Re: Draft Cleanup Action Plan - Ecology comments

Dear Peter Kingston:

Thank you for your request to the Department of Ecology. In response to your request, I am restating my substantive comments on your Draft Cleanup Action Plan for the Lakeside Industries – Aberdeen site.

In Section 5.5, a public comment period for the plan is not necessary as this is not a formal site nor are there indications of strong public interest in the site.

In Section 3.3 of the Sampling and Analysis Plan, I suggest sampling the groundwater every six months for the first two years, and once a year for the following three years. The analytes sampled and the frequency of sampling may be adjusted at any time up to five years from the start of sampling, by agreement with Ecology. Groundwater sampling may need to continue beyond five years.

If you have any questions please contact me Chris Maurer, Site Manager at christopher.maurer@ecy.wa.com or by phone at (360) 407-7223.

Sincerely,

Christopher Maurer, P.E.
