Question	Answer	Comment
Radioactivity either was not measured or, if measured, is at or below background	True	
The cooler's custody seal, if present, is intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the sample IDs on the containers and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
VOA sample vials do not have headspace or bubble is <6mm (1/4") in diameter.	N/A	
If necessary, staff have been informed of any short hold time or quick TAT needs	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True

cc: Mr. Norman M Cira
Eric Gropp

TestAmerica Seattle is a part of TestAmerica Laboratories, Inc.

This report is issued solely for the use of the person or company to whom it is addressed. Any use, copying or disclosure other than by the intended recipient is unauthorized. If you have received this report in error, please notify the sender immediately at 253-922-2310 and destroy this report immediately.

This report shall not be reproduced except in full, without prior express written approval by the laboratory. The results relate only to the item(s) tested and the sample(s) as received by the laboratory.

The results included in this report have been reviewed for compliance with the laboratory QA/QC plan and meet all requirements of NELAC. All data have been found to be compliant with laboratory protocol, with the exception of any items noted in the case narrative.

CASE NARRATIVE

Client: MWH Americas Inc

Project: Yakima, WA Phase II

Report Number: 580-24953-1

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) resulting from a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are an unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes within the calibration range of the instrument or that reduces the interfererences thereby enabling the quantification of target analytes.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 03/14/2011; the samples arrived in good condition, properly preserved and on ice. The temperature of the coolers at receipt was 0.0, 2.2, 5.6 and 5.8 C.

Note: All samples which require thermal preservation are considered acceptable if the arrival temperature is within 2C of the required temperature or method specified range. For samples with a specified temperature of 4C, samples with a temperature ranging from just above freezing temperature of water to 6C shall be acceptable. Samples that are hand delivered immediately following collection may not meet these criteria, however they will be deemed acceptable according to NELAC standards, if there is evidence that the chilling process has begun, such as arrival on ice, etc.

VOLATILE ORGANIC COMPOUNDS (GC-MS) LOW LEVEL

Samples Irrigation Well (580-24953-1), YK-MW-A (580-24953-2), YK-MW-B (580-24953-3), TB01 (580-24953-4), YK-MW-1 (580-24953-5), YK-MW-2 (580-24953-6), YK-MW-3 (580-24953-7), YK-MW-4 (580-24953-8), YK-MW-5 (580-24953-9), YK-MW-6 (580-24953-10), YK-MW-7 (580-24953-11), YK-MW11 (580-24953-12) and YK-Equipment Blank (580-24953-13) were analyzed for volatile organic compounds (GC-MS) low level in accordance with EPA SW-846 8260B. The samples were analyzed on 03/14/2011.

No difficulties were encountered during the volatile organic compounds (GC-MS) low level analyses.

All quality control parameters were within the acceptance limits.

SEMIVOLATILE ORGANIC COMPOUNDS (GC-MS)

Samples Irrigation Well (580-24953-1), YK-MW-A (580-24953-2), YK-MW-B (580-24953-3), YK-MW-1 (580-24953-5), YK-MW-2 (580-24953-6), YK-MW-3 (580-24953-7), YK-MW-4 (580-24953-8), YK-MW-5 (580-24953-9), YK-MW-6 (580-24953-10), YK-MW-7 (580-24953-11), YK-MW11 (580-24953-12) and YK-Equipment Blank (580-24953-13) were analyzed for semivolatile organic compounds (GC-MS) in accordance with EPA SW-846 Method 8270C. The samples were prepared on 03/14/2011 and analyzed on 03/14/2011 and 03/15/2011.

2,4,6-TBP and terphenyl-d14 surrogate recovery for the following sample(s) was outside control limits: YK-MW-7 (580-24953-11). Evidence of matrix interference is present. A thick emulsion was noted in prep. Therefore, re-extraction and/or re-analysis were not performed.

The laboratory control sample (LCS) for batch 82214 exceeded control limits for the following analyte: nitrobenzene. This analyte was biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

Isophorone and Nitrobenzene failed the recovery criteria high for the MS of sample YK-MW-2MS (580-24953-6) in batch 580-82272.

Several analytes failed the recovery criteria high for the MSD of sample YK-MW-2MSD (580-24953-6) in batch 580-82272.

No other difficulties were encountered during the SVOC analyses.

All other quality control parameters were within the acceptance limits.

POLYCHLORINATED BIPHENYLS (PCBS)

Samples Irrigation Well (580-24953-1), YK-MW-A (580-24953-2), YK-MW-B (580-24953-3), YK-MW-1 (580-24953-5), YK-MW-2 (580-24953-6), YK-MW-3 (580-24953-7), YK-MW-4 (580-24953-8), YK-MW-5 (580-24953-9), YK-MW-6 (580-24953-10), YK-MW-7 (580-24953-11), YK-MW11 (580-24953-12) and YK-Equipment Blank (580-24953-13) were analyzed for polychlorinated biphenyls (PCBs) in accordance with EPA SW-846 Method 8082. The samples were prepared on 03/14/2011 and analyzed on 03/15/2011.

All samples required sulfuric acid clean up to reduce matrix interferences.

DCB Decachlorobiphenyl surrogate recovery for the following sample(s) was outside control limits: YK-MW-5 (580-24953-9), -MW-6 (580-24953-10), YK-MW-7 (580-24953-11) and YK-Equipment Blank (580-24953-13).

No other difficulties were encountered during the PCBs analyses.

All other quality control parameters were within the acceptance limits.

TOTAL RECOVERABLE METALS (ICPMS)

Samples Irrigation Well (580-24953-1), YK-MW-A (580-24953-2), YK-MW-B (580-24953-3), YK-MW-1 (580-24953-5), YK-MW-2 (580-24953-6), YK-MW-3 (580-24953-7), YK-MW-4 (580-24953-8), YK-MW-5 (580-24953-9), YK-MW-6 (580-24953-10), YK-MW-7 (580-24953-11), YK-MW11 (580-24953-12) and YK-Equipment Blank (580-24953-13) were analyzed for total recoverable metals (ICPMS) in accordance with EPA SW-846 Method 6020. The samples were prepared on 03/14/2011 and analyzed on 03/15/2011.

Tin and Zinc were detected in method blank MB 580-82227/16-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged “J”. If the associated sample reported a result above the MDL and/or RL, the result has been “B” flagged.

No other difficulties were encountered during the metals analyses.

All other quality control parameters were within the acceptance limits.

TOTAL MERCURY

Samples Irrigation Well (580-24953-1), YK-MW-A (580-24953-2), YK-MW-B (580-24953-3), YK-MW-1 (580-24953-5), YK-MW-2 (580-24953-6), YK-MW-3 (580-24953-7), YK-MW-4 (580-24953-8), YK-MW-5 (580-24953-9), YK-MW-6 (580-24953-10), YK-MW-7 (580-24953-11), YK-MW11 (580-24953-12) and YK-Equipment Blank (580-24953-13) were analyzed for total mercury in accordance with EPA SW-846 Methods 7470A. The samples were prepared on 03/14/2011 and analyzed on 03/15/2011.

Mercury was detected in method blank MB 580-82237/21-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged “J”. If the associated sample reported a result above the MDL and/or RL, the result has been “B” flagged.

Insufficient sample volume was provided to perform matrix spike/matrix spike duplicate (MS/MSD) on the requested sample YK-MW-2 (580-24953-6), sample YK-MW-1 (580-24953-5) was prepared as an MS/MSD to provide QC for the batch.

No other difficulties were encountered during the mercury analyses.

All other quality control parameters were within the acceptance limits.

DATA REPORTING QUALIFIERS

Client: MWH Americas Inc Job Number: 580-24953-1

Lab Section	Qualifier	Description
GC/MS VOA		
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
GC/MS Semi VOA		
	*	LCS or LCSD exceeds the control limits
	F	MS or MSD exceeds the control limits
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
	X	Surrogate is outside control limits
GC Semi VOA		
	^	ICV,CCV,ICB,CCB, ISA, ISB, CRI, CRA, DLCK or MRL standard: Instrument related QC exceeds the control limits.
	I	Indicates the presence of an interference, recovery is not calculated.
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
	X	Surrogate is outside control limits
Metals		
	B	Compound was found in the blank and sample.
	^	ICV,CCV,ICB,CCB, ISA, ISB, CRI, CRA, DLCK or MRL standard: Instrument related QC exceeds the control limits.
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
	V	Serial Dilution exceeds the control limits

PCBS ORGANICS ANALYSIS DATA SHEET

Lab Name: TestAmerica Seattle | Job No.: 580-24953-1

SDG No.:

Client Sample ID: YK-Equipment Blank | Lab Sample ID: 580-24953-13

Matrix: Water | Lab File ID: CC155426.D

Analysis Method: 8082 | Date Collected: 03/13/2011 15:00

Extraction Method: 3510C | Date Extracted: 03/14/2011 10:54

Sample wt/vol: 1060(mL) | Date Analyzed: 03/15/2011 15:11

Con. Extract Vol.: 10(mL) | Dilution Factor: 1

Injection Volume: 1(uL) | GC Column: ZB-MR-1 ID: 0.25(mm)

% Moisture: | GPC Cleanup:(Y/N) N

Analysis Batch No.: 82292 | Units: ug/L

Question	Answer	Comment
Radioactivity either was not measured or, if measured, is at or below background	True	
The cooler's custody seal, if present, is intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the sample IDs on the containers and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
VOA sample vials do not have headspace or bubble is <6mm (1/4") in diameter.	True	
If necessary, staff have been informed of any short hold time or quick TAT needs	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True

TestAmerica Seattle is a part of TestAmerica Laboratories, Inc.

This report is issued solely for the use of the person or company to whom it is addressed. Any use, copying or disclosure other than by the intended recipient is unauthorized. If you have received this report in error, please notify the sender immediately at 253-922-2310 and destroy this report immediately.

This report shall not be reproduced except in full, without prior express written approval by the laboratory. The results relate only to the item(s) tested and the sample(s) as received by the laboratory.

The results included in this report have been reviewed for compliance with the laboratory QA/QC plan and meet all requirements of NELAC. All data have been found to be compliant with laboratory protocol, with the exception of any items noted in the case narrative.

CASE NARRATIVE

Client: MWH Americas Inc

Project: Yakima, WA Phase II

Report Number: 580-24977-1

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) resulting from a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are an unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes within the calibration range of the instrument or that reduces the interfererences thereby enabling the quantification of target analytes.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT
The samples were received on 03/14/2011; the samples arrived in good condition, properly preserved and on ice. The temperature of the coolers at receipt was 5.7 and 5.8 C.

Note: All samples which require thermal preservation are considered acceptable if the arrival temperature is within 2C of the required temperature or method specified range. For samples with a specified temperature of 4C, samples with a temperature ranging from just above freezing temperature of water to 6C shall be acceptable. Samples that are hand delivered immediately following collection may not meet these criteria, however they will be deemed acceptable according to NELAC standards, if there is evidence that the chilling process has begun, such as arrival on ice, etc.

TCLP VOLATILE ORGANIC COMPOUNDS (GC-MS)
Samples YK-IDW-Soil (580-24977-1) and YK-IDW-GW (580-24977-2) were analyzed for TCLP volatile organic compounds (GC-MS) in accordance with EPA SW-846 Methods 1311/8260B. The samples were leached on 03/15/2011 and analyzed on 03/22/2011.

2-Butanone was detected in method blank MB 580-82341/4-A at a level exceeding the reporting limit. If the associated sample reported a result above the MDL and/or RL, the result has been “B” flagged.

The laboratory control sample (LCS) for batch 580-82736 exceeded upper control limits for 2-Butanone. This analyte was biased high in the LCS and was not detected in the associated samples above the RL. Additionally, the recovery of 2-Butanone was within limits in the associated MS/MSD; therefore, the data have been reported.

Surrogate recovery of Ethylbenzene-d10 for the LCS/MS/MSD associated with batch 580-82341 exceeded upper QC limits. The recovery of all spiked targets and sample surrogates were within QC limits; therefore, the data were reported.

The matrix spike duplicate (MSD) recoveries for batch 82736 were outside control limits for the target analyte Tetrachloroethene. The associated laboratory control sample (LCS) recovery met acceptance criteria.

Samples YK-IDW-Soil (580-24977-1)[100X] and YK-IDW-GW (580-24977-2)[100X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

No other difficulties were encountered during the TCLP volatiles analyses.

All other quality control parameters were within the acceptance limits.

TCLP SEMIVOLATILE ORGANIC COMPOUNDS (GC-MS)
Sample YK-IDW-Soil (580-24977-1) was analyzed for TCLP semivolatile organic compounds (GC-MS) in accordance with EPA SW-846 Methods 1311/8270C. The samples were leached on 03/15/2011, prepared on 03/21/2011 and analyzed on 03/23/2011.

No difficulties were encountered during the TCLP semivolatiles analysis.

All quality control parameters were within the acceptance limits.

TCLP SEMIVOLATILE ORGANIC COMPOUNDS (GC-MS)
Sample YK-IDW-GW (580-24977-2) was analyzed for TCLP semivolatile organic compounds (GC-MS) in accordance with EPA SW-846

Method 8270C. The samples were leached on 03/15/2011, prepared on 03/21/2011 and analyzed on 03/23/2011.

No difficulties were encountered during the TCLP semivolatiles analysis.

All quality control parameters were within the acceptance limits.

POLYCHLORINATED BIPHENYLS (PCBS)
Samples YK-IDW-Soil (580-24977-1) and YK-IDW-GW (580-24977-2) were analyzed for polychlorinated biphenyls (PCBs) in accordance with EPA SW-846 Method 8082. The samples were prepared on 03/16/2011 and analyzed on 03/18/2011.

Surrogate recovery for the following sample(s) was outside control limits: 580-24977-1. Evidence of matrix interference is present; therefore, re-extraction and/or re-analysis were not performed.

The following sample) required a sulfuric acid clean-up to reduce matrix interferences: YK-IDW-Soil (580-24977-1) and YK-IDW-GW (580-24977-2).

No other difficulties were encountered during the PCBs analysis.

All other quality control parameters were within the acceptance limits.

TCLP METALS
Samples YK-IDW-Soil (580-24977-1) and YK-IDW-GW (580-24977-2) were analyzed for TCLP metals in accordance with EPA SW-846 Methods 1311/ 6010B. The samples were leached on 03/15/2011, prepared on 03/16/2011 and analyzed on 03/17/2011.

Barium was detected in method blank MB 580-82340/15-B at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged “J”. If the associated sample reported a result above the MDL and/or RL, the result has been “B” flagged.

No other difficulties were encountered during the TCLP metals analyses.

All other quality control parameters were within the acceptance limits.

TCLP MERCURY
Samples YK-IDW-Soil (580-24977-1) and YK-IDW-GW (580-24977-2) were analyzed for TCLP mercury in accordance with EPA SW-846 Methods 1311/7470A. The samples were leached on 03/15/2011, prepared on 03/16/2011 and analyzed on 03/21/2011.

No difficulties were encountered during the TCLP mercury analyses.

All quality control parameters were within the acceptance limits.

PH (CORROSIVITY)
Sample YK-IDW-GW (580-24977-2) was analyzed for pH (corrosivity) in accordance with EPA Method 150.1. The samples were analyzed on 03/16/2011.

No difficulties were encountered during the pH analysis.

All quality control parameters were within the acceptance limits.

REACTIVE CYANIDE
Samples YK-IDW-Soil (580-24977-1) and YK-IDW-GW (580-24977-2) were analyzed for reactive cyanide in accordance with EPA SW-846 Method 9014. The samples were prepared on 03/22/2011 and analyzed on 03/23/2011.

No difficulties were encountered during the cyanide analysis.

All quality control parameters were within the acceptance limits.

REACTIVE SULFIDE
Samples YK-IDW-Soil (580-24977-1) and YK-IDW-GW (580-24977-2) were analyzed for reactive sulfide in accordance with EPA SW-846 Method 7.3.4. The samples were prepared on 03/22/2011 and analyzed on 03/23/2011.

No difficulties were encountered during the reactive sulfide analysis.

All quality control parameters were within the acceptance limits.

PERCENT SOLIDS
Sample YK-IDW-Soil (580-24977-1) was analyzed for percent solids in accordance with EPA SW846 3550C. The samples were analyzed on 03/16/2011.

The matrix duplicate %RPD for percent moisture was outside the control limits due to non homogeneity of the sample. This sample is a mixture of soil and rocks. The percent solids %RPD was within acceptance limits.

No other difficulties were encountered during the % solids analysis.

All other quality control parameters were within the acceptance limits.

DATA REPORTING QUALIFIERS

Client: MWH Americas Inc Job Number: 580-24977-1

Lab Section	Qualifier	Description
GC/MS VOA		
	B	Compound was found in the blank and sample.
	^	ICV,CCV,ICB,CCB, ISA, ISB, CRI, CRA, DLCK or MRL standard: Instrument related QC exceeds the control limits.
	*	LCS or LCSD exceeds the control limits
	F	MS or MSD exceeds the control limits
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
	X	Surrogate is outside control limits
GC/MS Semi VOA		
	F	MS or MSD exceeds the control limits
GC Semi VOA		
	^	ICV,CCV,ICB,CCB, ISA, ISB, CRI, CRA, DLCK or MRL standard: Instrument related QC exceeds the control limits.
	I	Indicates the presence of an interference, recovery is not calculated.
	X	Surrogate is outside control limits
Metals		
	B	Compound was found in the blank and sample.
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
General Chemistry		
	HF	Field parameter with a holding time of 15 minutes

Question	Answer	Comment
Radioactivity either was not measured or, if measured, is at or below background	True	
The cooler's custody seal, if present, is intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	False	no
There are no discrepancies between the sample IDs on the containers and the COC.	True	
Samples are received within Holding Time.	False	pH
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
VOA sample vials do not have headspace or bubble is <6mm (1/4") in diameter.	N/A	
If necessary, staff have been informed of any short hold time or quick TAT needs	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	

DATA VALIDATION REPORT

GE Aviation – Yakima

Fifty-three soil samples, thirteen groundwater samples and associated quality assurance/quality control samples were collected from the GE Aviation Yakima Site between March 10 and 13, 2011. The samples were analyzed by Test America Laboratories, Inc., Tacoma, Washington for one or more of the following: volatile organic compounds (VOCs) by United States Environmental Protection Agency (USEPA) methods SW-846 5030B/8260B; semi-volatile organic compounds (SVOCs) by US EPA Method SW-846 8270C; polychlorinated biphenyls (PCBs) by US EPA Methods SW-846 3546/8082; and total metals by USEPA Methods SW-846 6020/7470A/7471A.

The analytical data were reviewed based on the results of the data evaluation parameters and/or the QC sample results provided by the laboratory.

VOCs

Sample Delivery Group (SDG) 580-24912-1

The method blank associated with all samples indicated detections of tetrachloroethene (8.95 micrograms per kilogram [µg/kg]), 4-isopropyltoluene (10.7 µg/kg), n-butylbenzene (13.4 µg/kg), and hexachlorobutadiene (28.2 µg/kg). Samples exhibiting detections of these analytes at concentrations less than 10X the method blank concentration were qualified "B" indicating blank contamination.

The surrogate spike recovery of ethylbenzene-d10 associated with sample YK-SB5(0-1) indicated a percent recovery (%R) outside the acceptance criteria with a high bias. None of the analytes associated with this surrogate were detected in the associated sample, therefore no qualifiers were issued.

The continuing calibration associated with the analysis of all samples indicated percent differences (%Ds) outside the acceptance criteria with high biases for 1,1,1,2-tetrachloroethane and tetrachloroethene. Neither of these analytes were detected in the associated samples, therefore no qualifiers were issued.

SDG 580-24938-1

The method blank associated with samples YK-SB08(0-1), YK-SB08(4-5), YK-SB14(0-1), YK-SB14(4-5), YK-SB06(0-1), YK-SB06(4-5), YK-SB15(0-1), YK-SB15(4-5), YK-Methanol Blank, YK-MW-6(4-5), YK-MW-6(4-5)D, YK-SB07(0-1), YK-MW-7(0-1), YK-MW-7(4-5), YK-MW-5(0-1), YK-MW-5(2-3), YK-SB16(01-), YK-SB16(3-4), YK-SB17(0-1), and YK-SB17(0-1)D indicated detections of tetrachloroethene (7.64 µg/kg), chloroform (17.5 µg/kg), chlorobenzene (16.7 µg/kg), and hexachlorobutadiene (28.7 µg/kg). Samples exhibiting detections of these analytes at concentrations less than 10X the method blank concentration were qualified "B" indicating blank contamination.

The method blank associated with samples YK-SB17(3-4), YK-SB18(0-1), YK-SB18(3-4), YK-MW-6(0-1), YK-SB07(3-4), YK-SB01(0-1), YK-SB01(4-5), YK-SB02(0-1), YK-SB02(3-4), YK-SB03(0-1), YK-SB03(3-4), YK-SB04(0-1), YK-SB04(4-5), YK-SB13(0-1), YK-SB13(7-8), YK-SB11(0-1), YK-SB11(3-4), YK-SB12(0-1), YK-SB10(0-1), and YK-Methanol Blank indicated detections of tetrachloroethene (7.59 µg/kg) and hexachlorobutadiene (24.8 µg/kg). Samples exhibiting detections of these analytes at concentrations less than 10X the method blank concentration were qualified "B" indicating blank contamination.

The surrogate spike recovery of ethylbenzene-d10 associated with samples YK-SB06(0-1), YK-SB15(4-5), YK-MW-6(4-5)D, YK-MW-6(0-1), YK-SB01(0-1), YK-SB04(4-5), and YK-SB10(0-1) indicated a %R outside the acceptance criteria with a high bias. None of the analytes associated with this surrogate were detected in the associated sample, therefore no qualifiers were issued.

The laboratory control sample (LCS) associated with all samples indicated a %R outside the acceptance criteria with a high bias for chlorobenzene. Chlorobenzene was not detected in any of the associated samples, therefore no qualifiers were issued.

The continuing calibration associated with the analysis of samples YK-SB08(0-1), YK-SB08(4-5), YK-SB14(0-1), YK-SB14(4-5), YK-SB06(0-1), YK-SB06(4-5), YK-SB15(0-1), YK-SB15(4-5), YK-Methanol Blank, YK-MW-6(4-5), YK-MW-6(4-5)D, YK-SB07(0-1), YK-MW-7(0-1), YK-MW-7(4-5), and YK-SB17(3-4) indicated %Ds outside the acceptance criteria with high biases for: trans-1,3-dichloropropene; ethylbenzene; and 1, 1,1,2-tetrachloroethane. None of these analytes were detected in the associated samples, therefore no qualifiers were issued.

The continuing calibration associated with the analysis of samples YK-MW-5(0-1), YK-MW-5(2-3), YK-SB16(01-), YK-SB16(3-4), YK-SB17(0-1), and YK-SB17(0-1)D indicated a %D outside the acceptance criteria with a high bias for tetrachloroethene. Tetrachloroethene was not detected in the associated samples, therefore no qualifiers were issued. The same continuing calibration indicated a %D outside the acceptance criteria with a low bias for 2,2-dichloropropane. Therefore, the associated samples were qualified "J" as estimated for 2,2-dichloropropane.

The continuing calibration associated with the analysis of samples YK-SB18(0-1), YK-SB18(3-4), YK-MW-6(0-1), YK-SB07(3-4), YK-SB01(0-1), YK-SB01(4-5), YK-SB02(0-1), YK-SB02(3-4), YK-SB03(0-1), YK-SB03(3-4), YK-SB04(0-1), YK-SB04(4-5), YK-SB13(0-1), YK-SB13(7-8), YK-SB11(0-1), YK-SB11(3-4), YK-SB12(0-1), YK-SB10(0-1), and YK-Methanol Blank indicated %Ds outside the acceptance criteria with high biases for tetrachloroethene and 1,1,1,2-tetrachloroethane. Samples exhibiting detections of these compounds were qualified "J" as estimated.

SDG 580-24953-1

Sample YK-Equipment Blank (collected 3/13/11) indicated detections of methylene chloride (11 micrograms per liter [µg/L]) and toluene (0.12 µg/L). Therefore, samples with the same collection date that indicated detections of these compounds were qualified "B" indicating blank contamination.

SVOCs

SDG 580-24912-1

The matrix spike/matrix spike duplicate (MS/MSD) associated with sample YK-SB09(4-5) indicated %Rs outside the acceptance criteria with low biases for: benzoic acid; 2,4-dinitrophenol; n-nitrosodiphenylamine; hexachlorobenzne; phenanthrene; anthracene; di-n-butylphthalate; 3,3'-dichlorobenzidine; benzo(a)anthracene; chrysene; benzo(a)pyrene; indeno(1,2,3-cd)pyrene; benzo(g,h,i)perylene; carbazole; benzo(b)fluoranthene; and benzo(k)fluoranthene. Therefore, the associated sample was qualified "J" as estimated for these analytes.

The continuing calibration associated with samples YK-MW3(4-5), YK-MW4(0-1), YK-MW-4(4-5), YK-SB5(0-1), AND YK-SB05(5-6) indicated a %D outside the acceptance criteria with a high bias for 3,3'-dichlorobenzidine. This analyte was not detected in the associated samples, therefore no qualifiers were issued.

SDG 580-24938-1

The method blank associated with samples YK-SB08(0-1), YK-SB08(4-5), YK-SB14(0-1), YK-SB14(4-5), YK-SB06(0-1), YK-SB06(4-5), YK-SB15(0-1), YK-SB15(4-5), YK-Methanol Blank, YK-MW-6(4-5), YK-MW-6(4-5)D, YK-SB07(0-1), YK-MW-7(0-1), YK-MW-7(4-5), YK-MW-5(0-1), YK-MW-5(2-3), YK-SB16(01-), YK-SB16(3-4), YK-SB17(0-1), and YK-SB17(0-1)D indicated a detection of diethyl phthalate (41.2 µg/kg). Samples exhibiting detections of this analyte at concentrations less than 10X the method blank concentration were qualified "B" indicating blank contamination.

The surrogate spike recovery of nitrobenzene-d5 associated with sample YK-SB17(3-4) indicated a %R outside the acceptance criteria with a high bias. No analytes were detected in the associated sample, therefore no qualifiers were issued.

The LCS associated with samples YK-SB08(0-1), YK-SB08(4-5), YK-SB14(0-1), YK-SB14(4-5), YK-SB06(0-1), YK-SB06(4-5), YK-SB15(0-1), YK-SB15(4-5), YK-Methanol Blank, YK-MW-6(4-5), YK-MW-6(4-5)D, YK-SB07(0-1), YK-MW-7(0-1), YK-MW-7(4-5), YK-MW-5(0-1), YK-MW-5(2-3), YK-SB16(01-), YK-SB16(3-4), YK-SB17(0-1), and YK-SB17(0-1)D indicated %Rs outside the acceptance criteria with high biases for isophorone and 2, 4-dinitrotoluene. Neither of these analytes were detected in the associated samples, therefore no qualifiers were issued. The same LCS indicated %Rs outside the acceptance criteria with low biases for n-nitrosodiphenylamine and 3,3'-dichlorobenzidine. Therefore, the associated samples were qualified "J" as estimated for these analytes.

The LCS associated with samples YK-SB17(3-4), YK-SB18(0-1), YK-SB18(3-4), YK-MW-6(0-1), YK-SB07(3-4), YK-SB01(0-1), YK-SB01(4-5), YK-SB02(0-1), YK-SB02(3-4), YK-SB03(0-1), YK-SB03(3-4), YK-SB04(0-1), YK-SB04(4-5), YK-SB13(0-1), YK-SB13(7-8), YK-SB11(0-1), YK-SB11(3-4), YK-SB12(0-1), YK-SB10(0-1), and YK-Methanol Blank indicated a %R outside the acceptance criteria with a high bias for isophorone. Isophorone was not detected in the associated samples, therefore no qualifiers were issued.

The MS/MSD associated with sample YK-SB14(4-5) indicated %Rs outside the acceptance criteria for a vast majority of analytes. Therefore, the associated sample was qualified "J" as estimated for all analytes.

The MS/MSD associated with sample YK-SB18(0-1) indicated %Rs outside the acceptance criteria with high biases for: 2-methylphenol; nitrobenzene; isophorone; 2, 6,-dinitrotoluene; and 2,4-dinitrotoluene. None of these analytes were detected in the associated sample, therefore no qualifiers were issued. The same MS/MSD indicated %Rs outside the acceptance criteria with low biases for: benzoic acid; 2,4-dinitrophenol; 2,4-dinitro-2-methylphenol; n-nitrosodiphenylamine; chrysene; benzo(g,h,i)perylene; carbazole; and benzo(b)fluoranthene. Therefore, the associated sample was qualified "J" as estimated for these analytes.

The continuing calibration associated with samples YK-SB08(0-1), YK-SB08(4-5), YK-SB14(0-1), YK-SB14(4-5), YK-SB06(0-1), YK-SB06(4-5), YK-SB15(0-1), YK-SB15(4-5), YK-MW-6(4-5), YK-MW-6(4-5)D, YK-SB07(0-1), YK-MW-7(0-1), YK-MW-7(4-5), YK-MW-5(0-1), YK-MW-5(2-3), YK-SB16(01-), YK-SB16(3-4), YK-SB17(0-1), and YK-SB17(0-1)D indicated a %D outside the acceptance criteria with a high bias for 2-nitroaniline. This analyte was not detected in the associated samples, therefore no qualifiers were issued.

The continuing calibration associated with samples YK-SB17(3-4), YK-SB18(0-1), YK-SB18(3-4), YK-MW-6(0-1), YK-SB07(3-4), YK-SB01(0-1), YK-SB01(4-5), YK-SB02(0-1), YK-SB02(3-4), YK-SB03(0-1), YK-SB03(3-4), YK-SB04(0-1), YK-SB04(4-5), YK-SB13(0-1), YK-SB13(7-8), YK-SB11(0-1), YK-SB11(3-4), YK-SB12(0-1), and YK-SB10(0-1) indicated a %D outside the acceptance criteria with a high bias for 3,3'-dichlorobenzidine. This analyte was not detected in the associated samples, therefore no qualifiers were issued.

SDG 580-24953-1

The surrogate spike recoveries of 2,4,6-tribromophenol and terphenyl-d8 associated with sample YK-MW7 indicated %Rs outside the acceptance criteria with low biases. According to the laboratory, the anomalies were due to matrix interference. Therefore, no qualifiers were issued.

The LCS associated with samples Irrigation Well, YK-MW-A, YK-MW-B, and YK-MW-1 indicated a %R outside the acceptance criteria with a high bias for nitrobenzene. Nitrobenzene was not detected in any of the associated samples, therefore no qualifiers were issued.

The MS/MSD associated with sample YK-MW-2 indicated %Rs outside the acceptance criteria with high biases for: nitrobenzene; isophorone; hexachloroethane; 2-nitroaniline; 2,4-dinitrotoluene; and 2,6-dinitrotoluene. None of these analytes were detected in the associated sample, therefore no qualifiers were issued.

PCBs

SDG 580-24912-1

The surrogate spike recovery of decachlorobiphenyl associated with sample YK-MW-3(0-1) indicated a %R outside the acceptance criteria with a low bias. According to the laboratory, the anomaly was due to matrix interference. All secondary source surrogates were within acceptance criteria. Therefore, no qualifiers were issued.

SDG 580-24938-1

The surrogate spike recovery of decachlorobiphenyl associated with a majority of samples indicated %Rs outside the acceptance criteria. According to the laboratory, the anomalies were due to matrix interference. Therefore, no qualifiers were issued.

The continuing calibration associated with samples YK-SB08(0-1), YK-SB08(4-5), YK-SB14(0-1), YK-SB14(4-5), YK-SB06(0-1), YK-SB06(4-5), YK-MW-6(4-5), YK-MW-6(4-5)D, YK-SB07(0-1), YK-MW-7(0-1), YK-MW-7(4-5), YK-MW-5(0-1), YK-MW-5(2-3), YK-SB16(01-), YK-SB16(3-4), and YK-SB17(0-1) indicated %Ds outside the acceptance criteria with low biases for PCB-1016 and PCB-1260. Therefore, the associated samples were qualified "J" as estimated for these analytes.

The continuing calibration associated with samples YK-SB15(0-1), YK-SB15(4-5), and YK-SB17(0-1)D indicated %Ds outside the acceptance criteria with low biases for PCB-1016, PCB-1221, PCB-1254, and PCB-1260. Therefore, the associated samples were qualified "J" as estimated for these analytes.

SDG 580-24953-1

The surrogate spike recovery of decachlorobiphenyl associated with samples YK-MW5 and YK-Equipment Blank indicated %Rs outside the acceptance criteria with low biases. According to the laboratory, the anomalies were due to matrix interference. All secondary source surrogates were within acceptance criteria. Therefore, no qualifiers were issued.

Metals

SDG 580-24912-1

The method blank associated with all samples indicated a detection of molybdenum (0.058 milligrams per kilogram [mg/kg]). Samples exhibiting detections of

molybdenum at concentrations less than 10X the method blank concentration were qualified "B" indicating blank contamination.

The MS/MSD associated with sample YK-MW-1(0-1) indicated %Rs outside the acceptance criteria with low biases for antimony and barium. Therefore, the associated sample was qualified "J" as estimated for these analytes.

The post digestion spike (PDS) associated with sample YK-MW-1(0-1) indicated a %R outside the acceptance criteria with a low bias for antimony. Therefore, the associated sample was qualified "J" as estimated for antimony.

The matrix duplicate associated with sample YK-MW-1(0-1) indicated %Ds outside the acceptance criteria for arsenic, chromium, copper, lead, nickel, and zinc. Therefore, the associated sample was qualified "J" as estimated for these analytes.

SDG 580-24938-1

The method blank associated with samples YK-SB08(0-1), YK-SB08(4-5), YK-SB14(0-1), YK-SB14(4-5), YK-SB06(0-1), YK-SB06(4-5), YK-SB15(0-1), YK-SB15(4-5), YK-MW-6(4-5), YK-MW-6(4-5)D, YK-SB07(0-1), YK-MW-7(0-1), YK-MW-7(4-5), YK-MW-5(0-1), YK-MW-5(2-3), YK-SB16(01-), YK-SB16(3-4), YK-SB17(0-1), and YK-SB17(0-1)D indicated detections of antimony (0.0125 mg/kg) and tin (0.0185 mg/kg). Samples exhibiting detections of these analytes at concentrations less than 10X the method blank concentration were qualified "B" indicating blank contamination.

The method blank associated with samples YK-SB17(3-4), YK-SB18(0-1), YK-SB18(3-4), YK-MW-6(0-1), YK-SB07(3-4), YK-SB01(0-1), YK-SB01(4-5), YK-SB02(0-1), YK-SB02(3-4), YK-SB03(0-1), YK-SB03(3-4), YK-SB04(0-1), YK-SB04(4-5), YK-SB13(0-1), YK-SB13(7-8), YK-SB11(0-1), YK-SB11(3-4), YK-SB12(0-1), and YK-SB10(0-1) indicated detections of barium (0.013 mg/kg), tin (0.022 mg/kg), and zinc (0.339 mg/kg). Samples exhibiting detections of these analytes at concentrations less than 10X the method blank concentration were qualified "B" indicating blank contamination.

The MS/MSD associated with sample YK-SB08(0-1) indicated a %R outside the acceptance criteria with a low bias for barium. Therefore, the associated sample was qualified "J" as estimated for barium.

SDG 580-24953-1

The method blanks associated with all samples indicated detections of tin (0.00018 milligrams per liter [mg/L]), zinc (0.00278 mg/L), and mercury (0.000061 mg/L). Samples exhibiting detections of these analytes at concentrations less than 10X the method blank concentration were qualified "B" indicating blank contamination.

The serial dilution associated with sample YK-MW-2 indicated a %D outside the acceptance criteria for copper. The parent sample result for copper was less than the reporting limit. Therefore, no qualifiers were issued.

The matrix duplicate associated with sample YK-MW-2 indicated a %D outside the acceptance criteria for selenium. The parent sample result for selenium was less than the control limits. Therefore, no qualifiers were issued.

Based on the results of this data validation, all data for the GE Aviation Yakima Site are considered complete and valid as qualified.

CASE NARRATIVE

Client: MWH Americas Inc

Project: GE Yakima - Yakima, WA

Report Number: 580-26534-1

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) resulting from a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are an unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes within the calibration range of the instrument or that reduces the interferences thereby enabling the quantification of target analytes.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 06/03/2011; the samples arrived in good condition, properly preserved and on ice. The temperature of the coolers at receipt was 2.8 C.

Note: All samples which require thermal preservation are considered acceptable if the arrival temperature is within 2C of the required temperature or method specified range. For samples with a specified temperature of 4C, samples with a temperature ranging from just above freezing temperature of water to 6C shall be acceptable. Samples that are hand delivered immediately following collection may not meet these criteria, however they will be deemed acceptable according to NELAC standards, if there is evidence that the chilling process has begun, such as arrival on ice, etc.

VOLATILE ORGANIC COMPOUNDS (GC-MS)

Samples EWB-060211 (580-26534-1), EB-060211 (580-26534-2), MW-05-060211 (580-26534-3), MW-07-060211 (580-26534-4), DUP-060211 (580-26534-5) and TB-060211 (580-26534-6) were analyzed for volatile organic compounds (GC-MS) in accordance with EPA SW-846 Method 8260B. The samples were analyzed on 06/09/2011 and 06/16/2011.

No difficulties were encountered during the VOC analyses.

All quality control parameters were within the acceptance limits.

TOTAL RECOVERABLE METALS (ICPMS)

Samples EWB-060211 (580-26534-1), EB-060211 (580-26534-2), MW-05-060211 (580-26534-3), MW-07-060211 (580-26534-4) and DUP-060211 (580-26534-5) were analyzed for total recoverable metals (ICPMS) in accordance with EPA SW-846 Method 6020. The samples were prepared and analyzed on 06/14/2011.

Tin was detected in method blank MB 580-87431/9-C at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged “J”. If the associated sample reported a result above the MDL and/or RL, the result has been “B” flagged.

No other difficulties were encountered during the metals analyses.

All other quality control parameters were within the acceptance limits.

TOTAL MERCURY

Samples EWB-060211 (580-26534-1), EB-060211 (580-26534-2), MW-05-060211 (580-26534-3), MW-07-060211 (580-26534-4) and DUP-060211 (580-26534-5) were analyzed for total mercury in accordance with EPA SW-846 Methods 7470A. The samples were prepared and analyzed on 06/03/2011.

No difficulties were encountered during the mercury analyses.

All quality control parameters were within the acceptance limits.

HEXAVALENT CHROMIUM

Samples EWB-060211 (580-26534-1), EB-060211 (580-26534-2), MW-05-060211 (580-26534-3), MW-07-060211 (580-26534-4) and DUP-060211 (580-26534-5) were analyzed for Hexavalent chromium in accordance with SM19 3500 CR D. The samples were analyzed on 06/03/2011.

Samples EWB-060211 (580-26534-1) and DUP-060211 (580-26534-5) were received with insufficient time to complete the requested analysis within required holding times. Samples qualified “H”.

No difficulties were encountered during the Hexavalent chromium analyses.

All quality control parameters were within the acceptance limits.

DATA REPORTING QUALIFIERS

Client: MWH Americas Inc Job Number: 580-26534-1

Lab Section	Qualifier	Description
GC/MS VOA		
	^	ICV,CCV,ICB,CCB, ISA, ISB, CRI, CRA, DLCK or MRL standard: Instrument related QC exceeds the control limits.
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
Metals		
	B	Compound was found in the blank and sample.
	^	ICV,CCV,ICB,CCB, ISA, ISB, CRI, CRA, DLCK or MRL standard: Instrument related QC exceeds the control limits.
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
General Chemistry		
	H	Sample was prepped or analyzed beyond the specified holding time

Client: MWH Americas Inc

Job Number: 580-26534-1

Question	Answer	Comment
Radioactivity either was not measured or, if measured, is at or below background	True	
The cooler's custody seal, if present, is intact.	N/A	Not present
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the sample IDs on the containers and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
VOA sample vials do not have headspace or bubble is <6mm (1/4") in diameter.	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A	No analysis requiring residual chlorine check assigned.

DATA VALIDATION REPORT

GE Aviation – Yakima

Four groundwater samples and associated quality assurance/quality control (QA/QC) samples were collected from the GE Aviation Yakima Site on June 2, 2011. The samples were analyzed by Test America Laboratories, Inc., Tacoma, Washington for one or more of the following: volatile organic compounds (VOCs) by United States Environmental Protection Agency (USEPA) methods SW -846 5030B/8260B; total metals by USEPA Methods SW-846 6020/7470A; and, hexavalent chromium by Standard Method (SM) 3500.

The analytical data were reviewed based on the results of the data evaluation parameters and/or the QC sample results provided by the laboratory.

VOCs

Sample Delivery Group (SDG) 580-26534-1

No anomalies were associated with the VOC data, therefore no flags were issued.

SDG 580-24938-1

Metals

SDG 580-24938-1

The method blank associated with all samples indicated a detection of tin (0.000235 milligrams per liter [mg/L]). Samples exhibiting detections of molybdenum at concentrations less than 10X the method blank concentration were qualified "B" indicating blank contamination.

Based on the results of this data validation, all data for the GE Aviation Yakima Site are considered complete and valid as qualified.

TestAmerica Seattle is a part of TestAmerica Laboratories, Inc.

This report is issued solely for the use of the person or company to whom it is addressed. Any use, copying or disclosure other than by the intended recipient is unauthorized. If you have received this report in error, please notify the sender immediately at 253-922-2310 and destroy this report immediately.

This report shall not be reproduced except in full, without prior express written approval by the laboratory. The results relate only to the item(s) tested and the sample(s) as received by the laboratory.

The results included in this report have been reviewed for compliance with the laboratory QA/QC plan and meet all requirements of NELAC. All data have been found to be compliant with laboratory protocol, with the exception of any items noted in the case narrative.

CASE NARRATIVE
Client: MWH Americas Inc
Project: GE Yakima-Yakima, WA
Report Number: 580-27847-1

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) resulting from a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are an unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes within the calibration range of the instrument or that reduces the interferences thereby enabling the quantification of target analytes.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT
The samples were received on 08/06/2011; the samples arrived in good condition, properly preserved and on ice. The temperature of the coolers at receipt was 6.0 C.

The container label for the following samples did not match the information listed on the Chain-of-Custody (COC): DUP-01-08052011 (580-27847-7), EB-01-08042011 (580-27847-1). Sample one lists "EB-01-08052011" with a collection date of 08/05/2011 at 07:37 on the label of the unpreserved 250mL poly while the COC lists this sample as "EB-01-08042011" with a collection date of 08/04/2011 at 07:53. All other containers of this sample set matched that of the COC and therefore, the 250mL unpreserved poly was logged-in and labeled according to the information given on the COC as well.

Sample seven lists "DUP-01" on all of the container labels of this sample set while the ID of this sample reads "DUP-01-08052011" on the COC. All collection dates and times on the sample containers matched what was reported on the COC, and so the ID reported on the COC was what was used to log-in and label these containers.

Note: All samples which require thermal preservation are considered acceptable if the arrival temperature is within 2C of the required temperature or method specified range. For samples with a specified temperature of 4C, samples with a temperature ranging from just above freezing temperature of water to 6C shall be acceptable. Samples that are hand delivered immediately following collection may not meet these criteria, however they will be deemed acceptable according to NELAC standards, if there is evidence that the chilling process has begun, such as arrival on ice, etc.

VOLATILE ORGANIC COMPOUNDS (GC-MS)
Samples EB-01-08042011 (580-27847-1), MW-04-08042011 (580-27847-2), TB-01-08042011 (580-27847-3), MW-02-08052011 (580-27847-4), MW-01-08052011 (580-27847-5), MW-03-08052011 (580-27847-6) and DUP-01-08052011 (580-27847-7) were analyzed for volatile organic compounds (GC-MS) in accordance with EPA SW-846 Method 8260B. The samples were analyzed on 08/16/2011.

Methylene Chloride was detected in method blank MB 580-92970/4 at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged “J”. If the associated sample reported a result above the MDL and/or RL, the result has been “B” flagged.

No other difficulties were encountered during the VOC analyses.

All other quality control parameters were within the acceptance limits.

TOTAL RECOVERABLE METALS (ICPMS)
Samples EB-01-08042011 (580-27847-1), MW-04-08042011 (580-27847-2), MW-02-08052011 (580-27847-4), MW-01-08052011 (580-27847-5), MW-03-08052011 (580-27847-6) and DUP-01-08052011 (580-27847-7) were analyzed for total recoverable metals (ICPMS) in accordance with EPA SW-846 Method 6020. The samples were prepared on 08/18/2011 and analyzed on 08/19/2011.

No difficulties were encountered during the metals analyses.

All quality control parameters were within the acceptance limits.

TOTAL MERCURY
Samples EB-01-08042011 (580-27847-1), MW-04-08042011 (580-27847-2), MW-02-08052011 (580-27847-4), MW-01-08052011 (580-27847-5), MW-03-08052011 (580-27847-6) and DUP-01-08052011 (580-27847-7) were analyzed for total mercury in accordance with EPA SW-846 Methods 7470A. The samples were prepared and analyzed on 08/18/2011.

No difficulties were encountered during the mercury analyses.

All quality control parameters were within the acceptance limits.

HEXAVALENT CHROMIUM

Samples EB-01-08042011 (580-27847-1), MW-04-08042011 (580-27847-2), MW-02-08052011 (580-27847-4), MW-01-08052011 (580-27847-5), MW-03-08052011 (580-27847-6) and DUP-01-08052011 (580-27847-7) were analyzed for hexavalent chromium in accordance with SM19 3500 CR D. The samples were analyzed on 08/06/2011 and 08/10/2011. Samples EB-01-08042011 (580-27847-1), MW-04-08042011 (580-27847-2) and MW-02-08052011 (580-27847-4) were analyzed outside of holding time per client request.

No difficulties were encountered during the hexavalent chromium analyses.

All quality control parameters were within the acceptance limits.

DATA REPORTING QUALIFIERS

Client: MWH Americas Inc Job Number: 580-27847-1

Lab Section	Qualifier	Description
GC/MS VOA		
	B	Compound was found in the blank and sample.
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
Metals		
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
General Chemistry		
	H	Sample was prepped or analyzed beyond the specified holding time

Question	Answer	Comment
Radioactivity either was not measured or, if measured, is at or below background	True	
The cooler's custody seal, if present, is intact.	N/A	Not present
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the sample IDs on the containers and the COC.	False	Refer to Job Narrative for details.
Samples are received within Holding Time.	False	Samples placed "ON HOLD" are outside of their hold time.
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
VOA sample vials do not have headspace or bubble is <6mm (1/4") in diameter.	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A	No analysis requiring residual chlorine check assigned.

TestAmerica Seattle is a part of TestAmerica Laboratories, Inc.

This report is issued solely for the use of the person or company to whom it is addressed. Any use, copying or disclosure other than by the intended recipient is unauthorized. If you have received this report in error, please notify the sender immediately at 253-922-2310 and destroy this report immediately.

This report shall not be reproduced except in full, without prior express written approval by the laboratory. The results relate only to the item(s) tested and the sample(s) as received by the laboratory.

The results included in this report have been reviewed for compliance with the laboratory QA/QC plan and meet all requirements of NELAC. All data have been found to be compliant with laboratory protocol, with the exception of any items noted in the case narrative.

CASE NARRATIVE

Client: MWH Americas Inc
Project: GE Yakima-Yakima,WA
Report Number: 580-27877-1

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Limits of Quantitation (LOQs) resulting from a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the LOQs are an unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes within the calibration range of the instrument or that reduces the interfererences thereby enabling the quantification of target analytes.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT
The samples were received on 08/09/2011; the samples arrived in good condition, properly preserved and on ice. The temperature of the coolers at receipt was 2.1 C.

The container label for the following sample did not match the information listed on the Chain-of-Custody (COC): TB-02-08082011 (580-27877-2). The container labels list TB1-08082011. The COC lists TB02-08082011. Sample logged in per COC.

The Lab received 4 trip blanks and not 2 as listed on the COC.

Note: All samples which require thermal preservation are considered acceptable if the arrival temperature is within 2C of the required temperature or method specified range. For samples with a specified temperature of 4C, samples with a temperature ranging from just above freezing temperature of water to 6C shall be acceptable. Samples that are hand delivered immediately following collection may not meet these criteria, however they will be deemed acceptable according to NELAC standards, if there is evidence that the chilling process has begun, such as arrival on ice, etc.

VOLATILE ORGANIC COMPOUNDS (GC-MS)
Samples MW-06-08082011 (580-27877-1), TB-02-08082011 (580-27877-2), EW-A-08082011 (580-27877-3), EW-B-08082011 (580-27877-4), MW-07-08082011 (580-27877-5) and MW-05-08082011 (580-27877-6) were analyzed for volatile organic compounds (GC-MS) in accordance with EPA SW-846 Method 8260B. The samples were analyzed on 08/16/2011.

Methylene Chloride was detected in method blank MB 580-92970/4 at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged “J”. If the associated sample reported a result above the MDL and/or RL, the result has been “B” flagged.

No other difficulties were encountered during the VOC analyses.

All other quality control parameters were within the acceptance limits.

TOTAL RECOVERABLE METALS (ICPMS)
Samples MW-06-08082011 (580-27877-1), EW-A-08082011 (580-27877-3), EW-B-08082011 (580-27877-4), MW-07-08082011 (580-27877-5) and MW-05-08082011 (580-27877-6) were analyzed for total recoverable metals (ICPMS) in accordance with EPA SW-846 Method 6020. The samples were prepared on 08/09/2011 and analyzed on 08/10/2011.

For Molybdenum, the ICP-MS ICSA standard contains trace impurities derived from the manufacturing process, which may cause these standards to fail method QC criteria. Regrettably corrective action can not be performed for any outliers other than to note deficiencies in the laboratory’s QC report section. The data was qualified “^” and reported.

Barium and Tin were detected in method blank MB 580-92342/16-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged “J”. If the associated sample reported a result above the MDL and/or RL, the result has been “B” flagged.

No other difficulties were encountered during the metals analyses.

All other quality control parameters were within the acceptance limits.

TOTAL MERCURY
Samples MW-06-08082011 (580-27877-1), EW-A-08082011 (580-27877-3), EW-B-08082011 (580-27877-4), MW-07-08082011 (580-27877-5) and MW-05-08082011 (580-27877-6) were analyzed for total mercury in accordance with EPA SW-846 Methods 7470A.

The samples were prepared and analyzed on 08/09/2011.

No difficulties were encountered during the mercury analyses.

All quality control parameters were within the acceptance limits.

HEXAVALENT CHROMIUM

Samples MW-06-08082011 (580-27877-1), EW-A-08082011 (580-27877-3), EW-B-08082011 (580-27877-4), MW-07-08082011 (580-27877-5) and MW-05-08082011 (580-27877-6) were analyzed for hexavalent chromium in accordance with SM19 3500 CR D. The samples were analyzed on 08/09/2011.

No difficulties were encountered during the hexavalent chromium analyses.

All quality control parameters were within the acceptance limits.

Question	Answer	Comment
Radioactivity either was not measured or, if measured, is at or below background	True	
The cooler's custody seal, if present, is intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the sample IDs on the containers and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
VOA sample vials do not have headspace or bubble is <6mm (1/4") in diameter.	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A	

DATA VALIDATION REPORT

GE Aviation – Yakima

Nine groundwater samples and associated quality assurance/quality control (QA/QC) samples were collected from the GE Aviation Yakima Site between August 4 and August 8, 2011. The samples were analyzed by Test America Laboratories, Inc., Tacoma, Washington for one or more of the following: volatile organic compounds (VOCs) by United States Environmental Protection Agency (USEPA) methods SW-846 8260B; total metals by USEPA Methods SW-846 6020/7470A; and, hexavalent chromium by Standard Method (SM) 3500.

The analytical data were reviewed based on the results of the data evaluation parameters and/or the QC sample results provided by the laboratory.

VOCs

Sample Delivery Group (SDG) 580-27847-1

The method blank associated with all samples indicated a detection of methylene chloride (0.195 micrograms per liter [µg/L]). Samples exhibiting detections of methylene chloride at concentrations less than 10X the method blank concentration were qualified "B" indicating blank contamination.

The trip blank associated with all samples indicated a detection of methylene chloride (0.22 µg/L). None of the associated samples indicated detections of methylene chloride; therefore, no qualifiers were issued.

SDG 580-27877-1

The method blank associated with all samples indicated a detection of methylene chloride (0.195 µg/L). None of the associated samples indicated detections of methylene chloride; therefore, no qualifiers were issued.

Metals

SDG 580-27847-1

The initial calibration blank (ICB) associated with all samples indicated detections of molybdenun (0.000236 milligrams per liter [mg/L]) and tin (0.000032 mg/L). Samples exhibiting detections of these analytes at concentrations less than 10X the ICB concentration were qualified "B" indicating blank contamination.

The continuing calibration blank (CCB) associated with all samples indicated detections of molybdenun (0.000367 mg/L) and tin (0.000078 mg/L). Samples exhibiting detections of these analytes at concentrations less than 10 X the CCB concentration were qualified "B" indicating blank contamination.

The hexavalent chromium analysis of samples EB-01-08042011, MW-04-08042011, and MW-02-08052011 were per formed five days out side of the method prescribed hold time. Therefore, the hexavalent chromium results for these samples (all non detect at 0.006 mg/L) were qualified "R" indicating they are rejected as unusable.

SDG 580-27877-1

The ICB associated with all samples indicated a detection of tin (0.000167 mg/L). Samples exhibiting detections of these analytes at concentrations less than 10X the ICB concentration were qualified “B” indicating blank contamination.

The CCB associated with all samples indicated a detection of tin (0.000343 mg/L). Samples exhibiting detections of these analytes at concentrations less than 10X the CCB concentration were qualified “B” indicating blank contamination.

The method blank associated with all samples indicated detections of barium (0.000415 mg/L) and tin (0.000299 mg/L). Samples exhibiting detections of these analytes at concentrations less than 10X the CCB concentration were qualified “B” indicating blank contamination.

Based on the results of this data validation, all data for the GE Aviation Yakima Site are considered complete and valid as qualified, with the exception of those rejected as unusable.
