Daily Chronicle May 16, 1940. Mr. Roy Inman relinquishes interest in Western Auto Supply Store to devote *entire time* to Signal Oil Station onsite.
- Spokane Daily Chronicle May 23, 1941. Mr. Inman of Signal Oil Company Distribution made application for a permit to construct a 30-foot by 50-foot storage warehouse adjoining his station.
- Spokane Daily Chronicle August 3, 1942. Mr. Inman, an agent of Signal Oil goes to Yukon to support construction of Alaska Highway. Mr. Inman takes his 1,000-gallon fuel truck to Seattle to embark for White Horse. Turns distribution accounts over to Mr. George Oakshott, who is the local Standard Oil Distributor. Inman's service station on West Fifth will be operated by Mrs. Inman and their daughters.
- Spokane Daily Chronicle May 22, 1944. Mr. Carroll Whitten Sr. resigns as Shop Foreman for Scott Chevrolet to open Colville Service Station at E. Second Avenue and Main Street (not the site). This is provided for context; Mr. Whitten's son reportedly purchased the subject property later in 1973.
- Spokane Daily Chronicle May 3, 1946. Mr. Inman and sons completed a new building at Signal Service Station. Allis-Chalmers Farm Equipment and Sales is part of building.
- **Spokane Daily Chronicle October 7, 1949.** Original operator of the site Mr. Roy Inman passed on. He was regarded as a notable agent of Signal Oil.
- Spokesman Review December 10, 1949. A fire started by a hot exhaust pipe spread to the Standard Oil Company pumphouse and warehouse, which is suspected to rest about 850 feet west of the subject property. Mr. George Oakshott Sr. was plant manager. The volunteer fire department kept the oil and gasoline-fed fire from spreading to five large storage tanks in the warehouse area. The driver of the

truck, Mr. George Oakshott Jr., jumped from the blazing truck, escaping injury. The elder Oakshott quickly turned off the oil feed lines and called firemen. Exploding oil and gasoline drums in the warehouse kept firemen at a distance, but they were able to get control long range. Local historians suggest the fire occurred onsite; however, after significant further review, the location appears to be southwest at 555 N. Louis Perras Road, which may be the old Standard Oil bulk plant 850 feet west. This article is included for context.

• City of Colville – 1950. During this timeframe, records suggest the City of Colville passed an ordinance making it unlawful to unload or empty into storage tanks or other receptacles, above or below ground, bulk gasoline from any truck carrying or transporting a quantity greater than 1,500

gallons. The law was reportedly favored by local distributors, who believed it unfair that stations could be served directly by outside suppliers. It appears the ordinance was later challenged and overturned in court in the 1970s. However, the ordinance provides a rationale for the establishment of local bulk fuel supply facilities.

- Spokane Daily Chronicle February 9, 1952. Mr. LaVern Bible leases Signal Service Station at the west end of the city limits on the Colville-Kettle Falls Highway (site). He leases the station from Mr. William (Bill) Inman (son of Roy Inman).
- **Spokane Daily Chronicle July 5, 1952.** Mr. Lawrence Haag buys Signal Oil Plant from Mr. Bill Inman. Mr. Haag takes over July 15 of that year.
- Commercial Appraisal March 31, 1964 1970s. This is part of commercial appraisal data from Stevens County Historical Archives. The site is listed as Signal Oil Service, with Humble Oil Company, Standard Oil Company, and Exxon associated with the site. It appears the station onsite was Signal Oil and the bulk plant on the north side of the site was managed by Standard Oil and later Humble Oil. Equipment listed in the appraisal includes signs, bulk plant equipment, lube equipment, tanks, a hoist, three pumps, three 550-gallon underground tanks, a bulk plant building; apparent pipelines for gas, water, and air; a light post, a pump island, and a pump. Assessor lists L.M. Haag as Distributor. Some equipment owned by the operator, such as a floor jack, tire equipment, and tools. Notes suggest the service station portion of the site was not in operation during some years, such as 1966. It is assumed the bulk plant was in operation during all years.
- Spokane Daily Chronicle December 11, 1965. The Colville City Council awards two contracts to supply city with petroleum. One contract was won by Pat Bryan and Son (Humble Oil) for supplying the city with approximately 15,000 gallons of regular gasoline during 1966.
- Spokane Daily Chronicle December 27, 1965. Classified ad shows Signal Service Station for lease by Mr. Haag.
- Spokane Daily Chronicle September 17, 1970. Article discussing lawsuit from four petroleum firms aimed to remove Colville ordinance restricting outside petroleum supplies with larger trucks from supplying local stations. The ordinance favors local distributors.
- **Note:** Supplementing records suggest the property was purchased by Mr. Carroll Whitten Jr. in 1973.
- Spokane Daily Chronicle September 28, 1977. Article indicates Whitten Oil is filing for a license to sell beer and wine for home consumption at Whitten Oil in Colville.

<u>Historic City Directory Search.</u> Records of the pasts uses of the subject property were researched within reverse directories (known as city directories, reverse directories, or R.L. Polk & Co. directories) to document past uses. City directory records were uncovered by Environmental Data Resources (EDR) for the period from 1992 through 2020. These records are located in **Appendix C** of this report. The subject property rests on the "even numbered" or northern side of the 300 block of addresses along West 5th Avenue in Colville. The following observations were made of listings for the years represented:

- Cole Information Directory 1992 Subject property is not listed. No even numbered addresses were listed on the 300 block.
- Cole Information Directory 1995 Subject property is listed as Whitten Oil, Inc., and includes Whitty's Carwash at the 370 and 380 W. 5<sup>th</sup> Avenue addresses, respectively, at the time. Fogle Pump is listed at 316 W. 5<sup>th</sup> Avenue. Fogle Pump is considered an east-adjoining site at the time, but later it became part of the subject property (in 2017).
- Cole Information Directory 2000 Subject property is listed as Whitty's Minimart at the time, occupying the 370 address along W. 5<sup>th</sup> Avenue. Fogle Pump & Supply is listed at 316 W. 5<sup>th</sup> Avenue.
- Cole Information Directory 2005 Subject property is listed as Whitty's Chevron Mini Mart at 370 W. 5<sup>th</sup> Avenue. Fogle Pump & Supply is listed at 316 W. 5<sup>th</sup> Avenue.
- Cole Information Directory 2010 Subject property is listed as Whitty's Chevron and as LDH Investments, Inc. at the 370 W. 5<sup>th</sup> Avenue address. Fogle Pump, which became part of the site later, is listed at 316 W. 5<sup>th</sup> Avenue.
- Cole Information Directory 2014 Subject property is listed as Chevron Station Colville and Whitty's Chevron. Fogle Pump & Supply is listed at 316 W. 5<sup>th</sup> Avenue.
- Cole Information Directory 2017 Subject property is listed simply as Chevron at the time, occupying the 370 W. 5<sup>th</sup> Avenue address. Fogle Pump & Supply is listed at 316 W. 5<sup>th</sup> Avenue.
- Cole Information Directory 2020 Subject property is listed as ATM, Blue Rhino (propane), LDH Investments, Inc., and Whitty's Chevron all at the 370 W. 5<sup>th</sup> Avenue address. Fogle Pump & Supply is listed as occupying the 316 W. 5<sup>th</sup> Avenue address, although this is suspected in error as the Fogle property had been purchased and repurposed by LDH/Sood Family by this timeframe.

<u>Historic Topographic Maps.</u> The subject property was examined on USGS topographic maps dated 1929, 1933, 1952, 1986, 1992, 2014, 2017, and 2020. These records are located in **Appendix C** of this report. These maps depict the subject property resting at the northwest corner of the City of Colville, along or proximal to the primary highway that extends through town. Swampy areas rest nearby to the west, across a few blocks of town and the lumber mill site. The site may rest on swampland. Minimal other distinguishing features were uncovered during this review.

Other Current and Historic Maps or Surveys. Additional maps or surveys were uncovered during research of the past uses of the subject property. Historic maps include Metsker's Maps from the years of 1933, 1941, 1950, 1956, and 1973; an historic plat map of the City of Colville dated circa 1940s; and a Record of Survey completed by Mid-Mountain Surveyors in 2017. These materials are included in this report in Appendix C. The following observations were made:

• 1933 Metsker's Map – The map depicts vaguely where the subject property would be located. No development is inferred on the map. The Inland Empire Highway rests nearby to the south. Ownership records indicate that the Texaco Oil Company, Associated Oil Company, and Union Oil Company own parcels in town but not onsite.

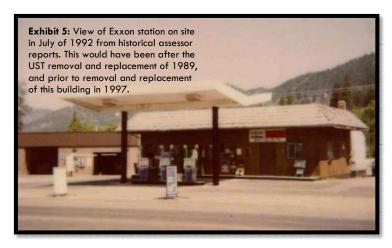

- Circa 1940s Map of Colville This map is a blueprint of the city plat at the time. Block 2 of Hammonds Addition is depicted. No development is shown; however, all 12 lots are shown, where each lot is roughly 30 feet wide and 130 feet long. The original Signal facility occupied the northern portion of Lots 4, 5, and 6, plus a portion of Block 2 of the Spokane Addition to the south. This includes an area approximately 90 feet east-west by perhaps 150 feet north-south.
- 1941 Metsker's Map The subject property is depicted along the now-curving W. 5<sup>th</sup> Avenue / Inland Empire Highway by this timeframe. The block of the subject property can be seen, which includes Block 2 of Hammonds Addition. The southern half of the block is part of the southadjoining highway. No development is depicted or denoted onsite on the map.
- 1950 Metsker's Map No significant changes were observed on this map from the 1941 map.
- 1956 Metsker's Map No significant changes were observed on this map from the 1941 map.
- 1973 Metsker's Map No significant changes were observed on this map from the 1941 map.
- **2017 Mid-Mountain Surveyors, Inc. Survey** The subject property is shown with current buildings but just two of the current three pump islands on the site currently. A warehouse proximal to the northeast corner of the property is listed as "garage" and is slightly offsite.

<u>Historic Aerial Photographs.</u> The subject property was examined on historical aerial photographs dated 1946, 1953, 1958, 1962, 1974, 1983, 1992, 1995, 1998, 2006, 2011, 2015, and 2019. The following observations were made each year:

- 1946 The subject property includes apparent gas and oil building apparent in **Exhibit 1**. North of the structure is the possible bulk plant, and west of the structure are smaller structures that appear to be small cabins. East of the structure is a building that may be the Allis-Chalmers building. It is eventually Fogle Pump & Supply. The northern edge of the subject property appears to include a row of housing or warehouses.
- 1953 The subject property remains similar to the 1946 photograph, with exception to the cabins on the west side of the site that appear to have been removed in favor of a large warehouse structure possibly a triplex.
- Exhibit 4: The 1946 aerial photo of the subject property.
- 1958 No significant changes were noted from the prior resource.
- 1962 The subject property can be seen clearly in this photo, and it appears to include the original gas and oil facility, the lean-to shed connected to the north of the original building, a warehouse to the east, warehouses or buildings to the north, apparent residences to the northwest, and a larger warehouse along the site's southern/western boundary. It appears the warehouse to the east, possibly once built to support the subject property, eventually became Fogle Pump & Supply.

- 1974 The subject property is difficult to discern on this infrared aerial photograph; however, significant changes to the site were not apparent from view.
- 1983 On the photo, the subject property can be seen with the original pump island and canopy to the south, warehouse to the north, warehouses to the east (possibly Fogle Pump & Supply at the time), and a long warehouse to the west. Mature vegetation and possible residences can be seen on the north side of the subject property at the time. It should be noted the station building onsite at the time is not the same building that exists today.
- 1992 The features on the subject property are difficult to discern on the photo.
- 1995 By this timeframe, the subject property is beginning to resemble the current site configuration. The new (existing) tank nest can be seen, as can the gasoline station and canopy, and the card lock facility to the north. East of the site are several structures that may be operated by Fogle Pump & Supply at the time. The structures on the western end of the subject property were removed (circa 1987) in favor of a carwash structure.
- 1998 The subject property appears generally unchanged when compared with the prior aerial photo, with exception to the carwash facility that appears expanded to the west.
- 2006 The subject property appears generally unchanged from prior photos; however, it is suspected the gasoline station building was removed and replaced with a similar structure by this timeframe. The east-adjoining Fogle Pump & Supply building and warehouses remain evident.
- **2011** No significant changes were apparent onsite when compared with the prior aerial photograph.
- 2015 No significant changes were apparent onsite when compared with the prior aerial photograph.
- 2019 On the photo, the subject property appears generally as it was observed during site reconnaissance. The property includes the gas station and convenience store building, a carwash to the west, a nest of USTs to the southwest, two pump islands to the south and southeast, an elongated warehouse to the northeast, and the cardlock facility to the north. The propane distribution tank on the eastern side of the property can be seen.

Historic Assessor Records. Historic assessor/appraisal records available from the Stevens County Historical Society document property uses, ownership, or management back to the early 1960s. These records are available in **Appendix E**. Ownership or management of the site included Signal Oil Service, Standard Oil Company, Humble Oil, Mr. L. M. Haag, Mr. Carroll Jeffrey Whitten, and Exxon. Early assessor records uncovered include commercial appraisal forms showing the site with a gas station, a pump island and canopy, an office area supporting the station, a 16-foot by 36-foot "lean-to" structure, tire equipment, and a bulk plant with a bulk plant building, tanks, and pump island.

It appears the gasoline station portion of the site utilized different petroleum tanks than the bulk petroleum distribution plant. Two 12,000-gallon tanks and one 10,000-gallon tank are listed on one record as part of the bulk plant. A second record lists a possible 12,000-gallon tank, a possible 6,000-gallon tank, a 10,000-gallon tank, and 300 feet of 2-inch piping. These records also indicate the facility, either the gas station or bulk gas and oil distribution plant, were not always operating.

Later in 1995, assessor records were updated to show the site with three fiberglass 10,000-gallon underground storage tanks (USTs) and one fiberglass 6,000-gallon UST. A photo of the site depicts it with an Exxon sign at the time. Building department records from 1997 indicate the building shown in **Exhibit 5** (above) was demolished in favor of a similar-sized building and new awning and pump island. City of Colville Building Department Records are examined in greater detail below.

Assessor records were also available for the former Fogle Pump & Supply property to the east, which is now part of the subject property. Those records indicate a larger warehouse and a triplex building once existed on the Fogle property. The triplex was torn down in 1986 and the larger warehouse was removed in 2017. No tanks were found associated with the Fogle listings.

**Building Department Records.** City of Colville Building Department records were uncovered from 1991 through 2019. The records are available in **Appendix E** or are available on request. The records uncovered generally document the following activities on the former gas station area and on the Fogle Pump & Supply portion of the subject property:

- 1991 Install of northern fuel island
- 1995 Adding two carwash bays to existing carwash facility
- 1996 Additional parapet signage (Fogle)
- 1997 Remodel of building (Fogle)
- 1997 Demo of station building and pump island and install C-store and island (Center of Site)
- 1998 Re-roof building (Fogle)
- 1999 Install metal pipe storage building and shed (Fogle)
- 2011 Repair station due to car damage
- 2017 Demolition of building (Fogle)
- 2017 Final framing inspection
- 2018 Install new Whitty's lighted sign
- 2018 Enclose existing shed
- 2018 Adding fuel dispensers and canopy
- 2018 Install bollards at propane tank
- 2019 Enclose existing shed
- 2019 Extending carwash to include automation (Bay 6)

<u>City of Colville Fire Department Records.</u> The City of Colville Fire Department provided two records of responses onsite. The records were provided by Mr. Wayne Walker. One incident occurred in August

of 2020 when a propane refill valve froze up. It was tapped and the problem cleared up. A second incident occurred in March of 2019 where the department responded to a false alarm. Apparently, occupants were changing a battery and set off an alarm. It is notable no records report of a 1940s fire. These records are available in **Appendix F.** 

While multiple entities have owned the subject property over the past approximately 90 years, from about 1973 onward just two primary entities, the Whitten family and LDH or the Sood family, have owned the site over the past approximate 50 years (Ecology 2013). The LDH (or Sood) entity purchased the site from Whitten in January of 2006 (Ecology 2013). Recent uses also include a convenience store, a carwash, a propane refill station, and an RV septic dump.

Records indicate the gasoline fueling station portion of the site has included at least seven (7) steel single-wall underground petroleum storage tanks and four (4) single-wall fiberglass-reinforced plastic (FRP or fiberglass) petroleum tanks through time. Considering the sizes and placements of the tanks, it appears at least three generations of petroleum tanks have been used onsite. Six of the steel tanks were removed and one steel tank was closed-in-place during a UST and soil removal project in 1989. Those tanks were replaced with the four fiberglass USTs that serve the property currently during that same timeframe. The northern or former bulk fuel storage portions of the site apparently also included aboveground or below ground storage tanks, and oil and gasoline stored in drums in warehouses.

The site currently includes three clusters of fuel dispenser (pump) islands, including a 1991-installed set of two pump islands to the north, a 2018-installed set of two pump islands on former Fogle Pump property to the east, and an older set of two pump islands to the south. The east adjoining former Fogle Pump property appears acquired in 2017. The southern pump islands appear proximal to the original dispenser locations depicted on Sanborn Maps. The northern pump islands were installed in 1991, but the area was once part of a bulk fuel plant in the 1960s. It is possible other pump or dispenser islands or tanks have been installed and removed from the site through time.

Sanborn Maps suggest vehicle service and repair were offered onsite during early years through the 1960s or later. Historic aerial photos indicate possible cabins on a western portion of the site in the 1940s, which later appear replaced by an apparent apartment structure (triplex). A central store and/or garage building appears in photos dating back to the 1940s. It appears that building was removed and replaced by a structure of similar size in the late 1990s. A carwash building was constructed on the western portion of the site in 1988. Additional bays were added to the car wash during more recent years, as was an automatic car wash system. A single belowground diesel efficiency fluid (DEF) tank was reportedly installed 10 years ago just south of the northern pump islands. DEF is a type of urea. The DEF tank has reportedly never been used for petroleum storage.

Today the subject Whitten Oil #1 site includes a convenience store, a multi-bay car wash facility, a storage warehouse, and multiple pump islands that are served by the four (4) 1989 single-walled fiberglass USTs. The site is reportedly connected to city water and sewer. It is unknown whether prior structures onsite were connected to the city sewer or storm sewer system.

#### 4. RECORDS REVIEW AND RELEASES

Current environmental records of the subject property and vicinity were ascertained utilizing both a Washington Department of Ecology Public Records Request (PRR) process and also through a private records reporting service called Environmental Data Resources (EDR; a Tetra Tech subcontractor). Ecology records were cataloged, reviewed, and summarized on a Microsoft Excel Spreadsheet (see

**Appendix B**). EDR records were examined and attached to this report (See **Appendix C**). A narrative summarizing both sets of records is located below.

EDR Records. EDR lists the subject Whitten Oil #1 property as EDR sites A1, A2, A3, A4, A5, A6, A7, A8, A9, A10, A11, and EDR site 20. The subject property is found on the Washington Recovered Government Archive (WA RGA) Leaking Underground Storage Tank (LUST) database for the years of 1995, 2011, and 2012. It is listed on the EDR Historical Auto Service Stations database for the years of 1985, 1986, 1987, 1988, 1989, 1990, 1991, 1992, 1993, 1994, 1995, 1996 (Whitten Oil, Inc.) and in 2009 and 2010 (LDH Investments, Inc.). The site is listed on the WA SPILLS database for a 20-gallon release of diesel or marine gas oil on August 23, 2013. Reportedly the spill, which is considered historic, originated from a truck located over an impermeable surface. Further details were uncovered below.

The subject property is also located on the UST FINDER and UST FINDER RELEASE databases as having four open USTs and seven closed USTs. These listings document the number of open and closed USTs onsite. The listing appears accurate with respect to the UST installation and closure event that took place in 1989 (further details are available below).

The subject property is listed on the Washington Voluntary Cleanup Program (VCP) database as having cleanup started and as having participated on the VCP in the past. The site is ranked a 4 (WARM) on Ecology's databases, where a 1 is of greatest concern and 5 is of least concern.

The subject property is also listed on the following databases: Washington Hazardous Sites List (HSL), the Washington Confirmed and Suspected Contaminated Sites List (CSCSL), the Washington LUST list, the Washington UST list, and the Washington ALLSITES and Washington Financial Assurance databases. The HSL, CSCSL, and LUST listings indicate cleanup has started. The listings appear to relate to releases from August 10, 1989.

USTs connected with the site that are mentioned on Ecology databases include:

- Tank 1 an unknown-size/age single wall steel tank used for leaded gasoline (removed)
- Tank 2 an unknown-size/age single wall steel tank used for unl. gasoline (closed-in-place)\*
- Tank 3 an unknown-size/age single wall steel tank used for unleaded gasoline (removed)
- **Tank 4** a single wall steel tank that's of unknown age and less than 1,100 gallons used for unleaded gasoline (removed)
- Tank 5 an unknown-size/age single wall steel tank used for unknown substance (removed)
- **Tank 6** a single wall steel tank that's of unknown age and less than 1,100 gallons in size used for unknown substance (removed)
- Tank 7 an unknown-size/age single wall steel tank used for unknown substance (removed)
- Tank 8 a 10,000-gallon single-wall FRP tank with diesel (operational)
- Tank 9 a 10,000-gallon single-wall FRP tank with diesel (operational)
- Tank 10 a 10,000-gallon single-wall fiberglass (FRP) tank with leaded gasoline (operational)\*\*
- Tank 11 a 10,000-gallon single-wall FRP tank containing unleaded gasoline (operational)\*\*
- \*Note: Likely an error; this UST is suspected to be the 12,000-gal. closed-in-place diesel/gas UST listed as Tank 4 (Delta 1990)
- \*\*Note: One of these USTs is suspected to include super unleaded and to be just 6,000 gallons in capacity.

ALLSITES database listings show the site as a LUST facility in the 1989/1990 timeframe, and as a UST facility beginning in 2000. The Washington Financial Assurance database lists Colony Insurance as an insurer for certain dates up through the current timeframe. The WA RGA database listings show the site as on the LUST list in 1996, 1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, and 2010.

Adjoining and nearby properties were also examined. EDR Site A12 adjoins the subject property to the west across North Lincoln Street. No evidence was uncovered suggesting releases on adjoining or nearby sites have impacted or are likely to impact the subject property with the following exception:

• Hartman Oil/Conoco/Busch Distributors/Sunset Mart (Hartman) – 285 W. 5<sup>th</sup> Avenue as EDR sites B13, B14, B15, B16, B17, B18, and B19 (but not K42 – a second Busch distribution site). The Hartman site is positioned roughly 150 feet east-southeast and reportedly up gradient from the subject property. The Hartman site has a history similar to that of the subject property, as a gasoline station with multiple past tanks and small bulk fuel storage site. The Hartman site is listed on the Washington Independent Cleanup Reports (WA ICR), VCP, Hazardous Sites List (HSL), CSCSL, LUST, UST, ALLSTES, FINDS, UST Finder, UST Finder Release, EDR Historical Auto, and Washington Manifest databases. It appears to be a state cleanup site and to have received an enforcement order from Ecology. Groundwater and soil appear to have been impacted. The site is listed as undergoing monitoring currently, and it ranks a 3 on the 1-5 WARM ranking method used by Ecology.

Given the history of this site and its close upgradient proximity, releases at this site may threaten the subject property. Further investigation and possible sampling would be necessary to determine whether releases from nearby Hartman Oil have affected the subject property. Such a determination would be completed during a standard remedial investigation.

Orphan or "unmappable" sites were also examined in the EDR report. Several sites were found in the greater vicinity that do not appear would significantly affect the subject property. Also, it should be noted that Whitten Oil was also found listed on the unmappable "orphan sites" list in the EDR report, likely resulting from its listing vaguely at "W. 5<sup>th</sup>" with no address number at one time.

<u>Ecology Records.</u> Ecology sent roughly 100 prior reports or records of the site to respond to the PRR. These reports are listed chronologically on the MS Excel Spreadsheet in **Appendix B.** These documents were reviewed, and many are discussed in greater detail below.

Ecology reports indicate significant petroleum contamination was discovered in soil and groundwater during removal and installation of underground storage tanks in 1989. A total of 7 steel USTs were closed at the time, where six USTs were removed. The reportedly leaking former Tank 4, a 12,000 two-compartment (diesel/gasoline) UST was closed-in-place. This UST may remain under the northern wall of the current convenience store onsite. While approximately 1,200 cubic yards of petroleum contaminated soil was removed at the time, contamination continued to remain in outlying soil and in groundwater – and likely remains proximal to former Tank 4.

Delta Environmental Consultants (Delta) investigated the site further in March of 1990. Delta installed six borings, five of which were completed as monitoring wells (MWs 1, 2, 3, 4, and 6). Delta sampled soil in borings SB-2, SB-4, and SB-5, and groundwater from the five wells. Delta encountered petroleum in boring SB-5 and in wells MW-2, MW-3, and MW-6. Notes in the report imply that a well at SB-5 was dry.

It should be noted that boring SB-2 (later MW-2) appears constructed in backfill provided by the then recent UST and contaminated soil removal project north and west of the gas station building. Installing wells in recent excavation backfill is unusual and can lead to misleading results. At the time, the highest concentration of contaminants in groundwater were found at MW-2, which included a 1,643  $\mu$ g/L

(micrograms per liter or parts per billion) concentration of benzene, far in exceedance of the current 5  $\mu$ g/L cleanup level. Delta did not sample the wells at opposite ends of the UST nest; however, it is suspected those are for observational purposes only and not for groundwater sampling purposes.

Delta indicated at the time that remaining soil contamination poses little threat to humans or the environment, and that dissolved phase hydrocarbons in groundwater appear restricted to the immediate vicinity of the former UST basin (Delta 1990). However, it appears additional characterization surrounding MW-2 and other areas with elevated levels would be warranted to support this presumption.

According to the Whitten Oil Groundwater Monitoring September 2017 Sampling Report from Fulcrum Environmental Consulting (Fulcrum; Whitten Oil consultant), in December of 2005 Northwest Environmental Solutions, Inc. (NES) completed soil boring and sampling to facilitate a change in ownership for the subject site to LDS Investments. Five soil borings were advanced to depths of 5 to 15 feet below ground surface. One sample was collected from the terminus of each boring. The results from analysis of five soil samples reportedly showed elevated yet below cleanup level concentrations of contaminants (Fulcrum 2023). It is unknown whether a photoionization detector was used during soil screening. Other questions remain. The report was not provided by Ecology so it's unknown whether it's ever been reviewed by Ecology. Review of the entire report is recommended.

In April of 2011, Ecology UST Inspector Mr. Doug Ladwig conducted an Initial Investigation (I. I.) that included review of prior site records. Mr. Ladwig focused on reports of the 1989 UST removal and subsequent site characterization work completed by Delta in 1990. Mr. Ladwig concluded that an Ecology Site Hazard Assessment (SHA) should be completed, based in part on information in Delta's report indicating the near surface groundwater table was left impacted with petroleum from the old tanks.

Ecology completed the SHA in 2013. The SHA indicated "seven (7) USTs were removed, and a 12,000-gallon dual compartment tank located under the store/office building was left in place." The SHA ranked the site a 4, where 1 represents a site with the greatest concern and 5 represents a site with the least concern. In conclusion, while the releases identified by Delta and Mr. Ladwig were left unresolved, Ecology indicated the right to initiate further investigation if new information indicates a potential or actual threat to human health or the environment.

Some discrepancies were noted within the SHA. Primarily, the number of USTs removed or closed appears different. The 2013 SHA indicates there were a total of 8 prior USTs onsite. The 1990 Delta Phase I ESA contends there were a total of seven (7) closed and/or removed USTs in 1989, and four USTs were installed during that timeframe (11 tanks total). It is presumed a total of seven underground tanks had been installed onsite leading up to 1989, where one tank was a dual compartment tank. This data suggests there were a total of eight (8) compartments associated with the former gasoline station onsite, which may have led to the confusion. Current Ecology records indicate a total of seven closed USTs, where six were removed and one remains closed in place, and a total of four operational USTs that were installed in 1989, for a total of 11 USTs.

Later in 2013, a release of approximately 20 gallons of diesel occurred from a commercial truck. The spill reportedly occurred over an impermeable surface along the road nearby the site. Incident report data forwarded by Ecology indicates the fire and road department used absorbent material and swept the roadway. No impacts to drains or waterways were identified. The document concludes with "no further action required."

Prior UST inspections and/or tightness tests were examined from the early 1990s through the current timeframe. Some tests did not include all the tanks. In one instance a repair was required of a detector, in another instance monitoring was required for several months as there was not enough product to measure while an inspector was onsite. On a third instance the spill buckets failed inspection. While these and other minor concerns were noted, no evidence of a significant release was discovered during review of prior inspections and tests.

Until 2017 the eastern portion of the property included a pump repair and sales facility called Fogle Pump, which shared the current block of land with the carwash and gasoline/diesel fueling station. No USTs, fueling, or releases were found during cursory review of Fogle Pump records. It also appears Fogle operated a triplex apartment on the western portion of the subject property through the mid-1980s.

**Fulcrum Environmental Consulting.** Ecology provided many records of recent work completed by Fulcrum Environmental Consulting in Spokane, Washington. It appears Fulcrum was initially retained by the current and past property owners in 2017 to help guild the subject property through Ecology's Voluntary Cleanup Program (VCP) in pursuit of an eventual "no further action" (NFA) determination. Fulcrum reportedly completed semi-annual groundwater sampling at the site from 2017 through March of 2024.

Fulcrum began groundwater sampling at the site in 2017 in the effort to determine the presence of benzene, toluene, ethyl benzene and total xylenes (BTEX) and gasoline-range total petroleum hydrocarbons (TPH-Gx). Diesel sampling was not completed at first. Fulcrum sampled groundwater from original Delta-installed wells MW-3, MW-4, and MW-6, and also from two observation wells (CW-1 and CW-2) that were installed proximal to the UST next when the UST system was installed in 1989. It should be noted, Fulcrum could not locate MW-1 and MW-2 in 2017; the wells were anticipated paved-over. Therefore, a total of five wells were sampled initially. Further, the construction of CW-1 and CW-2 was not found, and it is unknown if such wells are appropriate for sampling. Regardless, this basic set of wells was sampled from 2017 to 2020.

In 2020, Fulcrum established a new well to replace MW-2, and new wells near MW-4 and MW-6 because wells MW-4 and MW-6 had poor surface seals and were slow to recharge. Also, Fulcrum established MW-7 near the west end of the subject property. The seven (7) wells Fulcrum sampled regularly from 2020 to the current timeframe include CW-1, CW-2, MW-2, MW-3, MW-4, MW-6, and MW-7. It should be noted, Fulcrum previously used a sample name that includes "MW-7" to designate its blind laboratory duplicate sample. That changed after the establishment of MW-7 in 2020. Now MW-8 is the name designating the blind duplicate.

Below are summaries of Fulcrum's groundwater sampling and analytical results:

- **September 2017** Monitoring wells CW-1, CW-2, MW-3, MW-4, and MW-6 were sampled and analyzed for VOCs benzene, toluene, ethylbenzene, total xylenes (BTEX) and for total petroleum hydrocarbons in the gasoline range (NWTPH-Gx or just TPH-Gx). Petroleum contaminants were found in MW-3 and MW-4 that did not exceed Model Toxics Control Act (MTCA) Method A Cleanup Levels (*cleanup levels or CULs*, as listed on Table 720-1 in MTCA statute and regulation, 173-340 WAC). Fulcrum recommended continued sampling.
- **December 2017** Monitoring wells CW-1, CW-2, MW-3, and MW-4 were sampled and analyzed for BTEX and TPH-Gx. MW-6 was found frozen with ice and was not sampled at the time. Petroleum contaminants were found in both MW-3 and MW-4. MW-4 was found with 6.81

- $\mu$ g/L (micrograms per liter, parts-per-billion, or ppb) of benzene, a concentration exceeding the 5  $\mu$ g/L cleanup level. Fulcrum recommended continued sampling.
- March 2018 Monitoring wells CW-1, CW-2, MW-3, MW-4, and MW-6 were sampled and analyzed for BTEX and TPH-Gx. Petroleum contaminants were found in MW-4 and MW-6 that did not exceed cleanup levels. Fulcrum recommended continued sampling.
- June 2018 Monitoring wells CW-1, CW-2, MW-3, MW-4, and MW-6 were sampled and analyzed for BTEX and for TPH-Gx. Petroleum contaminants were found in MW-4 and MW-6. MW-4 was found with 5.84 μg/L of benzene, a concentration exceeding the 5 μg/L cleanup level. Fulcrum recommended continued sampling.
- September 2018 Report not available through Ecology; however, some summarization data was uncovered for the September 2018 sampling event from Fulcrum's March 2020 groundwater monitoring report. The March 2020 report indicates MW-4 was found with 3,530 μg/L of NWTPH-Dx (diesel range; total diesel and oil or TPH-Dx) and 7.25 μg/L of benzene during the September 2018 event, exceeding respective cleanup levels of 500 and 5 μg/L. Note: This is the first time Fulcrum's analysis included diesel-range hydrocarbons. It is unclear if silica gel cleanup standards were used. Silica gel cleanup can be used to distinguish the contribution from naturally occurring organic matter and polar metabolites (formed during weathering) in the NWTPH-Dx analysis.
- March 2019 Report not available through Ecology; however, summarizing data was uncovered for the March 2019 sampling event from Fulcrum's March 2020 groundwater monitoring report. The March 2020 report indicates MW-4 was found with 596 μg/L of TPH-Dx, exceeding the 500 μg/L cleanup level. Groundwater from the same well was found with 4.46 μg/L of benzene during that timeframe, which does not exceed the 5 μg/L cleanup level.
- September 2019 Monitoring wells CW-1, CW-2, MW-3, MW-4, and MW-6 were sampled and analyzed for BTEX, TPH-Gx, and for TPH-Dx. Petroleum contaminants were found in CW-1, MW-3, MW-4, and MW-6 (four out of five wells). MW-4 was found with 5.06 μg/L of benzene, a concentration exceeding the 5 μg/L cleanup level. MW-6 was found with TPH-Dx totaling 1,440 μg/L, exceeding the 500 μg/L cleanup level. Fulcrum recommended continued sampling.
- March 2020 Monitoring wells CW-1, CW-2, MW-3, MW-4, and MW-6 were sampled and analyzed for BTEX, TPH-Gx, and for TPH-Dx. Petroleum contaminants were found in CW-2, MW-3, MW-4, and MW-6 (all but CW-1). MW-4 was found with 552 μg/L of TPH-Dx and MW-6 was found with a 1,580 μg/L of TPH-Dx, both of which exceed the 500 μg/L cleanup level. It is notable no benzene exceedances were identified; that filtration was applied to some samples with entrained sediments; and that "heavy fuel oil" was identified in the diesel and heavy oil ranges in samples. Fulcrum recommended continued sampling.
- September/October 2020 Monitoring wells MW-4 and MW-6 were decommissioned due to reported failing surface seals and poor recharge rates, and four new wells were installed onsite. The original MW-2 and MW-1 were never located and are suspected paved over. New wells installed by Fulcrum include a new MW-2, a new MW-4, a new MW-6, and an MW-7. Of those, the new MW-2, the new MW-4, and the new MW-6 appear placed somewhat proximal to the former locations of old wells with the same respective names. However, using the same well nomenclature can complicate comparison with prior groundwater sampling, flow, and elevation

data. The new wells (MW-2, MW-4, MW-6, and MW-7) add to the existing network of three wells CW-1, CW-2, and MW-3 that were installed in 1989 or 1990. There are now a total of seven wells onsite.

Composite soil samples were collected from drums of drill cuttings, and composite water samples were collected from the two drums of purge water. Samples were generally analyzed for BTEX, TPH-Gx, and for TPH-Dx. It appears no soil samples were collected from depth during soil boring or installation of new wells. It is unknown if field instruments such as a photoionization detector (PID) were used to help guide sampling.

Groundwater analytical results from the September/October event indicated all wells but MW-3 include some concentration of petroleum. Well CW-2 was found with a combined (diesel and oil) TPH-Dx concentration of 5,347  $\mu$ g/L, and the new MW-4 was found to have a concentration of 707  $\mu$ g/L of TPH-Dx, which exceeds the cleanup level of 500  $\mu$ g/L. Both of those wells also exceeded cleanup levels for TPH-Gx and benzene. The report suggests fluctuating concentrations of petroleum in groundwater may be associated with high and low groundwater elevations. Well MW-6 was also noted as in need of repair. Fulcrum recommended continued sampling.

• March 2021 – Monitoring wells CW-1, CW-2, new MW-2, MW-3, new MW-4, and new MW-6, and the recently installed MW-7 were sampled and analyzed for BTEX, TPH-Gx, and for TPH-Dx. These wells are hereinafter just MW-2 (dropping the "new" for example); however, comparing prior results with wells of similar names through time may be misleading.

Petroleum was found in all wells but CW-1 and its blind duplicate, where blind duplicates are now labeled MW-8. Combined TPH-Dx concentrations exceeding the 500  $\mu$ g/L cleanup level were identified by the report in MW-2 (3,834  $\mu$ g/L), MW-4 (1,461  $\mu$ g/L), and MW-6 (500  $\mu$ g/L cleanup level was found in MW-4 (1,740  $\mu$ g/L), and concentrations of benzene exceeding the 5  $\mu$ g/L cleanup level were found in wells MW-2 (8.04  $\mu$ g/L) and MW-4 ( $\mu$ g/L). *Note:* It is observed that levels of oil versus diesel in samples undergoing TPH-Dx analysis seem to vary greatly.

- September 2021 Monitoring wells CW-1, CW-2, MW-2, MW-3, MW-4, MW-6, and MW-7 were sampled, and groundwater was analyzed for BTEX, TPH-Gx, and for TPH-Dx. Petroleum was found in all wells. Combined TPH-Dx concentrations exceeding the 500 μg/L cleanup level were identified by the report in MW-2 (1.010 μg/L), MW-4 (1,580 μg/L), and MW-6 (597 ug/l). Concentrations of TPH-Gx exceeding the 800 μg/L cleanup level were found in MW-4 (2,050 μg/L) and MW-2 (872 μg/L), and a concentration of benzene exceeding the 5 μg/L cleanup level was found in well MW-4 (128 μg/L). Elevated but consistent concentrations of diesel and gasoline are identified in groundwater at MW-4, which along with CW-2 appears downgradient from the closed-in-place UST, which is perhaps a source. Fulcrum recommended continued sampling.
- March 2022 Monitoring wells CW-1, CW-2, MW-2, MW-3, MW-4, MW-6, and MW-7 were sampled, and groundwater was analyzed for BTEX, TPH-Gx, and for TPH-Dx. Petroleum was found in all wells. Combined TPH-Dx concentrations exceeding the 500 μg/L cleanup level were identified by the report in CW-2 (703 μg/L), MW-2 (1.175 μg/L), MW-3 (913 μg/L), MW-4 (1,130 μg/L), and MW-6 (600 ug/l). Concentrations of TPH-Gx exceeding the 800 μg/L cleanup level were found in MW-4 (1,840 μg/L) and MW-2 (828 μg/L), and a concentration of benzene

exceeding the 5  $\mu$ g/L cleanup level was found in well MW-4 (68.7  $\mu$ g/L). Fulcrum recommended continued sampling.

- September 2022 No report available through Ecology. However, information presented in the March of 2023 report suggests slight increases to the results of March 2022. Results for prior sampling events were found harder to interpret after Fulcrum switched to using three-dimensional graphs by the timeframe of the March 2023 report.
- March 2023 Monitoring wells CW-1, CW-2, MW-2, MW-3, MW-4, MW-6, and MW-7 were sampled, and groundwater was analyzed for BTEX, TPH-Gx, and for TPH-Dx. Petroleum was found in all wells. Combined TPH-Dx concentrations exceeding the 500 μg/L cleanup level were identified by the report in MW-2 (1,250 μg/L), MW-3 (518 μg/L), and MW-4 (1,250 μg/L). Concentrations of TPH-Gx exceeding the 800 μg/L cleanup level were found only in MW-4 (1,180 μg/L), and concentrations of benzene exceeding the 5 μg/L cleanup level were found in wells CW-1 (6.05 μg/L), CW-2 (104 μg/L), MW-3 (88.3 μg/L), and MW-4 (70.2 μg/L). It is notable that nearly all wells, except MW-7, exhibited some concentration of benzene. Fulcrum recommended continued sampling.
- September 2023 Monitoring wells CW-1, CW-2, MW-2, MW-3, MW-4, MW-6, and MW-7 were sampled, and groundwater was analyzed for BTEX, TPH-Gx, and for TPH-Dx. Petroleum was found in all wells. Combined TPH-Dx concentrations exceeding the 500 μg/L cleanup level were identified by the report in CW-2 (719 μg/L), MW-02 (1,070 μg/L), MW-3 (521 μg/L), MW-4 (1,710 μg/L), and a significant concentration in MW-7 (34,100 μg/L). Concentrations of TPH-Gx exceeding the 800 μg/L cleanup level were found only in MW-4 (1,190 μg/L); however, concentrations of benzene exceeding the 5 μg/L cleanup level were found in wells CW-2 (75.1 μg/L), MW-3 (15.3 μg/L), and MW-4 (177 μg/L).

It is notable groundwater with elevated diesel that was analyzed from MW-7 required 10 dilutions, that results had elevated detection limits, and that no trace heavy oil or BTEX was uncovered. The quality of this sample and analysis is in question and further discussion with Fulcrum and the laboratory should be completed, or a second sampling event may be necessary to determine whether this concentration is reliable. Also, nearly all wells, except MW-6 and MW-7, exhibited some concentration of benzene. Fulcrum indicates new contaminant sources may be responsible for elevated levels of petroleum in wells CW-2 (elevated benzene) and MW-7 (high levels of diesel), and it recommended additional investigation.

• March 2024 – Monitoring wells CW-1, CW-2, MW-2, MW-3, MW-4, and MW-6 were sampled; however, MW-7 was not sampled. Groundwater from wells was analyzed for BTEX, TPH-Gx, and for TPH-Dx. Petroleum was found in all wells sampled. Combined TPH-Dx concentrations exceeding the 500 μg/L cleanup level were identified by the report in CW-02 (15,510 μg/L), MW-02 (738 μg/L), MW-3 (590 μg/L), and MW-4 (1,050 μg/L). Concentrations of TPH-Gx exceeding the 800 μg/L cleanup level were found only in MW-4 (1,270 μg/L); however, concentrations of benzene exceeding the 5 μg/L cleanup level were found in wells CW-2 (20.1 μg/L), MW-03 (40.6 μg/L), and MW-4 (95.8 μg/L).

It is notable that the primary concern from the last event included the high concentration of diesel at MW-7. That well was not sampled this round. Fulcrum states the well was found inundated with sediment that prevented sampling. Also, according to Fulcrum, a spike in well CW-2 was

found with diesel and oil-range hydrocarbons, with the majority of the wells showing a leveling off of increased concentrations.

Fulcrum stated the following of groundwater onsite:

- Monitoring data shows a trend of increased contaminant concentrations and areal extent that is inconsistent with ongoing degradation of a 1989 spill;
- Review of data ... from 2017 to current shows an increasing trend in both concentration and areal extent;
- O Results of this monitoring event and trending data indicate that a new release or releases of petroleum has or is occurring.

With respect to monitoring data at CW-2, Fulcrum found:

- o From 2018 to 2019, CW-2 reported low to non-detect concentrations of gasoline;
- o From 2020-2021, an apparent increase in gasoline-range materials with a chemical footprint indicative of old, weathered gasoline was reported;
- o In September of 2022, an apparent new material with a unique chemical footprint likely related to diesel was identified;
- o Fulcrum's analytical laboratory (Fremont) reports that the weathered nature of the new material indicates that a new release likely occurred after the March 2022 sampling event.

Ecology PRP Letters. Ecology sent letters to potentially liable or responsible parties (PLPs or PRPs) Whitty's LLC (LDH) and to Whitten Oil, Inc. to inform each party of pending liability with respect to the release of petroleum on the subject property. According to the letter, soil and groundwater samples collected at the site since 1990 demonstrate that concentrations of petroleum hydrocarbons and volatile organic compounds exceed MTCA cleanup levels. Further, the letter suggests that the "release has potentially migrated from the source property and into residential properties" and that the release poses a threat to human health and the environment through various routes of exposure. It appears Ecology based its opinion on the results from former and recent groundwater monitoring, including the unresolved releases of the past and the anomalously elevated results discovered in MW-7 in September of 2023.

#### 5. SITE RECONNAISSANCE

The subject property is currently known as the Whitten Oil #1. The site was formerly known as Whitten Oil Inc, Whitty's Chevron, Whitty's Northtown Chevron, and Whitten #1. The approximately 1.4-acre site fronts the curving W. 5<sup>th</sup> Avenue (aka Highway 395) to its south in a northern portion of the City of Colville, in northern Stevens County, Washington. The site occupies nearly an entire block, fronting W. 5<sup>th</sup> Avenue to the south, W. 6<sup>th</sup> Avenue to the north, N. Lincoln Street to the west, and N. Washington Street to the east. The immediate area of the site is mostly flat, mostly level, yet slightly sloping downward to the west. Please see **Figure 2** for a site plan.

The subject property was visited by Tetra Tech personnel on May 2, 2024. Tetra Tech scientists Lola Akintomide, PhD and Jon Welge met with Mr. Casey Boyd and Mr. David Shaw during reconnaissance. Mr. Boyd and Mr. Shaw assisted with access to the site. Both were interviewed briefly and neither indicated they knew of releases that have affected the subject property. Mr. Boyd indicated he has been familiar with the subject property for more than a decade.

Tetra Tech personnel walked the perimeter of the property, performed a transect across the central portions of the property, and then visited each of the site's prominent features. Tetra Tech collected notes and photos of prominent features.

Site features documented during reconnaissance include:

- Northern pump islands
- Southern pump island
- Southeast pump island
- Convenience store
- Carwash building plus vacuums
- Large warehouse
- Metal shed
- Aboveground propane tank
- RV dump
- Underground tanks
- Pavement, drains, apparent wells
- Utilities

The northern pump islands include two parallel pump islands that each have multiple dispensers (1-10). The islands are generally oriented lengthwise east-west and have concrete aprons. The southern island of these northern islands is sheltered by a canopy carrying the Pacific Pride logo. The dispensers generally supply diesel, but also dyed diesel, premium, and unleaded. Also, according to the site manager there is a separate 3,000-gallon underground tank just south of the islands that holds diesel efficiency fluid (DEF). The use of a bulk underground tank in this manner is unusual; however, it is reported that the station pumps a lot of DEF. The dispensers were examined and appeared lined during reconnaissance. The islands were apparently installed in 1991. No drains or drywells were noted nearby.

The southern pump island includes dispensers that supply diesel only or diesel, regular, mid-grade, and premium. Dispensers 1 through 6 appear located on this island, which is oriented lengthwise west northwest by east southeast, and is surrounded by a concrete apron. Modern dispensers were noted on this island, which rests under a Chevron-adorned canopy directly to the south of the convenience store building. These dispensers were examined and appear to have lined sumps. This island appears to rest in the location of the original 1930s canopy and pump island.

The southeastern pump island includes two dispensers that supply only gasoline products (regular, midgrade, and premium). The island is oriented lengthwise west northwest and east southeast, includes lined dispensers, and rests under a canopy with a Chevron logo. The island is positioned over concrete. Dispensers (7-10) appear associated with this pump island, which was installed in 2018. Overall, no significant staining was noted on pump islands. Drains are connected to an oil/water separator that reportedly leads to the city storm sewer system.

The convenience store building is a single-story, flat-roofed, approximately 1,500 square foot structure resting in the southern central portion of the subject property just north of the southern pump island. The store includes a counter area, coolers and freezers, restrooms, and a Veeder-Root automatic tank gauge (ATG) system. It is an older-appearing system. The system was engaged to print out a tank status report. No alarms were noted, and all tanks were reported to have slightly more than half of total tank volume with exception to the 10,000-gallon regular tank that had slightly less than half. No unusual odors or

staining was noted within or proximal to the store. The building appears connected to water, sewer, communications, electricity, and natural gas.

The carwash building was examined. The building is a single-story flat-roofed brick structure that includes six wash bays and an outdoor truck wash area. The western four bays are non-automated and the remaining two bays to the east are automated. The truck bay rests at the western end. Each of the bays, including the truck bay, have concrete floors and sumps that are reportedly plumbed to the sanitary sewer system. Floor drains were observed in each bay. The interior of the automated wash system maintenance room was examined. Several vacuum islands were also observed. No significant concerns, such as unusual odors, larger stains, or the presence of clogged drains were observed in wash bays. Four vent lines serving the UST nest were observed affixed to the eastern side of the carwash building. The base of the vent lines includes staining. The building appears connected to water, sewer, electricity, and natural gas. The truck wash area appears to drain to the sump beneath it, but effluent also appears to sheet flow across pavement to reach a drywell or drain at the northwest corner of the subject property that may also affect MW-7.

The large 30-foot by 70-foot metal warehouse onsite was examined along its exterior and interior. The structure is a single-story, wood-framed warehouse with corrugated metal roofing and siding. It generally faces west and has a roll-up door and two "person" doors. A garbage dumpster and a couple 55-gallon drums rest at the southern end of the building. A two-gallon bucket of oil was noted. Small propane tanks, small containers of oil, steel debris, a roller cart, trailers, a small track hoe, and a small snowplow tractor were noted along the western side of the building. The interior of the building is generally divided between food supplies and maintenance in separate rooms. The building primarily includes maintenance parts, a large air compressor, shelving, supplies to keep the fueling station running, and carwash supplies such as detergent. A separate room contains bottled pop and other similar supplies. A work bench with tools was observed. The building has insulated walls and ceilings, concrete floors, and it is connected to electricity. No usual odors or stains were observed in the warehouse structure.

A small approximately 10-foot by 10-foot metal shed building was observed adjacent to the southwestern corner of the larger warehouse. The building includes mostly disposable cups and supplies for the store. No significant concerns were observed.

An approximate 500-gallon aboveground propane storage tank (AST) rests in the central eastern portion of the subject property. It is surrounded by protective bollards. The tank appears used to fill RV propane tanks. No odors or other concerns were noted with the AST.

An RV septic system dump that is reportedly connected with the sewer system locally was observed on the northern side of the subject property. A water spigot was observed next to the dump, as was a suspected second connection. No unusual odors were noted of the system.

The current underground petroleum storage tank (UST) system and nest was observed during site reconnaissance. Four larger underground single-walled fiberglass tanks rest beneath an approximately 36-foot by 46-foot concrete pad resting on the southern central portion of the subject property. The tanks are oriented lengthwise east and west. Fill ports and turbine sumps were observed. Typical staining was found during inspection; however, no unusual odors or obvious releases were identified.

Observation wells CW-1 and CW-2 were observed at opposite ends of the UST nest. It appears these wells were installed as routine observation wells during the installation of the USTs in 1989. It is not

suspected the wells were installed as part of a site characterization effort during that timeframe. It is notable that no well construction data was found during records review.

The following is a list of the current USTs onsite from north to south:

- 10,000-gallon tank holding regular grade gasoline (white)
- 10,000-gallon tank holding red-dyed (off-road) diesel (green)
- 6,000-gallon tank holding premium unleaded (red)
- 10,000-gallon tank holding regular (on-road) diesel (yellow)

Underground petroleum supply lines connect the four USTs to three separate pump islands (northern, southern, and southeastern). Generally, the lines were reported to take the shortest distances from tanks to dispensers. This would include lines running from the UST nest to the east to connect the southern and southeast dispenser islands, and a set of lines running north to connect the northern pump island. It was reported that at one time, diesel lines were routed around the east side of the former gasoline station building to connect to a diesel load rack at the northeastern corner of that building (replaced by the current store). Those lines have reportedly been abandoned.

Generally, pavement across the site is in average condition. Newer pavement is located on the eastern portion of the subject property where the former Fogle Pump building was once located. The pavement on the central, northern, and western portions of the subject property appears older. Numerous pavement cuts were observed north of the convenience store. It is suspected the cuts were made during rerouting of utilities such as sewer, water, and power – and possibly to accommodate petroleum lines.

Numerous flush-mount groundwater monitoring well and utility port access lids were observed across the subject property. These lids were left undisturbed. Markings designating certain wells were not found, but such markings are usually short-lived due to vehicle traffic. The condition of the lids varied significantly.

Parking lot and gas station pad drains were found in multiple locations onsite. Photographs were collected of each drain. It appears many of the drains are new and some are reportedly connected to the local stormwater system along W. 5<sup>th</sup> Avenue. A round drywell type drain appears located near the northwest corner of the property in the vicinity of MW-7. The drain was found with pooled water a foot or two below the proximal ground surface. Any internal connection to the stormwater system could not be observed.

Utilities serving the subject property include water, electricity, sewer, storm sewer, natural gas, and communication utilities. Pole mounted transformers were observed on poles along W. 6<sup>th</sup> Avenue. None of the transformers appeared to be leaking.

# 6. CONCLUSIONS AND RECOMMENDATIONS

The subject property has been used as a gasoline station and bulk fuel storage facility from the 1930s through the current timeframe. Records provide evidence of significant releases and suggest the likelihood of additional releases of petroleum over the 85-90 years of site uses. There is evidence of releases from underground tanks, but records also suggest a likelihood of releases from pumps island dispensers, the diesel rack, petroleum supply lines, automotive services and maintenance activities, drums of oil and petroleum, and from weekly tank filling activities.

The primary documented releases were identified during the 1989 closure of seven decaying steel underground tanks at the southern and eastern portions of the subject property. Several small 550 gallon or similar tanks (Tanks 1-3, Delta 1990) were removed from an area proximal to the west side of the gasoline station building at the time. Two larger 10,000 to12,000-gallon tanks and a smaller tank were removed from the area north of the gasoline station building. Tank 4, a 12,000-gallon two-compartment UST that held diesel and gasoline, was closed-in-place under the gasoline station building at the time due to the inability to access the UST under the building. Tank 4 was reported to have had holes (Delta 1990); however, most of the old steel tanks are suspected to have been leaking. A total of six steel tanks were removed and the larger Tank 4 was closed-in-place and left beneath the former gasoline station structure. Reports indicate 1,200 cubic yards of petroleum-contaminated soil was removed during excavation and closure activities; however, removal is not suspected of soils that were proximal to Tank 4.

Subsequent sampling completed by Delta Environmental Consultants in 1990 found elevated concentrations of petroleum in groundwater and soil. At the time, the highest concentration of contaminants in groundwater were found at MW-2, which included a 1,643  $\mu$ g/L (micrograms per liter or parts per billion) concentration of benzene, far in exceedance of the current 5  $\mu$ g/L cleanup level.

While Delta stated that remaining contaminated soil poses little threat to humans or the environment, and that dissolved phase hydrocarbons in groundwater appear restricted to the immediate vicinity of the former UST basin (Delta 1990), the lateral extent of contamination was left undermined.

Subsequent records suggest the original gasoline station building was demolished and a new convenience store building was constructed in its place in 1997. No record of removal of the closed-in-place 12,000-gallon diesel/gasoline UST (Tank 4) and presumed adjacent contaminated soil was discovered in building department records, which suggests the UST and possible source soil remain buried beneath the northern part of the modern convenience store structure today (see **Exhibit 6**, right).

An Initial Investigation (I.I.) by Ecology in 2011 indicated the need to characterize the extent of contamination on the subject property stemming from the 1989-discovered releases. A subsequent 2013 Site Hazard Assessment (SHA) by Ecology indicated it "reserves the right to initiate further investigation at this site if new information indicates a potential or actual threat to human health of the environmental through the release of hazardous substances" (Ecology 2013).

Studies conducted of the site since 1989 do not appear extensive or dependable enough to provide a defensible understanding of site conditions. The initial study by Delta did not uncover the lateral extent of contamination, and none of the prior studies found included use of standard tools to characterize soil and groundwater, including but not limited to:

• Implementation and use of a professional land survey to determine the exact horizontal and vertical positioning of wells for the purposes of determining groundwater elevations and the adequate characterization of the direction of groundwater flow.

- Use of a standard suite of chemical analyses, regular sampling interval, and consistent well network over time.
- Groundwater monitoring data does not appear to include observation of groundwater parameters such as temperature, pH, conductivity, dissolved oxygen, turbidity, etc. These parameters may be useful in characterizing processes that may be related to natural degradation of the fuels in groundwater.
- It does not appear standard and reliable EPA low-flow minimal-drawdown sample collection methods were used to collect samples. Variations in sampling procedures could result in inconsistent sampling results.
- It appears electric pumps were used to collect groundwater samples instead of peristaltic pumps. Depending on the type of pumps and sampling procedures employed, this could result in inconsistent and low bias results, particularly for VOC analyses.
- No groundwater monitoring forms were found and the amount of purging and the sample collection depth prior to sample collection does not appear reported.
- QAQC and data validation was not found explained in prior reports.
- The original wells MW-1 and MW-2 appear to be in excavation backfill, which is presumably different than native clayey material, and may lead to misleading results.
- The construction details of wells CW-1 and CW-2 were not found, and considering these wells were installed during the original UST nest as observation wells, sampling these wells may be inappropriate and may lead to misleading results. It should be noted, Delta did not sample these wells.
- It appears likely a closed-in-place former diesel and gasoline UST that leaked may rest underneath the northern portion of the convenience store, upgradient of CW-2 and MW-4. If so, this may explain the elevated diesel and gasoline concentrations in those wells.
- A September of 2023 analytical result indicates a concentration of 34,100 μg/L of diesel in groundwater at MW-7; however, this result may not be representative based on the following evidence:
  - o Laboratory analytical data shows 10 dilutions were required to analyze that sample, and elevated method detection limits were observed for diesel and other constituents.
  - Subsequent sampling in March of 2024 could not be completed due to sedimentation of that same well.
  - Aerial photographs suggest runoff from the nearby truck wash and pooling from rainwater affects the area of MW-7, which may have contributed to the elevated diesel concentration in the well September of 2023 and sedimentation of the well found in March of 2024.
  - o A nearby drywell was observed during reconnaissance with significant standing water, which suggests it may also have received significant sediment runoff through time.

Considering that petroleum is regularly discovered in all wells sampled, and that questions remain surrounding the closed-in-place UST, it is apparent the sources and extent of contamination onsite has not

been revealed. In conclusion, although significant sampling work was completed initially in 1990 and over the past seven years, the results do not appear to characterize the breadth and depth and concentration of contaminants in soil and groundwater across the site.

Given that Ecology and others have expressed concerns regarding the spread of contaminants onsite through time, Tetra Tech recommends a remedial investigation consistent with MTCA requirements that characterizes the breadth, depth, and concentration of the releases of petroleum to soil and groundwater, confirms the location and status of the closed-in-place UST, that maps the former and current well locations and elevations. Further, a magnetometer and/or ground-penetrating radar survey of former UST areas can assist in determining the locations of former USTs and supply lines that may remain.

Tetra Tech is in receipt of hundreds of records pertaining to the subject property. The records reviewed are generally referenced within this document. Due to the number of records, we did not include all of these documents in appendices. Electronic copies of all records reviewed are available upon request.

# **LIMITATIONS**

This report was compiled based partially on information supplied to Tetra Tech from outside sources and other information in the public domain. The conclusions and opinions herein are based on the information Tetra Tech obtained in compiling the report. This information is on file at Tetra Tech's office in Spokane, Washington. Tetra Tech makes no warranty as to the accuracy of statements made by others which may be contained in the report, nor are any other warranties or guarantees, expressed or implied, included or intended by the report except that it has been prepared in accordance with the current generally accepted practices and standards consistent with the level of care and skill exercised under similar circumstances by other professional consultants or firms performing the same or similar services. Because the facts forming the basis for the report are subject to professional interpretation, differing conclusions could be reached. Tetra Tech does not assume responsibility for the discovery and elimination of hazards that could possibly cause accidents, injuries, or damage. Compliance with submitted recommendations or suggestions does not assure elimination of hazards or the fulfillment of client's obligations under local, state, or federal laws or any modifications or changes to such laws. None of the work performed hereunder shall constitute or be represented as a legal opinion of any kind or nature but shall be a representation of findings of fact from records examined.

Please email or call anytime if you'd like to discuss (509) 263-5737.

# APPENDIX B Ecology Records Matrix

Date	Report or Action	Author	Subject Release	Summary Result	Reference	Data source
4/21/1986	Washington State Underground Storage Tank Notification Form	CJ Whitten of Whitten Oil	N/A	Completed Washington State Underground Storage Tank (UST) Notification form for 4 active and 3 inactive USTs. The inactive tanks appear older than 1966, so the form may be in error. All tanks and piping are steel and none of the tanks have cathodic protection.	Whitten Oil 1986. Underground Storage Tank Notification Form. Washington State Department of Ecolog (Ecology) form. Form dated April 21.	Ecology
5/26/1989	Underground Storage Tank Location and Indentification List	Whitten Oil	N/A	List of Whitten Oil's sites and locations of USTs. The details in the list includes site name and address, the # of tanks reported, tank #1D, tank size, year installed and tank status. A total of 7 tanks are listed for the site. The form indicates the tanks were all installed in 1968, which may be in error. The form indicates tanks 1-4 are active and that tanks 5-7 are temporarily out of service.	Whitten Oil 1989. Underground Storage Tank (UST) Inventory (Locations and Details). May 26.	Ecology
9/20/1989	LTR Underground Storage Tank Contamination	Ecology Letter to Jeff Whitten / Whitten Oil	Petroleum release due to USTs as reported by Jeff Whitten	Ecology's letter to Jeff Whitten (VP) regarding UST contamination on the site as reported by Whitten. <u>Does not describe circumstances of release or quantity</u> . Describes the next steps such as site characterization. Confirmed conversation during the site visit and provided federal regulations and a draft guidance document to deal with concerns. Listed and described the actions Ecology may take to impose cleanup.	Ecology 1989. Letter Re: Underground Storage Tank Contamination at the 300 Block of 5th Street, Colville, Washington. Sepetember 20.	Ecology
10/10/1989	LTR of acknowledge receipt of Sept. 20, 1989 letter from Ecology	Whitten Oil	N/A	Letter to Ecology acknowledging receipt of the letter dated September 20, 1989 and provides contact of technical service provider chosen to remediate the site.	Whitten Oil 1989. Letter of acknowledge receipt of Sept. 20, 1989 letter from Ecology. October 10.	Ecology
11/14/1989	LTR from Whitten indicating correction of USTs	Whitten Oil	N/A	Whitten Oil's Letter to Ecology specifying actual number of USTs at Site #7372. Attached to the letter was a WA UST notification form and a list including the site number, name, address, number of tanks, tank ID, tank size, tank status, and year installed.	Whitten Oil 1989. Notice of Numbers of Tanks at Whitten Properties. November 14.	Ecology
11/15/1989	LTR from Federated Insurance notifying that Delta will be investigating.	Federated Insurance	N/A	Letter from Federated to Ecology to inform of an environmental consulting firm retainment (Delta) to conduct an environmental investigation and perform any necessary remedial activities.	Federated Insurance 1989. Letter to Ecology informing of action. Claim No: 832-408, Insured: Whitten Oil Co. November 15.	Ecology
11/30/1989	UST Adjustments - Tank Changes Form	Whitten Oil	N/A	UST Adjustments form - Tank Changes Action, Requested From Program Form by Whitten Oil, Inc	Whitten Oil 1989. UST Adjustments - Tank Changes Action Requested From Program. November 30.	Ecology
3/12/1990	LTR and Phase 1 Environmental Site Assessment Report	Delta Environmental Consultants (Delta)	Subsurface Hydrocarbon Release from LUST	Letter from Delta Consultants to Whitten Oil that includes a Phase I ESA report. The Phase I was completed prior to standardization includes sampling and analysis. The field activities and data analyses at the Whitten Oil facility concludes that the contamination—dissolved hydrocarbon in groundwater— is restricted to the former UST vicinity and poses little threat to humans or the environment at the time. Some soil samples collected in apparent backfill areas from recent contaminated soil excavation. Only limited samples collected across the site.	Delta Environmental Consultants (Delta) 1990. Phase I Environmental Site Assessment Report of Whitten Oil Company, 370 West 5th Avenue, Colville, WA. March 12.	Ecology, Vertex
3/22/1990	LTR to Ecology forwarding the Phase 1 Environmental Assessment Report	Delta	Subsurface Hydrocarbon Release from LUST (ID 1990)	Letter to Ecology presenting the Phase I Environmental Site Assessment Report.	Delta 1990. Letter to Ecology transmitting Phase I Environmental Site Assessment Report of Whitten Oil. March 22.	Ecology
5/16/1990	Notice of Permanent Closure of Underground Storage Tanks.	Ecology	N/A	Letter to tank owners to complete the enclosed Washington State Notification Forms and copies of the original notifications submitted in 1986.	Ecology 1990. Notice of Permanent Closure of USTs. May 16.	Ecology
5/16/1990	LTR with enclosed WA notification forms	Ecology	N/A	Ecology's letter forwarding the WA notification forms and notice of permanent closure form. Describes the steps for tank replacement and the new ID numbers.	Ecology 1990. Washington notification forms and notice of permannent closure form. May 16.	Ecology
5/22/1990	Washington State Underground Storage Tank Notification Form	Ecology	N/A	Completed Washington State Underground Storage Tank Notification Form for four USTs.	Ecology 1990. Underground Storage Tank Notification Form. May 22.	Ecology
5/22/1990	Notice of Permanent Closure of Underground Storage Tanks.	Ecology form completed by Whitten Oil Inc.	N/A	Whitten Oil, Inc. completed the Notice of Permanent Closure of UST form for seven USTs, and Petroleum, Inc. completed the closure. One of the USTs was closed in place using slurry concrete, and the other USTs were removed.	Whitten Oil 1990. Notice of Permanent Closure of USTs. May 22.	Ecology
9/13/1990	LTR from Ecy to White Shield requesting for file on Whitten Oil Co	White Shield, Inc	N/A	Letter requested a copy of the file on Whitton (Whitten) Oil Co. (Exxon Station, 5th Avenue in Colville, Washington) from Ecology. Received by Ecology on 9/14/1990.	White Shield 1990. Requesting a file on Whitton, Oil Co. (Exxon Station, 5th Avenue in Colville, Washington). September 13.	Ecology
11/15/1990	LTR regarding 1991 UST Tank registration invoices	Whitten Oil Co.	N/A	Enclosed are Ecology Form 020-32 and 1991 tank registration invoices for all Whitten Oil Co., Inc. Changes to site #7372. The tank numbers (tanks 1-11) were adjusted. The certification of compliance and UST adjustment form were attached.	Whitten Oil 1990. Ecology Form 020-32 and Letter on the 1991 tank registartion forms for Whitten Oil locations. November 31.	Ecology
11/15/1990	Underground Storage Tank Self- Certification of Compliance Form	PEI and Whitten Oil Co.	N/A	The certification of compliance completed by Whitten Oil Co., Inc. and Petroleum Equipment Inc. (PEI). Includes forms from 5/1990	Whitten Oil 1990. Certification of Compliance - includes PEI information. November 15.	Ecology
12/31/1990	Underground Storage Tank Billing Invoice	Ecology for Whitten Oil Inc.	N/A	Underground Storage Tank Billing Invoice of \$420.00 due to Ecology from whitten Oil Inc. due on 12/31/1990. Address correction was requested (Note: included within 5-22-90 document)	Whitten Oil 1990. Underground Storage Tank Billing Invoice. December 31.	Ecology
1/28/1991	UST Adjustments - Tank Deletions Form	Ecology form completed by Whitten Oil Inc.	N/A	Four completed UST Adjustments—Tank Deletions Form. Comments on the form: "We only have four replacement tanks, and an additional three tanks were removed before the deadline." The form includes vague quantities and does not disclose tank contents.	Whitten Oil 1991. Form A. UST Adjustments - Tank Deletions Form. January 28.	Ecology

5/15/1991	Underground Storage Tank Self- Certification of Compliance Form	Ecology form completed by Whitten Oil Inc.	N/A	Completed Underground Storage Tank Self-Certification of Compliance Form for four USTs.	Whitten Oil 1991. Underground Storage Tank Self-Certification of Compliance Form. May 15.	Ecology

The lines from the four USTs on this site passed the test. Attached is the Precison Line Test Data.	Whitten Oil 1997. UST Tightness Testing Checklist. March 18.	Ecology
3/24/1998	UST Tightness Testing Checklist	Ecology form completed by Jensen and Whitten Oil Inc.	N/A	Completed Ecology's Precision Line Test Data for Site #7372 by Jensen Tank Testing. The four USTs on this site passed the test. Attached is the Precison Line Test Data.	Whitten Oil 1998. UST Tightness Testing Checklist. March 24.	Ecology
10/13/1998	LTR on Notice of Facility Compliance Tagging program	Ecology	N/A	Ecology's letter about the new law - the Facility Compliance Tagging Program that affects owners and operators of regulated USTs. Discusses ease of upgrading USTs to meet 12/22/1998 standards.	Ecology 1998. Facility Compliance Tagging Program. October 13.	Ecology
3/16/1999	UST Tightness Testing Checklist	Ecology form completed by PNE and Whitten Oil Inc.	N/A	Completed Ecology's Precision Line Test Data for Site #7372 by Pacific Environmental Services Company. The lines of the four USTs on this site passed the test. Attached is the Precison Line Test Data.	Whitten Oil 1999. UST Tightness Testing Checklist. March 16.	Ecology
3/20/2000	UST Tightness Testing Checklist	Ecology form completed by Whitten Oil Inc.	N/A	Completed Ecology's Precision Line Test Data for Site #7372 by Pacific Environmental Services Company. The four USTs on this site passed the test. Attached is the Precison Line Test Data.	Whitten Oil 2000. UST Tightness Testing Checklist. March 20.	Ecology

3/15/2001	UST Tightness Testing Checklist	Ecology form completed by Whitty #1	N/A	Completed Ecology's Precision Line Test Data for Site #7372 by Pacific Environmental Services Company. The four USTs on this site passed the test. Attached is the Precison Line Test Data.	Whitty's Chevron 2001. UST Tightness Testing Checklist. March 15.	Ecology
3/20/2002	UST Tightness Testing Checklist	Ecology form completed by Whitty's Chevron	N/A	Completed Ecology's Precision Line Test Data for Site #7372 by Pacific Environmental Services Company, The four USTs on this site passed the test. Attached is the Precison Line Test Data. A leak detector appears to have failed during the test for the Plus tank. Repairs were made.	Whitty's Chevron 2002. UST Tightness Testing Checklist. March 20.	Ecology
4/23/2002	UST Tightness Testing Checklist	Ecology form completed by Whitten Oil Inc.	N/A	Completed Ecology's UST Tightness Testing Checklist for Site #7372 by Pacific Environmental Services Company. The UST #1 passed the test after it had failed lead detector before (LD).	Whitten Oil 2002. UST Tightness Testing Checklist. April 23	Ecology
5/13/2002	UST Tightness Testing Checklist	Ecology form completed by Whitten Oil Co.	N/A	Completed Ecology's UST Tightness Testing Checklist for Site #7372 by Pacific Environmental Services Company. The single line for the plus UST on this site passed the test. This was sent to Ecology.	Whitten Oil 2002. UST Tightness Testing Checklist. April 23. May 13.	Ecology
3/10/2003	UST Tightness Testing Checklist	Ecology form completed by Whitten #1.	N/A	Completed Ecology's Line Tightness Testing Checklist for Site #7372 by Pacific Environmental Services Company. The four lines passed the test. Attached is the Precison Line Test Data.	Whitten #1. March 10, 2003. UST Tightness Testing Checklist	Ecology
5/1/2003	LT R on Notice of compliance inspection. UST 7372	Ecology	N/A	Ecology's Letter notified Whitten Oil, LLC of an upcoming compliance inspection of UST system records and equipment in accordance with WA's UST regulation (Washington Administrative Code 173-360).	Ecology 2003. Re: UST Site 007372, Whitten's #1, Colville, WA. May 01.	Ecology
5/16/2003	UST Site/Tank Data Summary	Ecology	N/A	Ecology's Toxics Cleanup Program - Integrated Site Information System UST Site/Tank Data Summary as of 05/16/2023. Site comments stated that "Re-enetered data from prime and JMS. Changes site address per tightness test. Tanks 8, 9, 10, 11 meet 1998 standards". This doument inventories USTs and closed tanks onsite. There are 4 active and 7 closed tanks.	Ecology 2003. Toxics Cleanup Program, Intergated Site Information System UST Site/Tank Data Summary. May 16.	Ecology
6/17/2003	UST Site Inspection Form	Ecology	N/A	Completed Ecology's UST Site Inspection form. Information on the checklist included recordkeeping requirements and equipment checks. Most systems and equipment were compliant, except for turbine sumps (not free of liquid) and dirty spill buckets.	Ecology 2003. Stevens County. UST ID#: 7372. UST Site Inspection. June 17.	Ecology
4/13/2005	UST Tightness Testing Checklist	Ecology form completed by Whitty #1.	N/A	Completed Ecology's UST Tightness Testing Checklist for Site #7372 by Northwest Petroleum and Equipment Systems. The USTs and lines on the site passed the test.	Whitty Northtown Chevron 2005. UST Tightness Testing Checklist. April 13.	Ecology
2/23/2006	LDH Investments Contact Info	Notes	N/A	LDH Contact Information from Ecology or Other notes.	Miscellaneous Notes	Ecology
8/11/2007	UST Site Inspection Form	Ecology	N/A	Completed Ecology's UST Site Inspection form. Information on the checklist included recordkeeping requirements and equipment checks. All systems and equipment were compliant.	Ecology 2007. Stevens County. UST ID#: 7372. UST Site Inspection.	Ecology
8/21/2007	UST Notice of Non-Compliance	Ecology	N/A	Ecology sent a UST Notice of Non-Compliance for violation 10 - failure to monitor tanks and/or piping for releases adequately. Due to low product, no monthly test was available for super lead.	Ecology 2007. UST Notice of Non-Compliance. State of Washington. August 21.	Ecology
8/21/2007	UST Tightness Testing Checklist	Ecology form completed by Whitty's Chevron	N/A	Completed Ecology's UST Tightness Testing Checklist for Site #7372 by Northwest Fuel Systems. The lines on the site passed the test. Received by Ecology on 10/10/2007.	Whitty Northtown Chevron 2007. UST Tightness Testing Checklist. August 21.	Ecology
8/27/2007	LTR on Notice of Non-Compliance and Compliance Schedule Requirements	Ecology	N/A	Ecology's letter informed Whitty's LLC of violations of the UST regulations, such as the failure to properly monitor tank releases observed during a compliance inspection. Ecology requested that proof of passing tests for tanks be conducted and sent each month for the next three months, and the service provider verified that the tanks are equipped with ball float valves for overfill protection. Plus additional records.	Ecology 2007. Re: Notice of Non-Compliance and Compliance Schedule Requirements for UST Site. ID # 7372, Whitty's Northtown Chevron , Colville, WA. 99205. August 27.	Ecology
12/6/2007	Leak Test Report for USTs	Whitty's No. 1	N/A	Print out of In-Tank leak test report for the four USTs. All USTs passed the leak test.	Whitty's 1 2007. 370 W . 5th Colville, WA. 99114. Leak Test Report for USTs. December 06.	Ecology
8/1/2009	UST Tightness Testing Checklist	Ecology form completed by Whitty Northtown Chevron.	N/A	Completed Ecology's UST Tightness Testing Checklist for Site #7372 by Northwest Fuel Systems. The USTs passed the test.	Whitty Northtown Chevron 2009. UST Tightness Testing Checklist. August 01.	Ecology
7/8/2010	UST Tightness Testing Checklist	Ecology form completed by Whitty's Chevron	N/A	Completed Ecology's UST Tightness Testing Checklist for Site #7372 by Northwest Fuel Systems. The lines passed the test.	Whitty Chevron 2010. UST Tightness Testing Checklist. July 08.	Ecology

8/20/2010	UST Tightness Testing Checklist	Northwest Tank & Environmental Services, Inc.	N/A	Completed Ecology's UST Tightness Testing Checklist for Site #7372 by Northwest Fuel Systems. The lines passed the test.	Northwest Tank & Environmental Services, Inc. 2010. UST Tightness Testing Checklist. August 20.	Ecology
5/25/2011	LTR on notice of compliance inspection. UST 7372	Ecology	N/A	Ecology's Letter notified Aditi Sood of the upcoming compliance inspection of UST system records and equipment in accordance with WA's UST regulation (Washington Administrative Code 173-360).	Ecology 2011. Re: UST Site 007372, Whitty's Chevron, 370 W. 5th Ave., Colville, WA. May 25.	Ecology, Vertex
7/14/2011	UST Site Inspection Form	Ecology	N/A	ECY Nalley completed Ecology's UST Site Inspection form. Information on the checklist includes recordkeeping requirements and equipment checks. The pressure and annual lines tightness were non-compliant for dyed diesel. The lines on north island are possibly in contact with ground (steel).	Ecology 2011. Stevens County. UST ID#: 7372. UST Site Inspection. July 14.	Ecology, Vertex
7/14/2011	Leak Test Report for USTs	Whitty Northtown Chevron	N/A	Print out of the leak test report for the four USTs. Two USTs failed the leak test.	Whitty Northtown Chevron 2011. 370 W. 5th Colville, WA. 99114. July 14. Leak Test Report for USTs.	Ecology, Vertex
7/14/2011	UST Notice of Non-Compliance	Ecology	N/A	Ecology sent a UST Notice of Non-Compliance of violation 10- failure to monitor tanks and/or piping for releases properly. Dyed diesel failed the monthly test.	Ecology 2011. UST Notice of Non-Compliance. July 14,	Ecology, Vertex
10/10/2011	Initial Investigation/File Review	Ecology	20g Diesel AST	Ecology's investigator completed the initial site investigation. Describes the site history, comments about the soil and groundwater contamination, and recommends Site Hazard Assessment based partly on inadequate characterization in 1990.	Ecology 2011. Initial Site Investigation. Incident #: 79346. October 10.	Ecology, Vertex
12/29/2011	UST Tightness Testing Checklist	LDH investments Inc. Whitty's Northtown Chevron	N/A	Completed Ecology's UST Tightness Testing Checklist for Site #7372 by Northwest Tank & Environmental Services, Inc. The USTs and Lines passed the test. Received by Ecology on 01/13/2012.	LDH Investments Inc 2011. UST Tightness Testing Checklist. December 29	Ecology, Vertex
1/14/2013	UST Tightness Testing Checklist	LDH investments Inc. Whitty's Northtown Chevron	N/A	Completed Ecology's UST Tightness Testing Checklist for Site #7372 by Northwest Tank & Environmental Services, Inc. The USTs and Lines passed the test. Received by Ecology on 01/14/2013.	LDH Investments Inc 2013. UST Tightness Testing Checklist.  January 14	Ecology, Vertex
2/12/2013	LTR : Status Update Report	Ecology	Release of hazardous substances	Letter summarized Ecology's update on the regulatory status of Whitty's Chevron site and offered guidance on resolving previously reported environmental issues. Letter informed that the site status has been updated to cleanup started. A SHA will be conducted for the site.	Ecology 2013a. Re: Site Name: Whitty's Chevron. Site Address: 370 West 5th Avenue. Site Status Update. Feburary 12.	Ecology
3/4/2013	SHA: Whitten Oil 1	Ecology	N/A	Ecology informed Whitten Oil #1 of the upcoming SHA and that the site listed as a Confirmed and Suspected Contaminated Site (CSCS). The list and status have been updated for cleanup. The process and purpose of SHA and the ranking of the site were discussed.	Ecology 2013b. Re: Site Hazard Assessment: Whitten Oil 1. March 04.	Ecology, Vertex
4/30/2013	UST Tightness Testing Checklist	LDH investments Inc. Whitty's Northtown Chevron	N/A	Completed Ecology's UST Tightness Testing Checklist for Site #7372 by Northwest Tank & Environmental Services, Inc. The tasnk 2 and 4 tested only, and both passed the test. Received by Ecology on 05/22/2013.	LDH Investments Inc. 2013. UST Tightness Testing Checklist. April 30.	Ecology, Vertex
8/12/2013	Site Hazard Ranking	Ecology	Release of hazardous substances	Ecology's letter informed Whitty's Chevron of the site's hazard ranking (#4) from the completed site Hazard Assessment (SHA) required under the Model Toxics Control Act. The ranking will be published in the next Special Issue of the Site Register. The SHA, route documentation, surface water route, and groundwater route worksheets were attached.	Ecology 2013c. Re: Site Hazard Assessment: Whitten Oil #1. Ecology Fcaility Site ID No: 49354234. August 12.	Ecology, Vertex
8/23/2013	Incident Detail Report	Ecology	20g Diesel AST	Report described the diesel oil release, incident information, caller information, incident location, what happened, PRP, References to spills, prevention, preparedness, and response.	Ecology 2013d. Incident Detail Report. Incident #: 79346. August 23.	Ecology
8/23/2013	ERTS Incident #643353. 12/27/2017	LTR on RE:Acceptance of VCP application for the Whitten Oil 1.	Ecology	N/A	Ecology's letter on the acceptance of the VCP application for the site. The letter included the agreement, identification number, designated ecology manager, request for written opinions, reported requirements, payment, and contact information. Attachments include a copy of the signed VCP agreement (between Ecology and Fulcrum Enviro: Consulting, Inc., and the Toxics Cleanup Program Policy 840: Data Submittal requirements.	Ecology 2017b. Re: Acceptance of VCP application for the following Contaminated Site. December 27.	Ecology, Vertex
6/19/2018	Groundwater Monitoring September 2017 Sampling Report	Fulcrum Environmental Consulting, Inc	No Specific Release Identified	Monitoring wells CW-1, CW-2, MW-3, MW-4, and MW-6 were sampled and analyzed for VOCs benzene, toluene, ethylbenzene, total xylenes (BTEX) and for total petroleum hydrocarbons in the gasoline range (NWTPH-Gx or just TPH-Gx). Petroleum contaminants were found in MW-3 and MW-4 that did not exceed Model Toxics Control Act (MTCA) Method Cleanup Levels (cleanup levels or CULs, as listed on Table 720-1 in MTCA statute and regulation, 173-340 WAC). Fulcrum recommended continued sampling.	Fulcrum Environmental Consulting 2018a. Whitten Oil Groundwater Monitoring September 2017 Sampling Report. Whitty's Chevron, 370 West 5th Avenue, Colville, Washington 99114. Project number: 172206.00. June 19.	Ecology
6/19/2018	Groundwater Monitoring December 2017 Sampling Report	Fulcrum Environmental Consulting, Inc	No Specific Release Identified	Monitoring wells CW-1, CW-2, MW-3, and MW-4 were sampled and analyzed for BTEX and TPH-Gx. MW-6 was found frozen with ice and was not sampled at the time. Petroleum contaminants were found in both MW-3 and MW-4. MW-4 was found with 6.81 µg/l (micrograms per liter, parts-per-billion, or ppb) of benzene, a concentration exceeding the 5 µg/l cleanup level. Fulcrum recommended continued sampling.	Fulcrum Environmental Consulting 2018b. Whitten Oil Groundwater Monitoring December 2017 Sampling Report. Whitty's Chevron, 370 West 5th Avenue, Colville, Washington 99114. Project number: 172206.00. June 19.	Ecology
6/19/2018	Groundwater Monitoring March 2018 Sampling Report	Fulcrum Environmental Consulting, Inc	No Specific Release Identified	Monitoring wells CW-1, CW-2, MW-3, MW-4, and MW-6 were sampled and analyzed for BTEX and TPH-Gx. Petroleum contaminants were found in MW-4 and MW-6 that did not exceed cleanup levels. Fulcrum recommended continued sampling.	Fulcrum Environmental Consulting 2018c. Whitten Oil Groundwater Monitoring March 2018 Sampling Report. Whitty's Chevron, 370 West 5th Avenue, Colville, Washington 99114. Project number: 172206.00. June 19.	Ecology
6/19/2018	Groundwater Monitoring June 2018 Sampling Report	Fulcrum Environmental Consulting, Inc	No Specific Release Identified	Monitoring wells CW-1, CW-2, MW-3, MW-4, and MW-6 were sampled and analyzed for BTEX and for TPH-Gx. Petroleum contaminants were found in MW-4 and MW-6. MW-4 was found with $5.84  \mu g/l$ of benzene, a concentration exceeding the $5  \mu g/l$ cleanup level. Fulcrum recommended continued sampling.	Fulcrum Environmental Consulting 2018d. Whitten Oil Groundwater Monitoring June 2018 Sampling Report. Whitty's Chevron, 370 West 5th Avenue, Colville, Washington 99114. Project number: 172206.00. June 19.	Ecology

7/25/2019	Automatic Line Leak Dectector Test Results	Northwest Tank & Environmental Services, Inc.	N/A	Information on the results includes company name, site name, address, test date/time, job ID number, technician name, license number, expiration date, and tightness test data (product, tank #ID, LD type, make, model, serial#, operating pressure, holding pressure, bleedback, result), and additional data for mechanical leak detectors only (metering pressure, step through time The 4 tanks passed the test.	Northwest Tank & Environmental Services 2019a. Automatic Line Leak Dectector Test Results. July 25.	Ecology, Vertex
7/25/2019	Line Tightness Test Results	Northwest Tank & Environmental Services, Inc.	N/A	Information on the results includes company name, site name, adress, UST site #ID, test date, Job ID number, technician name, license number, expiration date, and tightness test data (product, approx. lenhth, size, line material, wall type, boot back, line type, tank #ID, STP MFG, operating pressure, test pressure, isolation dispenser, isolation pump, initia;/ylinder level, final cylinder level, start time, end time, total test time, final leak rate, impact valves operational, check valve location, and result). The tests were passed.	Northwest Tank & Environmental Services 2019b. Line Tightness Test Results. July 25.	Ecology, Vertex
7/25/2019	Monitoring System Certification	Northwest Tank & Environmental Services, Inc.	N/A	This form documented testing and servicing of monitoring equipment. Information include general information about the site and testing, inverntory of equipment tested/certified, certification, results of testing/service, comments, in-tank gauging/SIR equipment, line leak detectors (LLD). The tests were passed.	Northwest Tank & Environmental Services 2019c. Monitoring System Certification. July 25.	Ecology, Vertex
10/18/2019	Groundwater Monitoring September 2019 Sampling Report	Fulcrum Environmental Consulting, Inc	No Specific Release Identified	Monitoring wells CW-1, CW-2, MW-3, MW-4, and MW-6 were sampled and analyzed for BTEX, TPH-Gx, and for TPH-Dx. Petroleum contaminants were found in CW-1, MW-3, MW-4, and MW-6 (four out of five wells). MW-4 was found with 5.06 $\mu$ g/l of benzene, a concentration exceeding the 5 $\mu$ g/l cleanup level. MW-6 was found with TPH-Dx totaling 1.440 $\mu$ g/l, exceeding the 500 $\mu$ g/l cleanup level. Fulcrum recommended continued sampling. NOTE: 9/2018 and 3/2019 data was ascertained from this report. Also, 9/2018 marks the first time Fulcrum analyzed for diesel.	Fulcrum Environmental Consulting 2019. Whitten Oil Groundwater Monitoring September 2019 Sampling Report. Whitty's Chevron, 370 West 5th Avenue, Colville, Washington 99114. Project number: 172206.00. October 18.	Ecology
4/1/2020	Groundwater Monitoring March 2020 Sampling Report	Fulcrum Environmental Consulting, Inc	No Specific Release Identified	Monitoring wells CW-1, CW-2, MW-3, MW-4, and MW-6 were sampled and analyzed for BTEX, TPH-Gx, and for TPH-Dx. Petroleum contaminants were found in CW-2, MW-3, MW-4, and MW-6 (all but CW-1). MW-4 was found with 552 µg/l of TPH-Dx and MW-6 was found with a 1,580 µg/l of TPH-Dx, both of which exceed the 500 µg/l cleanup level. Fulcrum recommended continued sampling.	Fulcrum Environmental Consulting 2020. Whitten Oil Groundwater Monitoring March 2020 Sampling Report. Whitty's Chevron, 370 West 5th Avenue, Colville, Washington 99114. Project number: 172206.00. April 1.	Ecology
1/8/2021	Monitoring Well Decomissioning / Installation and Groundwater Montoring Event for September/October 2020	Fulcrum Environmental Consulting, Inc	No Specific Release Identified	New wells installed by Fulcrum include a new MW-2, a new MW-4, a new MW-6, and an MW-7. Groundwater results from the September/October event indicated all wells but MW-3 include some concentration of petroleum. Well CW-2 was found with a combined (diesel and oil) TPH-Dx concentration of 5,347 µg/l, and the new MW-4 was found to have a concentration of 707 µg/l of TPH-Dx, which exceeds the cleanup level of 500 µg/l. The report suggests fluctuating concentrations of petroleum in groundwater may be associated with high and low groundwater elevations. Fulcrum recommended continued sampling.	Fulcrum Environmental Consulting 2021a. Whitten Oil Monitoring Well Decomissioning / Installation and Groundwater Montoring Event for September/October 2020. Whitty's Chevron, 370 West 5th Avenue, Colville, Washington 99114. Project number: 213162.00. January 8.	Ecology
5/24/2021	Groundwater Monitoring March 2021 Sampling Report	Fulcrum Environmental Consulting, Inc	No Specific Release Identified	Monitoring wells CW-1, CW-2, new MW-2, MW-3, new MW-4, and new MW-6, and the recent MW-7 were sampled for BTEX, TPH-Gx, and for TPH-Dx. Petroleum was found in all wells but CW-1. Combined TPH-Dx concentrations exceeding cleanup level were identified by the report in MW-2 (3,834 µg/l), MW-4 (1,461 µg/l), and MW-6 (500 ug/l). TPH-Gx exceeding the 800 µg/l cleanup level was found in MW-4 (1,740 µg/l), and benzene exceeding the 5 µg/l cleanup level were found in wells MW-2 (8.04 µg/l) and MW-4 (µg/l).	Fulcrum Environmental Consulting 2021b. Whitten Oil Groundwater Monitoring March 2021 Sampling Report. Whitty's Chevron, 370 West 5th Avenue, Colville, Washington 99114. Project number: 213162.00. May 24.	Ecology
7/13/2021	Released Detection and Prevention Equipment Testing Checklist for USTs	Ecology form completed by Whitty's Chevron	N/A	Completed Released the Detection and Prevention Equipment Testing Checklist for USTs on site, #7372. The four USTs on this site passed the ALLD Test and Line Tightness Test. The completed DT 890 Test forms and TEL-A-LEAK Hydrostatic Line Test Field Sheets were attached.	Whitty's Chevron 2021. Released Detection and Prevention Equipment Testing Checklist for USTs. July 21.	Ecology
7/13/2021	LDT 890 Test forms	Petroleum Technology and Testing	N/A	Information on the form includes contractor, customer, date, location, product, technician, manufacturer of submersible pump identification, manufacturer and description of leak detector identification, temper proof seal installed, leak detector in submersible pump-test at dispenser, and result of detector test. The 4 tanks passed the leak detector test.	Ecology 2022a. LDT 890 Test forms. June 21.	Ecology, Vertex

#### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

#### STANDARD ENVIRONMENTAL RECORDS

#### Lists of Federal RCRA generators

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 2 RCRA-VSQG sites within approximately 0.25 miles of the target property.

#### Lists of state- and tribal (Superfund) equivalent sites

WA HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM). As of 2024 this data is no loinger being updated.

A review of the WA HSL list, as provided by EDR, and dated 08/24/2023 has revealed that there are 2 WA HSL sites within approximately 1 mile of the target property.

#### Lists of state- and tribal hazardous waste facilities

WA CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the WA CSCSL list, as provided by EDR, and dated 01/09/2024 has revealed that there are 3 WA CSCSL sites within approximately 1 mile of the target property.

#### Lists of state and tribal registered storage tanks

WA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Ecology's Statewide UST Site/Tank Report.

A review of the WA UST list, as provided by EDR, has revealed that there are 13 WA UST sites within approximately 0.25 miles of the target property.

WA CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the WA CSCSL NFA list, as provided by EDR, and dated 01/09/2024 has revealed that there are 5 WA CSCSL NFA sites within approximately 0.5 miles of the target property.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/04/2023 has revealed that there are 8 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories. UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 8 UST FINDER sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 2 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

#### **EDR HIGH RISK HISTORICAL RECORDS**

#### **EDR Exclusive Records**

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:

The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup,

and water quality programs.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Pipe Construction: Single Wall Pipe

Pipe Primary Release Detection: Safe Suction (No Leak Detection)

Pipe Second Release Detection: Not reported
Pipe Corrosion Protection: Corrosion Resistant
Pipe Pumping System: Safe Suction
Responsible Unit: Eastern

Dispencer/Pump SFC Type: Single Wall Sump

Region: Eastern
Is Active: True
Actual Capacity: 10000
Pipe Install Date: Not reported

Compart Number: 1
Stored Substance: Diesel

Used Substance: Motor Fuel for Vehicles

Compart Capacity: 10000
Tank Manufacturer: Not reported

Environmental Interest/Information System:

The Washington Facility / Site Identification System (WA-FSIS) provides a means to guery and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the

departments air quality, dam safety, hazardous waste, toxic cleanup,

and water quality programs.

Click this hyperlink while viewing on your computer to access

additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup,

and water quality programs.

Environmental Interest/Information System:

The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the

departments air quality, dam safety, hazardous waste, toxic cleanup,

and water quality programs.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup,

and water quality programs.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many

types of information about generators, transporters, treaters,

storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters,

Click Here for FRS Facility Detail Report:

#### Environmental Interest/Information System:

The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the

departments air quality, dam safety, hazardous waste, toxic cleanup,

and water quality programs.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters,

storers, and disposers of hazardous waste.

Registry ID: 110070735616

Click Here for FRS Facility Detail Report:

### Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed

within the RCRA Information (RCRAInfo) database

110006140595 Registry ID:

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:

The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup,

and water quality programs.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many

types of information about generators, transporters, treaters.

storers, and disposers of hazardous waste.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

### STANDARD ENVIRONMENTAL RECORDS

#### Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Next Scheduled EDR Contact: 07/08/2024 Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991 Date Data Arrived at EDR: 02/02/1994 Date Made Active in Reports: 03/30/1994

Next Scheduled EDR Contact: 11/28/2011 Data Release Frequency: No Update Planned

#### Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 02/29/2024 Date Data Arrived at EDR: 03/01/2024 Date Made Active in Reports: 03/27/2024

### Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/20/2023 Date Data Arrived at EDR: 12/20/2023 Date Made Active in Reports: 01/24/2024

Number of Days to Update: 35

Source: Environmental Protection Agency Telephone: 703-603-8704

Last EDR Contact: 03/26/2024

Next Scheduled EDR Contact: 07/08/2024 Data Release Frequency: Varies

### SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 01/29/2024 Date Data Arrived at EDR: 02/01/2024 Date Made Active in Reports: 02/22/2024

Number of Days to Update: 21

Source: EPA Telephone: 800-424-9346

Last EDR Contact: 04/02/2024

Next Scheduled EDR Contact: 07/22/2024 Data Release Frequency: Quarterly

#### Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

#### Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/04/2023 Date Data Arrived at EDR: 12/06/2023 Date Made Active in Reports: 12/12/2023

### Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/04/2023 Date Data Arrived at EDR: 12/06/2023 Date Made Active in Reports: 12/12/2023

#### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/04/2023 Date Data Arrived at EDR: 12/06/2023 Date Made Active in Reports: 12/12/2023

Next Scheduled EDR Contact: 07/01/2024 Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation
and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database
includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste
as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate
less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/04/2023 Date Data Arrived at EDR: 12/06/2023 Date Made Active in Reports: 12/12/2023

#### Lists of state- and tribal hazardous waste facilities

CSCSL: Confirmed and Suspected Contaminated Sites List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 01/09/2024 Date Data Arrived at EDR: 01/11/2024 Date Made Active in Reports: 04/02/2024

Number of Days to Update: 82

Source: Department of Ecology Telephone: 360-407-7200 Last EDR Contact: 04/10/2024

#### State and tribal institutional control / engineering control registries

INST CONTROL: Institutional Control Site List

The Environmental Covenants Registry is a list of sites that have implemented institutional controls as part of the remedy. Institutional controls are administrative or legal measures used to prevent activities that may compromise the integrity of a cleanup action. They are meant to prevent exposure to contamination remaining on site. Institutional controls may include environmental covenants (also known as "deed restrictions"), zoning restrictions, public health advisories, or other administrative tools. The most common institutional control is an environmental covenant. Environmental covenants are legal recorded documents that typically limit certain uses of the property, such as: Drilling a water supply well on the property. Disturbing pavement covering contaminated areas. Residential use of the property.

## ADDITIONAL ENVIRONMENTAL RECORDS

#### Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

#### EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013 Date Data Arrived at EDR: 03/21/2014 Date Made Active in Reports: 06/17/2014

#### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017 Date Data Arrived at EDR: 05/08/2018 Date Made Active in Reports: 07/20/2018

### SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

#### US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

#### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

#### PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST\_HANDLING\_INSTR), Non-hazardous waste description (NON\_HAZ\_WASTE\_DESCRIPTION), DOT printed information (DOT\_PRINTED\_INFORMATION), Waste line handling instructions (WASTE\_LINE\_HANDLING\_INSTR), Waste residue comments (WASTE\_RESIDUE\_COMMENTS).

#### PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention, ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

#### PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

### PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

### PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

#### PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

### PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

### AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

#### **EDR HIGH RISK HISTORICAL RECORDS**

### **EDR Exclusive Records**

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

# **GEOCHECK®-PHYSICAL SETTING SOURCE ADDENDUM**

### **TARGET PROPERTY ADDRESS**

WHITTEN OIL #1 370 W. 5TH AVENUE COLVILLE, WA 99114

### **TARGET PROPERTY COORDINATES**

Latitude (North): 48.549019 - 48° 32' 56.47" Longitude (West): 117.909737 - 117° 54' 35.05"

Universal Tranverse Mercator: Zone 11 UTM X (Meters): 432859.1 UTM Y (Meters): 5377505.0

Elevation: 1590 ft. above sea level

## **USGS TOPOGRAPHIC MAP**

Target Property Map: 14866817 COLVILLE, WA

Version Date: 2020

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

## **GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

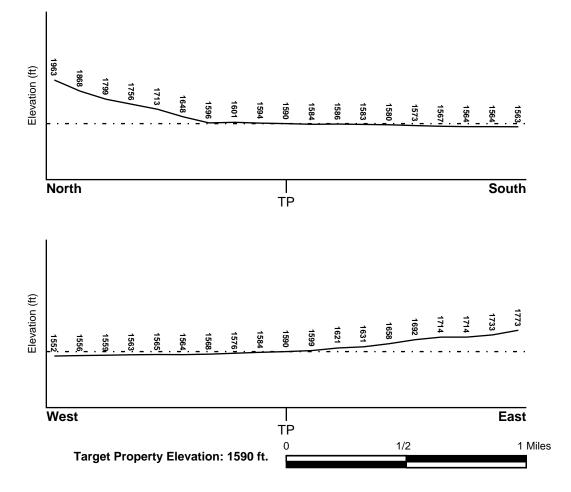

## **TOPOGRAPHIC INFORMATION**

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

#### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

NWI Quad at Target Property Data Coverage

COLVILLE YES - refer to the Overview Map and Detail Map

### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

FEMA Q3 Flood data

## Site-Specific Hydrogeological Data\*:

Search Radius: 1.25 miles Status: Not found

### **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

 GROUNDWATER FLOW

## **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

## GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Colville

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward

movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 92 inches

			Soil Laye	r Information			
	Bou	ındary		Classi	fication	Saturated hydraulic	
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec	
1	0 inches	16 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1	Max: 9 Min: 7.4
2	16 inches	26 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1	Max: 9 Min: 7.4
3	26 inches	59 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1	Max: 9 Min: 7.4

Soil Map ID: 2

Soil Component Name: Donavan

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep,

moderately well and well drained soils with moderately coarse

textures.

> 0 inches

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Depth to Watertable Min:

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

#### HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory Source: Department of Ecology Telephone: 360-407-6121

## HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

### **GEOLOGIC INFORMATION**

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## PHYSICAL SETTING SOURCE RECORDS SEARCHED

### LOCAL / REGIONAL WATER AGENCY RECORDS

#### FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

#### STATE RECORDS

Water Wells

Source: Department of Health Telephone: 360-236-3148 Group A and B well locations.

Water Well Listing

Source: Public Utility District Telephone: 206-779-7656

A listing of water well locations in Kitsap County.

**Ecology Well Logs** 

Source: Department of Ecology Telephone: 360-407-7294

Point geodatabase with a record for each Ecology well report. Points are located by quarter quarter section centroid. Points contain all well report types including water wells, resource protection wells, and decommissioned wells.

## OTHER STATE DATABASE INFORMATION

Oil and Gas Well Listing

Source: Department of Natural Resources

Telephone: 360-902-1450

Locations that represent oil and gas test well sites in Washington State from 1890 to present.

## RADON

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency

(USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at

private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor

radon levels.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Tetra Tech, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

#### **EXECUTIVE SUMMARY**

### **DESCRIPTION**

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

#### **RECORD SOURCES**

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

#### **RESEARCH SUMMARY**

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

# APPENDIX D Site Photographs

**Photo 1:** Looking northwest at the southeastern dispensers (2018) on the subject property. The warehouse is to the right and the main pump island and the convenience store is on the left. This area was once Fogle Pump.

**Photo 2:** Looking northwest at the southern dispensers in front of the convenience store (built 1997, replaced an old building). Drains onsite are primarily connected to the city storm sewer system, although a drywell or possibly two were observed. The UST nest and carwash rests in the background on the left.

**Photo 3:** Looking north at the UST nest onsite (1989). There are two diesel tanks here and two gasoline tanks. The carwash facility rests in the background (1987).

**Photo 4:** Looking east at the truck wash on the far west end of the carwash building. The wash bays, including the truck bay on the left, have interconnected drains that appear to lead off site.

**Photo 5:** Looking south at a possible drywell near the northwest property corner and at possible MW-7. This area is downgradient from the truck wash bay, and it appears sediment accumulates in this area.

**Photo 6:** Looking north at the RV septic tank disposal area. Residents bound the northern edges of W. 6<sup>th</sup> Avenue, pictured above.

**Photo 7:** Looking southeast at the wash bays from along W. 6<sup>th</sup> Avenue. The bays runoff but the water doesn't seem to leave the subject property. Left are the northern pump islands. Several pole-mounted transformers were observed nearby that did not appear leaking.

**Photo 8:** Looking southwest at the northern pump islands on the subject property. This set of islands was built in 1991.

**Photo 9:** Looking east at the warehouse that was once used by Fogle Pump. It generally stores convenience store supplies and gasoline station maintenance supplies.

Photo 10: Looking westerly across the subject property from along N. Washington Street.

**Photo 11:** View of the east end of the car wash building where the UST vent lines are located. Some staining was observed at the bottom of these lines. The current and former MW-4 wells are located in the right foreground.

Photo 12: Looking easternly at the propane aboveground tank. No issues were noted of this system.

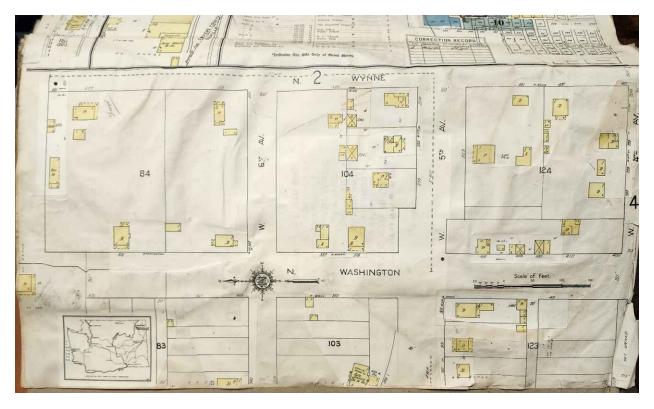

**Photo 13:** Looking south at the northern wall of the convenience store building. The store may be built over a closed-in-place UST, proximal to its northern wall. The pavement patches in the foreground may have been where larger USTs were located (and removed in 1989) that supported the "bulk plant" uses of the subject property in the 1950s and 1960s.

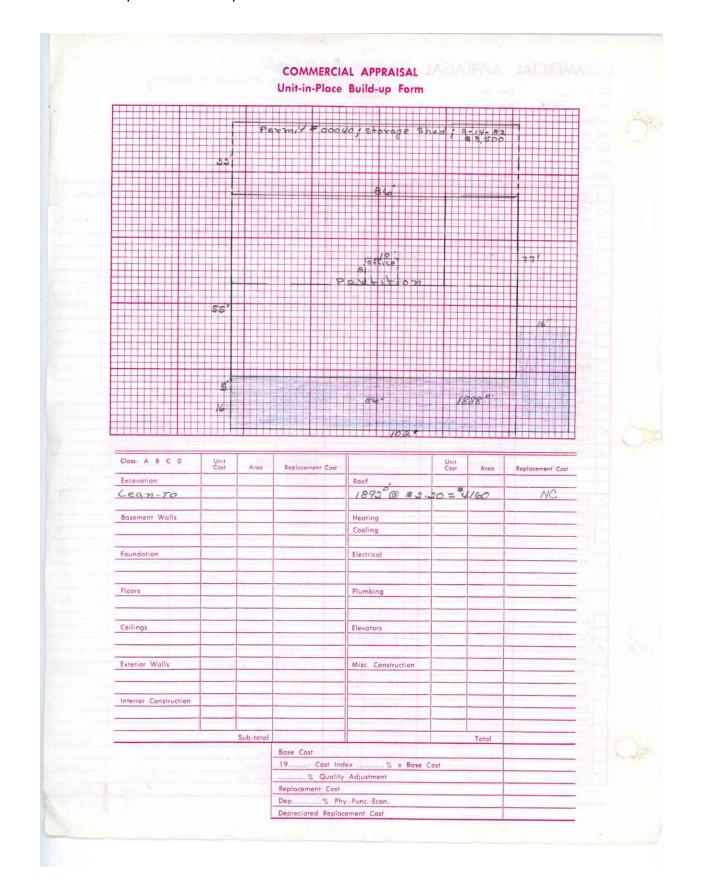

**Photo 14:** Looking east at the convenience store and the southern pump island. The area left of the car in the center is apparently where the three former 550-gallon tanks were removed in 1989.

## **Plan Correction Sheet**

Job Address: 370 W. 5 <sup>th</sup> Ave. Colville, Wa. 99114						
Legal Description: Parcel #0070800						
Owner: Aditi Sood	diti Sood Builder: Toptier Petroleum					
Zone: C3	Type of Construction	:IIB	Occupancy: U			
Use of Building:	Fuel Pump Canopy	Occupant Load: N/A				
Total Bldg. Floor Are	a: 1196 sq. ft.	Main Floor Area:	1196 sq.ft.			
Project Valuation:	\$100,000.00					

Plans submitted for the proposed structure at the above location have been checked and the following items require correction, clarification, or additional detailing:

- 1. Rebar inspection required before any concrete is poured.
- 2. Testing. Piping, before being covered, enclosed or placed into use, shall be hydrostatically tested to 150% of the maximum anticipated pressure of the system, or pneumatically tested to 110% of the maximum anticipated pressure of the system. This test shall be maintained for a sufficient time period to complete visual inspection of joints and connections. For no less than 10 minutes, there shall be no leakage or permanent distortion. (2015 IFC 5703.6)
- 3. The attendant shall be able to communicate with persons in the dispensing area at all times.(2015 IFC 2304.2.5)
- 4. Approved portable fire extinguishers with a minimum rating of 2-AA:20-B-C shall be provided and located such that an extinguisher is not more than 75 feet from pumps, dispensers or storage tank fill-pipe openings.(2015 IFC 2305.5)
- 5. Warning signs shall be conspicuously posted within sight of each dispenser in the fuel-dispensing area and shall state the following: No smoking; Shut off motor; Discharge your static electricity before fueling by touching a metal surface away from the nozzle; To prevent static charge, do not reenter your vehicle while gasoline is pumping; If a fire starts, do not remove nozzle back away immediately; It is unlawful and dangerous to dispense gasoline into unapproved containers; No filling of portable containers in or on a motor vehicle. Place container on ground before filling.
