Subject: Chevron 90129 4700 Brooklyn - Status Update 01152024

Hello ,

On behalf of Chevron Environmental Management Company (CEMC), the following is a progress update for Chevron site 90129 ("Brooklyn") located at 4700 Brooklyn Avenue NE in Seattle, Washington. This update satisfies the requirements of Agreed Order No. 13815 associated with the site which indicates that quarterly progress reports be submitted to the Washington State Department of Ecology by the 15th of the month following the reporting period. This update summarizes activities completed from October 1 through December 31, 2023.

Description of Actions Taken to Comply with Agreed Order

- Arcadis discussed chlorinated solvent groundwater data with Anchor QEA (consultant for west-adjoining Carson Cleaners site)
- Q4 2023 groundwater monitoring event was conducted on December 26, 2023

Summary of Deviations from Approved Work Plans

- The Q3 groundwater monitoring event was planned for September 19, 2023; however, the field technician stopped work and left the site due to safety concerns when a carjacking occurred near the site, and the monitoring event was rescheduled for October.

Description of Work Planned for the First Quarter Reporting Period

- Pending Ecology's review of responses to comments on the Supplemental Remedial Investigation Report, (submitted on July 12, 2023) Arcadis will finalize the report as a draft for public review.
- Arcadis will create figures of the co-mingled plume (petroleum impacts from the historical gas station co-mingling with chlorinated solvent impacts from Carson Cleaners)
- Arcadis will conduct the first quarter 2024 groundwater monitoring event.
- Arcadis will continue to prepare and submit quarterly updates to Ecology.

Please let me know if you have any questions.

Thank you

-Ada
