Re: Ecology Support for the Evergreen Treatment Services' Application for a Brownfields Cleanup Grant

Dear Becca Judy:

The Washington Department of Ecology (Ecology) acknowledges that Evergreen Treatment Services (ETS) plans to conduct the cleanup of a brownfield site and is applying for an FY25 EPA Brownfields Cleanup Grant.

ETS has developed an application requesting site-specific federal Brownfields Cleanup funding for the Evergreen Treatment Services site located at 1700 Airport Way South in Seattle.

Ecology affirms that the Evergreen Treatment Services site:

- I. Is eligible to be enrolled in the State voluntary response program;
- II. Is not currently enrolled, but ETS intends to enroll the site in the voluntary response program;
- III. Additional assessment is needed to sufficiently characterize the site for the remediation work to begin. There will be a sufficient level of site characterization from the environmental site assessment(s) performed by June 15, 2025, for the remediation work to begin on the site.

For any questions regarding this letter, please contact me at (509) 655-0538.

Sincerely,

Ali Furmall
Brownfields Lead
Toxics Cleanup Program
