RE: WEEKLY NOISE MONITORING REPORT
NOVEMBER 6 – NOVEMBER 10, 2006
Levee Zone Interim Action
Skykomish, Washington

Ms. Voges,

This document represents weekly noise monitoring data for the BNSF Skykomish levee zone interim action for the town of Skykomish, Washington conducted by Argus Pacific, Inc. (Argus Pacific) during the week of November 6 through November 10, 2006. The purpose of this report is to summarize and interpret noise monitoring data collected in the town of Skykomish during the levee zone interim action conducted by The RETEC Group (RETEC). Argus Pacific conducted monitoring in accordance with the revised BNSF Skykomish Air and Noise Monitoring Plan issued by Argus Pacific on September 19, 2006.

In addition, Thursday, November 2, 2006 was the last day of both chemical and respirable dust sampling for the levee zone interim action project, therefore ending the air monitoring portion of the BNSF Skykomish Air and Noise Monitoring Plan. Starting with the week of November 6 through November 10, 2006, Argus Pacific and RETEC technicians will be conducting noise monitoring only. The noise monitoring schedule will remain the same, with Argus Pacific and RETEC technicians placing two stationary noise monitors in the same positions within the town of Skykomish in order to gather noise data directly related to the construction activities taking place.

An Argus Pacific technician will commute to Skykomish once per week to download compiled noise data and place the noise monitors for that day. A RETEC technician will then be responsible for breaking down and bringing in the noise monitors at the end of this day. On all other days of the week with construction activity, Argus Pacific will not be on site, and a RETEC technician will be responsible for placing the noise monitors at their respective locations at the beginning of each day and also for breaking each monitor down and bringing them inside at the end of each day.

WORK ACTIVITIES

Argus Pacific collected no noise measurements during the week of November 6 through November 10, 2006. RETEC technicians collected noise measurements on November 9 and 10 of that week. No noise measurements were taken on November 6, 7 or 8, 2006 due to potential and actual flooding as a result of extremely heavy and persistent rainfall.

During sampling, workers at the levee water treatment plant used a vacuum truck to clean out the tanks and vessels. Workers continued loading impacted materials from the railyard stockpiles into railcars. Crews were formed at the house pads to begin the process of moving displaced residential housing back to their original foundations.

SAMPLING METHODOLOGY

All samples were collected in accordance with the methods specified in the BNSF Skykomish Air and Noise Monitoring Plan. Please refer to this Plan for specific details on sampling methodology.

Community noise monitoring was conducted at the northwest corner of the railyard (just north of railroad tracks on the corner of Railroad Avenue and North 5th Street), and at the northeast corner of the schoolyard, immediately adjacent to the levee zone. RETEC technicians collected community noise measurements on November 9 and 10, 2006. Approximate noise sample locations are indicated on the attached Noise Monitoring Sample Locations Plan.

SAMPLING RESULTS

The average noise levels recorded on November 9 and November 10, 2006 were below the project action limit for community noise in the areas monitored. Average and maximum noise levels (measured in decibels) along with the monitoring plan limits can be found in the tables below.

COMMUNITY NOISE MONITORING – RAILYARD

DATE OF MONITORING	AVERAGE NOISE LEVEL	MAXIMUM NOISE LEVEL	MONITORING PLAN LIMIT
November 9, 2006	77.9 dB	113.9 dB	85 dB
November 10, 2006	81.1 dB	113.3 dB	

COMMUNITY NOISE MONITORING – NE SCHOOLYARD

DATE OF MONITORING	AVERAGE NOISE LEVEL	MAXIMUM NOISE LEVEL	MONITORING PLAN LIMIT
November 9, 2006	63.2 dB	94.0 dB	80 dB
November 10, 2006	64.7 dB	96.1 dB	

CONCLUSIONS

Based on this data, the work at the levee water treatment plant involving a vacuum truck cleaning out the tanks and vessels, the loading of impacted materials from the railyard stockpiles into railcars, and house replacement activities conducted on November 9 and 10, 2006 did not produce average noise levels above the project action limit for community noise in the areas monitored. Maximum noise levels were recorded above the project action level at both locations; however, these exceedances were for extremely short durations and occurred when BNSF trains passed through the town and during some heavy equipment operations.

Although the elevated noise limits are above the project action limit, they do not exceed the King County Noise Code or the Skykomish Municipal Noise Code, which allow for any source of construction noise that is of short duration to be increased by:

- 5 dB(A) for a total of fifteen minutes in any one-hour period; or
- 10 dB(A) for a total of five minutes in any one-hour period; or
- 15 dB(A) for a total of one and one-half minutes in any one-hour period.

All readings greater than 100 dB for the railyard and schoolyard monitoring stations were instantaneous readings that occurred while a train passed through town. Since train noise is exempt from the applicable noise codes, no exceedances of County or Municipal Code were recorded at either location during the monitoring period.

We appreciate this opportunity to be of service to you. Please contact us at (206) 285-3373 if you have questions regarding this report, or if you require additional information.

Sincerely,

Scott Rinear
Industrial Hygienist

RE: WEEKLY NOISE MONITORING REPORT
NOVEMBER 13 – NOVEMBER 17, 2006
Levee Zone Interim Action
Skykomish, Washington

Ms. Voges,

This document represents weekly noise monitoring data for the BNSF Skykomish levee zone interim action for the town of Skykomish, Washington conducted by Argus Pacific, Inc. (Argus Pacific) during the week of November 13 through November 17, 2006. The purpose of this report is to summarize and interpret noise monitoring data collected in the town of Skykomish during the levee zone interim action conducted by The RETEC Group (RETEC). Argus Pacific conducted monitoring in accordance with the revised BNSF Skykomish Air and Noise Monitoring Plan issued by Argus Pacific on September 19, 2006.

WORK ACTIVITIES

Argus Pacific collected no noise measurements during the week of November 13 through November 17, 2006. RETEC technicians collected noise measurements November 14 through November 17 of that week.

During sampling, workers continued with foundation work for transported houses and loaders continued loading impacted materials from railyard stockpiles into railcars.

SAMPLING METHODOLOGY

All samples were collected in accordance with the methods specified in the BNSF Skykomish Air and Noise Monitoring Plan. Please refer to this Plan for specific details on sampling methodology.

Community noise monitoring was conducted at the northwest corner of the railyard (just north of railroad tracks on the corner of Railroad Avenue and North 5th Street), and at the northeast corner of the schoolyard, immediately adjacent to the levee zone. RETEC technicians collected community noise measurements November 14 through November 17, 2006. Approximate noise sample locations are indicated on the attached Noise Monitoring Sample Locations Plan.

SAMPLING RESULTS

The average noise levels recorded on November 14, 15, 16, and 17, 2006 were below the project action limit for community noise in the areas monitored. Average and maximum noise levels (measured in decibels) along with the monitoring plan limits can be found in the tables below.

COMMUNITY NOISE MONITORING – RAILYARD

DATE OF MONITORING	AVERAGE NOISE LEVEL	MAXIMUM NOISE LEVEL	MONITORING PLAN LIMIT
November 14, 2006	83.1 dB	117.7 dB	85 dB
November 15, 2006	79.7 dB	114.6 dB	
November 16, 2006	77.1 dB	112.1 dB	
November 17, 2006	78.3 dB	114.9 dB	

COMMUNITY NOISE MONITORING – NE SCHOOLYARD

DATE OF MONITORING	AVERAGE NOISE LEVEL	MAXIMUM NOISE LEVEL	MONITORING PLAN LIMIT
November 14, 2006	67.2 dB	97.6 dB	80 dB
November 15, 2006	71.1 dB	95.2 dB	
November 16, 2006	65.6 dB	98.3 dB	
November 17, 2006	65.6 dB	95.5 dB	

CONCLUSIONS

Based on this data, the foundation work in the levee zone and the loading of impacted materials from the railyard stockpiles into railcars conducted from November 14 through November 17, 2006 did not produce average noise levels above the project action limit for community noise in the areas monitored. Maximum noise levels were recorded above the project action level at both locations; however, these exceedances were for extremely short durations and occurred when BNSF trains passed through the town and during some heavy equipment operations.

Although the elevated noise limits are above the project action limit, they do not exceed the King County Noise Code or the Skykomish Municipal Noise Code, which allow for any source of construction noise that is of short duration to be increased by:

- 5 dB(A) for a total of fifteen minutes in any one-hour period; or
- 10 dB(A) for a total of five minutes in any one-hour period; or
- 15 dB(A) for a total of one and one-half minutes in any one-hour period.

All readings greater than 100 dB for the railyard and schoolyard monitoring stations were instantaneous readings that occurred while a train passed through town. Since train noise is exempt from the applicable noise codes, no exceedances of County or Municipal Code were recorded at either location during the monitoring period.

We appreciate this opportunity to be of service to you. Please contact us at (206) 285-3373 if you have questions regarding this report, or if you require additional information.

Sincerely,

RE: WEEKLY NOISE MONITORING REPORT
NOVEMBER 20 – NOVEMBER 24, 2006
Levee Zone Interim Action
Skykomish, Washington

Ms. Voges,

This document represents weekly noise monitoring data for the BNSF Skykomish levee zone interim action for the town of Skykomish, Washington conducted by Argus Pacific, Inc. (Argus Pacific) during the week of November 20 through November 24, 2006. The purpose of this report is to summarize and interpret noise monitoring data collected in the town of Skykomish during the levee zone interim action conducted by The RETEC Group (RETEC). Argus Pacific conducted monitoring in accordance with the revised BNSF Skykomish Air and Noise Monitoring Plan issued by Argus Pacific on September 19, 2006.

In addition, noise measurements were only taken on November 20, 2006 due to minimal construction activity and the Thanksgiving holiday.

WORK ACTIVITIES

RETEC technicians collected noise measurements on November 20, 2006. During sampling, workers continued with foundation work for relocated houses and loaders continued loading impacted materials from railyard stockpiles into railcars.

SAMPLING METHODOLOGY

All samples were collected in accordance with the methods specified in the BNSF Skykomish Air and Noise Monitoring Plan. Please refer to this Plan for specific details on sampling methodology.

Community noise monitoring was conducted at the northwest corner of the railyard (just north of railroad tracks on the corner of Railroad Avenue and North 5th Street), and at the northeast corner of the schoolyard, immediately adjacent to the levee zone. RETEC technicians collected community noise measurements on November 20, 2006. Approximate noise sample locations are indicated on the attached Noise Monitoring Sample Locations Plan.

SAMPLING RESULTS

The average noise levels recorded on November 20, 2006 were below the project action limit for community noise in the areas monitored. Average and maximum noise levels (measured in decibels) along with the monitoring plan limits can be found in the tables below.

COMMUNITY NOISE MONITORING – RAILYARD

DATE OF MONITORING	AVERAGE NOISE LEVEL	MAXIMUM NOISE LEVEL	MONITORING PLAN LIMIT
November 20, 2006	66.4 dB	106.1 dB	85 dB

COMMUNITY NOISE MONITORING – NE SCHOOLYARD

DATE OF MONITORING	AVERAGE NOISE LEVEL	MAXIMUM NOISE LEVEL	MONITORING PLAN LIMIT
November 20, 2006	62.0 dB	81.9 dB	80 dB

CONCLUSIONS

Based on this data, the foundation work in the levee zone and the loading of impacted materials from the railyard stockpiles into railcars conducted on November 20, 2006 did not produce average noise levels above the project action limit for community noise in the areas monitored. Maximum noise levels were recorded above the project action level at both locations; however, these exceedances were for extremely short durations and occurred when BNSF trains passed through the town and during some heavy equipment operations.

Although the elevated noise limits are above the project action limit, they do not exceed the King County Noise Code or the Skykomish Municipal Noise Code, which allow for any source of construction noise that is of short duration to be increased by:

- 5 dB(A) for a total of fifteen minutes in any one-hour period; or
- 10 dB(A) for a total of five minutes in any one-hour period; or
- 15 dB(A) for a total of one and one-half minutes in any one-hour period.

All readings greater than 100 dB for the railyard and schoolyard monitoring stations were instantaneous readings that occurred while a train passed through town. Since train noise is exempt from the applicable noise codes, no exceedances of County or Municipal Code were recorded at either location during the monitoring period.

We appreciate this opportunity to be of service to you. Please contact us at (206) 285-3373 if you have questions regarding this report, or if you require additional information.

Sincerely,

RE: WEEKLY NOISE MONITORING REPORT
NOVEMBER 27 – DECEMBER 1, 2006
Levee Zone Interim Action
Skykomish, Washington

Ms. Voges,

This document represents weekly noise monitoring data for the BNSF Skykomish levee zone interim action for the town of Skykomish, Washington conducted by Argus Pacific, Inc. (Argus Pacific) during the week of November 27 through December 1, 2006. The purpose of this report is to summarize and interpret noise monitoring data collected in the town of Skykomish during the levee zone interim action conducted by The RETEC Group (RETEC). Argus Pacific conducted monitoring in accordance with the revised BNSF Skykomish Air and Noise Monitoring Plan issued by Argus Pacific on September 19, 2006.

In addition, noise measurements were only taken on November 30, 2006 due to severe winter weather in the early part of the week and a lack of technical staff during the rest of the week.

WORK ACTIVITIES

RETEC technicians collected noise measurements on November 30, 2006. During sampling, workers continued with foundation work for transported houses and loaders continued loading impacted materials from railyard stockpiles into railcars.

SAMPLING METHODOLOGY

All samples were collected in accordance with the methods specified in the BNSF Skykomish Air and Noise Monitoring Plan. Please refer to this Plan for specific details on sampling methodology.

Community noise monitoring was conducted at the northwest corner of the railyard (just north of railroad tracks on the corner of Railroad Avenue and North 5th Street), and at the northeast corner of the schoolyard, immediately adjacent to the levee zone. RETEC technicians collected community noise measurements on November 30, 2006. Approximate noise sample locations are indicated on the attached Noise Monitoring Sample Locations Plan.

SAMPLING RESULTS

The average noise levels recorded on November 30, 2006 were below the project action limit for community noise in the areas monitored. Average and maximum noise levels (measured in decibels) along with the monitoring plan limits can be found in the tables below.

COMMUNITY NOISE MONITORING – RAILYARD

DATE OF MONITORING	AVERAGE NOISE LEVEL	MAXIMUM NOISE LEVEL	MONITORING PLAN LIMIT
November 30, 2006	78.8 dB	112.4 dB	85 dB

COMMUNITY NOISE MONITORING – NE SCHOOLYARD

DATE OF MONITORING	AVERAGE NOISE LEVEL	MAXIMUM NOISE LEVEL	MONITORING PLAN LIMIT
November 30, 2006	63.6 dB	96.5 dB	80 dB

CONCLUSIONS

Based on this data, the foundation work in the levee zone and the loading of impacted materials from the railyard stockpiles into railcars conducted on November 30, 2006 did not produce average noise levels above the project action limit for community noise in the areas monitored. Maximum noise levels were recorded above the project action level at both locations; however, these exceedances were for extremely short durations and occurred when BNSF trains passed through the town and during some heavy equipment operations.

Although the elevated noise limits are above the project action limit, they do not exceed the King County Noise Code or the Skykomish Municipal Noise Code, which allow for any source of construction noise that is of short duration to be increased by:

- 5 dB(A) for a total of fifteen minutes in any one-hour period; or
- 10 dB(A) for a total of five minutes in any one-hour period; or
- 15 dB(A) for a total of one and one-half minutes in any one-hour period.

All readings greater than 100 dB for the railyard and schoolyard monitoring stations were instantaneous readings that occurred while a train passed through town. Since train noise is exempt from the applicable noise codes, no exceedances of County or Municipal Code were recorded at either location during the monitoring period.

We appreciate this opportunity to be of service to you. Please contact us at (206) 285-3373 if you have questions regarding this report, or if you require additional information.

Sincerely,

RE: WEEKLY NOISE MONITORING REPORT
DECEMBER 4 – DECEMBER 8, 2006
Levee Zone Interim Action
Skykomish, Washington

Ms. Voges,

This document represents weekly noise monitoring data for the BNSF Skykomish levee zone interim action for the town of Skykomish, Washington conducted by Argus Pacific, Inc. (Argus Pacific) during the week of December 4 through December 8, 2006. The purpose of this report is to summarize and interpret noise monitoring data collected in the town of Skykomish during the levee zone interim action conducted by The RETEC Group (RETEC). Argus Pacific conducted monitoring in accordance with the revised BNSF Skykomish Air and Noise Monitoring Plan issued by Argus Pacific on September 19, 2006.

WORK ACTIVITIES

RETEC technicians collected noise measurements on December 5, 6, 7 and 8, 2006. No noise measurements were taken on Monday, December 4, 2006 due to a lack of technical staff.

During sampling, workers continued with house restoration activities in the levee zone. Also in the levee zone, workers conducted joint utility trenching, backfilling with compaction, conduit installation, and septic tank excavation. Loaders continued loading impacted materials from railyard stockpiles into railcars.

SAMPLING METHODOLOGY

All samples were collected in accordance with the methods specified in the BNSF Skykomish Air and Noise Monitoring Plan. Please refer to this Plan for specific details on sampling methodology.

Community noise monitoring was conducted at the northwest corner of the railyard (just north of railroad tracks on the corner of Railroad Avenue and North 5th Street), and at the northeast corner of the schoolyard, immediately adjacent to the levee zone. RETEC technicians collected

community noise measurements from December 5 through December 8, 2006. Approximate noise sample locations are indicated on the attached Noise Monitoring Sample Locations Plan.

SAMPLING RESULTS

The average noise levels recorded on December 5, 6, 7, and 8, 2006 were below the project action limit for community noise in the areas monitored. Average and maximum noise levels (measured in decibels) along with the monitoring plan limits can be found in the tables below.

COMMUNITY NOISE MONITORING – RAILYARD

DATE OF MONITORING	AVERAGE NOISE LEVEL	MAXIMUM NOISE LEVEL	MONITORING PLAN LIMIT
December 5, 2006	74.0 dB	111.3 dB	85 dB
December 6, 2006	67.2 dB	69.8 dB	
December 7, 2006	67.2 dB	69.8 dB	
December 8, 2006	67.2 dB	68.1 dB	

COMMUNITY NOISE MONITORING – NE SCHOOLYARD

DATE OF MONITORING	AVERAGE NOISE LEVEL	MAXIMUM NOISE LEVEL	MONITORING PLAN LIMIT
December 5, 2006	66.4 dB	98.5 dB	80 dB
December 6, 2006	72.3 dB	95.3 dB	
December 7, 2006	68.6 dB	95.7 dB	
December 8, 2006	67.3 dB	97.4 dB	

CONCLUSIONS

Based on this data, the house restoration activities, and the excavation, backfilling, and conduit installation activities in the levee zone along with the loading of impacted materials from the railyard stockpiles into railcars conducted from December 5 through December 8, 2006 did not produce average noise levels above the project action limit for community noise in the areas monitored. Maximum noise levels were recorded above the project action level at both locations; however, these exceedances were for extremely short durations and occurred when BNSF trains passed through the town and during some heavy equipment operations.

Although the elevated noise limits are above the project action limit, they do not exceed the King County Noise Code or the Skykomish Municipal Noise Code, which allow for any source of construction noise that is of short duration to be increased by:

- 5 dB(A) for a total of fifteen minutes in any one-hour period; or
- 10 dB(A) for a total of five minutes in any one-hour period; or
- 15 dB(A) for a total of one and one-half minutes in any one-hour period.

All readings greater than 100 dB for the railyard and schoolyard monitoring stations were instantaneous readings that occurred while a train passed through town. Since train noise is exempt from the applicable noise codes, no exceedances of County or Municipal Code were recorded at either location during the monitoring period.

We appreciate this opportunity to be of service to you. Please contact us at (206) 285-3373 if you have questions regarding this report, or if you require additional information.

Sincerely,

Scott Rinear
Industrial Hygienist

RE: WEEKLY NOISE MONITORING REPORT
DECEMBER 11 – DECEMBER 15, 2006
Levee Zone Interim Action
Skykomish, Washington

Ms. Voges,

This document represents weekly noise monitoring data for the BNSF Skykomish levee zone interim action for the town of Skykomish, Washington conducted by Argus Pacific, Inc. (Argus Pacific) during the week of December 11 through December 15, 2006. The purpose of this report is to summarize and interpret noise monitoring data collected in the town of Skykomish during the levee zone interim action conducted by The RETEC Group (RETEC). Argus Pacific conducted monitoring in accordance with the revised BNSF Skykomish Air and Noise Monitoring Plan issued by Argus Pacific on September 19, 2006.

Please note, this will be the final report for noise monitoring for the Levee Zone Interim Action.

WORK ACTIVITIES

RETEC technicians collected noise measurements on December 11, 12, 13 and 14, 2006. No noise measurements were taken on Friday, December 15, 2006 due to the lack of technical staff on site.

During sampling, workers continued with house restoration activities in the levee zone. Also in the levee zone, backfill materials were imported and workers conducted joint utility excavation and backfilling with compaction. Workers also conducted septic tank excavation/installation and drain field backfill activities, and grading and compaction in road areas. Loaders continued loading impacted materials from railyard stockpiles into railcars.

SAMPLING METHODOLOGY

All samples were collected in accordance with the methods specified in the BNSF Skykomish Air and Noise Monitoring Plan. Please refer to this Plan for specific details on sampling methodology.

Community noise monitoring was conducted at the northwest corner of the railyard (just north of railroad tracks on the corner of Railroad Avenue and North 5th Street), and at the northeast corner of the schoolyard, immediately adjacent to the levee zone. RETEC technicians collected community noise measurements from December 11 through December 14, 2006. Approximate noise sample locations are indicated on the attached Noise Monitoring Sample Locations Plan.

SAMPLING RESULTS

The average noise levels recorded on December 11, 12, 13, and 14, 2006 were below the project action limit for community noise in the areas monitored. Average and maximum noise levels (measured in decibels) along with the monitoring plan limits can be found in the tables below.

COMMUNITY NOISE MONITORING – RAILYARD

DATE OF MONITORING	AVERAGE NOISE LEVEL	MAXIMUM NOISE LEVEL	MONITORING PLAN LIMIT
December 11, 2006	76.0 dB	111.9 dB	85 dB
December 12, 2006	79.2 dB	114.1 dB	
December 13, 2006	80.2 dB	113.2 dB	
December 14, 2006	76.2 dB	113.6 dB	

COMMUNITY NOISE MONITORING – NE SCHOOLYARD

DATE OF MONITORING	AVERAGE NOISE LEVEL	MAXIMUM NOISE LEVEL	MONITORING PLAN LIMIT
December 11, 2006	68.3 dB	98.6 dB	80 dB
December 12, 2006	65.6 dB	97.1 dB	
December 13, 2006	68.7 dB	97.3 dB	
December 14, 2006	67.7 dB	97.9 dB	

CONCLUSIONS

Based on this data, the house restoration activities, and the excavation, backfilling, grading, and compaction activities in the levee zone along with the loading of impacted materials from the railyard stockpiles into railcars conducted from December 11 through December 14, 2006 did not produce average noise levels above the project action limit for community noise in the areas monitored. Maximum noise levels were recorded above the project action level at both locations; however, these exceedances were for extremely short durations and occurred when BNSF trains passed through the town and during some heavy equipment operations.

Although the elevated noise limits are above the project action limit, they do not exceed the King County Noise Code or the Skykomish Municipal Noise Code, which allow for any source of construction noise that is of short duration to be increased by:

- 5 dB(A) for a total of fifteen minutes in any one-hour period; or
- 10 dB(A) for a total of five minutes in any one-hour period; or
- 15 dB(A) for a total of one and one-half minutes in any one-hour period.

All readings greater than 100 dB for the railyard and schoolyard monitoring stations were instantaneous readings that occurred while a train passed through town. Since train noise is exempt from the applicable noise codes, no exceedances of County or Municipal Code were recorded at either location during the monitoring period.

We appreciate this opportunity to be of service to you. Please contact us at (206) 285-3373 if you have questions regarding this report, or if you require additional information.

Sincerely,

Scott Rinear
Industrial Hygienist
