**SUBJECT: Monthly Progress Report – February 2024
Duwamish Marine Center Property
6365 1st Avenue South
Seattle, Washington 98018**

Dear Mr. Harris:

This monthly progress report includes a summary of actions completed by G-Logics, an Atlas Geosciences NW company (G-Logics), in December 2023 and January 2024 for Michigan Marine Properties, LLC at the above-referenced Duwamish Marine Center Property (Property). This progress report includes the required information as set forth in the Agreed Order No. DE 8072. In accordance with the Agreed Order, a copy of this letter is provided to the Washington State Department of Ecology (Ecology).

**ACTIONS TAKEN AT THE PROPERTY TO COMPLY WITH AGREED ORDER
NO. DE 8072**

The following actions were completed by G-Logics on the project in during this reporting period:

- G-Logics continued development of the revised draft remedial investigation (RI) report.

G-Logics, an Atlas Geosciences NW Company
40 2nd Avenue Southeast

(425) 391-6874
www.g-logics.com

- As requested by Ecology, G-Logics submitted draft copies of the updated groundwater data tables and figures to the Ecology site manager for review.
- On January 22, 2024, Ecology requested that the submission of the draft RI report be delayed until a review of the submitted groundwater data and a discussion of the recent Ecology sampling of the sliver property is completed.
- G-Logics and Ecology participated in a phone conversation on January 25, 2024, during which the Port of Seattle owned sliver property along shoreline to the west of the Duwamish Marine Center property discussed. Ecology, in an email dated January 26, 2024, requested additional sampling of the metal slag and sediment on the sliver property and that the new data be incorporated into the RI report.
- Ecology provided G-Logics with data collected by the Lower Duwamish Working Group. These data are sediment samples collected near the Duwamish Marine Center property. Ecology requested that these data be reviewed and included in the draft RI report.

SUMMARY OF SAMPLING AND TESTING REPORTS

Groundwater sampling data for the Ecology requested November 2023 dioxin/furan sampling event was received during this reporting period. These data have been incorporated into the revised draft RI report.

SUMMARY OF DEVIATIONS FROM THE APPROVED WORK PLAN

There were no deviations from the applicable approved work plan.

SUMMARY OF CONTACTS WITH REPRESENTATIVES FROM LOCAL COMMUNITY, PUBLIC INTEREST GROUPS, PRESS, AND FEDERAL, STATE, AND TRIBAL GOVERNMENTS

No outside representatives from the local community, public interest groups, press, and Federal, state, and tribal governments were contacted during this reporting period.

SUMMARY OF PROBLEMS OR ANTICIPATED PROBLEMS IN MEETING SCHEDULE OR OBJECTIVES

No problems were encountered, and no problems are anticipated in meeting the schedule or objectives at this time.

CHANGES IN KEY PERSONNEL

No changes to key personnel were made during the reporting period.

DESCRIPTION OF ACTIVITIES FOR NEXT REPORTING PERIOD

The following project activities are planned for completion in February 2024:

- G-Logics will prepare for the planned sampling of the sliver property as requested by Ecology. The sliver property sampling is tentatively scheduled to be conducted by the end of February. The sampling requires sufficiently low tides that occur during daylight hours. The next available favorable low tides are at the end of February.
- Revised RI report development will continue.

CLOSING

G-Logics appreciates this opportunity to continue to provide services for this project. Please feel free to call or email with any questions.

Sincerely,

G-Logics, an Atlas Geosciences NW Company

Don Wyll
Principal Project Manager
