

DEPARTMENT OF
ECOLOGY
State of Washington

The Everett Smelter Cleanup

from Ecology's Toxics Cleanup Program

May 14, 2010

Sorry we missed you again.

The Department of Ecology (Ecology) is updating contact information and access agreements for homes that were mapped in 2007 for the purpose of cleaning up arsenic and lead contaminated soil in the neighborhood. Staff from Ecology tried to visit your home today.

Mapping and sampling to occur in your neighborhood.

We wanted to make sure you received a packet in the mail that included:

- A cover letter
- Everett Smelter Mapping and Sampling information sheets.
- Access agreement that explains the site mapping and sampling work that Ecology has planned for your neighborhood.

In 2007, Ecology produced sampling location maps at your property. Ecology will need to update its contact information and access agreements in case things changed since 2007.

Please notify Ecology whether you intend to participate in the mapping and sampling process. A signed access agreement needs to be submitted to Ecology by **July 31, 2010**. If you do not wish to have your property mapped and sampled, please write **"DECLINE"** or check the appropriate box on your access agreement form and sign it. You may also write a letter or call us if you do not wish to participate. Please mail the form in the pre-addressed envelope.

For Technical Questions, please contact:

Site Manager: Jerome Cruz

Telephone number: (425) 649-7094

E-mail: jcru461@ecy.wa.gov

Mail: Department of Ecology
3190 160th Avenue SE
Bellevue, WA 98008
