RE: WEEKLY AIR AND NOISE MONITORING REPORT
AUGUST 28 – SEPTEMBER 1, 2006
Levee Zone Interim Action
Skykomish, Washington

Ms. Voges,

This document represents the fourteenth report of weekly air and noise monitoring data for the BNSF Skykomish levee zone interim action for the town of Skykomish, Washington conducted by Argus Pacific, Inc. (Argus Pacific) during the week of August 28 through September 1, 2006. The purpose of this report is to summarize and interpret air and noise sampling data collected in the town of Skykomish during the levee zone interim action conducted by The RETEC Group (RETEC). Argus Pacific conducted monitoring in accordance with the BNSF Skykomish Air and Noise Monitoring Plan issued by Argus Pacific on June 20, 2006, and amended on August 5, 2006.

WORK ACTIVITIES

Argus Pacific collected chemical and respirable dust samples and noise measurements on August 28 and August 31, 2006. RETEC technicians collected noise measurements on August 29, 30, and September 1 of that week. RETEC technicians collected respirable dust samples on August 29 and September 1, 2006, with no respirable dust samples collected due to heavy rainfall on August 30, 2006.

During sampling, workers excavated materials in the levee zone west of the bridge, trucks moved and hauled dirt from the levee to the railyard, and workers cleaned up contaminated water. Large rocks and other backfilling materials were hauled from the railyard to the levee area. A water truck wetted roadways and a street sweeper removed rocks from the roadway.

SAMPLING METHODOLOGY

All samples were collected in accordance with the methods specified in the BNSF Skykomish Air and Noise Monitoring Plan. Please refer to this Plan for specific details on sampling methodology.

On August 28, 2006, Argus Pacific collected air samples at the southeast exit from the railyard and on the west side of the bridge directly east of the excavation, in a downwind direction relative to construction activities. Samples were analyzed for lead, arsenic, and petroleum hydrocarbons (Naphthas). On August 31, 2006, Argus Pacific collected samples for lead, arsenic, petroleum hydrocarbons (Naphthas), diesel particulate matter, and polynuclear aromatic hydrocarbons (PAHs) at the same bridge location, and at the northwest corner of the railyard at the corner of North 5th Street and Railroad Avenue. Again, monitors were positioned in a downwind direction relative to construction activities.

Argus Pacific also conducted respirable dust monitoring and community noise monitoring at all three of the aforementioned locations. Community noise monitors were placed at the northwest corner of the railyard (just north of railroad tracks) and at the southeast corner of the bridge, in a downwind direction relative to construction activities. On days during the week when Argus Pacific was not on site (August 29, 30, and September 1), RETEC employees conducted respirable dust monitoring and community noise monitoring at the northwest corner of the railyard and at the same bridge location (no respirable dust samples were taken on August 30, 2006 due to heavy rainfall). Argus Pacific and RETEC employees placed the second set of instruments for respirable dust and community noise monitoring at the northwest corner of the railyard after August 28, instead of the southeast corner of the railyard, to address tourist and public traffic at the intersection of Railroad Avenue and North 5th Street.

Approximate air and noise sample locations are indicated on the attached Air and Noise Monitoring Sample Locations Plan.

SAMPLING RESULTS

A detectable concentration of diesel particulate matter was found in the sample collected at the bridge on August 31, 2006. A detectable concentration of polynuclear aromatic hydrocarbons (PAHs) was also found in the sample collected at the bridge on August 31, 2006. None of the other target compounds were identified at or above the laboratory limit of detection at either of the two sampling stations. Respirable dust concentrations and community noise levels were below project action limits during sampling for the entire week. Laboratory results, and dust and noise monitoring data are attached.

AUGUST 31, 2006

**RAILYARD (NW CORNER) SAMPLES – HAULING AND STOCKPILING OF DIRT, LOADING
EXCAVATED MATERIALS INTO RAILCARS**

SAMPLE ID	COMPOUND	SAMPLE TIME	LIMIT OF DETECTION	RESULT	MONITORING PLAN LIMIT
0831-RY-LA	Lead	425 minutes	2.4 µg/m ³	<2.4 µg/m ³	50 µg/m ³
	Arsenic	425 minutes	3.5 µg/m ³	<3.5 µg/m ³	10 µg/m ³
0831-FB-LA	Lead	Field Blank	2.0 µg/sample	ND	NA
	Arsenic	Field Blank	3.0 µg/sample	ND	NA

0828-B-N	Naphthas	519 minutes	0.49 mg/m ³	<0.49 mg/m ³	100 mg/m ³

AUGUST 28 THROUGH SEPTEMBER 1, 2006

RESPIRABLE DUST MONITORING RESULTS - RAILYARD

SAMPLE NUMBERS	DATE SAMPLE COLLECTED	PEAK CONCENTRATION (ONE MINUTE)	AVERAGE CONCENTRATION	MONITORING PLAN LIMIT
DataRam4, Serial #D417 Tag 67	August 28, 2006	342 µg/m ³	20.1 µg/m ³	5,000 µg/m ³
DataRam4, Serial #D417 Tag 01	August 29, 2006	73 µg/m ³	7.0 µg/m ³	
DataRam4, Serial #D417 Tag 02	August 31, 2006	282 µg/m ³	15.0 µg/m ³	
DataRam4, Serial #D417 Tag 03	September 1, 2006	152 µg/m ³	5.4 µg/m ³	

NOTE: On August 29, 2006, the memory of the #D417 and #D416 Data Rams was cleared causing the tag numbers to start over at 1. To differentiate between identical tag numbers from past sampling dates, a zero will be placed before the new tag numbers for both machines.

RESPIRABLE DUST MONITORING RESULTS – BRIDGE

SAMPLE NUMBERS	DATE SAMPLE COLLECTED	PEAK CONCENTRATION (ONE MINUTE)	AVERAGE CONCENTRATION	MONITORING PLAN LIMIT
DataRam4, Serial #D416 Tag 53	August 28, 2006	508 µg/m ³	11.9 µg/m ³	5,000 µg/m ³
DataRam4, Serial #D416 Tag 01	August 29, 2006	153 µg/m ³	4.9 µg/m ³	
DataRam4, Serial #D416 Tag 02	August 31, 2006	57 µg/m ³	3.0 µg/m ³	
DataRam4, Serial #D416 Tag 03	September 1, 2006	176 µg/m ³	3.4 µg/m ³	

NOTE: On August 29, 2006, the memory of the #D417 and #D416 Data Rams was cleared causing the tag numbers to start over at 1. To differentiate between identical tag numbers from past sampling dates, a zero will be placed before the new tag numbers for both machines.

COMMUNITY NOISE MONITORING - RAILYARD

DATE OF MONITORING	AVERAGE NOISE LEVEL	MAXIMUM NOISE LEVEL	MONITORING PLAN LIMIT
August 28, 2006	78.2 dB	115.2 dB	85 dB
August 29, 2006	77.9 dB	113.6 dB	
August 30, 2006	76.2 dB	113.3 dB	
August 31, 2006	79.9 dB	115.3 dB	
September 1, 2006	81.2 dB	119.0 dB	

COMMUNITY NOISE MONITORING - BRIDGE

DATE OF MONITORING	AVERAGE NOISE LEVEL	MAXIMUM NOISE LEVEL	MONITORING PLAN LIMIT
August 28, 2006	68.1 dB	97.9 dB	80 dB
August 29, 2006	68.8 dB	98.4 dB	
August 30, 2006	66.2 dB	94.8 dB	
August 31, 2006	67.3 dB	95.6 dB	
September 1, 2006	69.3 dB	102.2 dB	

CONCLUSIONS

Based on this data, the excavating, dirt hauling, backfilling, and contaminated water cleanup conducted from August 28 through September 1, 2006 did not release the contaminants of concern or respirable dust in concentrations above the project action limits specified in the BNSF Skykomish Air and Noise Monitoring Plan for the areas monitored.

The average noise levels documented during the week of August 28 to September 1, 2006 were below the project action limit for community noise in the areas monitored. Maximum noise levels were recorded above the project action level at both locations; however, these exceedances were for extremely short durations and occurred when BNSF trains passed through the town and during some heavy equipment operations.

Although the elevated noise limits are above the project action limit, they do not exceed the King County Noise Code or the Skykomish Municipal Noise Code, which allow for any source of construction noise that is of short duration to be increased by:

- 5 dB(A) for a total of fifteen minutes in any one-hour period; or
- 10 dB(A) for a total of five minutes in any one-hour period; or
- 15 dB(A) for a total of one and one-half minutes in any one-hour period.

All readings greater than 100 dB for the railyard and bridge monitoring stations were instantaneous readings that occurred while a train passed through town. Since train noise is exempt from the applicable noise codes, no exceedances of County or Municipal Code were recorded at either location during the monitoring period.

We appreciate this opportunity to be of service to you. Please contact us at (206) 285-3373 if you have questions regarding this report, or if you require additional information.

Sincerely,

Scott Rinear

ANALYTICAL REPORT

Form ARF-C

Page 2 of 2
09130607595754RX

SEP 13 2006

Date _____

Laboratory Group Name 06I-4718-02

General Set Comments

Method Reference: NIOSH Manual of Analytical Methods (NMAM), fourth ed., 3/15/03

Sample analysis was performed on a representative 1x1.5 cm² area of the sample filter. The reported µg/sample values correspond to the entire exposed area of the sample. The µg/sample values assume an even distribution of organic and elemental carbon on the exposed area of the sample filter. The value for the exposed area was calculated by the analyst after measuring the diameter of the sample area.

The reported results have not been blank corrected.

** Result cannot be calculated for samples missing air volume.

µg/m³ formula: (Result)*(1000µg/mg)/Volume

Sample Comments

Laboratory
Number

Comment

06I34821	Measured diameter = 32mm; see set comments.
06I34822	Measured diameter = 32mm; see set comments.
06I34823	Measured diameter = 32mm; see set comments.

General Lab Comments

The results provided in this report relate only to the items tested.

Samples were received in acceptable condition unless otherwise noted in the General Set Comments above.

Samples have not been field blank corrected unless otherwise noted in the General Set Comments above.

This test report shall not be reproduced, except in full, without written approval of DataChem Laboratories, Inc.

This page is the concluding page of the report.

RE: WEEKLY AIR AND NOISE MONITORING REPORT
SEPTEMBER 5 – SEPTEMBER 9, 2006
Levee Zone Interim Action
Skykomish, Washington

Ms. Voges,

This document represents the fifteenth report of weekly air and noise monitoring data for the BNSF Skykomish levee zone interim action for the town of Skykomish, Washington conducted by Argus Pacific, Inc. (Argus Pacific) during the week of September 5 through September 9, 2006. The purpose of this report is to summarize and interpret air and noise sampling data collected in the town of Skykomish during the levee zone interim action conducted by The RETEC Group (RETEC). Argus Pacific conducted monitoring in accordance with the BNSF Skykomish Air and Noise Monitoring Plan issued by Argus Pacific on June 20, 2006, and amended on August 5, 2006.

WORK ACTIVITIES

Argus Pacific collected chemical and respirable dust samples and noise measurements on September 5 and September 7, 2006. RETEC technicians collected respirable dust samples and noise measurements on September 6, 8, and 9 of that week.

During sampling, workers excavated materials in the levee zone west of the bridge, trucks moved and hauled dirt from the levee to the railyard, and workers cleaned up contaminated water. Large rocks and other backfilling materials were hauled from the railyard to the levee area. Also, workers began removing the cofferdam in the river area of the levee zone. A water truck wetted roadways and a street sweeper removed rocks from the roadway.

SAMPLING METHODOLOGY

All samples were collected in accordance with the methods specified in the BNSF Skykomish Air and Noise Monitoring Plan. Please refer to this Plan for specific details on sampling methodology.

On September 5, 2006, Argus Pacific collected air samples at the northwest corner of the railyard (just north of the railroad tracks, at the corner of N 5th Street and Railroad Avenue) in a downwind direction relative to construction activities. Air samples were also collected at the northeast corner of the schoolyard, not directly downwind of construction activities, but immediately adjacent to the primary area of excavation and truck traffic. Samples were analyzed for lead, arsenic, and petroleum hydrocarbons (Naphthas). On September 7, 2006, Argus Pacific collected samples for lead, arsenic, petroleum hydrocarbons (Naphthas), diesel particulate matter, and polynuclear aromatic hydrocarbons (PAHs) at the northwest corner of the railyard in a downwind direction relative to construction activities, and at the northeast corner of the schoolyard.

Argus Pacific also conducted respirable dust monitoring and community noise monitoring at both of the aforementioned locations. Community noise monitors were placed at the northwest corner of the railyard in a downwind direction relative to construction activities and at the northeast corner of the schoolyard, immediately adjacent to the primary area of excavation and truck traffic. On days during the week when Argus Pacific was not on site (September 6, 8, and 9), RETEC employees conducted respirable dust monitoring and community noise monitoring at the northwest corner of the railyard and at the northeast corner of the schoolyard. Beginning on September 5, 2006, Argus Pacific and RETEC employees placed the second set of instruments for respirable dust and community noise monitoring at the northeast corner of the schoolyard instead of the west side of the bridge to address concerns about exposures at or near the school in anticipation of the start of the new school year scheduled for September 18, 2006.

Approximate air and noise sample locations are indicated on the attached Air and Noise Monitoring Sample Locations Plan.

SAMPLING RESULTS

A detectable concentration of diesel particulate matter was found in the sample collected at the northeast corner of the schoolyard on September 5, 2006. None of the other target compounds were identified at or above the laboratory limit of detection at either of the two sampling stations. Respirable dust concentrations and community noise levels were below project action limits during sampling for the entire week. Laboratory results, and dust and noise monitoring data are attached.

SEPTEMBER 5, 2006

**RAILYARD (NW CORNER) SAMPLES – HAULING AND STOCKPIILING OF DIRT, LOADING
EXCAVATED/IMPACTED MATERIALS INTO RAILCARS**

SAMPLE ID	COMPOUND	SAMPLE TIME	LIMIT OF DETECTION	RESULT	MONITORING PLAN LIMIT
0905-RY-LA	Lead	502 minutes	2.0 µg/m ³	<2.0 µg/m ³	50 µg/m ³

DataRam4, Serial #D416 Tag 08	September 9, 2006	356 µg/m ³	7.2 µg/m ³	

COMMUNITY NOISE MONITORING - RAILYARD

DATE OF MONITORING	AVERAGE NOISE LEVEL	MAXIMUM NOISE LEVEL	MONITORING PLAN LIMIT
September 5, 2006	80.2 dB	118.7 dB	85 dB
September 6, 2006	78.8 dB	114.4 dB	
September 7, 2006	79.2 dB	114.9 dB	
September 8, 2006	78.1 dB	114.5 dB	
September 9, 2006	79.4 dB	117.6 dB	

COMMUNITY NOISE MONITORING – NE SCHOOLYARD

DATE OF MONITORING	AVERAGE NOISE LEVEL	MAXIMUM NOISE LEVEL	MONITORING PLAN LIMIT
September 5, 2006	76.5 dB	97.8 dB	80 dB
September 6, 2006	76.3 dB	95.6 dB	
September 7, 2006	77.8 dB	97.1 dB	
September 8, 2006	77.3 dB	97.0 dB	
September 9, 2006	74.8 dB	97.8 dB	

CONCLUSIONS

Based on this data, the excavating, dirt hauling, backfilling, and contaminated water cleanup conducted from September 5 through September 9, 2006 did not release the contaminants of concern or respirable dust in concentrations above the project action limits specified in the BNSF Skykomish Air and Noise Monitoring Plan for the areas monitored.

The average noise levels documented from September 5 to September 9, 2006 were below the project action limit for community noise in the areas monitored. Maximum noise levels were recorded above the project action level at both locations; however, these exceedances were for extremely short durations and occurred when BNSF trains passed through the town and during some heavy equipment operations.

Although the elevated noise limits are above the project action limit, they do not exceed the King County Noise Code or the Skykomish Municipal Noise Code, which allow for any source of construction noise that is of short duration to be increased by:

- 5 dB(A) for a total of fifteen minutes in any one-hour period; or
- 10 dB(A) for a total of five minutes in any one-hour period; or
- 15 dB(A) for a total of one and one-half minutes in any one-hour period.

All readings greater than 100 dB for the railyard and schoolyard monitoring stations were instantaneous readings that occurred while a train passed through town. Since train noise is exempt from the applicable noise codes, no exceedances of County or Municipal Code were recorded at either location during the monitoring period.

We appreciate this opportunity to be of service to you. Please contact us at (206) 285-3373 if you have questions regarding this report, or if you require additional information.

Sincerely,

Scott Rinear (RV)

ANALYTICAL REPORT

Form ARF-C

Page 2 of 2
09130607594846RX

SEP 13 2006

Date _____

Laboratory Group Name 06I-4774-02

General Set Comments

Method Reference: NIOSH Manual of Analytical Methods (NMAM), fourth ed., 3/15/03

Sample analysis was performed on a representative 1x1.5 cm² area of the sample filter. The reported µg/sample values correspond to the entire exposed area of the sample. The µg/sample values assume an even distribution of organic and elemental carbon on the exposed area of the sample filter. The value for the exposed area was calculated by the analyst after measuring the diameter of the sample area.

The reported results have not been blank corrected.

** Result cannot be calculated for samples missing air volume.
µg/m³ formula: (Result)*(1000µg/mg)/Volume

Sample Comments

Laboratory
Number

Comment

06I35277	Measured diameter = 32mm; see set comments.
06I35278	Measured diameter = 32mm; see set comments.
06I35279	Measured diameter = 32mm; see set comments.

General Lab Comments

The results provided in this report relate only to the items tested.

Samples were received in acceptable condition unless otherwise noted in the General Set Comments above.

Samples have not been field blank corrected unless otherwise noted in the General Set Comments above.

This test report shall not be reproduced, except in full, without written approval of DataChem Laboratories, Inc.

This page is the concluding page of the report.

RE: WEEKLY AIR AND NOISE MONITORING REPORT
SEPTEMBER 11 – SEPTEMBER 16, 2006
Levee Zone Interim Action
Skykomish, Washington

Ms. Voges,

This document represents the sixteenth report of weekly air and noise monitoring data for the BNSF Skykomish levee zone interim action for the town of Skykomish, Washington conducted by Argus Pacific, Inc. (Argus Pacific) during the week of September 11 through September 16, 2006. The purpose of this report is to summarize and interpret air and noise sampling data collected in the town of Skykomish during the levee zone interim action conducted by The RETEC Group (RETEC). Argus Pacific conducted monitoring in accordance with the BNSF Skykomish Air and Noise Monitoring Plan issued by Argus Pacific on June 20, 2006, and amended on August 5, 2006.

In addition, in preparation for the 2006/2007 school year scheduled to begin September 18, 2006, air monitoring was conducted for all target compounds inside the school building on September 11, 2006. A regular day sampling event was initiated inside the school building while construction activities were occurring. In addition, for comparison, a one-time night sampling event was conducted while no construction activities were taking place.

WORK ACTIVITIES

Argus Pacific collected chemical samples and noise measurements on September 11 and 14, 2006. Respirable dust samples were only collected on September 11 due to heavy and persistent rain on September 14, 2006. RETEC technicians collected noise measurements on September 12, 13, 15, and 16 of that week. RETEC technicians collected respirable dust samples on these same days, with the exception of September 16 due to rain.

During sampling, workers excavated materials in the levee zone west of the bridge, trucks moved and hauled dirt from the levee to the railyard, and workers cleaned up contaminated water. Large rocks and other backfilling materials were hauled from the railyard to the levee area. Also, removal of the cofferdam in the river area of the levee zone was completed. A water truck wetted roadways and a street sweeper removed rocks from the roadway.

SAMPLING METHODOLOGY

All samples were collected in accordance with the methods specified in the BNSF Skykomish Air and Noise Monitoring Plan. Please refer to this Plan for specific details on sampling methodology.

All samples collected on September 11, 2006 were analyzed for lead, arsenic, petroleum hydrocarbons (Naphthas), diesel particulate matter, and polynuclear aromatic hydrocarbons (PAHs). Sampling events for September 11 are summarized as follows:

- Argus Pacific collected air samples at the northwest corner of the railyard (just north of the railroad tracks, at the corner of N 5th Street and Railroad Avenue) in a downwind direction relative to construction activities.
- Air samples were also collected at the northeast corner of the schoolyard, not directly downwind of construction activities, but immediately adjacent to the primary area of excavation and truck traffic.
- In anticipation of the beginning of the 2006/2007 school year, a new air monitoring site was established inside the school building. Air monitoring pumps were set up on the third floor of the school, in the northeast classroom. A wooden stool was laid on its side on top of a table in the classroom along the east wall. The pumps were placed on this table, with the tubing and attached filters/cassettes hanging over the legs of the wooden stool with cassette inlets facing north.
- In addition to the regular daytime sampling event, a night sampling event was conducted at the same location inside the school building from approximately 9:30pm (September 11, 2006) until approximately 8:00am on September 12, 2006. Samples taken during the night sampling event were analyzed for the same compounds as the daytime sampling period.

On September 14, 2006, Argus Pacific collected samples for lead, arsenic, and petroleum hydrocarbons (Naphthas) at the northwest corner of the railyard in a downwind direction relative to construction activities, and at the northeast corner of the schoolyard immediately adjacent to the primary area of excavation and truck traffic.

Argus Pacific also conducted respirable dust monitoring (on September 11 only) and community noise monitoring at the northwest corner of the railyard, in a downwind direction relative to construction activities, and at the northeast corner of the schoolyard, immediately adjacent to the primary area of excavation and truck traffic. Community noise monitors were placed at both of the aforementioned locations. On days during the week when Argus Pacific was not on site (September 12, 13, 15, and 16), RETEC technicians conducted respirable dust monitoring and community noise monitoring at the northwest corner of the railyard and at the northeast corner of the schoolyard. However, no dust monitors were set up on September 16, 2006 due to rain.

Approximate air and noise sample locations are indicated on the attached Air and Noise Monitoring Sample Locations Plan.

SAMPLING RESULTS

None of the target compounds were identified at or above the laboratory limits of detection at the railyard, schoolyard, or interior school sampling stations on either of the two days Argus Pacific conducted sampling. Also, no detectable concentrations of the target compounds were identified for the night sampling period inside the school. Respirable dust concentrations and community noise levels were below project action limits during sampling for the entire week. Laboratory results, and dust and noise monitoring data are attached.

SEPTEMBER 11, 2006

RAILYARD (NW CORNER) SAMPLES – HAULING AND STOCKPILING OF DIRT, LOADING EXCAVATED/IMPACTED MATERIALS INTO RAILCARS

SAMPLE ID	COMPOUND	SAMPLE TIME	LIMIT OF DETECTION	RESULT	MONITORING PLAN LIMIT
0911-RY-LA	Lead	494 minutes	0.51 $\mu\text{g}/\text{m}^3$	<0.51 $\mu\text{g}/\text{m}^3$	50 $\mu\text{g}/\text{m}^3$
	Arsenic	494 minutes	1.0 $\mu\text{g}/\text{m}^3$	<1.0 $\mu\text{g}/\text{m}^3$	10 $\mu\text{g}/\text{m}^3$

September 14, 2006	72.5 dB	98.7 dB	
September 15, 2006	73.4 dB	96.5 dB	
September 16, 2006	70.9 dB	95.8 dB	

CONCLUSIONS

Based on this data, the excavating, dirt hauling, backfilling, and contaminated water cleanup conducted from September 11 through September 16, 2006 did not release the contaminants of concern or respirable dust in concentrations above the project action limits specified in the BNSF Skykomish Air and Noise Monitoring Plan for the areas monitored.

In addition, no detectable amounts of any of the target compounds were found in the results for both the daytime and night sampling events inside of the school building conducted on September 11, 2006 and the morning of September 12, 2006.

The average noise levels documented from September 11 to September 16, 2006 were below the project action limit for community noise in the areas monitored. Maximum noise levels were recorded above the project action level at both locations; however, these exceedances were for extremely short durations and occurred when BNSF trains passed through the town and during some heavy equipment operations.

Although the elevated noise limits are above the project action limit, they do not exceed the King County Noise Code or the Skykomish Municipal Noise Code, which allow for any source of construction noise that is of short duration to be increased by:

- 5 dB(A) for a total of fifteen minutes in any one-hour period; or
- 10 dB(A) for a total of five minutes in any one-hour period; or
- 15 dB(A) for a total of one and one-half minutes in any one-hour period.

All readings greater than 100 dB for the railyard and schoolyard monitoring stations were instantaneous readings that occurred while a train passed through town. Since train noise is exempt from the applicable noise codes, no exceedances of County or Municipal Code were recorded at either location during the monitoring period.

We appreciate this opportunity to be of service to you. Please contact us at (206) 285-3373 if you have questions regarding this report, or if you require additional information.

Sincerely,

Scott Rinear
Industrial Hygienist

RE: WEEKLY AIR AND NOISE MONITORING REPORT
SEPTEMBER 18 – SEPTEMBER 23, 2006
Levee Zone Interim Action
Skykomish, Washington

Ms. Voges,

This document represents the seventeenth report of weekly air and noise monitoring data for the BNSF Skykomish levee zone interim action for the town of Skykomish, Washington conducted by Argus Pacific, Inc. (Argus Pacific) during the week of September 18 through September 23, 2006. The purpose of this report is to summarize and interpret air and noise sampling data collected in the town of Skykomish during the levee zone interim action conducted by The RETEC Group (RETEC). Argus Pacific conducted monitoring in accordance with the revised BNSF Skykomish Air and Noise Monitoring Plan issued by Argus Pacific on September 19, 2006.

Starting on September 18, 2006, air monitoring was conducted inside the school, in accordance with the revised Plan. This is a permanent addition to the air monitoring schedule and will be conducted each day Argus Pacific is on site. In addition, a new dust monitor was brought on site beginning on September 22, 2006 to be placed at the original bridge air monitoring location.

WORK ACTIVITIES

Argus Pacific collected chemical samples and noise measurements on September 18 and 20, 2006. RETEC technicians collected noise measurements on September 19, 21, 22, and 23 of that week. Respirable dust monitoring was conducted by RETEC technicians this week only on September 19, 22, and 23, due to rain during the rest of the week

During sampling, workers excavated materials in the levee zone west of the bridge, trucks moved and hauled dirt from the levee to the railyard, and workers cleaned up contaminated water. Impacted materials were loaded into railcars near the railyard stockpiles. Large rocks and other backfilling materials were hauled from the railyard to the levee area. A water truck wetted roadways and a street sweeper removed rocks from the roadway.

SAMPLING METHODOLOGY

All samples were collected in accordance with the methods specified in the BNSF Skykomish Air and Noise Monitoring Plan. Please refer to this Plan for specific details on sampling methodology.

On September 18, 2006, Argus Pacific collected air samples at the northwest corner of the railyard (just north of the railroad tracks, at the corner of N 5th Street and Railroad Avenue) in a downwind direction relative to construction activities. Air samples were also collected at the northeast corner of the schoolyard, not directly downwind of construction activities, but immediately adjacent to the primary area of excavation and truck traffic. Samples taken on September 18, 2006 at these two locations were analyzed for lead, arsenic, and petroleum hydrocarbons (Naphthas). Air samples were also taken inside the school building on the third floor in the northeast room. Samples taken on September 18, 2006 inside the school building were analyzed for petroleum hydrocarbons (Naphthas) and polynuclear aromatic hydrocarbons (PAHs).

On September 20, 2006, Argus Pacific collected samples at the northwest corner of the railyard, the northeast corner of the schoolyard, and inside the school building. Samples collected on September 20, 2006 from the railyard and schoolyard were analyzed for lead, arsenic, petroleum hydrocarbons (Naphthas), diesel particulate matter, and polynuclear aromatic hydrocarbons (PAHs). The samples collected inside the school were analyzed for petroleum hydrocarbons (Naphthas) and polynuclear aromatic hydrocarbons (PAHs).

Argus Pacific also conducted community noise monitoring at the northwest corner of the railyard, in a downwind direction relative to construction activities, and at the northeast corner of the schoolyard, immediately adjacent to the primary area of excavation and truck traffic. Due to constant rain on September 18 and 20, Argus Pacific conducted no respirable dust monitoring during this week. On days during the week when Argus Pacific was not on site (September 19, 21, 22, and 23), RETEC technicians conducted respirable dust monitoring and community noise monitoring at the northwest corner of the railyard and at the northeast corner of the schoolyard. In addition, this was the first week with the placement of a new DataRam instrument for respirable dust monitoring. On September 22 and 23, 2006, RETEC technicians placed this dust monitor on the south side of the bridge (west side of North 5th Street on the northernmost guardrail post) in a downwind direction relative to construction activities. No respirable dust monitoring was conducted by RETEC September 21, 2006 due to rain.

Approximate air and noise sample locations are indicated on the attached Air and Noise Monitoring Sample Locations Plan.

SAMPLING RESULTS

A detectable concentration of diesel particulate matter was found in the samples collected at both the northwest corner of the railyard and at the northeast corner of the schoolyard on September 20, 2006. None of the other target compounds were identified at or above the laboratory limits of detection at any of the three sampling stations. Respirable dust concentrations and community noise levels were below project action limits during sampling for the entire week. Laboratory results, and dust and noise monitoring data are attached.

SEPTEMBER 18, 2006

**RAILYARD (NW CORNER) SAMPLES – HAULING AND STOCKPILING OF DIRT, LOADING OF
EXCAVATED MATERIALS INTO RAILCARS**

SAMPLE ID	COMPOUND	SAMPLE TIME	LIMIT OF DETECTION	RESULT	MONITORING PLAN LIMIT

0920-ISB-PAH	PAHs (as benzene solubles)	660 minutes	0.03 mg/m ³	<0.03 mg/m ³	0.2 mg/m ³

SEPTEMBER 18 THROUGH SEPTEMBER 23, 2006

RESPIRABLE DUST MONITORING RESULTS – RAILYARD

SAMPLE NUMBERS	DATE SAMPLE COLLECTED	PEAK CONCENTRATION (ONE MINUTE)	AVERAGE CONCENTRATION	MONITORING PLAN LIMIT
DataRam4, Serial #D417 Tag 013	September 19, 2006	513 µg/m ³	11.6 µg/m ³	5,000 µg/m ³
DataRam4, Serial #D417 Tag 014	September 22, 2006	48 µg/m ³	4.0 µg/m ³	
DataRam4, Serial #D417 Tag 015	September 23, 2006	59 µg/m ³	4.3 µg/m ³	

RESPIRABLE DUST MONITORING RESULTS – NE SCHOOLYARD

SAMPLE NUMBERS	DATE SAMPLE COLLECTED	PEAK CONCENTRATION (ONE MINUTE)	AVERAGE CONCENTRATION	MONITORING PLAN LIMIT
DataRam4, Serial #D416 Tag 013	September 19, 2006	30 µg/m ³	2.4 µg/m ³	5,000 µg/m ³
DataRam4, Serial #D416 Tag 014	September 22, 2006	92 µg/m ³	3.0 µg/m ³	
DataRam4, Serial #D416 Tag 015	September 23, 2006	80 µg/m ³	1.9 µg/m ³	

RESPIRABLE DUST MONITORING RESULTS – BRIDGE

SAMPLE NUMBERS	DATE SAMPLE COLLECTED	PEAK CONCENTRATION (ONE MINUTE)	AVERAGE CONCENTRATION	MONITORING PLAN LIMIT
DataRam4, Serial #D495 Tag 1	September 22, 2006	27 $\mu\text{g}/\text{m}^3$	11.2 $\mu\text{g}/\text{m}^3$	5,000 $\mu\text{g}/\text{m}^3$
DataRam4, Serial #D495 Tag 2	September 23, 2006	15 $\mu\text{g}/\text{m}^3$	2.6 $\mu\text{g}/\text{m}^3$	

NOTE: When this new Data Ram (#D495) was set up for the week, the setup parameters were slightly different than the other two DataRams. Dust monitoring data is supposed to be recorded every minute during a sampling session. On this machine, data was recorded every ten minutes on September 22 and 23, 2006. Due to this difference, the attached data lists are much shorter for this particular machine. The setup parameters for #D495 were not adjusted until September 29, 2006. From September 29, 2006 on, data was recorded every minute in accordance with the Plan.

COMMUNITY NOISE MONITORING – RAILYARD

DATE OF MONITORING	AVERAGE NOISE LEVEL	MAXIMUM NOISE LEVEL	MONITORING PLAN LIMIT
September 18, 2006	80.7 dB	115.9 dB	85 dB
September 19, 2006	76.5 dB	113.4 dB	
September 20, 2006	82.1 dB	114.8 dB	
September 21, 2006	79.8 dB	116.5 dB	
September 22, 2006	79.4 dB	114.8 dB	
September 23, 2006	78.2 dB	113.2 dB	

COMMUNITY NOISE MONITORING – NE SCHOOLYARD

DATE OF MONITORING	AVERAGE NOISE LEVEL	MAXIMUM NOISE LEVEL	MONITORING PLAN LIMIT
September 18, 2006	74.7 dB	96.0 dB	80 dB
September 19, 2006	73.6 dB	96.9 dB	
September 20, 2006	73.9 dB	97.9 dB	
September 21, 2006	71.9 dB	96.4 dB	
September 22, 2006	71.7 dB	98.1 dB	
September 23, 2006	74.2 dB	94.7 dB	

CONCLUSIONS

Based on this data, the excavating, dirt hauling, backfilling, and contaminated water cleanup conducted from September 18 through September 23, 2006 did not release the contaminants of concern or respirable dust in concentrations above the project action limits specified in the BNSF Skykomish Air and Noise Monitoring Plan for the areas monitored.

The average noise levels documented from September 18 to September 23, 2006 were below the project action limit for community noise in the areas monitored. Maximum noise levels were

recorded above the project action level at both locations; however, these exceedances were for extremely short durations and occurred when BNSF trains passed through the town and during some heavy equipment operations.

Although the elevated noise limits are above the project action limit, they do not exceed the King County Noise Code or the Skykomish Municipal Noise Code, which allow for any source of construction noise that is of short duration to be increased by:

- 5 dB(A) for a total of fifteen minutes in any one-hour period; or
- 10 dB(A) for a total of five minutes in any one-hour period; or
- 15 dB(A) for a total of one and one-half minutes in any one-hour period.

All readings greater than 100 dB for the railyard and schoolyard monitoring stations were instantaneous readings that occurred while a train passed through town. Since train noise is exempt from the applicable noise codes, no exceedances of County or Municipal Code were recorded at either location during the monitoring period.

We appreciate this opportunity to be of service to you. Please contact us at (206) 285-3373 if you have questions regarding this report, or if you require additional information.

Sincerely,

Scott Rinear
Industrial Hygienist

ANALYTICAL REPORT

Form ARF-C

Page 2 of 2
09290610102462RX

SEP 28 2006

Date _____

Laboratory Group Name 06I-5074-02

General Set Comments

Method Reference: NIOSH Manual of Analytical Methods (NMAM), fourth ed., 3/15/03

Sample analysis was performed on a representative 1x1.5 cm² area of the sample filter. The reported µg/sample values correspond to the entire exposed area of the sample. The µg/sample values assume an even distribution of organic and elemental carbon on the exposed area of the sample filter. The value for the exposed area was calculated by the analyst after measuring the diameter of the sample area.

The reported results have not been blank corrected.

** Result cannot be calculated for samples missing air volume.
µg/m³ formula: (Result)*(1000µg/mg)/Volume

Sample Comments

RE: WEEKLY AIR AND NOISE MONITORING REPORT
SEPTEMBER 25 – SEPTEMBER 29, 2006
Levee Zone Interim Action
Skykomish, Washington

Ms. Voges,

This document represents the eighteenth report of weekly air and noise monitoring data for the BNSF Skykomish levee zone interim action for the town of Skykomish, Washington conducted by Argus Pacific, Inc. (Argus Pacific) during the week of September 25 through September 29, 2006. The purpose of this report is to summarize and interpret air and noise sampling data collected in the town of Skykomish during the levee zone interim action conducted by The RETEC Group (RETEC). Argus Pacific conducted monitoring in accordance with the revised BNSF Skykomish Air and Noise Monitoring Plan issued by Argus Pacific on September 19, 2006.

Throughout the summer, the construction workweek ran from Monday through Saturday. Starting this week, the construction workweek was reduced to Monday through Friday only.

WORK ACTIVITIES

Argus Pacific collected chemical and dust samples and noise measurements on September 25 and 28, 2006. RETEC technicians collected dust samples and noise measurements on September 26, 27, and 29 of that week.

During sampling, workers excavated materials in the levee zone west of the bridge, trucks moved and hauled dirt from the levee to the railyard, and workers cleaned up contaminated water. Impacted materials were loaded into railcars near the railyard stockpiles. Large rocks and other backfilling materials were hauled from the railyard to the levee area. A water truck wetted roadways and a street sweeper removed rocks from the roadway.

SAMPLING METHODOLOGY

All samples were collected in accordance with the methods specified in the BNSF Skykomish Air and Noise Monitoring Plan. Please refer to this Plan for specific details on sampling methodology.

On September 25, 2006, Argus Pacific collected air samples at the northwest corner of the railyard (just north of the railroad tracks, at the corner of N 5th Street and Railroad Avenue) in a downwind direction relative to construction activities. Air samples were also collected at the northeast corner of the schoolyard, not directly downwind of construction activities, but immediately adjacent to the primary area of excavation and truck traffic. Samples taken on September 25, 2006 at these two locations were analyzed for lead, arsenic, and petroleum hydrocarbons (Naphthas). Air samples were also taken inside the school building (third floor, northeast room). Samples taken on September 25, 2006 inside the school building were analyzed for petroleum hydrocarbons (Naphthas) and polynuclear aromatic hydrocarbons (PAHs).

On September 28, 2006, Argus Pacific collected samples at the northwest corner of the railyard, the northeast corner of the schoolyard, and inside the school building. Samples collected on September 28, 2006 from the railyard and schoolyard were analyzed for lead, arsenic, petroleum hydrocarbons (Naphthas), diesel particulate matter, and polynuclear aromatic hydrocarbons (PAHs). The samples collected inside the school were analyzed for petroleum hydrocarbons (Naphthas) and polynuclear aromatic hydrocarbons (PAHs).

Argus Pacific also conducted respirable dust monitoring and community noise monitoring at the northwest corner of the railyard, in a downwind direction relative to construction activities, and at the northeast corner of the schoolyard, immediately adjacent to the primary area of excavation and truck traffic. Respirable dust monitoring was also conducted on the south side of the bridge (west side of North 5th Street on the northernmost guardrail post) in a downwind direction relative to construction activities. On days during the week when Argus Pacific was not on site (September 26, 27, and 29), RETEC technicians conducted community noise monitoring at the northwest corner of the railyard and the northeast corner of the schoolyard. RETEC technicians conducted respirable dust monitoring at the northwest corner of the railyard, the northeast corner of the schoolyard, and on the south side of the bridge on the same days.

Approximate air and noise sample locations are indicated on the attached Air and Noise Monitoring Sample Locations Plan.

SAMPLING RESULTS

Detectable concentrations of diesel particulate matter were found in the samples collected at both the northwest corner of the railyard and at the northeast corner of the schoolyard on September 28, 2006. None of the other target compounds were identified at or above the laboratory limits of detection at any of the three sampling stations. Respirable dust concentrations and community noise levels were below project action limits during sampling for the entire week. Laboratory results, and dust and noise monitoring data are attached.

SEPTEMBER 25, 2006

**RAILYARD (NW CORNER) SAMPLES – HAULING AND STOCKPILING OF DIRT, LOADING OF
EXCAVATED MATERIALS INTO RAILCARS**

SAMPLE ID	COMPOUND	SAMPLE TIME	LIMIT OF DETECTION	RESULT	MONITORING PLAN LIMIT
0925-RY-LA	Lead	488 minutes	2.0 µg/m ³	<2.0 µg/m ³	50 µg/m ³
	Arsenic	488 minutes	3.1 µg/m ³	<3.1 µg/m ³	10 µg/m ³
0925-RY-N	Naphthas	488 minutes	0.51 mg/m ³	<0.51 mg/m ³	100 mg/m ³

**SCHOOLYARD (NE CORNER) SAMPLES – EXCAVATING, HAULING DIRT, BACKFILLING
CLEANING UP CONTAMINATED WATER**

SAMPLE ID	COMPOUND	SAMPLE TIME	LIMIT OF DETECTION	RESULT	MONITORING PLAN LIMIT
0925-NSY-LA	Lead	486 minutes	2.1 µg/m ³	<2.1 µg/m ³	50 µg/m ³
	Arsenic	486 minutes	3.1 µg/m ³	<3.1 µg/m ³	10 µg/m ³
0925-NSY-N	Naphthas	486 minutes	0.51 mg/m ³	<0.51 mg/m ³	100 mg/m ³

**INSIDE SCHOOL BUILDING (THIRD FLOOR, NE ROOM) SAMPLES – EXCAVATING, HAULING
DIRT, COFFERDAM REMOVAL, BACKFILLING, CLEANING UP CONTAMINATED WATER**

SAMPLE ID	COMPOUND	SAMPLE TIME	LIMIT OF DETECTION	RESULT	MONITORING PLAN LIMIT
0925-ISB-N	Naphthas	488 minutes	0.51 mg/m ³	<0.51 mg/m ³	100 mg/m ³
0925-ISB-PAH	PAHs (as benzene solubles)	488 minutes	0.040 mg/m ³	<0.040 mg/m ³	0.2 mg/m ³

SEPTEMBER 28, 2006

**RAILYARD (NW CORNER) SAMPLES – HAULING AND STOCKPILING OF DIRT, LOADING
EXCAVATED/IMPACTED MATERIALS INTO RAILCARS**

SAMPLE ID	COMPOUND	SAMPLE TIME	LIMIT OF DETECTION	RESULT	MONITORING PLAN LIMIT
0928-RY-LA	Lead	478 minutes	2.1 µg/m ³	<2.1 µg/m ³	50 µg/m ³
	Arsenic	478 minutes	4.2 µg/m ³	<4.2 µg/m ³	10 µg/m ³
0928-FB-LA	Lead	Field Blank	2.0 µg/sample	ND	NA

RESPIRABLE DUST MONITORING RESULTS – BRIDGE

SAMPLE NUMBERS	DATE SAMPLE COLLECTED	PEAK CONCENTRATION (ONE MINUTE)	AVERAGE CONCENTRATION	MONITORING PLAN LIMIT
DataRam4, Serial #D495 Tag 3	September 25, 2006	24 $\mu\text{g}/\text{m}^3$	8.2 $\mu\text{g}/\text{m}^3$	5,000 $\mu\text{g}/\text{m}^3$
DataRam4, Serial #D495 Tag 4	September 26, 2006	53 $\mu\text{g}/\text{m}^3$	19.1 $\mu\text{g}/\text{m}^3$	
DataRam4, Serial #D495 Tag 5	September 27, 2006	14 $\mu\text{g}/\text{m}^3$	7.8 $\mu\text{g}/\text{m}^3$	
DataRam4, Serial #D495 Tag 6	September 28, 2006	21 $\mu\text{g}/\text{m}^3$	9.2 $\mu\text{g}/\text{m}^3$	
DataRam4, Serial #D495 Tag 7	September 29, 2006	215 $\mu\text{g}/\text{m}^3$	18.1 $\mu\text{g}/\text{m}^3$	

NOTE: When the new DataRam (#D495) was set up for the week, the setup parameters were slightly different than the other two Data Rams. In accordance with the Plan, respirable dust monitoring data is supposed to be recorded every minute during a sampling session. On this instrument, data was recorded every ten minutes on September 25, 26, 27 and 28, 2006. Due to this difference, the attached data lists are much shorter for this particular machine. The setup parameters for #D495 were not adjusted until September 29, 2006. From September 29, 2006 on, data was recorded every minute in accordance with the Plan.

COMMUNITY NOISE MONITORING – RAILYARD

DATE OF MONITORING	AVERAGE NOISE LEVEL	MAXIMUM NOISE LEVEL	MONITORING PLAN LIMIT
September 25, 2006	77.1 dB	113.8 dB	85 dB
September 26, 2006	78.4 dB	114.8 dB	
September 27, 2006	78.0 dB	114.4 dB	
September 28, 2006	79.4 dB	115.6 dB	
September 29, 2006	78.4 dB	114.3 dB	

COMMUNITY NOISE MONITORING – NE SCHOOLYARD

DATE OF MONITORING	AVERAGE NOISE LEVEL	MAXIMUM NOISE LEVEL	MONITORING PLAN LIMIT
September 25, 2006	72.9 dB	92.0 dB	80 dB
September 26, 2006	72.7 dB	98.2 dB	
September 27, 2006	74.1 dB	93.1 dB	
September 28, 2006	74.7 dB	97.8 dB	
September 29, 2006	72.6 dB	98.6 dB	

CONCLUSIONS

Based on this data, the excavating, dirt hauling, backfilling, and contaminated water cleanup conducted from September 25 through September 29, 2006 did not release the contaminants of concern or respirable dust in concentrations above the project action limits specified in the BNSF Skykomish Air and Noise Monitoring Plan for the areas monitored.

The average noise levels documented from September 25 to September 29, 2006 were below the project action limit for community noise in the areas monitored. Maximum noise levels were recorded above the project action level at both locations; however, these exceedances were for extremely short durations and occurred when BNSF trains passed through the town and during some heavy equipment operations.

Although the elevated noise limits are above the project action limit, they do not exceed the King County Noise Code or the Skykomish Municipal Noise Code, which allow for any source of construction noise that is of short duration to be increased by:

- 5 dB(A) for a total of fifteen minutes in any one-hour period; or
- 10 dB(A) for a total of five minutes in any one-hour period; or
- 15 dB(A) for a total of one and one-half minutes in any one-hour period.

All readings greater than 100 dB for the railyard and schoolyard monitoring stations were instantaneous readings that occurred while a train passed through town. Since train noise is exempt from the applicable noise codes, no exceedances of County or Municipal Code were recorded at either location during the monitoring period.

We appreciate this opportunity to be of service to you. Please contact us at (206) 285-3373 if you have questions regarding this report, or if you require additional information.

Sincerely,

Scott Rinear
Industrial Hygienist

General Set Comments

Method Reference: NIOSH Manual of Analytical Methods (NMAM), fourth ed., 3/15/03

Sample analysis was performed on a representative 1x1.5 cm² area of the sample filter. The reported µg/sample values correspond to the entire exposed area of the sample. The µg/sample values assume an even distribution of organic and elemental carbon on the exposed area of the sample filter. The value for the exposed area was calculated by the analyst after measuring the diameter of the sample area.

The reported results have not been blank corrected.

** Result cannot be calculated for samples missing air volume.
µg/m³ formula: (Result)*(1000µg/mg)/Volume

OCT 10 2000

Date _____

Laboratory Group Name 06I-5304-04

General Set Comments

** Result cannot be calculated for samples missing air volume.
mg/m³ formula: (Result * 1000) / Volume
"VM&P Naphtha" is the sum of all peaks in the chromatogram minus the solvent peak and was quantitated against n-hexane.

General Lab Comments

The results provided in this report relate only to the items tested.
Samples were received in acceptable condition unless otherwise noted in the General Set Comments above.
Samples have not been field blank corrected unless otherwise noted in the General Set Comments above.
