Re: Request for No Further Action Determination, Former Auburn Auto Wrecking Yard  
Property, Northeast Corner of 6<sup>th</sup> Street SE and A Street SE, Auburn, Washington

Dear Mr. Myers:

SLR International Corp, on behalf of ARD, LLC, is submitting the attached Soil Remediation Report for the above-referenced site. The report describes the surface soil excavation activities that were conducted in May and June 2005, and presents the results of the confirmation soil sampling. We have also attached a completed set of VCP application forms (Application to Request Assistance, Site Summary, and Terrestrial Ecological Evaluation Exclusion form) and the review fee.

Since all of the final confirmation samples contained contaminant concentrations below the MTCA Method A cleanup levels, we believe that the excavation activities effectively removed the impacted soil at the site, and that "no further action" is necessary.

If you have any questions, please call me at (425) 402-8800.

Sincerely,

SLR International Corp

Michael D. Staton, L.G.  
Principal Geologist
