RE: Former Whitten Oil (Whitty's Minimart)
Facility Site # 38465614
485 South Main, Colville, WA 99114
Agreed Order No. 97TC-E101

Dear Jim:

In a letter dated November 14, 2013 Ecology provided you with a summary of the remaining tasks to be completed pursuant to the requirements of Agreed Order No. 97TC-E101 (AO).

Those remaining tasks were identified as follows:

- The remaining monitoring wells (MW-7, MW-8, MW-10, MW-11, MW-12R and MW-14) are no longer needed and must be properly decommissioned.
- Groundwater sampling data for the Site must be entered into Ecology's Environmental Information Management (EIM) database.
- A Final Cleanup Report will be submitted to Ecology for review. This report will provide a summary of the final cleanup actions for this Site along with appropriate documentation.

The Final Cleanup Report was received by Ecology on February 7, 2014. This report provided documentation that each of the above-referenced tasks has been completed. As a result, Ecology has determined all the requirements of the Cleanup Action Plan and the AO have now been achieved.

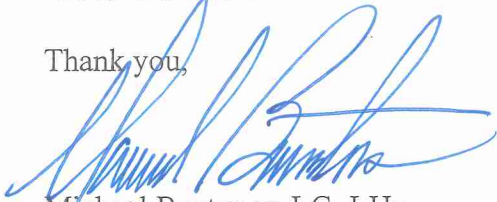

Ecology will now begin the process of delisting the Site from the Hazardous Sites List. This process involves the preparation of a Fact Sheet and a 30-day opportunity for public comment.

Mr. Jim Rolle
Whitten Oil, FSID #38465614
