

Toxics Cleanup Program

Chelan Chevron Cleanup Site

Ecology has information to share with you and your neighbors about pollution in your community. Chevron USA Inc is preparing to begin **cleanup** of the Chelan Chevron site, located at 232 East Woodin Avenue in Chelan, with supervision from Ecology. An **investigative report** describing the contamination at the site is available for public comment from **June 23 through July 22, 2025**.

The Chelan Chevron site has been a gas station since 1931. Over the years, **leaks and spills** from petroleum contaminated the soil and groundwater. The pollution has spread to nearby properties and is a concern for Lake Chelan, which is only 300 feet away.

Petroleum products contain many chemicals and one of them, benzene, is a known carcinogen. Harmful vapors could enter buildings and impact indoor air quality. **Pollution** in Lake Chelan could also harm fish and other wildlife.

Street View of Chelan Chevron Site

Cleanup Timeline

- 1987 - Leak discovered and cleanup began
- 2005 - Removed contaminated soil and groundwater
- 2015 - Found diesel and gasoline in groundwater
- Ongoing - Continued monitoring and public updates
- Future - Begin to study options for cleanup
