**Re: First Quarter 2025 Progress Report  
TECT Aerospace Cleanup Site  
Everett, Washington  
Landau Project No. 0222057.050**

Dear Mr. Unruh:

Landau Associates, Inc. (Landau) prepared this progress report for the TECT Aerospace Cleanup site (Site), at the request of the Snohomish County Airport (Airport), to address Snohomish County's obligation under Section VII (C) of Agreed Order No. DE 21781 (AO) to provide progress reports to the Washington State Department of Ecology (Ecology). This report summarizes progress during the first quarter (January through March) of 2025, and activities anticipated for the second quarter (April through June) of 2025.

**The following activities were conducted in the first quarter of 2025:**

- Prepared for and conducted remedial investigation field activities, as directed by the AO Remedial Investigation (RI)/Feasibility Study (FS) Work Plan and the AO RI Interim Data Report including coordination with subcontractors, vendors, analytical laboratories, and Airport representatives and tenants
- Prepared the annual dangerous waste report through Ecology's Turbo Waste website, and coordinated with the Airport for signature and submittal of the 2024 report
- Ongoing soil and groundwater data management and laboratory coordination related to the January 2025 RI field activities, including laboratory correspondence and preliminary analytical report review and discussion
- Conducted internal project status meeting with technical team to discuss next steps for investigation activities and ongoing evaluation of results to determine potential FS components
- Ongoing updates to Site figures and tables to support review and evaluation of RI progress, including geologic cross sections, conceptual Site model, boring logs, and monitoring well as-built diagrams

- Ongoing coordination with Airport to provide cleanup cost estimates and schedule for remaining AO deliverables.

**The following activities are anticipated for the second quarter of 2025:**

- Laboratory coordination and data management related to January 2025 RI field activities, including updates to existing Site data tables
- Reporting of January 2025 RI field activities to Ecology and ongoing coordination with Ecology representatives to discuss next steps for the Site
- Investigation-derived waste characterization and disposal coordination, including subcontractor and Airport coordination
- Ongoing data evaluation and RI reporting activities, including finalizing soil boring logs, geologic cross sections, and updates to the conceptual Site model.

**Deviations from the AO Scope of Work and Schedule:**

- None to report.

Thank you for your continued support with the ongoing cleanup efforts at the TECT Aerospace Cleanup Site. Please contact Andrew Rardin with the Airport, or Jerry Ninteman of Landau, if you have any questions regarding the activities described above.
