RE: UST Removal - 30 day notice

This letter is to provide a 30 day notice to the Department of Ecology for underground storage tank removals at our E.A. Nord plant, located at 300 West Marine View Drive, in Everett, Washington. A site assessment will be made, at the time of tank removal, by Sweet-Edwards/Emcon. A list of the tanks to be removed and their particulars follow.

Tank I.D. No. 1: 1000 gal. diesel, location as shown on the attached map.

Tank I.D. No. 2: 500 gal. gas tank, location as shown on the attached map.

Tank I.D. NO. 5: 500 gal. thinner tank, location as shown on the attached map. Thinner in the tank is toluene. This tank has been out of service for several years and currently contains about 1.5 inches of material in the bottom of the tank.

We are currently organizing the necessary help required for removal of the tanks. Our goal is to remove these tanks during the week of November 5th. We will follow up with an exact date when it is known. Please let me know if you need any further information or have any questions.

Sincerely yours,

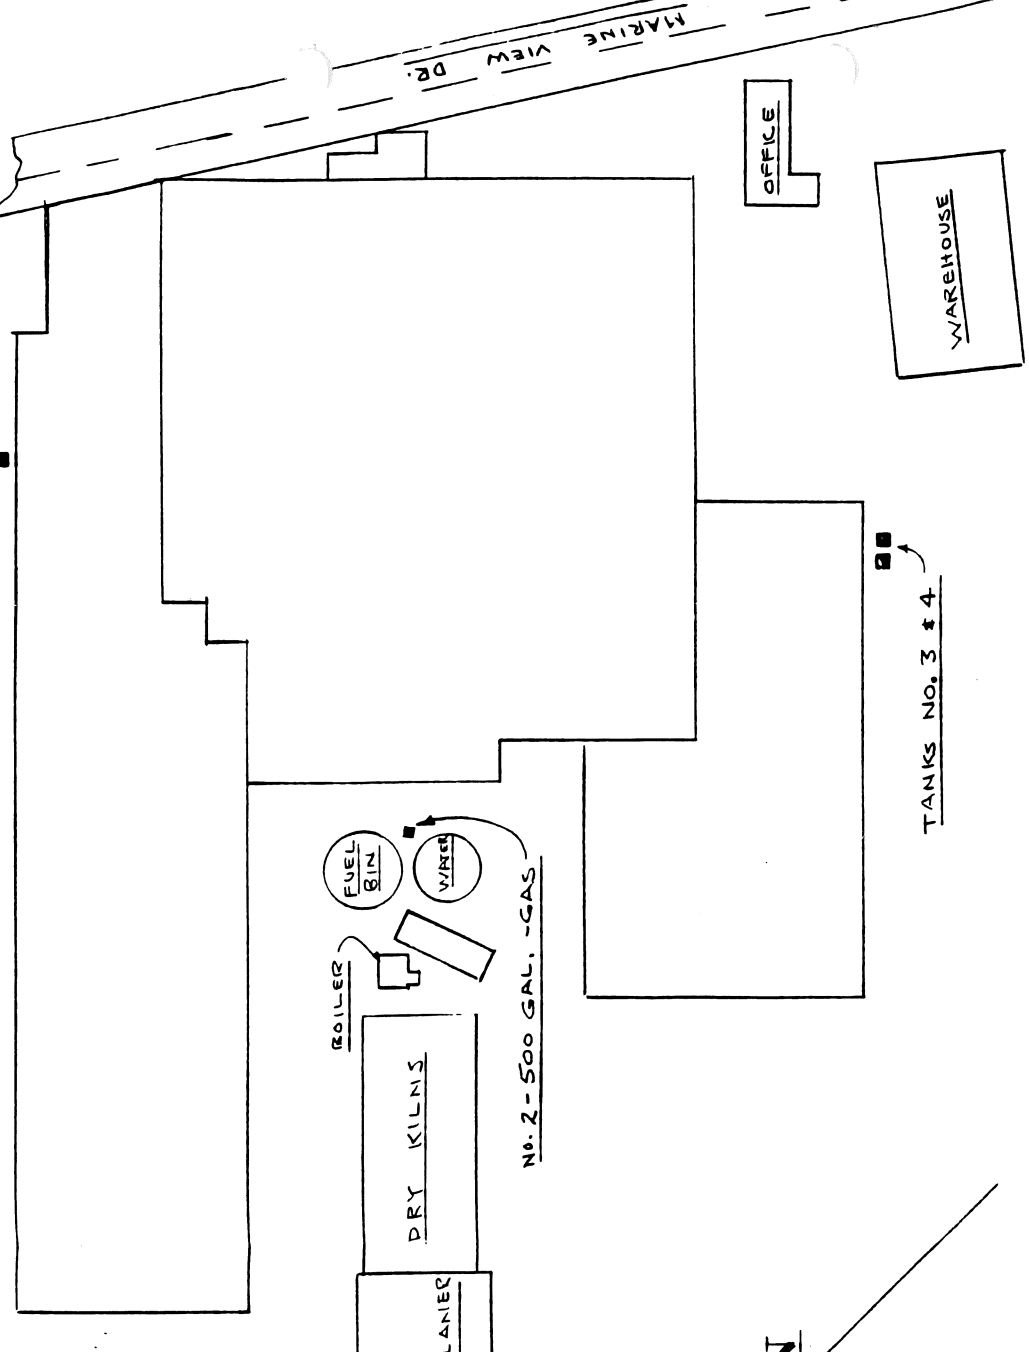

Stanley K. Meyers, P.E.
