Re: Fourth Quarter 2024 Progress Report

TECT Aerospace Cleanup Site

Everett, Washington

Landau Project No. 0222057.050

Dear Mr. Unruh:

Landau Associates, Inc. (Landau) prepared this progress report for the TECT Aerospace Cleanup site (Site), at the request of the Snohomish County Airport (Airport), to address Snohomish County's obligation under Section VII (C) of Agreed Order No. DE 21781 (AO) to provide progress reports to the Washington State Department of Ecology (Ecology). This report summarizes progress during the fourth quarter (October through December) of 2024, and activities anticipated for the first quarter (January through March) of 2025.

The following activities were conducted in the fourth quarter of 2024:

- Prepared for and conducted quarterly groundwater elevation measurements, and semiannual Site-wide groundwater sampling as directed by the AO Remedial Investigation (RI)/Feasibility Study (FS) Work Plan, including coordination with vendors, analytical laboratories, and Airport representatives and tenants
- Ongoing data management and laboratory coordination related to semiannual groundwater sampling, including sample laboratory correspondence, analytical results tabulation, quality control reviews, and database updates
- Conducted internal project status meeting with technical team to discuss next steps for investigation activities and ongoing evaluation of results to determine potential feasibility study components
- Prepared and submitted AO RI Interim Data Report, and subsequently reviewed and accepted
 Ecology comments on the report
- Ongoing updates to Site figures and tables to support review and evaluation of RI progress, including geologic cross sections, conceptual Site model, boring logs, and monitoring well as-built diagrams.

The following activities are anticipated for the first quarter of 2025:

- Prepare for and conduct additional field investigations, as presented in the AO RI Interim Data Report including coordination with vendors, analytical laboratories, and Airport representatives and tenants
- Ongoing coordination with Airport and Ecology representatives to provide status of results and next steps for the Site
- Investigation-derived waste characterization and disposal coordination, including subcontractor and Airport coordination, and waste generator annual reporting, as required by Ecology
- Ongoing data evaluation and RI reporting activities, including finalizing soil boring logs, monitoring well as-built diagrams, geologic cross sections, and updates to the conceptual Site model.

Deviations from the AO Scope of Work and Schedule:

None to report.

Thank you for your continued support with the ongoing cleanup efforts at the TECT Aerospace Cleanup Site. Please contact Andrew Rardin with the Airport, or Jerry Ninteman of Landau, if you have any questions regarding the activities described above.
