RE: Groundwater Sampling – Agri-Tech Yakima Steel Fabricators Site, FSID: 479

Dear Merv Wark:

The Washington Department of Ecology (Ecology) is continuing the Yakima Railroad Area groundwater-monitoring project. As part of this investigation, Ecology's Environmental Assessment Program will be conducting groundwater sampling for the Yakima Railroad Area between April 21 and April 24, 2025.

Samples will be analyzed for tetrachloroethylene, breakdown products, and general water quality parameters. Results will be available to you once Ecology receives them, upon your request. Please consider this letter to be a formal property access notice for an Ecology representative.

If you have any questions, please contact me at (509) 907-1353.

Sincerely,

A handwritten signature in blue ink, reading "Rachel Caron".

Rachel Caron
