RE: No Further Action for the following Site:

- **Site Name:** G & W Oil & Wood Inc
- **Site Address:** 903 W 1st Street, Cle Elum
- **Facility Site ID:** 4658443
- **Cleanup Site ID:** 7045

Dear Kaelin Newman:

Thank you for reaching out regarding the status of the above-referenced site. The Washington State Department of Ecology (Ecology) received the Subsurface Investigation and Request for No Further Action Opinion report dated November 8, 2024 via email.

However, this site was already listed in our database as “no further action” based on the UST Report received in 1999. I’m attaching that determination for your reference.

The site remains in No Further Action status and is reflected as such. Because this site was adjacent to another contaminated site, Pacific Pride Card Lock (Cleanup Site 7209), there was some data that had merged inadvertently. We have corrected that.

Thank you for your commitment to cleanup. Please contact me at valerie.bound@ecology.wa.gov if you have further questions.

Sincerely,

Valerie Bound
Section Manager
Toxics Cleanup Program
