Re: Ecology Approval to Decommission Groundwater Monitoring Wells P1-I and P1-S

- **Site Name:** Frederickson Industrial Park (Site)
- **Site Address:** 18001 Canyon Road East, Puyallup, 98375
- **Facility/ Site ID:** 1301
- **Cleanup Site ID:** 3557

Dear Dane Grimshaw:

This work is being done under Agreed Order No. 9514 between Washington State Department of Ecology (Ecology) and Olin Corporation and Mallinckrodt US Holdings LLC (the Companies), and in compliance with the Model Toxics Control Act (MTCA), Chapter 70A.305 RCW.

In a January 17, 2025, letter Ecology requested that the Companies collect groundwater samples from monitoring wells P1-S and P1-I to ensure carbon tetrachloride (CTC) levels are still below the MTCA Method B cleanup level of 0.63 ug/L. Groundwater samples collected on November 11, 2025, and presented in Geosyntec Consultants' Eleventh Compliance Groundwater Monitoring Report dated April 20, 2026, indicate that groundwater concentrations at monitoring wells remain below the MTCA Method B cleanup level.

Please note, if site conditions change or CTC rebounds, monitoring well re-installation may be necessary to satisfy cleanup site obligations and monitoring requirements.

If you have any questions, please contact me at cameron.penner-ash@ecy.wa.gov. or (360) 999-9590.

Sincerely,

Cam Penner-Ash, LG
