Re: Notice of third Periodic Review Conducted at the following Hazardous Waste Site:

- **Site Name:** Eastmont Junior High
- **Site Address:** 905 8th Street NE, Wenatchee
- **Facility/Site ID:** 83426117
- **Cleanup Site ID:** 1904

Dear Dr. Becky Berg:

Under the Model Toxics Control Act (MTCA), Chapter 70.105D RCW,¹ which governs the cleanup of hazardous waste sites in Washington State, the Department of Ecology (Ecology) must conduct a periodic review of all sites where Ecology has conducted cleanup actions, or at sites with institutional controls and environmental covenants every five years. This letter serves to inform you that a periodic review has been conducted at the Eastmont Junior High Site in July 2022. Sending the final report was delayed due to staff workload.

The periodic review process typically includes the following steps: confirmation that the environmental covenant (if used) is still active and recorded with the title to the property, a review of any monitoring data collected since the cleanup was completed or since the last review was conducted, and a site visit to confirm the institutional controls and conditions of the environmental covenant are being followed.

Based on the information collected during this periodic review, the Eastmont Junior High Site appears to meet the requirements of Chapter 173-340 WAC,² and the selected remedy continues to be protective of human health and the environment.

A periodic review will continue to be required every five years as long as contamination remains at the Site or institutional controls and/or an environmental covenant are required to protect human health and the environment. The next periodic review will be due in July 2027.
