APPENDIX G

SOIL, GROUNDWATER, AND SOIL VAPOR CHEMISTRY TABLES

APPENDIX G TABLES

Table G-1	On Property Soil Results for Petroleum Hydrocarbons and VOCs
Table G-2	Perimeter Injection Well Soil Results for Petroleum Hydrocarbons and VOCs
Table G-3	Off Property Soil Results for Petroleum Hydrocarbons and VOCs
Table G-4	615 Dexter and SDOT Mercer Soil Results for Petroleum Hydrocarbons and VOCs
Table G-5	Petroleum Hydrocarbons and VOCs in Groundwater – 2017 and 2021
Table G-6	Petroleum Hydrocarbons and CVOCs in Shallow Zone Groundwater
Table G-7	Groundwater Petroleum Hydrocarbons and CVOCs in Intermediate A Zone Wells
Table G-8	Groundwater Petroleum Hydrocarbons and CVOCs in Intermediate B Zone Wells
Table G-9	Groundwater Petroleum Hydrocarbons and CVOCs in Deep Zone Wells
Table G-10	Summary of Reconnaissance Groundwater Analytical Data
Table G-11	Soil Vapor Analytical Results
Table G-12	Estimated Hydraulic Conductivity Based on Grain Size Analyses

Table G-1

On Property Soil Results for Petroleum Hydrocarbons and VOCs
American Linen Supply Co Dexter Ave Site
700 Dexter Avenue North, Seattle, Washington

Abbreviations:
AAL = Alden Analytical Laboratories, Inc., of Seattle, Washington
ARI = Analytical Resource, Incorporated, Seattle, Washington
B&V = Black Veatch
bgs = below ground surface
Comp = Composite Sample
dup = duplicate
EPJ = E.PJohnson Construction Inc., and Environmental
ESC = ESC Lab Services of Mt. Juliet, Tennessee
F&BI = Friedman & Bruya, Inc.
GeoEng = GeoEngineers, Inc.
HC = Hart Crowser, Inc.
NCA = North Creek Analytical, of Bothell, Washington
OnSite = OnSite Environmental Inc., of Redmond, Washington
Pace = Pace Analytical of Mt. Juliet, Tennessee (formerly ESC)
PES = PES Environmental, Inc.
Retec = Remediation Technologies, Inc.
Roux = Roux Associates
SES = SoundEarth Strategies, Inc.
TR = TR Corporation
Urban = Urban Redevelopment LLC
WW = WW Environmental LLC

Notes:
All on-Property soil was excavated during Property redevelopment above elevations 0.7 to 10.7 feet, and CVOCs in soil between elevations +10 to 55 feet was treated.
Petroleum Hydrocarbons (PHCs) analyzed by Ecology Methods NWTPH-HCID, NWTPH-Gx, or NWTPH-Dx; or EPA Method 418.1, Method 8020, or Method 8015M.
VOCs analyzed by EPA Methods 8010, 8020, 8021B, 624/8240, or 8260B/C/D.
Well screen elevations provided below Sample Location. in parentheses when appliable.
PCUL = Preliminary Cleanup Level from Washington State Department of Ecology, Memorandum from P. Tomlinson to TCP File for American Linen Supply Co. Dexter Ave. (FSID 3573, CSID 12004) re: Development of site-specific preliminary cleanup levels, December 14, 2021. PCULs based on the practical quantitation limits (PQLs) italicized.
Detected results shown in **bold**.
Detections above the screening level in the vadose zone are shown in **bold** and **highlighted blue**.
Detections above the screening level in the saturated zone are shown in **bold and highlighted gray.**
– = Not available or results not analyzed.
A = Result reported as total petroleum hydrocarbons.
B = Analyte detected in an associated method blank.
J = The reported concentration is an estimate based on detectable results between the method detection limit and reporting limit, laboratory QA/QC, or data validation review.
J+ = The result is an estimated quantity, but the result may be biased high.
J- = The result is an estimated quantity, but the result may be biased low.
ND = Not detected above laboratory reporting limit. Reporting limit not available.
q = Sample may contain gasoline or petroleum components. Chromatographic pattern indicates the presence of gasoline constituents.
R = The data is unusable. The sample result is rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample
T = Analyte also detected in trip blank.
U = Not detected at a concentration exceeding laboratory reporting limit
ve = Estimated value. The reported range exceeds the calibration range of the analysis.
w = Petroleum product eluting in the C8-C9 range
x = The sample chromatographic pattern does not resemble the fuel standard used for quantitation.
z = Gasoline/petroleum detection result is likely elevated due to high detections of CVOCs.

Abbreviations:
AAL = Alden Analytical Laboratories, Inc., of Seattle, Washington
ARI = Analytical Resource, Incorporated, Seattle, Washington
B&V = Black Veatch
bgs = below ground surface
Comp = Composite Sample
dup = duplicate
EPJ = E.PJohnson Construction Inc., and Environmental
ESC = ESC Lab Services of Mt. Juliet, Tennessee
F&BI = Friedman & Bruya, Inc.
GeoEng = GeoEngineers, Inc.
HC = Hart Crowser, Inc.
NCA = North Creek Analytical, of Bothell, Washington
OnSite = OnSite Environmental Inc., of Redmond, Washington
Pace = Pace Analytical of Mt. Juliet, Tennessee (formerly ESC)
PES = PES Environmental, Inc.
Retec = Remediation Technologies, Inc.
Roux = Roux Associates
SES = SoundEarth Strategies, Inc.
TR = TR Corporation
Urban = Urban Redevelopment LLC
WW = WW Environmental LLC

Notes:
All on-Property soil was excavated during Property redevelopment above elevations 0.7 to 10.7 feet, and CVOCs in soil between elevations +10 to 55 feet was treated.
Petroleum Hydrocarbons (PHCs) analyzed by Ecology Methods NWTPH-HCID, NWTPH-Gx, or NWTPH-Dx; or EPA Method 418.1, Method 8020, or Method 8015M.
VOCs analyzed by EPA Methods 8010, 8020, 8021B, 624/8240, or 8260B/C/D.
Well screen elevations provided below Sample Location. in parentheses when appliable.
PCUL = Preliminary Cleanup Level from Washington State Department of Ecology, Memorandum from P. Tomlinson to TCP File for American Linen Supply Co. Dexter Ave. (FSID 3573, CSID 12004) re: Development of site-specific preliminary cleanup levels, December 14, 2021. PCULs based on the practical quantitation limits (PQLs) italicized.
Detected results shown in **bold**.
Detections above the screening level in the vadose zone are shown in **bold and highlighted blue.**
Detections above the screening level in the saturated zone are shown in **bold** and **highlighted gray.**
– = Not available or results not analyzed.
A = Result reported as total petroleum hydrocarbons.
B = Analyte detected in an associated method blank.
J = The reported concentration is an estimate based on detectable results between the method detection limit and reporting limit, laboratory QA/QC, or data validation review.
J+ = The result is an estimated quantity, but the result may be biased high.
J- = The result is an estimated quantity, but the result may be biased low.
ND = Not detected above laboratory reporting limit. Reporting limit not available.
q = Sample may contain gasoline or petroleum components. Chromatographic pattern indicates the presence of gasoline constituents.
R = The data is unusable. The sample result is rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample
T = Analyte also detected in trip blank.
U = Not detected at a concentration exceeding laboratory reporting limit
ve = Estimated value. The reported range exceeds the calibration range of the analysis.
w = Petroleum product eluting in the C8-C9 range
x = The sample chromatographic pattern does not resemble the fuel standard used for quantitation.
z = Gasoline/petroleum detection result is likely elevated due to high detections of CVOCs.

Abbreviations:
AAL = Alden Analytical Laboratories, Inc., of Seattle, Washington
ARI = Analytical Resource, Incorporated, Seattle, Washington
B&V = Black Veatch
bgs = below ground surface
Comp = Composite Sample
dup = duplicate
EPJ = E.PJohnson Construction Inc., and Environmental
ESC = ESC Lab Services of Mt. Juliet, Tennessee
F&BI = Friedman & Bruya, Inc.
GeoEng = GeoEngineers, Inc.
HC = Hart Crowser, Inc.
NCA = North Creek Analytical, of Bothell, Washington
OnSite = OnSite Environmental Inc., of Redmond, Washington
Pace = Pace Analytical of Mt. Juliet, Tennessee (formerly ESC)
PES = PES Environmental, Inc.
Retec = Remediation Technologies, Inc.
Roux = Roux Associates
SES = SoundEarth Strategies, Inc.
TR = TR Corporation
Urban = Urban Redevelopment LLC
WW = WW Environmental LLC

Notes:
All on-Property soil was excavated during Property redevelopment above elevations 0.7 to 10.7 feet, and CVOCs in soil between elevations +10 to 55 feet was treated.
Petroleum Hydrocarbons (PHCs) analyzed by Ecology Methods NWTPH-HCID, NWTPH-Gx, or NWTPH-Dx; or EPA Method 418.1, Method 8020, or Method 8015M.
VOCs analyzed by EPA Methods 8010, 8020, 8021B, 624/8240, or 8260B/C/D.
Well screen elevations provided below Sample Location. in parentheses when appliable.
PCUL = Preliminary Cleanup Level from Washington State Department of Ecology, Memorandum from P. Tomlinson to TCP File for American Linen Supply Co. Dexter Ave. (FSID 3573, CSID 12004) re: Development of site-specific preliminary cleanup levels, December 14, 2021. PCULs based on the practical quantitation limits (PQLs) italicized.
Detected results shown in **bold**.
Detections above the screening level in the vadose zone are shown in **bold and highlighted blue**.
Detections above the screening level in the saturated zone are shown in **bold and highlighted gray.**
– = Not available or results not analyzed.
A = Result reported as total petroleum hydrocarbons.
B = Analyte detected in an associated method blank.
J = The reported concentration is an estimate based on detectable results between the method detection limit and reporting limit, laboratory QA/QC, or data validation review.
J+ = The result is an estimated quantity, but the result may be biased high.
J- = The result is an estimated quantity, but the result may be biased low.
ND = Not detected above laboratory reporting limit. Reporting limit not available.
q = Sample may contain gasoline or petroleum components. Chromatographic pattern indicates the presence of gasoline constituents.
R = The data is unusable. The sample result is rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample
T = Analyte also detected in trip blank.
U = Not detected at a concentration exceeding laboratory reporting limit
ve = Estimated value. The reported range exceeds the calibration range of the analysis.
w = Petroleum product eluting in the C8-C9 range
x = The sample chromatographic pattern does not resemble the fuel standard used for quantitation.
z = Gasoline/petroleum detection result is likely elevated due to high detections of CVOCs.

Abbreviations:
AAL = Alden Analytical Laboratories, Inc., of Seattle, Washington
ARI = Analytical Resource, Incorporated, Seattle, Washington
B&V = Black Veatch
bgs = below ground surface
Comp = Composite Sample
dup = duplicate
EPJ = E.PJohnson Construction Inc., and Environmental
ESC = ESC Lab Services of Mt. Juliet, Tennessee
F&BI = Friedman & Bruya, Inc.
GeoEng = GeoEngineers, Inc.
HC = Hart Crowser, Inc.
NCA = North Creek Analytical, of Bothell, Washington
OnSite = OnSite Environmental Inc., of Redmond, Washington
Pace = Pace Analytical of Mt. Juliet, Tennessee (formerly ESC)
PES = PES Environmental, Inc.
Retec = Remediation Technologies, Inc.
Roux = Roux Associates
SES = SoundEarth Strategies, Inc.
TR = TR Corporation
Urban = Urban Redevelopment LLC
WW = WW Environmental LLC

Notes:
All on-Property soil was excavated during Property redevelopment above elevations 0.7 to 10.7 feet, and CVOCs in soil between elevations +10 to 55 feet was treated.
Petroleum Hydrocarbons (PHCs) analyzed by Ecology Methods NWTPH-HCID, NWTPH-Gx, or NWTPH-Dx; or EPA Method 418.1, Method 8020, or Method 8015M.
VOCs analyzed by EPA Methods 8010, 8020, 8021B, 624/8240, or 8260B/C/D.
Well screen elevations provided below Sample Location. in parentheses when appliable.
PCUL = Preliminary Cleanup Level from Washington State Department of Ecology, Memorandum from P. Tomlinson to TCP File for American Linen Supply Co. Dexter Ave. (FSID 3573, CSID 12004) re: Development of site-specific preliminary cleanup levels, December 14, 2021. PCULs based on the practical quantitation limits (PQLs) italicized.
Detected results shown in **bold**.
Detections above the screening level in the vadose zone are shown in **bold** and **highlighted blue**
Detections above the screening level in the saturated zone are shown in **bold** and **highlighted gray.**
– = Not available or results not analyzed.
A = Result reported as total petroleum hydrocarbons.
B = Analyte detected in an associated method blank.
J = The reported concentration is an estimate based on detectable results between the method detection limit and reporting limit, laboratory QA/QC, or data validation review.
J+ = The result is an estimated quantity, but the result may be biased high.
J- = The result is an estimated quantity, but the result may be biased low.
ND = Not detected above laboratory reporting limit. Reporting limit not available.
q = Sample may contain gasoline or petroleum components. Chromatographic pattern indicates the presence of gasoline constituents.
R = The data is unusable. The sample result is rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample
T = Analyte also detected in trip blank.
U = Not detected at a concentration exceeding laboratory reporting limit
ve = Estimated value. The reported range exceeds the calibration range of the analysis.
w = Petroleum product eluting in the C8-C9 range
x = The sample chromatographic pattern does not resemble the fuel standard used for quantitation.
z = Gasoline/petroleum detection result is likely elevated due to high detections of CVOCs.

Abbreviations:
AAL = Alden Analytical Laboratories, Inc., of Seattle, Washington
ARI = Analytical Resource, Incorporated, Seattle, Washington
B&V = Black Veatch
bgs = below ground surface
Comp = Composite Sample
dup = duplicate
EPJ = E.PJohnson Construction Inc., and Environmental
ESC = ESC Lab Services of Mt. Juliet, Tennessee
F&BI = Friedman & Bruya, Inc.
GeoEng = GeoEngineers, Inc.
HC = Hart Crowser, Inc.
NCA = North Creek Analytical, of Bothell, Washington
OnSite = OnSite Environmental Inc., of Redmond, Washington
Pace = Pace Analytical of Mt. Juliet, Tennessee (formerly ESC)
PES = PES Environmental, Inc.
Retec = Remediation Technologies, Inc.
Roux = Roux Associates
SES = SoundEarth Strategies, Inc.
TR = TR Corporation
Urban = Urban Redevelopment LLC
WW = WW Environmental LLC

Notes:
All on-Property soil was excavated during Property redevelopment above elevations 0.7 to 10.7 feet, and CVOCs in soil between elevations +10 to 55 feet was treated.
Petroleum Hydrocarbons (PHCs) analyzed by Ecology Methods NWTPH-HCID, NWTPH-Gx, or NWTPH-Dx; or EPA Method 418.1, Method 8020, or Method 8015M.
VOCs analyzed by EPA Methods 8010, 8020, 8021B, 624/8240, or 8260B/C/D.
Well screen elevations provided below Sample Location. in parentheses when appliable.
PCUL = Preliminary Cleanup Level from Washington State Department of Ecology, Memorandum from P. Tomlinson to TCP File for American Linen Supply Co. Dexter Ave. (FSID 3573, CSID 12004) re: Development of site-specific preliminary cleanup levels, December 14, 2021. PCULs based on the practical quantitation limits (PQLs) italicized.
Detected results shown in **bold**.
Detections above the screening level in the vadose zone are shown in **bold and highlighted blue**.
Detections above the screening level in the saturated zone are shown in **bold and highlighted gray.**
– = Not available or results not analyzed.
A = Result reported as total petroleum hydrocarbons.
B = Analyte detected in an associated method blank.
J = The reported concentration is an estimate based on detectable results between the method detection limit and reporting limit, laboratory QA/QC, or data validation review.
J+ = The result is an estimated quantity, but the result may be biased high.
J- = The result is an estimated quantity, but the result may be biased low.
ND = Not detected above laboratory reporting limit. Reporting limit not available.
q = Sample may contain gasoline or petroleum components. Chromatographic pattern indicates the presence of gasoline constituents.
R = The data is unusable. The sample result is rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample
T = Analyte also detected in trip blank.
U = Not detected at a concentration exceeding laboratory reporting limit
ve = Estimated value. The reported range exceeds the calibration range of the analysis.
w = Petroleum product eluting in the C8-C9 range
x = The sample chromatographic pattern does not resemble the fuel standard used for quantitation.
z = Gasoline/petroleum detection result is likely elevated due to high detections of CVOCs.

Abbreviations:
AAL = Alden Analytical Laboratories, Inc., of Seattle, Washington
ARI = Analytical Resource, Incorporated, Seattle, Washington
B&V = Black Veatch
bgs = below ground surface
Comp = Composite Sample
dup = duplicate
EPJ = E.PJohnson Construction Inc., and Environmental
ESC = ESC Lab Services of Mt. Juliet, Tennessee
F&BI = Friedman & Bruya, Inc.
GeoEng = GeoEngineers, Inc.
HC = Hart Crowser, Inc.
NCA = North Creek Analytical, of Bothell, Washington
OnSite = OnSite Environmental Inc., of Redmond, Washington
Pace = Pace Analytical of Mt. Juliet, Tennessee (formerly ESC)
PES = PES Environmental, Inc.
Retec = Remediation Technologies, Inc.
Roux = Roux Associates
SES = SoundEarth Strategies, Inc.
TR = TR Corporation
Urban = Urban Redevelopment LLC
WW = WW Environmental LLC

Notes:
All on-Property soil was excavated during Property redevelopment above elevations 0.7 to 10.7 feet, and CVOCs in soil between elevations +10 to 55 feet was treated.
Petroleum Hydrocarbons (PHCs) analyzed by Ecology Methods NWTPH-HCID, NWTPH-Gx, or NWTPH-Dx; or EPA Method 418.1, Method 8020, or Method 8015M.
VOCs analyzed by EPA Methods 8010, 8020, 8021B, 624/8240, or 8260B/C/D.
Well screen elevations provided below Sample Location. in parentheses when appliable.
PCUL = Preliminary Cleanup Level from Washington State Department of Ecology, Memorandum from P. Tomlinson to TCP File for American Linen Supply Co. Dexter Ave. (FSID 3573, CSID 12004) re: Development of site-specific preliminary cleanup levels, December 14, 2021. PCULs based on the practical quantitation limits (PQLs) italicized.
Detected results shown in **bold**.
Detections above the screening level in the vadose zone are shown in **bold and highlighted blue.**
Detections above the screening level in the saturated zone are shown in **bold and highlighted gray.**
– = Not available or results not analyzed.
A = Result reported as total petroleum hydrocarbons.
B = Analyte detected in an associated method blank.
J = The reported concentration is an estimate based on detectable results between the method detection limit and reporting limit, laboratory QA/QC, or data validation review.
J+ = The result is an estimated quantity, but the result may be biased high.
J- = The result is an estimated quantity, but the result may be biased low.
ND = Not detected above laboratory reporting limit. Reporting limit not available.
q = Sample may contain gasoline or petroleum components. Chromatographic pattern indicates the presence of gasoline constituents.
R = The data is unusable. The sample result is rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample
T = Analyte also detected in trip blank.
U = Not detected at a concentration exceeding laboratory reporting limit
ve = Estimated value. The reported range exceeds the calibration range of the analysis.
w = Petroleum product eluting in the C8-C9 range
x = The sample chromatographic pattern does not resemble the fuel standard used for quantitation.
z = Gasoline/petroleum detection result is likely elevated due to high detections of CVOCs.

Notes and Abbreviations:
Soil between elevations +10 to 55 feet was treated.
Petroleum Hydrocarbons (PHCs) analyzed by Ecology Method NWTPH-Gx.
VOCs analyzed by EPA Method 8260C or D.
PCUL = Preliminary Cleanup Level from Washington State Department of Ecology, Memorandum from P. Tomlinson to TCP File for American Linen Supply Co. Dexter Ave. (FSID 3573, CSID 12004) re: Development of site-specific preliminary cleanup levels, December 14, 2021. PCULs based on the practical quantitation limits (PQLs) italicized.
Detected results shown in **bold**.
Detections above the screening level in the vadose zone are shown in **bold** and **highlighted blue**.
Detections above the screening level in the saturated zone are shown in **bold** and **highlighted gray.**
– = Not available or results not analyzed.
J = The reported concentration is an estimate based on detectable results between the method detection limit and reporting limit, laboratory QA/QC, or data validation review.
J+ = The result is an estimated quantity, but the result may be biased high.
J- = The result is an estimated quantity, but the result may be biased low.
U = Not detected at a concentration exceeding laboratory reporting limit
z = Gasoline/petroleum detection result is likely elevated due to high detections of CVOCs.
bgs = below ground surface
dup = duplicate
Pace = Pace Analytical of Mt. Juliet, Tennessee (formerly ESC)
PES = PES Environmental, Inc.

Notes and Abbreviations:
Soil between elevations +10 to 55 feet was treated.
Petroleum Hydrocarbons (PHCs) analyzed by Ecology Method NWTPH-Gx.
VOCs analyzed by EPA Method 8260C or D.
PCUL = Preliminary Cleanup Level from Washington State Department of Ecology, Memorandum from P. Tomlinson to TCP File for American Linen Supply Co. Dexter Ave. (FSID 3573, CSID 12004) re: Development of site-specific preliminary cleanup levels, December 14, 2021. PCULs based on the practical quantitation limits (PQLs) italicized. Detected results shown in bold.
Detections above the screening level in the vadose zone are shown in **bold and highlighted blue**.
Detections above the screening level in the saturated zone are shown in **bold and highlighted gray.**
– = Not available or results not analyzed.
J = The reported concentration is an estimate based on detectable results between the method detection limit and reporting limit, laboratory QA/QC, or data validation review.
J+ = The result is an estimated quantity, but the result may be biased high.
J- = The result is an estimated quantity, but the result may be biased low.
U = Not detected at a concentration exceeding laboratory reporting limit
z = Gasoline/petroleum detection result is likely elevated due to high detections of CVOCs.
bgs = below ground surface
dup = duplicate
Pace = Pace Analytical of Mt. Juliet, Tennessee (formerly ESC)
PES = PES Environmental, Inc.

Notes and Abbreviations:
Soil between elevations +10 to 55 feet was treated.
Petroleum Hydrocarbons (PHCs) analyzed by Ecology Method NWTPH-Gx.
VOCs analyzed by EPA Method 8260C or D.
PCUL = Preliminary Cleanup Level from Washington State Department of Ecology, Memorandum from P. Tomlinson to TCP File for American Linen Supply Co. Dexter Ave. (FSID 3573, CSID 12004) re: Development of site-specific preliminary cleanup levels, December 14, 2021. PCULs based on the practical quantitation limits (PQLs) italicized. Detected results shown in bold.
Detections above the screening level in the vadose zone are shown in **bold and highlighted blue.**
Detections above the screening level in the saturated zone are shown in **bold and highlighted gray.**
– = Not available or results not analyzed.
J = The reported concentration is an estimate based on detectable results between the method detection limit and reporting limit, laboratory QA/QC, or data validation review.
J+ = The result is an estimated quantity, but the result may be biased high.
J- = The result is an estimated quantity, but the result may be biased low.
U = Not detected at a concentration exceeding laboratory reporting limit
z = Gasoline/petroleum detection result is likely elevated due to high detections of CVOCs.
bgs = below ground surface
dup = duplicate
Pace = Pace Analytical of Mt. Juliet, Tennessee (formerly ESC)
PES = PES Environmental, Inc.

Notes and Abbreviations:
Soil between elevations +10 to 55 feet was treated.
Petroleum Hydrocarbons (PHCs) analyzed by Ecology Method NWTPH-Gx.
VOCs analyzed by EPA Method 8260C or D.
PCUL = Preliminary Cleanup Level from Washington State Department of Ecology, Memorandum from P. Tomlinson to TCP File for American Linen Supply Co. Dexter Ave. (FSID 3573, CSID 12004) re: Development of site-specific preliminary cleanup levels, December 14, 2021. PCULs based on the practical quantitation limits (PQLs) italicized. Detected results shown in bold.
Detections above the screening level in the vadose zone are shown in **bold and highlighted blue**.
Detections above the screening level in the saturated zone are shown in **bold and highlighted gray.**
– = Not available or results not analyzed.
J = The reported concentration is an estimate based on detectable results between the method detection limit and reporting limit, laboratory QA/QC, or data validation review.
J+ = The result is an estimated quantity, but the result may be biased high.
J- = The result is an estimated quantity, but the result may be biased low.
U = Not detected at a concentration exceeding laboratory reporting limit
z = Gasoline/petroleum detection result is likely elevated due to high detections of CVOCs.
bgs = below ground surface
dup = duplicate
Pace = Pace Analytical of Mt. Juliet, Tennessee (formerly ESC)
PES = PES Environmental, Inc.

Notes and Abbreviations:
Soil between elevations +10 to 55 feet was treated.
Petroleum Hydrocarbons (PHCs) analyzed by Ecology Method NWTPH-Gx.
VOCs analyzed by EPA Method 8260C or D.
PCUL = Preliminary Cleanup Level from Washington State Department of Ecology, Memorandum from P. Tomlinson to TCP File for American Linen Supply Co. Dexter Ave. (FSID 3573, CSID 12004) re: Development of site-specific preliminary cleanup levels, December 14, 2021. PCULs based on the practical quantitation limits (PQLs) italicized. Detected results shown in bold.
Detections above the screening level in the vadose zone are shown in **bold and highlighted blue**.
Detections above the screening level in the saturated zone are shown in **bold and highlighted gray.**
– = Not available or results not analyzed.
J = The reported concentration is an estimate based on detectable results between the method detection limit and reporting limit, laboratory QA/QC, or data validation review.
J+ = The result is an estimated quantity, but the result may be biased high.
J- = The result is an estimated quantity, but the result may be biased low.
U = Not detected at a concentration exceeding laboratory reporting limit
z = Gasoline/petroleum detection result is likely elevated due to high detections of CVOCs.
bgs = below ground surface
dup = duplicate
Pace = Pace Analytical of Mt. Juliet, Tennessee (formerly ESC)
PES = PES Environmental, Inc.

Notes and Abbreviations:

Soil between elevations +10 to 55 feet was treated.

Petroleum Hydrocarbons (PHCs) analyzed by Ecology Method NWTPH-Gx.

VOCs analyzed by EPA Method 8260C or D.

PCUL = Preliminary Cleanup Level from Washington State Department of Ecology, Memorandum from P. Tomlinson to TCP File for American Linen Supply Co. Dexter Ave. (FSID 3573, CSID 12004) re: Development of site-specific preliminary cleanup levels, December 14, 2021. PCULs based on the practical quantitation limits (PQLs) italicized. Detected results shown in bold.

Detections above the screening level in the vadose zone are shown in **bold and highlighted blue**.

Detections above the screening level in the saturated zone are shown in **bold and highlighted gray.**

– = Not available or results not analyzed.

J = The reported concentration is an estimate based on detectable results between the method detection limit and reporting limit, laboratory QA/QC, or data validation review.

J+ = The result is an estimated quantity, but the result may be biased high.

J- = The result is an estimated quantity, but the result may be biased low.

U = Not detected at a concentration exceeding laboratory reporting limit

z = Gasoline/petroleum detection result is likely elevated due to high detections of CVOCs.

bgs = below ground surface

dup = duplicate

Pace = Pace Analytical of Mt. Juliet, Tennessee (formerly ESC)

PES = PES Environmental, Inc.

Abbreviations:
AAL = Alden Analytical Laboratories, Inc., of Seattle, Washington
ARI = Analytical Resource, Incorporated, Seattle, Washington
B&V = Black Veatch
bgs = below ground surface
Comp = Composite Sample
dup = duplicate
EPJ = E.PJohnson Construction Inc., and Environmental
ESC = ESC Lab Services of Mt. Juliet, Tennessee
F&BI = Friedman & Bruya, Inc.
HC = Hart Crowser, Inc.
OnSite = OnSite Environmental Inc., of Redmond, Washington
Pace = Pace Analytical of Mt. Juliet, Tennessee (formerly ESC)
PES = PES Environmental, Inc.
Retec = Remediation Technologies, Inc.
Roux = Roux Associates
Urban = Urban Redevelopment LLC
WW = WW Environmental LLC

Notes:
Petroleum Hydrocarbons (PHCs) analyzed by Ecology Methods NWTPH-HCID, NWTPH-Gx, or NWTPH-Dx; or EPA Method 418.1, Method 8020, or Method 8015M.
VOCs analyzed by EPA Methods 8010, 8020, 8021B, 624/8240, or 8260B/C/D.
Well screen elevations provided below Sample Location. in parentheses when appliable.
PCUL = Preliminary Cleanup Level from Washington State Department of Ecology, Memorandum from P. Tomlinson to TCP File for American Linen Supply Co. Dexter Ave. (FSID 3573, CSID 12004) re: Development of site-specific preliminary cleanup levels, December 14, 2021. PCULs based on the practical quantitation limits (PQLs) italicized.
Detected results shown in **bold**.
Detections above the screening level in the vadose zone are shown in **bold and highlighted blue**.
Detections above the screening level in the saturated zone are shown in **bold and highlighted gray.**
– = Not available or results not analyzed.
B = Analyte detected in an associated method blank.
J = The reported concentration is an estimate based on detectable results between the method detection limit and reporting limit, laboratory QA/QC, or data validation review.
J+ = The result is an estimated quantity, but the result may be biased high.
J- = The result is an estimated quantity, but the result may be biased low.
ND = Not detected above laboratory reporting limit. Reporting limit not available.
R = The data is unusable. The sample result is rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample
T = Analyte also detected in trip blank.
U = Not detected at a concentration exceeding laboratory reporting limit
ve = Estimated value. The reported range exceeds the calibration range of the analysis.
z = Gasoline/petroleum detection result is likely elevated due to high detections of CVOCs.

Abbreviations:
AAL = Alden Analytical Laboratories, Inc., of Seattle, Washington
ARI = Analytical Resource, Incorporated, Seattle, Washington
B&V = Black Veatch
bgs = below ground surface
Comp = Composite Sample
dup = duplicate
EPJ = E.PJohnson Construction Inc., and Environmental
ESC = ESC Lab Services of Mt. Juliet, Tennessee
F&BI = Friedman & Bruya, Inc.
HC = Hart Crowser, Inc.
OnSite = OnSite Environmental Inc., of Redmond, Washington
Pace = Pace Analytical of Mt. Juliet, Tennessee (formerly ESC)
PES = PES Environmental, Inc.
Retec = Remediation Technologies, Inc.
Roux = Roux Associates
Urban = Urban Redevelopment LLC
WW = WW Environmental LLC

Notes:
Petroleum Hydrocarbons (PHCs) analyzed by Ecology Methods NWTPH-HCID, NWTPH-Gx, or NWTPH-Dx; or EPA Method 418.1, Method 8020, or Method 8015M.
VOCs analyzed by EPA Methods 8010, 8020, 8021B, 624/8240, or 8260B/C/D.
Well screen elevations provided below Sample Location. in parentheses when appliable.
PCUL = Preliminary Cleanup Level from Washington State Department of Ecology, Memorandum from P. Tomlinson to TCP File for American Linen Supply Co. Dexter Ave. (FSID 3573, CSID 12004) re: Development of site-specific preliminary cleanup levels, December 14, 2021. PCULs based on the practical quantitation limits (PQLs) italicized.
Detected results shown in **bold**.
Detections above the screening level in the vadose zone are shown in **bold and highlighted blue**.
Detections above the screening level in the saturated zone are shown in **bold and highlighted gray.**
– = Not available or results not analyzed.
B = Analyte detected in an associated method blank.
J = The reported concentration is an estimate based on detectable results between the method detection limit and reporting limit, laboratory QA/QC, or data validation review.
J+ = The result is an estimated quantity, but the result may be biased high.
J- = The result is an estimated quantity, but the result may be biased low.
ND = Not detected above laboratory reporting limit. Reporting limit not available.
R = The data is unusable. The sample result is rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample
T = Analyte also detected in trip blank.
U = Not detected at a concentration exceeding laboratory reporting limit
ve = Estimated value. The reported range exceeds the calibration range of the analysis.
z = Gasoline/petroleum detection result is likely elevated due to high detections of CVOCs.

Abbreviations:
AAL = Alden Analytical Laboratories, Inc., of Seattle, Washington
ARI = Analytical Resource, Incorporated, Seattle, Washington
B&V = Black Veatch
bgs = below ground surface
Comp = Composite Sample
dup = duplicate
EPJ = E.PJohnson Construction Inc., and Environmental
ESC = ESC Lab Services of Mt. Juliet, Tennessee
F&BI = Friedman & Bruya, Inc.
HC = Hart Crowser, Inc.
OnSite = OnSite Environmental Inc., of Redmond, Washington
Pace = Pace Analytical of Mt. Juliet, Tennessee (formerly ESC)
PES = PES Environmental, Inc.
Retec = Remediation Technologies, Inc.
Roux = Roux Associates
Urban = Urban Redevelopment LLC
WW = WW Environmental LLC

Notes:
Petroleum Hydrocarbons (PHCs) analyzed by Ecology Methods NWTPH-HCID, NWTPH-Gx, or NWTPH-Dx; or EPA Method 418.1, Method 8020, or Method 8015M.
VOCs analyzed by EPA Methods 8010, 8020, 8021B, 624/8240, or 8260B/C/D.
Well screen elevations provided below Sample Location. in parentheses when appliable.
PCUL = Preliminary Cleanup Level from Washington State Department of Ecology, Memorandum from P. Tomlinson to TCP File for American Linen Supply Co. Dexter Ave. (FSID 3573, CSID 12004) re: Development of site-specific preliminary cleanup levels, December 14, 2021. PCULs based on the practical quantitation limits (PQLs) italicized.
Detected results shown in **bold**.
Detections above the screening level in the vadose zone are shown in **bold and highlighted blue**.
Detections above the screening level in the saturated zone are shown in **bold and highlighted gray.**
– = Not available or results not analyzed.
B = Analyte detected in an associated method blank.
J = The reported concentration is an estimate based on detectable results between the method detection limit and reporting limit, laboratory QA/QC, or data validation review.
J+ = The result is an estimated quantity, but the result may be biased high.
J- = The result is an estimated quantity, but the result may be biased low.
ND = Not detected above laboratory reporting limit. Reporting limit not available.
R = The data is unusable. The sample result is rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample
T = Analyte also detected in trip blank.
U = Not detected at a concentration exceeding laboratory reporting limit
ve = Estimated value. The reported range exceeds the calibration range of the analysis.
z = Gasoline/petroleum detection result is likely elevated due to high detections of CVOCs.

Abbreviations:
AAL = Alden Analytical Laboratories, Inc., of Seattle, Washington
ARI = Analytical Resource, Incorporated, Seattle, Washington
B&V = Black Veatch
bgs = below ground surface
Comp = Composite Sample
dup = duplicate
EPJ = E.PJohnson Construction Inc., and Environmental
ESC = ESC Lab Services of Mt. Juliet, Tennessee
F&BI = Friedman & Bruya, Inc.
HC = Hart Crowser, Inc.
OnSite = OnSite Environmental Inc., of Redmond, Washington
Pace = Pace Analytical of Mt. Juliet, Tennessee (formerly ESC)
PES = PES Environmental, Inc.
Retec = Remediation Technologies, Inc.
Roux = Roux Associates
Urban = Urban Redevelopment LLC
WW = WW Environmental LLC

Notes:
Petroleum Hydrocarbons (PHCs) analyzed by Ecology Methods NWTPH-HCID, NWTPH-Gx, or NWTPH-Dx; or EPA Method 418.1, Method 8020, or Method 8015M.
VOCs analyzed by EPA Methods 8010, 8020, 8021B, 624/8240, or 8260B/C/D.
Well screen elevations provided below Sample Location. in parentheses when appliable.
PCUL = Preliminary Cleanup Level from Washington State Department of Ecology, Memorandum from P. Tomlinson to TCP File for American Linen Supply Co. Dexter Ave. (FSID 3573, CSID 12004) re: Development of site-specific preliminary cleanup levels, December 14, 2021. PCULs based on the practical quantitation limits (PQLs) italicized.
Detected results shown in **bold**.
Detections above the screening level in the vadose zone are shown in **bold and highlighted blue**.
Detections above the screening level in the saturated zone are shown in **bold and highlighted gray.**
– = Not available or results not analyzed.
B = Analyte detected in an associated method blank.
J = The reported concentration is an estimate based on detectable results between the method detection limit and reporting limit, laboratory QA/QC, or data validation review.
J+ = The result is an estimated quantity, but the result may be biased high.
J- = The result is an estimated quantity, but the result may be biased low.
ND = Not detected above laboratory reporting limit. Reporting limit not available.
R = The data is unusable. The sample result is rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample
T = Analyte also detected in trip blank.
U = Not detected at a concentration exceeding laboratory reporting limit
ve = Estimated value. The reported range exceeds the calibration range of the analysis.
z = Gasoline/petroleum detection result is likely elevated due to high detections of CVOCs.
