## EXECUTIVE SUMMARY

The subject of this Phase I Environmental Site Assessment is a rectangular-shaped approximately 0.11-acre (4,792 square foot) Parcel of commercial land located on the north side of Northwest 53<sup>rd</sup> Street in Seattle, Washington. Adjoining and adjacent properties and landmarks include 15<sup>th</sup> Avenue Northwest adjacent to the west; Northwest Market Street approximately one-eighth mile north; Lake Washington Ship Canal approximately ½ mile south; The Woodland Park Zoo approximately one mile northeast; Highway 99 approximately 1½ miles east; Green Lake approximately 1½ miles northeast; and Interstate Five approximately 2½ miles east. Significant bodies of water include Shilshole Bay of the Puget Sound approximately 1½ miles northwest.

The Property is configured with the building occupying the majority of the Parcel with a paved parking lot to the south. Vehicular access onto the Property is provided on the north side of Northwest 53<sup>rd</sup> Street. The building is an approximately 3,291 square foot, single story storage structure divided into two sections. The western portion houses the personal training studio, *Outrageously Fit*, while the eastern portion houses a dojo. The two entrances face south toward Northwest 53<sup>rd</sup> Street. South of the parking spaces is a square concrete patch in the asphalt. According to a representative of the seller, Mr. Dane Murphy, the patch is the location of a heating oil tank that was reportedly closed-in-place on January 31, 2017.

*Outrageously Fit* is comprised of an open gym space containing workout equipment and weights, two restrooms, an office, and a lounge. The dojo is comprised of one open space with weighted bags hanging from the ceiling. The spaces are connected by two interior doors in the center of the shared wall.

The subject Property was first developed sometime prior to 1917 with the construction of a residence. In 1949, the residence was remodeled to occupy *Am Chimney Services*. In 1957, the building was relocated to a different site and the present-day building was constructed to occupy *Sullivan Auto Parts*. The Property occupied the automobile parts distributor from 1957 throughout until the late 1990's. The Property is currently occupied by a dojo and the personal training studio, *Outrageously Fit*.

The subject Property is located in a mixed-use commercial and residential area. To the north is Mudbay. To the south is Northwest 53<sup>rd</sup> Street followed by O'Reilly Auto Parts. To the east is GOW Alexander Fire Equipment. To the west is Subway followed by 15<sup>th</sup> Avenue Northwest.

Upon completion of the Site investigation, historical research, document file review, and other tasks as stipulated in the Scope of Work, the following Recognized Environmental Conditions, potential environmental concerns, or recommended actions were identified:

■ **Recommendation: Confirmatory Soil Sampling for Underground Storage Tank Abandonment-in-Place.** On January 31, 2017, *Universal Applicators, Inc.*, triple rinsed a 300 gallon commercial heating oil tank at the subject Property. The tank was reportedly abandoned-in-place; however, no confirmatory soil samples were collected at the time of closure. According to the Washington State Department of Ecology, if an underground storage tank is permanently closed in place, a site assessment must be conducted after the UST system is emptied and cleaned and all liquid and accumulated sludge has been removed. **Based on the lack of confirmatory soil samples, Further Action is Recommended.**

## ASTM PROTOCOL CONCLUSION

---

We have performed a *Phase I Environmental Site Assessment* in conformance with the scope and limitations of ASTM Practice 1527 (Revision 2013) for 1446 Northwest 53<sup>rd</sup> Street in Seattle, Washington, the *property*. Any exceptions to, or deletions from, this practice are described in Possible Report Exceptions To All Appropriate Inquiry Rule Section<sup>1</sup> of this *report*.

This Assessment **has revealed** evidence of *recognized environmental conditions*<sup>2</sup> in connection with the *property*.

This Assessment has not revealed evidence of an *historical recognized environmental condition* in connection with the *property*<sup>3</sup>.

This Assessment has not revealed evidence of a *controlled recognized environmental conditions*<sup>4</sup> in connection with the *property*.

---

<sup>1</sup> Refer to page 5 of this Assessment.

<sup>2</sup> *Recognized Environmental Condition* - the presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a *property* under conditions that indicate an existing release, a past release, or a *material threat* of a release of any *hazardous substances* or *petroleum products* into structures on the *property* or into the ground, ground water, or surface water of the *property*. The term includes *hazardous substances* or *petroleum products* even under conditions in compliance with laws. The term is not intended to include *de minimis conditions* that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not *recognized environmental conditions*.

<sup>3</sup> *Historical Recognized Environmental Condition* – a past release of any hazardous substance or petroleum product that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory agency or meeting the unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls such as property use restrictions, activity and use limitations, institutional controls, or engineering controls – at the time of the completion of the Environmental Site Assessment.

<sup>4</sup> *Controlled Recognized Environmental Condition* – a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority with hazardous substances or petroleum products allowed by remain in place subject to the implementation of required controls. A condition identified as a Controlled Recognized Environmental Condition does not imply that the Assessment has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the required control that has been, or is intended to be implemented.

This Phase I Environmental  
Site Assessment was performed in  
**Compliance with the  
All Appropriate Inquiry (AAI)  
Final Rule: 40 CFR Part 312<sup>5</sup>**

POTENTIAL REPORT EXCEPTIONS TO ALL APPROPRIATE INQUIRY RULE:

**§ 40 CFR Part 312.25 Searches for recorded environmental cleanup liens.** (a) All appropriate inquiry must include a search for the existence of environmental cleanup liens against the subject property that are filed or recorded under federal, tribal, state, or local law.

**§ 40 CFR Part 312.28 Specialized knowledge or experience on the part of the defendant.** (a) Persons to whom this part is applicable per § 312.1(b)<sup>6</sup> must take into account, their specialized knowledge of the subject property, the area surrounding the subject property, the conditions of adjoining properties, and any other experience relevant to the inquiry, for the purpose of identifying conditions indicative of releases or threatened releases at the subject property, as defined in § 312.1(c).

**§ 40 CFR Part 312.29 The relationship of the purchase price to the value of the property, if the property were not contaminated.** (a) Persons to whom this part is applicable per § 312.1(b) must consider whether the purchase price of the subject property reasonably reflects to fair market value of the property, if the property were not contaminated.

---

<sup>5</sup> A copy of excerpts from the *Standards and Practices for All Appropriate Inquiries; Final Rule* U.S. EPA, 40 CFR Part 312, 70 FR 66070, November 1, 2005, is included in the Appendix of this Report, in the Section entitled Supplemental Documents.

<sup>6</sup> § 312.1(b). *Applicability.* The requirements of this part are applicable to: (1) Persons seeking to establish: (i) The innocent landowner defense pursuant to CERCLA sections 101(35) and 197(b)(3); (ii) The bona fide prospective purchaser liability protection pursuant to CERCLA sections 101(40) and 107(r); (iii) The contiguous property owner liability protection pursuant to CERCLA section 107(q); and (2) persons conducting site characterization and assessments with the use of a grant awarded under CERCLA section 104(k)(2)(B).

## ASSESSMENT OVERVIEW

### **Purpose:**

The purpose of this Assessment is to comply with selected sections of the standards and practices for “all appropriate inquiry” for the purposes of CERCLA sections 101(35)(B)(i)(I) and 101(35)(B)(ii) and (iii), as defined in *Standards and Practices for All Appropriate Inquiries; Final Rule*, U.S. EPA, 40 CFR Part 312 (70 FR 66070). Some of the requires contained in Part 312 are excluded from this Assessment, as delineated in the preceding Section entitled “Report Exceptions to All Appropriate Inquiry Rule.”

The business purpose of this Phase I Environmental Site Assessment was to investigate, review, assess, and evaluate – through historical research, document and record review, generally available environmental data, visual or physical observations, and inspection by a trained assessor – the presence or likely existence of:

- Contamination by hazardous materials, generally recognized environmental contaminants, visible pollutants, underground contaminants, and asbestos-containing materials.
- The possibility that these materials are or may have been introduced – by internal generation, external introduction, or unknown sources – into the structure or subject Property.
- A brief overview, evaluation, and assessment of the severity of the current potential environmental risk based upon known standards or applicable regulations.

Unless specifically noted within the text of this Report, this Phase I Environmental Site Assessment does not include or address groundwater, soil, or extraneous material contamination upon or under the surface soils, with respect to testing, coring, or sampling analysis.

### **Protocol:**

The procedure for this Environmental Site Assessment was to perform in practical and reasonable steps-- employing currently available technology, existing regulations, and generally acceptable engineering practices – an investigation to ascertain the possibility, presence, or absence of environmental releases, threatened releases, or Recognized Environmental Conditions, as limited by the Scope of Work. As such, this Assessment was performed in substantial compliance with the ASTM Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (Designation E 1527-13).

### **Objectives:**

- To attempt to accomplish all appropriate inquiry into ownership and uses of the Property consistent with good commercial or customary practice, in an effort to minimize liability.
- To conduct an investigation of the Property that will assist ownership's positioning within the "safe harbor" section of the Federal Superfund liability in 42 U.S.C. §9601(35), the Lender Liability Final Rule, and the CERCLA amendments enacted as part of the 2002 Brownfields Act.
- To provide environmental information that will assist in evaluating ownership's risk of potential loss or value impairment of the security interest due to environmental defects; and information for decisions and operational limitations concerning the National Pollution Contingency Plan.

While this Phase I Assessment cannot absolutely quantify and qualify every possible past and present environmental risk, the Assessment does provide a partial information basis for reasonable decision making regarding the potential for environmental liabilities and risk, based upon the current Site-specific situation, Assessment limitations, and methods of evaluation.

## GENERAL SITE RECONNAISSANCE OVERVIEW

Mr. Preston Walls, of Walls Property Management, engaged Aerotech Environmental Consulting, Inc. ("Aerotech") to perform a Phase I Environmental Site Assessment on the subject Property. This Assessment was additionally performed as required by the U.S. Small Business Administration ("SBA") Environmental Policy Guidelines for Phase I Environmental Site Assessments, and the "All Appropriate Inquiry" standard as promulgated by the U.S. Environmental Protection Agency in 40 CFR Part 312.

This Site consists of a rectangular-shaped approximately 0.11-acre (4,792 square foot) Parcel of commercial land located in the Ballard Neighborhood of Seattle, Washington, occupied by the personal fitness studio, *Outrageously Fit*, and a dojo. The Property Successor Trustee, Ms. Catherine M. Zamperin, was identified as the Key Site Manager. The *Key Site Manager* is the person identified by the Client or the Owner of the Property as a person having the most reliable knowledge as to the previous uses and current condition of the subject Property and is in a position to provide reasonably accurate information for the Environmental Questionnaire. The Assessor performed the on-Site Reconnaissance on the afternoon of June 19, 2018.

According to the information provided, on January 31, 2017, *Universal Applicators, Inc.* triple rinsed a 300 gallon commercial heating oil tank at the subject Property. The tank was reportedly abandoned in place, however, no confirmatory soil samples were collected at the time of closure. According to the Washington State Department of Ecology, if an underground storage tank is permanently closed in place, a site assessment must be conducted after the UST system is emptied and cleaned and all liquid and accumulated sludge has been removed. **Based on the lack of confirmatory soil samples, Further Action is Recommended.**

## SUBJECT PROPERTY SITE DESCRIPTION

### Visual Description:

The subject of this Phase I Environmental Site Assessment is a rectangular-shaped approximately 0.11-acre (4,792 square foot) Parcel of commercial land located on the north side of Northwest 53<sup>rd</sup> Street in Seattle, Washington.

Adjoining and adjacent properties and landmarks include Northwest 53<sup>rd</sup> Street adjoining to the south; 15<sup>th</sup> Avenue Northwest adjacent to the west; Northwest Market Street approximately one-eighth mile north; Lake Washington Ship Canal approximately ½ mile south; The Woodland Park Zoo approximately one mile northeast; Highway 99 approximately 1½ miles east; Green Lake approximately 1½ miles northeast; and Interstate Five approximately 2½ miles east. Significant bodies of water include Shilshole Bay of the Puget Sound approximately 1½ miles northwest.

The Property is configured with the building occupying the majority of the Parcel with a paved parking lot to the south. Vehicular access onto the Property is provided on the north side of Northwest 53<sup>rd</sup> Street. The building is an approximately 3,291 square foot, single story storage structure divided into two sections. The western portion houses the personal training studio,

*Outrageously Fit*, while the eastern portion houses a dojo. The two entrances face south toward Northwest 53<sup>rd</sup> Street. South of the parking spaces is a square concrete patch in the asphalt. According to a representative of the seller, Mr. Dane Murphy, the patch is the location of a heating oil tank that was reportedly closed-in-place on January 31, 2017.

*Outrageously Fit* is comprised of an open gym space containing workout equipment and weights, two restrooms, an office, and a lounge. The dojo is comprised of one open space with weighted bags hanging from the ceiling. The spaces are connected by two interior doors in the center of the shared wall.

During the on Site Reconnaissance, there were no readily observed visual indicators of active underground storage tanks, stained soils, stressed vegetation, oily sheens, or discolorations on standing water surfaces. There was no evidence of foul odors. Additionally, the Site Reconnaissance did not reveal the presence of discarded drums, barrels, or containers, construction debris, damaged or discarded containers of chemicals, paints, or pesticides. There are no waste storage or treatment lagoons, pits, ponds, or surface impoundments on the Site, or the adjoining properties.

The subject Property was first developed sometime prior to 1917 with the construction of a residence. In 1949, the residence was remodeled to occupy *Am Chimney Services*. In 1957, the building was relocated to a different site and the present-day building was constructed to occupy *Sullivan Auto Parts*. The Property occupied the automobile parts distributor from 1957 throughout until the late 1990's. The Property is currently occupied by a dojo and the personal training studio, *Outrageously Fit*.

The subject Property is located in a mixed-use commercial and residential area. To the north is Mudbay. To the south is Northwest 53<sup>rd</sup> Street followed by O'Reilly Auto Parts. To the east is GOW Alexander Fire Equipment. To the west is Subway followed by 15<sup>th</sup> Avenue Northwest.

### **Physical Setting Source:**

In order to ascertain the physical setting of the subject Property, a review was conducted of the appropriate current United States Geological Survey ("USGS") 7.5 Minute Topographic Quadrangle (quad) Map. The USGS 7.5 minute quad map has an approximate scale of 1" to 2,000 feet, shows physical features such as wetlands, water bodies, roadways, mines, and buildings. These physical and natural features shown should be the areas of visual emphasis, when conducting the on-site inspection of the subject Property. The USGS 7.5 quad map is considered to be the only Standard Physical Setting Source, and is sufficient as a single reference. The applicable USGS 7.5 minute topo map is the Quadrangle 6005219 - *Shilshole Bay, WA.*, photo revised in 2014.

### **Surface Characteristics:**

The precise Property location is N 47° 40' 2.60" / W 122° 22' 32.59" as determined by DeLorme mapping data. The Site is located within Universal Transverse Mercator Zone No.10. The Site elevation is approximately 66 feet above mean sea level. As observed during the Site visit and confirmed on the USGS topographic map, the subject Property exhibits a surficial drainage towards the southeast, based upon overall Site topography. Additionally, the assumed general groundwater flow is to the south/southwest.

During the course of the on-site observations, particular attention was directed towards (i)

pools of liquid; (ii) roads and paths that might be used for unauthorized entry; (iii) drains and sumps; (iv) stressed vegetation; (v) pits, ponds, or lagoons; (vi) surface or soil staining; (vii) ditches, catch basins, or dry wells; (viii) unidentified substance containers; (ix) location of manholes, sewer grates, sewer outfalls; and (x) other subterranean accesses. All roads, driveways, paths, and other vehicular access areas were identified and evaluated for suspected use as an avenue for transport or disposal of hazardous materials, regulated substances, or petroleum products. Railroad tracks and previous right-of-ways are also identified if present on the subject Property. Potential wetland area indicators were considered during the on-site activities. These indicators include (i) wetland characteristic soil types; (ii) areas that appear permanently wet during most of the year; (iii) the presence of wetlands-related submergent or emergent plants; and (iv) wetland indicative wildlife.

### **Subsurface Soils Characteristics:**

The subject Property soils are likely characterized as *Urban Land - Alderwood Complex*. This Complex is on beaches and low terraces on broad uplands. The Alderwood soils formed in glacial till. The Complex is about 70 percent Urban land and 20 percent Alderwood very gravelly sandy loam, with 0 to 6 percent slopes. The components of this Complex tend to be intermingled, and can also include Dystric Xerorthents. Urban land is land covered by streets, parking lots, buildings, and other structures typical of urban areas.

The Alderwood soil is moderately deep and moderately well drained. Typically, the surface of this soil is covered by a thin mat of undecomposed needles and wood fragments. The subsurface layer is brown very gravelly sandy loam about ½ inch thick. The subsoil is brown very gravelly loam about 21 inches thick. The substratum to a depth of 60 inches or more is grayish brown gravelly sandy loam that is weakly-silica cemented in the upper part. Depth to the silica-cemented hardpan ranges from 20 to 40 inches.

The permeability of this Alderwood soil is moderately rapid above the hardpan and very slow in the pan. The available water capacity is low. Runoff is slow, and the hazard of water erosion is slight. A perched water table is at a depth of 2.5 to 3 feet during the rainy season in winter and spring. This generalized characterization has been determined by the U.S. Department of Agriculture, Soil Conservation Service in cooperation with the Washington State Department of Natural Resources and the Washington State University, Agricultural Research Center, and is published in the *Soil Survey of King County Area, Washington*, dated 1977.

### **Subsurface and Hydrological Characteristics:**

The subsurface of the Property may have been modified by cuts and fills for building foundations and underground construction. However, no obvious visual evidence of non-native fill or backfill was observed around the structures. This was confirmed by Site interviews.

Based upon the USGS map and surface topography, groundwater is inferred to flow generally towards the south/southwest. However, topography is not always a reliable basis for predicting groundwater flow direction. Local gradient under the subject Property may be influenced naturally by zones of higher or lower permeability, or artificially by nearby pumping or recharge, and may deviate in any particular location for the overall regional trend. These observations are consistent with the historical research and review of historical aerial photographs.

The principal aquifers in the Puget Sound Region occur in glacial drift, that along with finer grained interglacial sediments, underlies the basin lowland to depths of more than 1,000 feet. The sand and gravel units in the glacial drift form the principle aquifers. These aquifers receive ample recharge from the typically heavy precipitation characteristic of western Washington. The glacial drift in the Puget Sound region varies greatly in composition and water yielding capacity. Typically, wells in glacial drift that tap silt, clay, or till in the Region at approximately 75 to 100 feet below ground surface may have yields of 100 gallons or more per minute. Deeper wells tapping thick, saturated layers of highly permeable gravel and coarse sand, typically at depths greater than 250 feet below ground surface, can yield more than 1,000 gallons per minute.

#### HISTORICAL USAGE STANDARD INFORMATION SOURCES: LOCAL AND STATE

The Historical Usage Information Section research is considered satisfied when both the Fifty-Year Complete Source and Developmental Complete Source have been researched and identified. These historical research requirements are satisfied by two separate sources with respect to the milestone or time constraints. A single source cannot simultaneously fulfill both source requirements.

The *Historical Site milestones* can include (i) construction activities that involve structural, renovation, or remodeling at any location within the subject Property; (ii) major changes in the topography or grade of the Site; (iii) installation or construction of roads, utilities, water or sewer systems; (iv) installation, removal, or modification of permanent equipment; or (v) installation, removal, or modification of above or below ground tanks.

Standard Historical Sources are categorized as either Fifty-Year Complete or Developmental Complete. A *Fifty-Year Complete* source is a Standard Historical Source that provides the required information through and back to the 1945 cutoff date in either reasonable time intervals or Property milestone events. A *Developmental Complete* source is a Standard Historical Source which provides the required information from the point that the Property exhibited development (other than agricultural use) or structure construction continuously to the present in either reasonable time intervals or Property milestone events.

#### **Fifty-Year Complete Standard Historical Source Summary:**

The subject Property was first developed sometime prior to 1917 with the construction of a residence. In 1949, the residence was remodeled to occupy *Am Chimney Services*. In 1957, the building was relocated to a different site and the present-day building was constructed to occupy *Sullivan Auto Parts*. The Property occupied the automobile parts distributor from 1957 throughout until the late 1990's. The Property is currently occupied by a dojo and the personal training studio, *Outrageously Fit*.

## Historical Research Data Gaps:

As defined in the Standards and Practices for All Appropriate Inquiries; Final Rule (70 FR 66070) promulgated November 1, 2005, and effective November 1, 2006,

“*Data gap* means: a lack or inability to obtain information required by the standards and practices listed in subpart C of this part despite good faith efforts by the environmental professional or persons identified under § 312.1(b), as appropriate, to gather such information pursuant to §§ 312.20(e)(1) and 312.20(e)(2).” [§ 312.10 *Definitions*].

Such Data Gaps result from insufficient information – as delineated in standards and practices – relative to the historical development of the subject Property.

“To the extent there are data gaps (as defined in § 312.10) in the information developed as part of the inquiries in paragraph (e) of this section that affect the ability of persons (including the environmental professional) conducting the all appropriate inquiries to identify conditions indicative of releases or threatened releases in each area of inquiry under each standard and practice such persons should identify the sources of information consulted to address such data gaps, and comment upon the significance of such data gaps with regard to the ability to identify conditions indicative of releases or threatened releases of hazardous substances [and in the case of persons identified in § 312.1(b)(2), hazardous substances, pollutants, contaminants, petroleum and petroleum products, and controlled substances (as defined in 21 U.S.C. 802)] on, at, in, or to the subject property.” [§ 312.20(g)].

In the opinion of the preparer of this Assessment and the Environmental Professional, no such Data Gaps as defined above, were identified during the preparation of this Assessment. No further investigation is necessary relative to issues resulting from Data Gaps.

## Aerial Photograph Review:

Originally performed under government contracts, aerial photographs of the general area are available beginning with the 1930s. The scales for these aerals can range from 1"=1667' to 1"=2500'; aerals taken by private contractors were generally taken at lower altitudes and provide a larger scale. Depending upon the resolution, the photographs can provide valuable information on land use and site development of both the subject and adjoining properties. Ultimately, the scale, clarity, and resolution serves as the limitations on visual interpretation. Historic aerial photographs were reviewed using the Nationwide Environmental Title Research online database. The following aerals were available for review:

<i>Date:</i>	<i>Observations:</i>
1936	The subject Property is occupied by a residence in the center with a structure to the north. The property to the north is occupied by a residence. The property to the south is occupied by a residence. The property to the east is occupied by a residence. The property to the west is occupied by three residences.

1969	The subject Property is occupied by the present-day building that comprises the majority of the Parcel. The property to the north is occupied by two structures forming an L-shape; possibly a gasoline station. The property to the south is occupied by a structure. The property to the east is occupied by a building. The property to the west is vacant. The west adjacent property is occupied by a storage or car lot.
1980	No changes have been made to the subject Property. The west adjacent property is occupied by a structure.
1990	No changes have been made to the subject Property. The property to the north has demolished the gasoline station and is occupied by a rectangular building. The property to the west is occupied by a structure in the northeast corner.
1998	No changes appear to have been made since 1990.
2002	No changes have been made since 1990.
2006	No changes have been made since 1990.
2009	The subject Property is occupied by the present-day building. The property to the north is occupied by a structure. The property to the south is occupied by a building. The property to the east is occupied by a building. The property to the west is occupied by a structure in the northeast corner.
2011	No changes have been made since 1990.
2013	No changes have been made since 1990.
2015	No changes have been made since 1990.

### **City of Seattle Building Permit/Inspection Department - Permit Review:**

The Property is located within the City of Seattle. Information concerning Site development was obtained from the Department of Planning and Community Development Services. Due the time required to obtain building department records via Freedom of Information requests ("FOIA"), this method of research was initially deemed to be reasonably ascertainable<sup>1</sup>. The following substantive information was observed:

<i>Date:</i>	<i>Permit No.</i>	<i>Substantive Information:</i>
1949	393211	Alter building
1957	455161	Relocate residence to 8760 Phinney Avenue
1957	455161	Construct building per plan 72x44 foot store/warehouse

01/14/66	BN-24102	Repair foundation under east wall
01/31/16	107829	Application for a temporary permit. Commercial tank removal/decommissioning of a 300 gallon fuel oil/diesel tank by Universal Applicators, Inc
06/07/18	011675-18PA	Pre-application for demolition of existing structure and construction of a six-story multi-family structure

### City and Telephone Directories:

Local directories based upon physical surveys of residents have been compiled since the late 1880's for use as city planning and marketing database tools. Commonly referred to as "reverse directories" or "city directories," these directories are generally maintained at public libraries. The following directories were available for review:

<i>Date:</i>	<i>Directory Listing:</i>

### Sanborn Fire Insurance Maps:

In 1867 the Sanborn Map Company began preparing detailed street maps of densely populated areas throughout the United States. The purpose of the mapping process was to assist insurance agents in rating the degree of fire hazard for a particular area or property. The maps drawn by the Sanborn Mapping Company indicate the type of building construction, the nature of land use, the configuration of buildings and the surrounding land, as well as identifying the location of above

and below ground storage tanks.

The recent purchase by Environmental Data Resources (“EDR”) of the Sanborn Map Company included the acquisition of all copyrights associated with the Sanborn Maps. The Sanborn copyright prohibits the photocopying of the maps without the prior written permission of EDR<sup>2</sup>.

This investigation has relied upon the collection of Sanborn maps previously owned by the Sanborn Mapping and Geological Information Service Company, known as the “Sanborn Library.” The following Sanborns were available for review:

<i>Date:</i>	<i>Observations:</i>
1905	The subject Property is vacant land. The property to the north is vacant. The property to the south is occupied by a dwelling. The property to the east is vacant. The property to the west is vacant. (Volume IV, Sheet No. 406)
1917	The subject Property is occupied by a dwelling in the center with a shed to the north. The property to the north is occupied by a dwelling and a structure. The property to the south is occupied by a dwelling and a structure. The property to the east is occupied by a dwelling and a structure. The property to the west is occupied by three dwellings and a structure. (Volume V, Sheet No. 568)
1951	The subject Property is occupied by a dwelling in the center with a shed to the north. The property to the north is occupied by a dwelling and a structure. The property to the south is occupied by a dwelling, an automobile garage, and a structure. The property to the east is occupied by a dwelling and a structure. The property to the west is occupied by three dwellings and a structure. (Volume V, Sheet No. 568)

### **Recorded Land Title Records:**

Recorded land titles are records usually maintained by the municipal clerk or county recorder of deeds which detail ownership fees, leases, land contracts, easements, liens, deficiencies, and other encumbrances attached to or recorded against the subject Property in the local jurisdiction having control for or reporting responsibility to the subject Property. Due to state land trust regulations and laws, land title records will often only provide trust names, bank trust numbers, owners' names, or easement holders, and not information concerning previous uses or occupants of the subject Property. Additionally, environmental liens recorded against the subject Property are considered outside the scope of recorded land title records. For these reasons, this Environmental Site Assessment has relied upon other standard historical information sources assumed to be either more accurate or informative than recorded land titles. Review of historical King County Tax Parcel maps revealed the following information:

<i>Date:</i>	<i>Assessor Comments:</i>
1957	Construction of 3,887 square foot single-story store for Sullivan Auto Parts. Address: 1446 West 53 <sup>rd</sup> Street

Heat source: oil burner furnace

1972                      Assessed Property Value of \$14,690.00

12/10/91                Sale for \$0 to King Arthur C+M Carroll (TR)

### **Washington State Business Registrations:**

The State of Washington Business Licensing Service maintains records of all business licenses issued within the State of Washington. In an attempt to identify potential environment issues, a search of business licenses issued through the Washington State Business Licensing Service was completed for the Site and revealed that the following businesses were issued licenses to operate on the subject Property.

<i>Issued Date:</i>	<i>Business Name:</i>
04/11/00	Toon Design
12/17/05	The Art of Fitness
N/A	Better Life Health and Fitness
N/A	Budo Punk

### **CURRENT USAGE INFORMATION SOURCES: LOCAL AND STATE**

### **City of Seattle - Emergency Release Reports/SARA§304:**

The Property is located within the City of Seattle, Washington. According to interviews with City Fire Department Personnel, the Site has not reported any Emergency Release incidents to local authorities. This information is consistent with the State of Washington ERNS records.

### **Local/State Waste Disposal Compliance:**

According to supplied information, the Site is not required to file, submit, or operate under any environmental permits, approvals, or notifications that were previously in place, or are known to be required in the future. Moreover, according the same supplied information and statements, the Site is not received prior notification of environmental violations, litigation, citations, claims, complaints, administrative actions, or environmental clean up or remedial actions pertaining to the Property or the operations conducted on the Property. This is consistent with the information reported in the EDR Environmental Database prepared for the subject Site.

VISUAL AND PHYSICAL  
OBSERVATIONS AND INFORMATION:  
STRUCTURAL AND BUSINESS OPERATIONAL

The Property Successor Trustee, Ms. Catherine M. Zamperin, was identified as the Key Site Manager. The *Key Site Manager* is the person identified by the Client or the Owner of the Property as a person having the most reliable knowledge as to the previous uses and current condition of the subject Property and is in a position to provide reasonably accurate information for the Environmental Questionnaire. The Aerotech Site Assessor performed the on-site Reconnaissance on June 19, 2018.

**Site Reconnaissance: Personal Interviews / Site Document Review:**

The Aerotech Assessor, Ms. Devin Melville, performed the Site Reconnaissance on June 19, 2018, accompanied by a Representative of the Seller, Mr. Dane Murphy. Mr. Murphy was interviewed during the Site Reconnaissance regarding the current Site operations, required environmental operating permits, his knowledge of current and historical environmental issues, past uses of the Property, and possible environmental concerns.

If an adjoining property represented an obvious Recognized Environmental Condition or a visual reconnaissance of the site indicated a potential environmental concern, the owner or operator of that site was also contacted regarding the type, nature, and potential impact of the environmental concern.

The information obtained and conclusions reached during the course of these interviews and document review has been incorporated in this Assessment; while the specific source of the information may not be identified in the text of the Assessment Report.

**Key Site Manager Interviews & Questionnaire:**

The Client identified the *Key Site Manager* for the performance of this Phase I Environmental Site Assessment. As defined by the ASTM<sup>7</sup> *Phase I Environmental Site Assessment Standard Practice* (ASTM E 1527-13) the *Key Site Manager* is the person identified by the Client or the Owner of the Property as having the most reliable knowledge as to the previous uses and current condition of the subject Property, and is in a position to provide reasonably accurate information to the Environmental Assessor and for the Environmental Questionnaire. Additionally, the information obtained from the Key Site Manager is recognized by the ASTM as a *Standard Historical Source* which can be utilized to satisfy the *Fifty-Year Complete* or *Developmental Complete* Historical Source requirements.

A Field Screen Questionnaire was completed on June 25, 2018, by Property Successor Trustee, Ms. Catherine M. Zamperin. (A copy of same can be found in the Appendix of this report, Section IV).

---

<sup>7</sup> ASTM: formerly the American Society for Testing and Materials.

## **Washington Commercial Real Estate Disclosure:**

On February 28, 2010, the State of Washington Legislature passed Substitute Senate Bill No.6749, concerning the transfer of commercial real estate – commonly known as the *Commercial Real Estate Disclosure Act*.

As required in the Act, a seller of commercial real estate must provide a buyer with a Disclosure Statement about the land – whether improved or unimproved – unless the buyer waives the right to receive it. The Disclosure for commercial real estate concerns title, water, sewer and on-site sewage, structure, systems, fixtures, and environmental.

The Disclosure Statement must be provided within five business days, or as otherwise agreed to, after mutual acceptance of a written purchase agreement between a buyer and a seller. Within three business days of receiving the Disclosure Statement, the buyer has the right to approve and accept the Statement or rescind the Agreement for purchase. If the seller fails to provide the Disclosure Statement, the buyer may rescind the transaction until the transfer has closed. If the Disclosure Statement is delivered late, the buyer's right to rescind expires three days after receipt of the Disclosure Statement.

A completed Commercial Real Estate Disclosure Statement was not provided prior to the completion of the Phase I Environmental Site Assessment.

## **Site Exterior Observations:**

This Phase I Environmental Site Assessment is an environmentally-based risk assessment of a rectangular-shaped approximately 0.11-acre (4,792 square foot) Parcel of commercial land located in the Ballard Neighborhood of Seattle, Washington, occupied by an approximately 3,291 square foot, single story storage warehouse.

The Property is configured with the building occupying the majority of the Parcel with a paved parking lot to the south. Vehicular access onto the Property is provided on the north side of Northwest 53<sup>rd</sup> Street. The western portion of the building houses the personal training studio, *Outrageously Fit*, while the eastern portion houses a dojo. The two entrances face south toward Northwest 53<sup>rd</sup> Street. South of the parking spaces is a square concrete patch in the asphalt. According to a representative of the seller, Mr. Dane Murphy, the patch is the location of a heating oil tank that was reportedly closed-in-place on January 31, 2017.

As observed and notated by the Aerotech Environmental Assessor during the on Site Reconnaissance activities, there were no readily observed visual indicators of active underground storage tanks, stained soils, stressed vegetation, oily sheens, or discolorations on standing water surfaces. There was no evidence of foul odors. Additionally, the Site Reconnaissance did not reveal the presence of discarded drums, barrels, or containers, construction debris, damaged or discarded containers of chemicals, paints, or pesticides. There are no waste storage or treatment lagoons, pits, ponds, or surface impoundments on the Site, or the adjoining properties. Particular attention was paid to indicators of petroleum based sheens or releases on the standing water; however, none were observed.

### **Site Interior Observations:**

*Outrageously Fit* is comprised of an open gym space containing workout equipment and weights, two restrooms, an office, and a lounge. The dojo is comprised of one open space with punching bags hanging from the ceiling. The spaces are connected by two interior doors in the center of the shared wall.

### **Sensitive Receptors**

Sensitive receptors are those receptors that would be especially or adversely affected by a release of hazardous substances on the Property. Sensitive receptors would include: exposed soil, surface water bodies and watercourses (including streams, washes, lakes, drainage ditches, or swales), impoundments (including lagoons, recharge basins, and detention basins), swamps, or wetlands, on-site groundwater monitoring or production wells, on-site hospitals or health care facilities, child daycare facilities, or parks and natural reserves. No such receptors were observed on the subject Property.

There are 13 sensitive receptors located within one-quarter mile of the subject Property. The sensitive receptor in closest proximity is identified as *GOW Alexander Fire Equipment*, adjoining the subject Property to the east. This site has a groundwater monitoring well along the southern portion of the property. The well is not identified in the Department of Ecology's Well database, therefore, additional information was not available.

### **Wetland Area Indicators:**

Potential wetland area indicators were considered during the on-site activities. These indicators include (i) wetland characteristic soil types; (ii) areas that appear permanently wet during most of the year; (iii) the presence of wetlands-related submergent or emergent plants; and (iv) wetland indicative wildlife. No such potential wetlands indicators were observed on the subject or adjoining properties.

### **Business Operations Description:**

The subject Property was first developed sometime prior to 1917 with the construction of a residence. In 1949, the residence was remodeled to occupy *Am Chimney Services*. In 1957, the building was relocated to a different site and the present-day building was constructed to occupy *Sullivan Auto Parts*. The Property occupied the automobile parts distributor from 1957 throughout until the late 1990's. The Property is currently occupied by a dojo and the personal training studio, *Outrageously Fit*.

This type of historical Property usage – as a retail automobile parts distributor – is not known and/or identified as the type of business usage that is in the classification of industries with a higher probability of environmental risk. This "higher risk" classification is based upon the SIC codes<sup>3</sup> reported by the business as applicable to their operation. Had the Site operations been in the general category of business operations identified by the EPA as a higher risk industry, particular attention

would have been paid to those activities that presented an elevated potential for environmental impact.

## MATERIAL, PRODUCT, AND WASTE-STREAM HANDLING AND PROCESSING

### **Materials/Products Handling and Storage:**

No improper storage of materials or products was observed at the Site. Reporting under the Spill Prevention, Control and Countermeasures program to address accidental chemical spills (40 CFR §§109-114) is not required. Additionally, no activities were observed that could be interpreted to be indicative of improper classification of waste material<sup>4</sup>.

### **Medical Waste Discharges:**

For the purposes of this Assessment, medical waste is defined in the *Medical Waste Tracking Act* ("MWTa") 42 U.S.C. §§ 6992-92k, "as waste materials produced in the diagnosis, treatment, or immunization of human beings or animals, in research pertaining thereto, or in the production or testing of biologicals. Specifically covered are cultures and stocks of infectious agents and associated biologicals, human pathological wastes, human blood and blood products, sharps (both used and unused), animal waste, and isolation waste." For the purposes of this Assessment, bloodborne pathogen waste material is defined in paragraph (b) of the *Occupational Exposure to Bloodborne Pathogens; Final Rule*, 29 CFR § 1910.1030 as "blood" and "other potentially infectious materials." No improper medical waste storage or discharge was observed.

### **Storage Tanks - Above and Below Ground:**

During the course of on-site activities, particular attention was directed toward indicators of above or below ground storage tanks, including (i) fill pipes, overflow pipes, vent pipes; (ii) areas of abnormal or heavy staining; (iii) man ways, manholes, or access covers; (iv) abandoned concrete saddles or gravity racks; (v) abandoned pumping equipment or gasoline pumps; (vi) concrete pads not homogeneous with surrounding surfaces; (vii) concrete build-up areas potentially pump islands or non-homogeneous patching; or (viii) new fill areas or piles of fill.

South of the parking lot is a square-shaped concrete patch that is likely associated with a 300 gallon heating oil tank that was reportedly closed in place on January 31, 2017, by *Universal Applicators, Inc.* According to the information provided by a representative of the seller, Mr. Dane Murphy, confirmatory soil samples were not collected at the time of closure. According to the Washington State Department of Ecology, if an underground storage tank is permanently closed in place, a site assessment must be conducted after the UST system is emptied and cleaned and all liquid and accumulated sludge has been removed. **Based on the lack of confirmatory soil samples, Further Action is Recommended.**

## **Secondary Underground Storage Tank Indicators:**

In addition to the primary UST visual indicators usually observed on the exterior of the property, secondary UST indicators were considered. These secondary – and usually interior – indicators included (i) interior product feed lines; (ii) remote tank fuel level gauges connected via flex tubes; (iii) unexplained pipe access routes through exterior walls; (iv) areas of surficial staining; (v) furnace or boiler identification labels; or (vi) visual indicators of burner unit changeover. No secondary UST indicators were observed during the on-site investigation.

## **Waste Stream Processing and Disposal:**

During the on-site observations, particular attention was directed toward activities or situations that could be considered contamination indicators by a regulated substance<sup>5</sup>. Potential indicators of contamination or violation can include: (1) stained or discolored sinks, drains, catch basins, drip pads, or sumps; (2) spills around loading docks, fueling areas, catch basins, or surface drains; (3) waste disposal areas, dumpsters, and other storage containers--evidence of spills or staining should be recorded; (4) pipes, gutters, spouts, or tubes protruding into potential bodies of water; or (5) waste stored on-site over 90 days that may require a RCRA Part B permit. No areas of potential concern were observed.

## **Hazardous Waste Processing and Disposal:**

In addition to solid waste disposal<sup>6</sup>, the on-site observations considered the potential existence of hazardous waste, defined as a solid waste which, due to quantity, concentration, or other characteristics, may cause an increase in mortality or illness, or may pose a hazard to human health or the environment, under RCRA 42 USC §6903(5). The Assessor did not observe any improper waste processing or disposal activities at the Site.

## **Wastewater, Storm Water Discharges:**

All point source discharges regulated by the Clean Water Act (“CWA”) are subject to the applicable water quality-based standards as established in the National Pollutant Discharge Elimination System (“NPDES”) codification 40 CFR Subpart D §131.36. Additionally, CWA Sections 402 (p)(1) and (p)(2) have created categories of storm water discharges within Permit Issuance and Permit Compliance Deadlines for Phase I Storm water Discharges effective October 1, 1993, that may also be applicable to the subject Property (as detailed in the Federal Register, Volume 57, Number 244). Any significant change in the usage of the subject Property could require the submittal of an NPDES initial storm water discharge permit under 40 CFR §122.26 or 40 CFR Chapter I - Preamble Appendix A. However, based upon information supplied during interviews and review of the relevant documents supplied to the Assessor, no requirements for NPDES permitting were discovered that are currently applicable to the subject Property.

## VISUAL AND PHYSICAL OBSERVATIONS AND INFORMATION: ADJACENT AND ADJOINING PROPERTIES

For the Scope of this Assessment, properties are defined and categorized based upon their physical proximity to the subject Property. An *adjacent* property is any real property located within 0.25 mile of the subject Property's border. An *adjoining* property is any real property whose border is contiguous or partially contiguous with the subject Property, or that would be if the properties were not separated by a roadway, street, public thoroughfare, river, or stream.

### **Adjacent Properties Overview:**

The subject Property is located in a mixed-use commercial and residential area. To the north is Mudbay. To the south is Northwest 53<sup>rd</sup> Street followed by O'Reilly Auto Parts. To the east is GOW Alexander Fire Equipment. To the west is Subway followed by 15<sup>th</sup> Avenue Northwest.

### **Adjoining Properties Description:**

Limited visual observation of the adjoining properties was performed by the Assessor. There were no observed materials or storage practices or other visual indicators of potential environmental impact on the adjoining properties which could affect the subject Property.

<b>Adjoining Property - north:</b>	To the north is Mudbay.
<b>Adjoining Property - south:</b>	To the south is Northwest 53 <sup>rd</sup> Street followed by O'Reilly Auto Parts
<b>Adjoining Property - east:</b>	To the east is GOW Alexander Fire Equipment.
<b>Adjoining Property - west:</b>	To the west is Subway followed by 15 <sup>th</sup> Avenue Northwest.

Adjoining and adjacent properties and landmarks include Northwest 53<sup>rd</sup> Street adjoining to the south; 15<sup>th</sup> Avenue Northwest adjacent to the west; Northwest Market Street approximately one-eighth mile north; Lake Washington Ship Canal approximately ½ mile south; The Woodland Park Zoo approximately one mile northeast; Highway 99 approximately 1½ miles east; Green Lake approximately 1½ miles northeast; and Interstate Five approximately 2½ miles east. Significant bodies of water include Shilshole Bay of the Puget Sound approximately 1½ miles northwest.

## POTENTIAL ON-SITE CONTAMINATION SOURCES

### **Current Business Operations:**

The Site is occupied by the personal training studio, *Outrageously Fit*, and a dojo. Based upon the on-site Reconnaissance, this type of occupancy is not reasonably anticipated to environmentally impact the subject Property.

### **Presumed Asbestos-Containing Building Materials:**

During the on-site investigation presumed asbestos-containing materials were observed, including but not limited to gypsum wall and ceiling surfacing materials, acoustic ceiling tiles, thermal insulation, floor tiles and associated mastic, and roofing materials. As defined in NESHAP §61.141, the observed materials may be classified as suspect regulated asbestos-containing materials. As defined in application OSHA regulations, the observed materials may also be classified as Presumed Asbestos-Containing Materials ("PACM"). Federal regulation requires that prior to demolition, renovation, or any other activity that may disturb these materials, either an inspection should be performed by an accredited building inspector or the materials should be handled as asbestos-containing. Moreover, the Site owner and operator should comply with the applicable regulations pursuant to the designation of PACM. Based upon the age of the building, the presence of asbestos is highly likely.

### **Formaldehyde:**

Formaldehyde is an extremely popular chemical used in a variety of both building materials and furnishing products. Currently national usage is estimated in the billions of pounds per year. EPA has now classified formaldehyde as a "probable human carcinogen" suspected of inducing cancer in humans. Studies have shown that after installation, indoor formaldehyde levels require years of decline and reach residual background levels. During the off-gassing process, the indoor levels can be a significant source of irritation to hypersensitive individuals. The formaldehyde product investigated within the scope of this Assessment is urea-formaldehyde foam insulation ("UFFI"), used in the 1970's primarily as wall cavity insulation. The release potential of UFFI from wall cavities is dependent upon factors such as; water-damaged walls, unpainted wall surfaces, or cracked paint or wall covering. While interior air sampling and analysis is the only conclusive method to delineate formaldehyde concentrations, visual and physical inspection of the subject Property indicate a virtually non-existent potential for UFFI contamination.

### **Lead-Based Paint:**

In 1978 the Federal Government banned the use of lead-based paint in residential applications, however use in general industry continued at a decreased rate to the present. Lead-based paint presents a hazard through inhalation or ingestion of paint chips or vapor fumes. The

greatest cumulative health threat is to young children, and for this reason the Department of Housing and Urban Development (“HUD”) has promulgated lead standards and survey requirements for buildings affected by HUD funding. This HUD regulation represents the only Federal requirement for lead-based paint management applicable to privately owned structures. Based upon the age of construction, the presence of lead-based paint is highly likely.

### **Lead-Based Paint Disclosure:**

The *Lead-Based Paint Hazard Reduction Disclosure Act*<sup>7</sup> is effective as of December 6, 1996. The Act applies, with limited exceptions, to all residential dwellings built before January 1, 1978<sup>8</sup>. The Act defines lead-based paint as "paint or other surface coatings that contain lead equal to or in excess of 1.0 milligrams per square centimeter or 0.5% by weight<sup>9</sup>." Under the Act, (i) sellers and lessors of most residential housing built before 1978 must disclose the presence of known lead-based paint and/or lead-based paint hazards in the housing; (ii) sellers and lessors must provide purchasers and lessees with any available records or reports pertaining to the presence of lead-based paint and/or lead-based paint hazards; (iii) sellers and lessors must provide purchasers and lessees with a federally approved lead hazard information pamphlet<sup>10</sup>; (iv) sellers must provide purchasers with a ten day opportunity to conduct a risk assessment or inspection for the presence of lead-based paint and/or lead-based paint hazards before the purchaser is obligated under the contract; (v) sales and leasing contracts must include certain disclosure and acknowledgment language; and (vi) agents must ensure compliance with these requirements. The determination of the applicability of the *Disclosure Act* to the subject Property is outside the Scope of this Assessment.

### **Lead-Based Paint OSHA §1926.62 Regulations:**

During the Site observations, no suspected lead-based paint (“LBP”) surfaces were identified, with paint in poor or delaminated condition. As defined in the OSHA *Lead Standard in Construction and General Industry*, and applicable State regulations, prior to any other activity that may disturb these suspect surfaces, either an inspection should be performed by an appropriately qualified Inspector, or the materials should be handled as lead-containing. Additionally, as required by 29 CFR §1926.62, (i) a limited response action should be initiated where necessary, and (ii) potentially impacted employees and occupants should be provided training.

### **PCB-Containing Exterior Electrical Transformers:**

The Assessor did not observed any leaking pole-mounted electrical transformers on the subject Property. All transformers are owned by the utility company, and not the responsibility of the Property owner.

### **Micro Biological Contaminants:**

The presence of micro biological organisms and their byproducts is ubiquitous throughout the indoor and outdoor environments. Mold, also known as fungi, are a species of micro biological

organisms can detrimentally effect buildings via the presence of their spores, off gassing, and airborne suspension of the organisms themselves. In the presence of both excess moisture and a nutrient supply, molds can grow rapidly to produce larger colonies with potentially adverse consequences.

While it is generally accepted that in particular environments, molds can be allergenic, and occasionally infectious or toxic, there is both no clear scientific evidence to support the conclusions that the mere presence of micro organisms is in itself a recognized environmental condition, or that any threshold level exists of airborne organisms or byproducts above which a negative impact to human health will likely result <sup>11</sup>. In particular, the U.S. EPA has stated “no EPA or other federal limits have been set for mold or mold spores...”<sup>12</sup>

In spite of the lack of scientific data – in response to the growing public concern over the potential adverse health effects of mold exposure – a variety of public agencies and regulatory authorities have published recommendations and guidelines for the assessment and remediation of mold. In recognition of both the increased public awareness and scientific limitations regarding mold, the observations conducted on Site attempted to identify clearly known indicators of potential micro biological impact.

These readily observable indicators typically include: (i) obvious visual indications of micro biological organism growth in readily accessible areas; (ii) indicators of extensive or continued water intrusion or severe staining; (iii) secondary indicators such as smells and odors; and (iv) information obtained from the Key Site Manager and other knowledgeable personnel. Since the majority of micro biological growth tends to occur in enclosed, covered, and otherwise inaccessible building and interstitial spaces, the likelihood that micro organisms would not be observed even though present, is possible. As such, even though no readily visible observations or indicators of micro biological impact were observed during the Site visit, a micro biologically-based problem could be present at the Site, even though not observed. However, the Site observations did not reveal the obvious potential presence of microbial impact.

## **Radon:**

Radon is emitted by the natural breakdown and radioactive decay of uranium in rocks and soils, which then enters buildings through cracks in the foundation, sump pumps, areas around drainage pipes and other openings. In addition, radon may enter a structure as a water contaminant, natural gas contaminant, or off-gas by-product of building materials. Once inside an enclosed space, radon can accumulate. No visual estimation technique exists that accurately predicts the potential radon risk within a building.

The radon risk is a function of site location, soils composition, building construction, foundation integrity, and previous landfill practices. Actual physical testing of a building is the only way to accurately determine the radon levels. Radon health risks can be controlled by recognizing the potential for a problem, by testing and by reduction of radon levels in the building. In response to the unknown health risks of radon, the US EPA conducted a radon survey that attempted to generalize the radon health risks by county. The EPA Radon Study has identified King County, Washington, as a Radon Zone 3; the anticipated generalized level of Site radon is less than 2 pCi/L. Therefore, due to this specific usage, further investigation is not indicated at this time.

## POTENTIAL ON-SITE HISTORICAL CONTAMINATION SOURCES

The Historical Usage Information research activities included a review of Standard Historical Sources, including but not limited to: (i) aerial photographs, (ii) fire insurance maps, (iii) property tax files, (iv) recorded land title records, (v) United States Geological Services topographical maps, (vi) local street directories, (vii) building department records, (viii) zoning or land use records, and (ix) other historical sources<sup>8</sup>. The historical information contained in this Section may also include reviews of applicable Agency records, files, and database information.

### **Historical Site Operations Recognized Conditions:**

As defined under the ASTM Phase I Standard Practice, a Historical Recognized Environmental Condition is an environmental condition which in the past would have been considered a Recognized Environmental Condition – but which may or may not be considered a Recognized Environmental Condition currently. The final determination will be influenced by the current impact of the Historical Recognized Environmental Condition (“HREC”) on the property. For example, if a past release of any hazardous substances or petroleum products has occurred in connection with the property and has been remediated, with such remediation accepted by the responsible regulatory agency, this condition shall be considered an HREC.

Additionally, trade practice occasionally identifies Controlled Recognized Environmental Conditions, which can be defined as a Recognized Environmental Condition which involves the past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory agency, subject to restrictions or conditions of use or implementation of activity and use limitations on the Property.

The prior Site activities and agency interactions, as defined above, do not represent such a Historical Recognized Environmental Condition or Controlled Recognized Environmental Condition. Had such been present, additional investigation in that regard would have been performed.

### **Regulatory Agency Records Information:**

Where indicated, a review was conducted of the authoritative controlling agencies that previously interacted with the subject Property in a manner that indicated the presence of a potential environmental issue or Recognized Environmental Condition.

---

<sup>8</sup> As defined in the *ASTM Standard Practice for Environmental Site Assessments E1527-13* (§ 8.3.4.9), “other historical sources” can include: miscellaneous maps, newspaper archives, internet sites, community organizations, local libraries, historical societies, current owners or occupants of neighboring properties, or records and files of the Property Owner or occupants.

### **Activity and Use Limitations:**

Activity and Use Limitations (“AUL”) include both legal and physical or engineering controls that may be required by an authoritative agency. Agencies, organizations, and jurisdictions may define or utilize these terms differently. An AUL is often recorded in land title records. AUL information may often be recorded in the restrictions of record on the title, rather than a within the chain of title.

The historical research and review has not encountered an Activity or Use Limitation that is applicable to the subject Property.

### **POTENTIAL OFF-SITE CONTAMINATION: SOURCES AND RECEPTORS**

An *adjacent property* is defined as any real property located within 0.25 mile of the subject Property's border. An *adjoining property* is defined as any real property whose border is contiguous or partially contiguous with the subject Property, or that would be if the properties were not separated by a roadway, street, public thoroughfare, river, or stream.

### **Potential Adjacent and Adjoining Property Contamination Sources:**

There were no adjoining properties that presented an obvious potential source of environmental contamination.

### **Potential Adjacent and Adjoining Property Contamination Receptors:**

Environmentally sensitive receptors were investigated within a thousand feet of the borders of the subject Property. The sensitive receptors are materials or structures particularly susceptible to environmental damage or stress from migrating contamination. The major receptor groups investigated were water supplies, surface water bodies, residential structures, and other public receptors. During the course of on-site visual and physical inspection, no indicators of sensitive receptor contamination from the subject Property were observed.

### **ENVIRONMENTAL DATABASE INFORMATION**

Environmental database information was prepared and supplied by third-party vendor Environmental Data Resources, Inc. A search of all readily available environmental records was conducted to assist in compliance with the requirements of the U.S. Environmental Protection Agency regulatory requirements for *All Appropriate Inquiry* (see, 40 CFR Part 312) and the ASTM<sup>9</sup> Standard Practice for Environmental Site Assessments ( E 1527-13 for Phase I Site Assessments, and E 1528-14 for Transaction Screen Site Assessments).

---

<sup>9</sup> Formerly known as the American Society for Testing and Materials.

## **Review of Federally Reported Environmental Data:**

The following Federally maintained environmental records were reviewed for the purposes of this Environmental Site Assessment. All of the records have been updated within 90 days from the date the controlling governmental agency made the information available to the public in an electronic format.

### **National Priorities List (“NPL”) of Superfund Sites:**

The NPL is the EPA's database of hazardous waste sites currently identified and targeted for priority cleanup action under the Superfund program. A search of the December 2017 National Priorities List revealed no Superfund sites within one site one mile of the subject Property.

### **Superfund Enterprise Management System (“SEMS”) of 1980:**

Mandated as part of the 1980 Superfund Act, the CERCLIS (Comprehensive Environmental Response, Compensation and Liability Information System) list is an EPA compilation of the sites investigated or currently being investigated for a release or potential release of a regulated hazardous substance under the CERCLA regulations. In 2015, the list was renamed as the Superfund Enterprise Management System (“SEMS”). A search of the January 2018 environmental database revealed no SEMS sites within one-eighth mile, no sites within one-quarter mile, and one site within one-half mile of the subject Property.

The SEMS site in closest proximity is identified as *Seattle Maritime Academy Acetylene Cylinder Response*, located approximately one-half mile south of the subject Property. Historically, this site was occupied by the *Phoenix Shingle Mill* between 1888 throughout until the mid 1960s. After remedial investigations, the most likely source of contamination was identified as shingle mill refuse and ship canal dredge material that was used as fill to elevate the Property. The site was found to have petroleum diesel and polycyclic aromatic hydrocarbons (“PAHs”) contamination confirmed to be in the soil and groundwater above the Model Toxics Control Act cleanup levels. The site is not currently listed on the National Priorities List (“NPL”) and is listed as a removal only site. The site entered into the Voluntary Cleanup Program (“VCP”) in 2014. The current site status is listed as Cleanup Started. Due to the distance, elevation, and groundwater flow direction, this site is not reasonably anticipated to environmentally impact the subject Property.

### **Resource Conservation and Recovery Act (“RCRA”) Facilities:**

The RCRA program identifies and tracks hazardous waste from generation source to the point of ultimate disposal. The RCRA facilities database is the composite of

reporting facilities that generate, store, transport, treat, or dispose of controlled or hazardous waste. A search of the December 2017 RCRA facilities database revealed two RCRA sites within one-eighth mile and five sites within one-quarter mile of the subject Property.

The RCRA site in closest proximity is identified as *Bardahl*, located approximately one-eighth mile southeast of the subject Property. Historically, the property has occupied *Bardahl Manufacturing Corporation* since the 1950s. This site has operated as a Large Quantity Generator of hazardous waste since 1990. During that time, 23 violations were issued by the Department of Ecology. Between 1997 and 2017, Ecology conducted 22 on-site compliance evaluation inspections. Additionally, the site operated two underground storage tanks (“USTs”) that have reportedly been removed. A petroleum release was reported to Ecology in October of 1992. The site was found to have petroleum contamination confirmed to be in the soil and groundwater and suspected to be in the surface water above the Model Toxics Control Act cleanup levels. Approximately 300 cubic yards of soil were removed. However, information from a contamination assessment report revealed that contamination was still present in the tank farm area. Due to the distance, elevation, and groundwater flow direction, this site is not reasonably anticipated to environmentally impact the subject Property.

### **Review of State of Washington Reported Environmental Data:**

This review of the existing compilation of the State environmental databases attempts to identify environment problem sites, activities, and occurrences from the records and reports of the applicable State Agencies. A detailed listing is included in the Appendix.

#### **State of Washington - Registered Underground Storage Tank ("UST") Sites:**

Underground Storage Tanks are regulated under Subtitle I of RCRA and must be registered with the appropriate State agency. The State of Washington requires registration through the Department of Ecology. A search of the May 2018 State UST database revealed nine UST sites within one-eighth mile and fifteen sites within one-quarter mile of the subject Property.

The UST site in closest proximity is identified as *Unocal 5479*, located approximately one-eighth mile north/northwest of the subject Property. Historically, this site occupied a gasoline station beginning in 1964. The property is currently occupied by *Walgreens*. In March of 1993, five USTs were removed from the site along with 4,400 cubic yards of petroleum contaminated soils. Heavy oil range contaminated soils were left in place due to limits of excavation imposed by Northwest Market Street. The current site status is listed as Cleanup Started for petroleum products and other hazardous substances confirmed to be in the soil and

groundwater above the Model Toxics Control Act cleanup levels. Additionally, the site was found to have chlorinated solvents in the groundwater due to down gradient product migration from the former *Tux Shop* that occupied the western portion of the property until 1993. Due to the distance and groundwater flow direction, this site is not reasonably anticipated to environmentally impact the subject Property.

#### **State of Washington - Leaking Underground Storage Tank ("LUST") Incident Location Sites:**

Underground Storage Tank incident releases are regulated under RCRA and must be reported within 48 hours to the State of Washington Department of Ecology. The Agency maintains a database of all reported LUST incident sites. A search of the January 2018 State LUST database revealed seven LUST sites within one-eighth mile, one site within one-quarter mile, and six sites within one-half mile of the subject Property.

The LUST site in closest proximity is identified as *The Tux Shop*, located approximately one-eighth mile north/northwest of the subject Property. Historically, this site occupied a gasoline station beginning in 1964. The property is currently occupied by *Walgreens*. In March of 1993, five USTs were removed from the site along with 4,400 cubic yards of petroleum contaminated soils. Heavy oil range contaminated soils were left in place due to limits of excavation imposed by Northwest Market Street. The current site status is listed as Cleanup Started for petroleum products and other hazardous substances confirmed to be in the soil and groundwater above the Model Toxics Control Act cleanup levels. Additionally, the site was found to have chlorinated solvents in the groundwater due to down gradient product migration from the former *Tux Shop* that occupied the western portion of the property until 1993. Due to the distance and groundwater flow direction, this site is not reasonably anticipated to environmentally impact the subject Property.

#### **State of Washington - Confirmed and Suspected Contaminated ("CSCSL") Sites:**

The State Confirmed and Suspected Contaminated ("CSCSL") Sites are the sites identified by the State of Washington Department of Ecology, as either confirmed or suspected, or have been confirmed as potential hazardous waste locations. Due to the wide range of included sites, the CSCSL listing should not be interpreted as a "State Superfund" sites listing. A search of the January 2018 database revealed seven CSCSL sites within one-eighth mile, seven sites within one-quarter mile, nineteen sites within one-half mile, and thirty-eight sites within one mile of the subject Property.

The CSCSL site in closest proximity is identified as *The Tux Shop*, located

approximately one-eighth mile north/northwest of the subject Property. Historically, this site occupied a gasoline station beginning in 1964. The property is currently occupied by *Walgreens*. In March of 1993, five USTs were removed from the site along with 4,400 cubic yards of petroleum contaminated soils. Heavy oil range contaminated soils were left in place due to limits of excavation imposed by Northwest Market Street. The current site status is listed as Cleanup Started for petroleum products and other hazardous substances confirmed to be in the soil and groundwater above the Model Toxics Control Act cleanup levels. Additionally, the site was found to have chlorinated solvents in the groundwater due to down gradient product migration from the former *Tux Shop* that occupied the western portion of the property until 1993. Due to the distance and groundwater flow direction, this site is not reasonably anticipated to environmentally impact the subject Property.

### **State of Washington Voluntary Cleanup (“VCP”) Sites:**

The State of Washington Department of Ecology has received remedial action reports from site owners and operators for Response action that were conducted without Department approval or oversight, not under the requirements of an order or decree. A search of the January 2018 State VCP database revealed four VCP sites within one-eighth mile, five sites within one-quarter mile, and twenty-one sites within one-half mile of the subject Property.

The VCP site in closest proximity is identified as *Texaco 632320049*, located approximately one-eighth mile north of the subject Property. The site has occupied a gasoline station since 1940. The site contains four underground storage tanks (“USTs”) that were reportedly installed in 1983 and are currently listed as “closure in progress”. A petroleum release impacting soil and groundwater was reported to the Department of Ecology in November of 1992. The release also impacted the adjacent *Burger King* restaurant parcel. The site was found to have benzene, petroleum products, metals, and methyl tertiary-butyl ether confirmed and suspected to be in the soil and groundwater above the Model Toxics Control Act (“MTCA”) cleanup levels. The site entered into the VCP in December of 2001, and was terminated in June of 2006. In 2008, the site was reentered; the current status is listed as Cleanup Started. A report prepared in February of 2013 by *Contestoga-Rovers & Associates* confirmed no petroleum hydrocarbons in the groundwater exceeded the MTCA Method A cleanup level. Residual xylenes and total petroleum hydrocarbons (“TPH”) gasoline were detected in a soil sample on the *Burger King* property, but analytical data from the groundwater sample collected from the same boring indicated the groundwater was not subsequently affected by the residual soil impact. Due to distance, this site is not reasonably anticipated to environmentally impact the subject Property.

### **State of Washington Waste Landfill Facilities:**

The State Solid Waste Landfill Facilities ("LF") listing is the sites identified by the State of Washington Department of Ecology, Waste Management Division, as either currently operating or previously identified as a solid waste landfill. This classification can be a result of either RCRA Part B permitting or prior identification by the Board. A search of the December 2017 database revealed one SWLF site within one-eighth mile, no sites within one-quarter mile, and no sites within one-half mile of the subject Property.

The SWLF site in closest proximity is identified as *Re Sources dba The RE Store Seattle*, located approximately one-eighth mile south/southeast of the subject Property. Historically, the site occupied an automotive repair facility between 1980 and 1990. This site is currently occupied by *Ballard Reuse* that operates as a drop off and buy back site for recycled materials. To date, no violations have been reported to the Department of Ecology. Due to the distance, elevation, and groundwater flow direction, this site is not reasonably anticipated to environmentally impact the subject Property.

### **Approximate Database Search Range:**

The above referenced Federal and State databases were reviewed for an appropriate search distance from the subject Property borders approximating the following radius:

#### **Federal Database/Search Range:**

- National Priorities List (NPL) of Superfund Sites/1.0 mile
- Superfund Enterprise Management System (SEMS) Facilities/0.5 mile
- Resource Conservation and Recovery Act (RCRA): TSDS Facilities/0.5 mile, Generators/0.25 mile
- Emergency Response Notification System (ERNS) Federal Reported Releases/0.05 mile

#### **State of Washington Database/Search Range:**

- State of Washington Registered Underground Storage Tanks/0.25 mile
- State of Washington Leaking Underground Storage Tanks/0.5 mile
- State of Washington Hazardous Waste Sites/1.0 mile
- State of Washington Landfill and Solid Waste Sites/0.5 mile

## STATEMENT OF THE ENVIRONMENTAL PROFESSIONAL

### Statement of Quality Assurance

I have performed this Assessment in accordance with generally accepted environmental practices and procedures, as of the date of this Report. I have employed the degree of care and skill ordinarily exercised under similar circumstances by reputable environmental technologists practicing in this area. The conclusions contained within this Assessment are based upon site conditions I observed or were reasonably ascertainable and present at the time of my inspection.

The objective of this Environmental Site Assessment was to ascertain the potential presence or absence of environmental releases or threatened releases that could impact the subject Property, as delineated by the Scope of Work. The Scope of this Assessment does not purport to encompass every report, record, or other form of documentation relevant to the Property being evaluated. Additionally, this Assessment does not include or address reasonably ascertainable Environmental Liens currently recorded against the Property.

The procedure was to perform reasonable steps in accordance with the existing regulations, currently available technology, and generally accepted engineering practices in order to accomplish the stated objective.

The conclusions and recommendations stated in this Report are based upon personal observations made by myself and other employees of Aerotech, and also upon information provided by others. I have no reason to suspect or believe that the information provided is inaccurate.

Signature of Environmental Assessor - Devin Melville:

Signature  
Environmental Assessor

### Statement of Regulatory Compliance

I have performed this Assessment in compliance with requirements set forth in the *Standards and Practices for All Appropriate Inquiries; Final Rule* ("AAI"); U.S. EPA, 40 CFR Part 312, 70 FR 66070, November 1, 2005.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of this part. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject Property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Signature of Environmental Professional - Alan T. Blotch:

### **Environmental Assessment Report Limitations:**

The enclosed Phase I Environmental Site Assessment has been performed for the exclusive use of the Client(s) for the transaction at issue concerning:

**1446 NORTHWEST 53<sup>RD</sup> STREET**

1446 Northwest 53<sup>rd</sup> Street  
Seattle, Washington 98107

This Assessment has been performed in accordance with generally accepted environmental practices and procedures, as of the date of the Report. All services have been performed employing that degree of care and skill ordinarily exercised under similar circumstances by reputable environmental technologists practicing in this, or similar localities. No other warranty or guarantee, expressed or implied, is made or offered.

The conclusions and recommendations stated in this Report are based upon observations made by employees of Aerotech Environmental Consulting, Inc. and also upon information provided by others. We have no reason to suspect or believe that the information provided is inaccurate. However, we cannot be held responsible for the accuracy of the information provided to us by others. The Scope of this Assessment does not purport to encompass every report, record, or other form of documentation relevant to the Property being evaluated.

This Assessment does not include or address reasonably ascertainable Environmental Liens currently recorded against the subject Property.

The observations contained within this Assessment are based upon site conditions readily visible and present at the time of our Site inspection. These site observations are unable to specifically address conditions of subsurface soil, groundwater, or underground storage tanks, unless specifically mentioned. This Phase I Environmental Site Assessment does not attempt to address the past or forecast the future Site conditions.

---

## REFERENCES AND CITATIONS

1. For the purposes of this Assessment, information is considered reasonably ascertainable if it is (1) publicly available, (2) obtainable from its source within reasonable time and cost constraints, and (3) practically reviewable. The length of time required to obtain information from the City Building and Zoning Department is considered to be reasonable.

2. It is a violation of copyright law to photocopy Sanborn Maps regardless of their location or source. This includes maps located at local libraries, universities, historical societies, or private collections. Sanborn Maps contained on microfiche collections are included in the prohibition against photocopying.

3. SIC code information is contained in the *Standard Industrial Classification Manual 1987*, publication 87-100012 of the national Technical Information Service, Springfield Va. The Manual is available through the U.S. Government Printing Office.

4. *Solid Waste*: defined as garbage, refuse, sludge, and other discarded material including solid, semi-solid, and contained gaseous waste per RCRA 42 USC §6903(27). For visual assessment purposes, any material that is discharged is a solid waste. A majority of the regulatory exclusions do not apply to discharges made within a structure.

5. *Regulated Substance*: defined as a substance that is (i) regulated under RCRA via direct definition; or (ii) regulated under CERCLA or the Clean Air Act, that may become subject to RCRA regulations as a result of the CERCLA classification.

6. *Disposal*: defined as the discharge, deposit, injection, dumping, spilling, leaking, or placing of any solid waste or hazardous waste into or on any land or water so that such solid waste of hazardous waste or constituent thereof may enter the environment or be emitted into the air or discharged into the waters, including ground waters, per RCRA 42 USC §6903(3).

7. Refer to, *Federal Register* Volume 61 Number 9064, March 6 1996, *Lead; Requirements for Disclosure of Known Lead-Based Paint and/or Lead-Based Paint Hazards in Housing*.

8. EPA and HUD consider "housing constructed before 1978" to mean housing for which a construction permit was obtained before January 1, 1978. If no permit was obtained, then housing in which construction was started before January 1, 1978.

9. See, 24 CFR §35.86 and §40 CFR 745.103.

10. This requirement may be satisfied by supplying a pamphlet issued by the U.S. Environmental Protection Agency and the U.S. Consumer Product Safety Commission entitled *Protect Your Family From Lead In Your Home*. This pamphlet is available from the National Lead Information Clearinghouse at (800)424-LEAD.

11. The American Conference of Governmental Industrial Hygienists has concluded that there are no mandatory numerical limits against which investigators can compare measurements of air or source concentrations for the majority of substances of biological origin that are associated with building-related exposures.

12. See, U.S. EPA Publication: *A Brief Guide to Mold, Moisture, and Your Home*, page 13, Publication No. EPA 402-K-02-003, 2002.

## TERMS AND DEFINITIONS

### Description of Terms Specific to this Report

*adjacent property*..... any real property located within 0.25 mile of the subject Property's border.

*adjoining property*..... any real property whose border is contiguous or partially contiguous with the subject Property, or it would be if the Properties were not separated by a roadway, street, public thoroughfare, river, or stream.

*ASTM*..... formerly the American Society for Testing and Materials.

*ASTM Phase I Environmental Site Assessment*..... the process described in the ASTM practice E 1527, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The process by which a person or entity seeks to determine if a particular parcel of property including improvements is subject to recognized environmental conditions. The process does not purport to address all of the safety, environmental concerns, and regulatory compliance applicability associated with its use.

*dwelling*..... any structure all or part of which is designed or used for human habitation, ie.; a place of residence or abode.

*field screen questionnaire*..... the environmental questionnaire normally completed by the key site manager, that asks the respondent to answer all questions to the best of their actual knowledge and good faith. The answers provide further details on the appropriateness of the investigation and areas of potential environmental concern.

*Key Site Manager*..... a person identified by the owner of the Property as having the best reliable knowledge of the previous uses, current conditions, and physical characteristics of the Property, and in a position to provide reasonably accurate information for the Field Screen Questionnaire.

*obvious*..... that which is plain or evident; a condition or fact that could not be ignored or overlooked by a reasonable observer while visually or physically observing the property.

*recognized environmental condition(s)*..... the presence or likely presence of hazardous substances or petroleum products on the Property under conditions that indicate as existing release, a past release, or a material threat of a release of those same substances into structures on the Property or into the ground, groundwater, or surface water of the Property. The term does not include *de minimis* conditions or those that would not be subject to an enforcement action if brought to the attention of an appropriate governmental agency.

*residential building*..... any room, group of rooms, or other interior areas of a structure designed or used for human habitation; common areas accessible by inhabitants; and the surrounding property or structures.

*Transaction Screen Site Assessment*..... the process described in the ASTM E 1528-00 standard, *Standard Practice for Environmental Site Assessments: Transaction Screen Process*.

## ENVIRONMENTAL CONTRACTOR'S CERTIFICATION

1446 NORTHWEST 53<sup>RD</sup> STREET  
1446 Northwest 53<sup>rd</sup> Street  
Seattle, Washington 98107

1. Contractor's Name: Aerotech Environmental Consulting, Inc.
2. Contractor's Address: 13925 Interurban Avenue South, Suite No. 210, Seattle, Washington 98168
3. Name and title of person completing this certification: Alan T. Blotch / President
4. Answer the following questions about each employee that contractor will have perform the assessment or prepare the report showing the results of the inspection:
  - a. Name and Title of Employee: Alan T. Blotch – Environmental Assessor
  - b. Length of experience doing environmental assessments: 37 years
  - c. Education degrees received: Masters of Business Administration  
Juris Doctor – Environmental Law
  - d. Relevant training received: ASTM E50 Environmental Assessment Committee Meetings
5. Identify any certifications and approvals issued to contractor pursuant to an official Federal, State or local program or policy to conduct environmental assessments: Registered Environmental Assessor  
Issued by State of California (1993-2012)
6. Describe the generally recognized standards which the contractor will use to perform the assessment.  
*Standard Practice for Environmental Site Assessments: Phase I Assessment (ASTM E 1527-13)*  
*Standard Practice for Environmental Site Assessments: Transaction Screen Process (ASTM E 1528-14)*
7. Disclose the nature of any previous environmental inspections contractor has ever performed for the seller of the property: KING ARTHUR  
or buyer of the property: WALLS PRESTON
8. Disclose the nature of any affiliation or association contractor now has, or ever had, with the above referenced seller of the property, of the above referenced buyer of the property: None
9. Describe the liability insurance carried by contractor to cover claims in the event that it fails to discover adverse environmental conditions during an environmental inspection.  
Professional Errors & Omissions Coverage \$1,000,000 / claim and \$1,000,000 aggregate liability

THE UNDERSIGNED HEREBY CERTIFIES, UNDER PENALTY OF THE CRIMINAL AND/OR CIVIL PENALTIES IN 18 U.S.C. § 1001 FOR FALSE STATEMENTS TO THE UNITED STATES GOVERNMENT, THAT THE ABOVE INFORMATION IS TRUE AND CORRECT.

## **Statement of Assessor Qualifications:**

### **CURRICULUM VITAE**

Alan T. Blotch

Mr. Blotch was previously the Corporate General Counsel for a national industrial safety and environmental consulting firm, with offices throughout the United States. Since 2000, he has been the President of an environmental consulting firm while continuing his law practice, specializing in insurance defense litigation orientated towards construction, products liability, environmental, health, and safety matters.

Mr. Blotch has over 37 years experience in the industrial safety and environmental consulting industry, including both field assessment and management positions. For nine years he held a variety of positions with a national consulting firm, including division manager, marketing vice president, and executive vice president.

Additionally, Mr. Blotch has been involved since 1991 in the development of the ASTM E50 Committee Phase I Environmental Site Assessment Standard Practice, ASTM Standard for the Survey of Asbestos Building Materials, EPA/HUD contract NIBS Lead-Based Paint Operations Manual, and NIBS Asbestos Operations and Maintenance Guidance manual.

#### **Education:**

University of Illinois at Chicago Circle – undergraduate pre-law  
Illinois Benedictine College – Masters of Business Administration  
Chicago-Kent College of Law – Juris Doctor of Law  
with Certificate in Environmental and Energy Law

#### **Certifications / Licenses:**

Registered Environmental Assessor – State of California (1993-2012)  
Asbestos Supervisor, Project Manager – AHERA Accredited  
Asbestos Building Inspector, Management Planner, Project Designer - AHERA Accredited  
Attorney at Law – State of Washington and State of Oregon

#### **Organization Memberships:**

American Bar Association  
– Section of Environmental, Energy, and Natural Resources, member.  
American Industrial Hygiene Association  
American Society of Safety Engineers  
– Board of Directors, Puget Sound Chapter, member;  
– Chairman, Regulatory Affairs Committee  
American Society for Testing and Materials (ASTM)  
– Environmental Standards Committee E50, Environmental Site Assessments, member;  
– Asbestos Inspection Protocol for the Survey of Asbestos Building Materials Working Group, member;  
– Environmental Standards Committee E06, Performance of Buildings, member.  
Association of Trial Lawyers of America  
Defense Research Institute, Inc.  
National Institute of Building Sciences  
– Operations Committee of Consultative Council; member, Project Committee on Lead-Based Paint O&M Work Practices Manual and Procedures Development, member;

- Project Committee on Asbestos Management, and Operations and Maintenance Manual Development, member;
- Project Committee on Asbestos Specifications and Response Actions Standards Revision, member.
- Occupational Safety and Health Administration
  - Advisory Committee on Construction Safety and Health, participant.
- Puget Sound Area Construction Safety Summit
- Washington Defense Trial Lawyers Association
  - Association magazine editorial board, member.
- Washington State Trial Lawyers Association

## **Professional and Standards Development:**

*ASTM Phase I Environmental Site Assessment Practice.* Beginning in 1991, Mr. Blotch was involved in the drafting and review of the American Society for Testing and Materials (“ASTM”) Environmental Standards Committee E50, Environmental Site Assessments, charged with the responsibility of developing the ASTM Phase I Environmental Site Assessment Standard Practice. This involvement in the committee’s work continues to the present.

*ASTM Survey of Asbestos in Buildings Practice.* In 1993, the ASTM formed a working group to develop an Asbestos Inspection Protocol for the Survey of Asbestos Building Materials Working Group. Mr. Blotch personally performed the drafting of significant portions of the initial Survey document. His involvement continues to the present.

*National Institute of Building Sciences (“NIBS”) Lead-Based Paint Work Practices Manual.* In 1992, Mr. Blotch was invited to join the newly formed NIBS Operations Committee of Consultative Council, Project Committee on Lead-Based Paint O&M Work Practices Manual and Procedures Development pursuant to a NIBS contract with the EPA and HUD. For two years Mr. Blotch attended the committee meetings and discussion groups and participated in the development and review of the Manual, which was subsequently published by the EPA.

*NIBS Asbestos Operations and Maintenance Manual.* Beginning in 1994, Mr. Blotch was invited to join the newly formed Project Committee on Asbestos Management, and Operations and Maintenance, charged with the responsibility of developing an Asbestos O&M Manual. This work included both the attendance of working group committee meetings and document review. This project was completed within two years.

*NIBS Asbestos Specifications Revision.* In order to ensure compliance with the revised OSHA asbestos regulations, in 1997, NIBS formed a Project Committee on Asbestos Specifications and Response Actions Standards Revision, of which Mr. Blotch was a member. His involvement included review and comment on the draft Specification revisions to the NIBS Asbestos MASTERSPEC® Removal and Response document.

*State of Washington Industrial Hygiene & Safety Title Protection Act.* Instrumental in drafting the 2001 Session Washington State Industrial Hygiene and Professional Safety Title Protection Act, Chapter 18 of the Washington Revised Code. Testified before the Legislature’s combined House and Senate Committee on Commerce and Industry in support of the Title Protection Act.

CURRICULUM VITAE  
**Devin R. Melville**  
Environmental Consultant

Ms. Melville graduated with a Bachelor of Science in Environmental Resource Management from the University of Washington. She has restoration field work experience for multiple ecosystems in the Pacific Northwest. She has written and contributed to multiple technical documents including a climate change vulnerability assessment, scientific experiment reports and abstracts, restoration draft proposals, and a white paper on net-zero energy.

**Education:** River View High School, Finley, Washington (2010)  
Columbia Basin Community College, Pasco, Washington - *Associates of Arts & Sciences* (2013)  
University of Washington, Seattle, Washington - *Bachelor of Science in Environmental Resource Management* (2016)

**Professional**

**History:** Aerotech Environmental Consulting Inc., Environmental Consultant (January 2017 - Present)  
Doty Plant Microbiology Lab, Undergraduate Researcher (January - July 2016)  
Applied Ecology, Restoration Technician (May - July 2016)  
Master Builder's Association of King and Snohomish County, Built Green Intern (March - October 2015)

**Expertise:** In 2015, Ms. Melville was an intern for Built Green, a non-profit green home certification company of the Master Builder's Association. She analyzed and graphed consumption data collected from a net-zero energy town home complex. The analysis was then used for a white paper written on net-zero energy. She also assisted in the coordination and planning of the Annual Built Green Conference.

During her time at the University, Ms. Melville was an undergraduate researcher in a plant microbiology lab focusing on sustainable agriculture production using endophytes. She conducted her own research trials and quantified results that will be published in the scientific community.

Additionally, Ms. Melville collaborated on a Climate Change Vulnerability Assessment for the National Park Service where she focused on researching previous assessments and summarizing findings through tables and citations.

She has been a volunteer for projects at the Washington Park Arboretum and the UW Botanic Gardens. She worked as a restoration technician along the I-5 corridor on projects for the Green Seattle Alliance and Sound Transit. Most recently she worked with the City of Seattle on the Trees for Neighborhoods Seattle reLeaf Program.

### TRIPLE RINSE CERTIFICATE

Date: 1-31-2017

On JANUARY 31<sup>ST</sup> 2017 Universal Applicators, Inc. triple rinsed a 300 Gallon UL-58 Commercial Heating Oil Tank at address 1446 NW 53<sup>rd</sup> St. Seattle, WA 98107. Under the supervision of Kelly Mackay the water, oil and sludge was transported to our facility in South Park (515 S. Southern St. Seattle, WA 98108). The mix will be stored on site until our re-refinery (ORRCO) picks it up for disposal and re-refinement of the product.

Kelly Mackay

\_\_\_ Yes ☒ No \_\_\_ Unkwn

(6) Are there currently, or to the best of your knowledge have there been previously, any automotive or industrial batteries in significant quantities, or pesticides, paints, or other chemicals in individual containers of greater than five gallons in volume or fifty gallons in the aggregate, stored on or used at the Property.

\_\_\_ Yes ☒ No \_\_\_ Unkwn

(7) Are there currently, or to the best of your knowledge have there been previously, any industrial drums (typically 55 gallon) or sacks of chemicals located on the Property or at the facility?

\_\_\_ Yes \_\_\_ No ☒ Unkwn

(8) Has Fill Dirt been brought onto the Property which originated from a contaminated site or which is of an unknown origin?

\_\_\_ Yes ☒ No \_\_\_ Unkwn

(9) Are there currently, or to the best of your knowledge have there been previously, any Pits, Ponds, Surface Impoundments or Lagoons located on the Property in connection with waste treatment or waste disposal?

\_\_\_ Yes ☒ No \_\_\_ Unkwn

(10) Are there currently, or to the best of your knowledge have there been previously, any Incinerators, Injection Wells, Transfer Stations, Waste Recycling Operations, Waste Treatment Detoxification, or Land Disposal Areas located on the Property in connection with waste treatment or waste disposal?

\_\_\_ Yes ☒ No \_\_\_ Unkwn

(11) Is there currently, or to the best of your knowledge has there been previously, any stained soil on the Property?

☒ Yes \_\_\_ No \_\_\_ Unkwn

(12) Are there currently, or to the best of your knowledge have there been previously, any registered or unregistered above or underground storage tanks located on the Property?

☒ Yes \_\_\_ No \_\_\_ Unkwn

(13) Are there currently, or to the best of your knowledge have there been previously, any vent pipes, fill pipes or access ways indicating a fill pipe protruding from the ground on the Property or adjacent to any structure located on the Property?

\_\_\_ Yes \_\_\_ No ☒ Unkwn

(14) Are there currently, or to the best of your knowledge have there been previously installed, any urea-formaldehyde foam insulation within the Property?

\_\_\_ Yes ☒ No \_\_\_ Unkwn

(15) Are there currently, or to the best of your knowledge have there been previously, any flooring, drains, or walls located within the facility that are stained by substances other than water, or are emitting foul odors?

\_\_\_ Yes ☒ No \_\_\_ Unkwn

(16) Are there currently, or to the best of your knowledge have there been previously, any groundwater wells located on the Property?

\_\_\_ Yes ☒ No \_\_\_ Unkwn

(17) If the Property is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system or has the well been designated as contaminated by any government environmental and/or health agency?

\_\_\_ Yes ☒ No \_\_\_ Unkwn  
*OWNER DECEASED*

(18) Does the Owner or Occupant of the Property have any knowledge of Environmental Liens or government notification relating to past or current violations of environmental laws with respect to the Property or any facility located on the Property?

\_\_\_ Yes \_\_\_ No ☒ Unkwn  
*OWNER DECEASED*

(19) Has the Owner or Occupant of the Property been informed of the past or current existence of hazardous Substances or Petroleum Products or environmental violations with respect to the Property or any facility located on the Property?

\_\_\_ Yes ☒ No \_\_\_ Unkwn  
*OWNER DECEASED*

(20) Does the Owner or Occupant of the Property have any knowledge of any Environmental Site Assessment of the Property or facility that indicated the presence of Hazardous Substances or Petroleum Products on, or contamination of, the Property or recommended further assessment of the Property?

\_\_\_ Yes ☒ No \_\_\_ Unkwn  
*OWNER DECEASED*

(21) Does the Owner or Occupant of the Property know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any Hazardous Substances or Petroleum Products involving the Property by an Owner or Occupant?

\_\_\_ Yes ☒ No \_\_\_ Unkwn

(22) Does the Property discharge waste water other than storm water, directly to a ditch or stream on or adjacent to the Property?

\_\_\_ Yes ☒ No \_\_\_ Unkwn

(23) To the best of your knowledge, have any Hazardous Substances or Petroleum Products, unidentified waste materials, tires, automotive or industrial batteries or any other waste materials been dumped above grade, buried, and or burned on the Property?

\_\_\_ Yes \_\_\_ No ☒ Unkwn

(24) To the best of your knowledge, have any railroad ties, telephone poles, treated lumber, wooden wire or cable storage reels or spools been dumped above grade, buried, and or burned on the Property?

\_\_\_ Yes ☒ No \_\_\_ Unkwn

(25) To the best of your knowledge, in the past or the present have any railroad tracks or railroad right-of-ways been located on, or adjacent to the Property?

\_\_\_ Yes ☒ No \_\_\_ Unkwn

(26) Is there a transformer, capacitor or any hydraulic equipment for which there are any records indicating the presence of PCBs?

\_\_\_ Yes \_\_\_ No ☒ Unkwn

(27) Are there currently, or to the best of your knowledge, has the Owner or Operator of the Property been required previously to submit, file, or maintain Material Safety Data Sheets (MSDS) or a written Hazard Communication Program?

\_\_\_ Yes \_\_\_ No ☒ Unkwn

(28) Are there currently, or to the best of your knowledge, has the Owner or Operator of the Property been required previously to submit or file to Federal or State agencies a Chemical Contingency Plan, Emergency and Hazardous Chemical Inventory Form, Toxic Chemical Release Form, SARA Title III - Emergency Planning and Community Right-to-Know Act inventory, SARA Title III - Extremely Hazardous Substances inventory, or report under the Emergency Response Notification System?

\_\_\_ Yes ☒ No \_\_\_ Unkwn

(29) To the best of your knowledge, does the Property currently fall within the auspices of Department of Housing and Urban Development (HUD) supplied funding, or is a source of income revenue directly derived from, supplied, or guaranteed by HUD?

## EXECUTIVE SUMMARY

### TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

### DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal NPL site list***

NPL..... National Priority List  
Proposed NPL..... Proposed National Priority List Sites  
NPL LIENS..... Federal Superfund Liens

#### ***Federal Delisted NPL site list***

Delisted NPL..... National Priority List Deletions

#### ***Federal CERCLIS list***

FEDERAL FACILITY..... Federal Facility Site Information listing

#### ***Federal RCRA CORRACTS facilities list***

CORRACTS..... Corrective Action Report

#### ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF..... RCRA - Treatment, Storage and Disposal

#### ***Federal institutional controls / engineering controls registries***

LUCIS..... Land Use Control Information System  
US ENG CONTROLS..... Engineering Controls Sites List

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal CERCLIS list***

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities,

## EXECUTIVE SUMMARY

private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 01/09/2018 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

### ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/09/2018 has revealed that there are 7 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

### ***Federal RCRA generators list***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/11/2017 has revealed that there are 4 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/11/2017 has revealed that there are 3 RCRA-CESQG sites within approximately 0.25 miles of the target property.

### **State- and tribal - equivalent NPL**

WA HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

A review of the WA HSL list, as provided by EDR, and dated 02/21/2018 has revealed that there are 11 WA HSL sites within approximately 1 mile of the target property.

### State- and tribal - equivalent CERCLIS

WA CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the WA CSCSL list, as provided by EDR, and dated 04/16/2018 has revealed that there are 71 WA CSCSL sites within approximately 1 mile of the target property.

### State and tribal landfill and/or solid waste disposal site lists

WA SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Ecology's Solid Waste Facilities Handbook.

A review of the WA SWF/LF list, as provided by EDR, has revealed that there is 1 WA SWF/LF site within approximately 0.5 miles of the target property.

### State and tribal Brownfields sites

WA BROWNFIELDS: A listing of brownfields sites included in the Confirmed & Suspected Sites Listing. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

A review of the WA BROWNFIELDS list, as provided by EDR, and dated 01/18/2017 has revealed that there is 1 WA BROWNFIELDS site within approximately 0.5 miles of the target property.

WA CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the WA CSCSL NFA list, as provided by EDR, and dated 04/16/2018 has revealed that there are 32 WA CSCSL NFA sites within approximately 0.5 miles of the target property.

### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/11/2017 has revealed that there are 32 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

EPA ID: WA0000097782

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 12 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 6 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

**FINDS:**

Registry ID: 110005318192

**Environmental Interest/Information System**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Waste Stream Comments:

Facility ID: 51263452  
Data Year: 2006  
Comments: Mixture of groundwater containing tetrachloroethene (PCE) at a concentration above 0.7 milligrams per liter purged from site monitoring wells during groundwater sampling events and rinsewater from decontamination of measuring instruments.

Facility ID: 51263452  
Data Year: 2006  
Comments: Mixture of groundwater containing tetrachloroethene (PCE) at a concentration that did not exceed 0.7 milligrams per liter purged from site monitoring wells during groundwater sampling events and rinsewater from decontamination of measuring instruments.

**FINDS:**

Registry ID: 110005383423

**Environmental Interest/Information System**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with

a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

**Environmental Interest/Information System**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**FINDS:**

Registry ID: 110015413685

**Environmental Interest/Information System**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Violation Status: No violations found

FINDS:

Registry ID: 110005383851

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Biennial Reports:**

Last Biennial Reporting Year: 2017

**Annual Waste Handled:**

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 58120.5

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 2700

Waste code: D035

Waste name: METHYL ETHYL KETONE

Amount (Lbs): 15415

Waste code: F003

Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL

**FINDS:**

Registry ID: 110000489436

**Environmental Interest/Information System**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

**AIR EMISSIONS CLASSIFICATION UNKNOWN**

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**HAZARDOUS WASTE BIENNIAL REPORTER**

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

US EPA Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store

certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).

SSTS (Section Seven Tracking System ) evolved from the FIFRA and TSCA Enforcement System (FATES). SSTS tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed each year.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Owner/Operator Summary:

Owner/operator name: SHAPES INNOVATO S  
Owner/operator address: 5113 RUSSELL AVE NW  
SEATTLE, WA 98107  
Owner/operator country: US  
Owner/operator telephone: 206-706-0698  
Owner/operator email: Not reported  
Owner/operator fax: Not reported  
Owner/operator extension: Not reported  
Legal status: Private  
Owner/Operator Type: Owner  
Owner/Op start date: 05/14/1999  
Owner/Op end date: Not reported

Handler Activities Summary:

U.S. importer of hazardous waste: No  
Mixed waste (haz. and radioactive): No  
Recycler of hazardous waste: No  
Transporter of hazardous waste: No  
Treater, storer or disposer of HW: No  
Underground injection activity: No  
On-site burner exemption: No  
Furnace exemption: No  
Used oil fuel burner: No  
Used oil processor: No  
User oil refiner: No  
Used oil fuel marketer to burner: No  
Used oil Specification marketer: No  
Used oil transfer facility: No  
Used oil transporter: No

Historical Generators:

Date form received by agency: 01/10/2000  
Site name: SHAPES INNOVATORS LLC  
Classification: Not a generator, verified

Violation Status: No violations found

Evaluation Action Summary:

Evaluation date: 12/16/1997  
Evaluation: COMPLIANCE ASSISTANCE VISIT  
Area of violation: Not reported  
Date achieved compliance: Not reported  
Evaluation lead agency: State

FINDS:

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

**Handler Activities Summary:**

U.S. importer of hazardous waste: No  
Mixed waste (haz. and radioactive): No  
Recycler of hazardous waste: No  
Transporter of hazardous waste: No  
Treater, storer or disposer of HW: No  
Underground injection activity: No  
On-site burner exemption: No  
Furnace exemption: No  
Used oil fuel burner: No  
Used oil processor: No  
User oil refiner: No  
Used oil fuel marketer to burner: No  
Used oil Specification marketer: No  
Used oil transfer facility: No  
Used oil transporter: No

. Waste code: WT02  
. Waste name: Washington State Dangerous Toxic Waste with a toxic constituents concentration greater than or equal to 0.001% and less than 1.0%, determined by biological testing methods or a book designation procedure.

**Historical Generators:**

Date form received by agency: 03/01/2011

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

**FINDS:**

Registry ID: 110000897236

**Environmental Interest/Information System**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**FINDS:**

Registry ID: 110005360947

**Environmental Interest/Information System**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

**Environmental Interest/Information System**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

**Environmental Interest/Information System**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**FINDS:**

Registry ID: 110017941851

**Environmental Interest/Information System**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.
