

MEMORANDUM

January 4, 2024

RE: Fourth Quarter 2023 Status Report, Boeing Field Chevron, 10805 East

Marginal Way South, Tukwila, Washington, Agreed Order DE-10947

To: Mr. Dale Myers, Washington State Department of Ecology

cc: Mr. Nathan Blomgren, Chevron Environmental Management and Real

Estate Company; Mr. Raj Sandhu, Boeing Field Chevron; and Mr. Russ

Shropshire, Leidos

From: Thomas Cammarata

This status report is related to the ongoing environmental remediation effort for the Boeing Field Chevron facility at 10805 East Marginal Way South, Tukwila, Washington (the Site). The status report is developed to inform stakeholders of project progress in the Fourth Quarter of 2023 and to comply with reporting requirements for the facility under Agreed Order DE-10947 with the Washington State Department of Ecology (Ecology).

FOURTH QUARTER 2023 TASKS AND MILESTONES

Between October 1, 2023, and December 31, 2023, the following efforts were completed and milestones were reached on the project:

• On November 20, 2023, G-Logics submitted to Ecology the *Draft Pilot Test Report*, *Boeing Field Chevron*, 10805 East Marginal Way South, Tukwila, Washington 98168 (Draft Pilot Test Report). The report presents the purpose, approach, and results of the in situ chemical oxidation and total liquids extraction pilot test performed by G-Logics at the Site. Ecology's comments regarding the Draft Pilot Test Report are pending at the end of the Fourth Quarter of 2023.

G-Logics 40 2nd Avenue SE Issaquah, WA 98027 T: 425-391-6874 F: 425-313-3074 • On December 6, 2023, G-Logics submitted to Ecology the *Final Groundwater Monitoring Sampling Work Plan, Boeing Field Chevron, 10805 East Marginal Way South, Tukwila, Washington* (Groundwater Work Plan 2023). The purpose of the Groundwater Work Plan 2023 is to present the procedures for collecting a single round of groundwater samples from a subset of the existing groundwater monitoring well network at the Site. Ecology requested the groundwater monitoring and sampling event to update the current groundwater quality at the Site, since groundwater samples have not been collected since 2017 and/or 2018.

Sampling groundwater monitoring wells in the East Marginal Way/Tukwila International Boulevard right-of-way will require closing traffic lanes. G-Logics began preparing a street use permit to submit to the City of Tukwila and selected a subcontractor to prepare a traffic control plan. Monitoring and sampling of the groundwater is pending until a street use permit is obtained from the City of Tukwila.

PROBLEMS ENCOUNTERED

G-Logics encountered no problems in the Fourth Quarter of 2023.

PLANNED FIRST QUARTER 2024 TASKS AND MILESTONES

The following tasks are expected to be completed in the First Quarter of 2024 (January 1, 2024, through March 31, 2024):

- Obtain the street use permit from the City of Tukwila and perform groundwater monitoring and sampling in accordance with the Groundwater Work Plan 2023.
- Obtain comments from Ecology for the Draft Pilot Test Report, revise the report per Ecology's comments, and submit the revised report to Chevron for review and comment.
