Source/source area description
<p>This release(s) occurred on a former bulk fuel facility. This type of usage began in 1921 associated with Standard Oil Company and continued under various ownerships up to 2017. In 2017, a petroleum sheen was observed on the Columbia River. The source of the release was a leaking underground piping associated with the fuel ASTs. An interim action was initiated to stop the release and prevent the transport of separate phase product to the river. Various interim actions were completed or are ongoing to address the contamination.</p>

Site history

[Go to top](#)

Several petroleum hydrocarbon releases occurred at this facility so the site has three different CSIDs. The main CSID is 13215 and refers to that portion of the site that is covered under RI/FS AO DE15389.

Overflow - Site contamination and cleanup history

The site address is listed as 3 East Chehalis Street, however, the Chelan County's Assessor online records show the property address for the former facility as 600 South Worthen Street.
