Seattle, WA 98105

Re: Request for updated information to complete a hazard assessment of the following contaminated site:

Site name: Safeway Fuel 3252
Address: 517 S. Pioneer Way, Moses Lake
Facility/Site ID: 4131720
Cleanup site ID: 3944
County assessor's parcel(s): 091539002

Dear Limantzakis Property NO 1 LLC:

The [Washington State Department of Ecology](https://ecology.wa.gov/)¹ (Ecology) is requesting updated information about the [Safeway Fuel 3252 - \(3944\)](https://apps.ecology.wa.gov/cleanupsearch/site/3944)² facility (Site) by June 5, 2026. We will use the information to complete a site hazard assessment per the Model Toxics Control Act (MTCA) Cleanup Regulations, WAC [173-340-320](https://app.leg.wa.gov/WAC/default.aspx?cite=173-340-320)³. This site has been on Ecology's [Contaminated Sites List](https://apps.ecology.wa.gov/cleanupsearch/reports/cleanup/contaminated)⁴ since February 17, 2009. We are currently working on completing hazard assessments for all sites on the Contaminated Sites List.

Assessing site hazards

We use the [site hazard assessment and ranking process](https://ecology.wa.gov/spills-cleanup/contamination-cleanup/cleanup-process/assessing-contaminated-sites)⁵ (SHARP) to assess a site's potential hazards to people and other living things based on available information. SHARP assesses the exposure potential and severity of contamination in five environmental media: soil, groundwater, surface water, sediment, and indoor air. Based on the assessment, we assign the site an overall hazard rating of low, medium, high, or critical. We may update the site's hazard

¹ <https://ecology.wa.gov/>

² <https://apps.ecology.wa.gov/cleanupsearch/site/3944>

³ <https://app.leg.wa.gov/WAC/default.aspx?cite=173-340-320>

⁴ <https://apps.ecology.wa.gov/cleanupsearch/reports/cleanup/contaminated>

⁵ <https://ecology.wa.gov/spills-cleanup/contamination-cleanup/cleanup-process/assessing-contaminated-sites>

assessment and ratings as appropriate, such as when we receive and review information about changed site conditions or completed cleanup activities. We use SHARP hazard assessments and ratings to:

- Support decisions to add or remove sites from the Contaminated Sites List and the [No Further Action Sites List](#)⁶.
- Prioritize remedial actions and allocate agency resources.
- Inform the public and legislature about risks posed by contaminated sites.
- Reflect changes in threats posed by a site based on new information or changes in site conditions.
- Identify whether the potentially impacted community includes a likely vulnerable population or overburdened community.

Action requested

To help us better understand the contaminated site's current environmental conditions, we request that you send us the following information by June 5, 2026:

- Any report documenting past site investigations, cleanup, or monitoring not previously submitted to Ecology. You are required to submit such reports under WAC [173-340-515](#)(4)⁷. You can access any previously submitted documents that Ecology has available electronically on the site's webpage⁸.
- Any ongoing or planned actions to further investigate or clean up the site.

You can subscribe to this Site to be notified if Ecology uploads a document, changes the site status, or opens a comment period. To subscribe, visit the webpage for [Safeway Fuel 3252 - \(3944\)](#)⁹ and click the **Subscribe to this site** button in the upper right corner. You can unsubscribe at any time.

Thank you for providing the best data available for your site and protecting Washington's people and environment.

If you have any questions, please contact me at sara.fulton@ecy.wa.gov or 509-319-0047.
