We want to hear from you!

Ecology is overseeing the cleanup of contamination at the Boeing Renton facility, located at 737 Logan Ave N, Renton, Washington. We invite you to review and comment on the following documents:

- **Draft Periodic Review:** Every five years we review the cleanup to check cleanup progress.
- **Draft Public Participation Plan:** This plan encourages community involvement in cleanup decisions.

Visit ecology.wa.gov/BoeingRentonComment to view these documents.

Public meeting

At this time, there are no public meetings scheduled for this comment period. To request a public meeting, please call 425-301-6454 or email Janelle.Anderson@ecy.wa.gov.

Site information

Boeing has been building planes here since 1962. In 2021, Boeing encountered an oily sheen in shallow water in a construction trench near the 737 final assembly buildings. They are investigating the nature and extent of contamination in that area.

In 2025, an unintended release of water with aqueous film-forming foam (AFFF) occurred. AFFF is a fire-fighting foam that contains per- and polyfluoroalkyl substances (PFAS) that can cause serious health conditions. Boeing cleaned up the affected areas and is doing more investigation to determine the extent of the PFAS contamination.

Contamination

In 2001, Boeing completed a site remedial investigation that showed that soil and groundwater beneath the Renton facility were contaminated with solvents and petroleum products from tank leaks and spills.

These hazardous substances include:

- Solvents (cleaning chemicals that can cause cancer)
- Fuels (can cause cancer)
- Oils (combustible substance)
- Heavy metals (toxic and can cause cancer)

Cleanup Actions

Several interim cleanup actions have been taken to prevent contaminants from reaching Lake Washington and the Cedar River. The cleanup protects human health and the environment from dangerous wastes and contaminated soil.

Boeing continues the cleanup at Renton with the bioremediation injections and groundwater monitoring outlined in their [Cleanup Action Plan](#) (large PDF, 1175 pages).¹ Bioremediation injections feed bacteria already in the soil. The bacteria “eat” chemical contaminants like TCE (trichloroethylene). Initially, contaminated groundwater was pumped and treated, and contaminated soils were excavated. Groundwater monitoring regularly tests samples for contamination to see how well remedies are working. Cleanup progress is reported to the public every five years during periodic reviews.

The cleanup process

Boeing follows Washington’s cleanup process (see Figure 1). **This site is in the “Monitor, maintain, and review” phase.**

Document review

How to view documents in person

In-person document review is available at these locations:

Washington State Department of Ecology

Northwest Region Office
15700 Dayton Ave N.
Shoreline, WA 98133-9716
Telephone: 206-594-0000

Appointments are encouraged. To schedule an appointment at Ecology, please contact:

Michael Hart, Public Disclosure Coordinator
Email: Michael.Hart@ecy.wa.gov.

Renton Library

100 Mill Ave
Renton, WA, 98057
Telephone: 425-226-6043
Website: [Renton | King County Library System](#)

No appointment needed.

How to view documents online

You can also review documents on our website: ecology.wa.gov/BoeingRentonComment.

Email: Janelle.Anderson@ecy.wa.gov

How to submit your comments

To submit your comments, questions, or concerns about any of these documents, visit Ecology's eComments page: ecology.wa.gov/BoeingRentonComment.

What happens next?

The public comment period is open from May 18 – June 19, 2026. After the comment period ends, we'll review and consider all comments received. The documents may change based on your comments. After we consider all the comments, the documents will become final.

When there are new documents about the site, we'll notify you about new public comment periods.

Language Services

We offer translation and interpretation services at no cost. To request them, email Janelle.Anderson@ecy.wa.gov or call 425-301-6454. If you call, please ask for an interpreter.

ADA Accessibility

To request an ADA accommodation, email hwtrpubs@ecy.wa.gov, call 360-407-6700, or dial 711 for relay service. Visit ecology.wa.gov/ADA for more information.
