

STATE OF WASHINGTON  
DEPARTMENT OF ECOLOGY

15 W Yakima Ave, Ste 200 • Yakima, WA 98902-3452 • (509) 575-2490

July 28, 2008

Gene Schmidt, Superintendent  
Bridgeport School District  
PO Box 1060  
Bridgeport, WA 98813

Dear Mr. Schmidt:

**Re: No Further Action Determination for:**

- Name: Bridgeport Elementary School
- Address: 1400 Tacoma Avenue, Bridgeport
- Facility/Site No.: 724755

Enclosed is a copy of the Interim Action Report, prepared by our staff, which provides details of the cleanup conducted last summer. The Department of Ecology (Ecology) appreciated the opportunity to partner with you in keeping children safe. The lead and arsenic contaminated soil from prior pesticide use has been contained under a cap, and as such, no further action is required (under the Model Toxics Control Act, chapter 70.105D RCW) to protect human health and the environment.

Ecology has received all the necessary documentation regarding the required restrictive covenant. The restrictive covenant was recorded and filed on July 2, 2008 (county recording # 3125345).

Ecology will update its database to reflect this "No Further Action" determination. The school will not appear in future publications of the Confirmed & Suspected Contaminated Sites Report. Ecology will also initiate the process to remove the school from the Hazardous Sites List. This process does include a thirty (30) day public comment period.

Once again, we appreciate your commitment to human health and the environment. Should you have any questions, please feel free to contact Jeff Newschwander at (509) 388-5223 or (509) 454-7842.

Sincerely,

Don Abbott  
Section Manager  
Toxics Cleanup Program  
Central Regional Office

Enclosure

cc: Randy Hurley, Maintenance Supervisor
