Subject: Phase I Environmental Site Assessment
ABC Supermarket Property
2500 Beacon Avenue South
Seattle, WA 98144

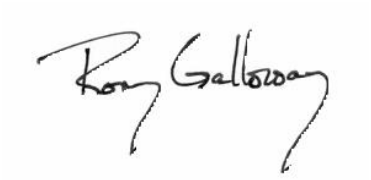

Dear Mr. Abell:

With the attached report, please find our Phase I Environmental Site Assessment (Phase I ESA) for the subject property, completed in accordance with ASTM E 1527-05. Per the Brownfields Fact Sheet dated October 2005, AAI Final Rule; the ASTM E 1527-05 standard "is consistent with the requirements of the final rule for all appropriate inquiries and may be used to comply with the provisions of the rule." The *Standards and Practices for All Appropriate Inquiries* (AAI) is described in 40 CFR Part 312.

We trust the information presented in this report meets your needs at this time. Should you require additional information or have any questions regarding this report, please contact us at your convenience. Thank you again for this opportunity to be of service.

G-Logics, Inc.
40 2nd Avenue SE
Issaquah, WA 98027
T: 425-391-6874
F: 425-313-3074
01-0860-A-RT

Sincerely,
G-Logics, Inc.

Rory L. Galloway, LG, LHG
Principal

Halli Hemley
Staff Environmental Scientist

We declare that, to the best of our professional knowledge and belief, we meet the definition of *environmental professional (EP)* as defined in § 312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess the nature, history, and setting of the subject property. We have developed and performed *all appropriate inquiries* in conformance with the standards and practices set forth in 40 CFR Part 312.

1.0 SUMMARY

At the request of Pacific Housing NW LLC (PHNW), G-Logics has completed a Phase I Environmental Site Assessment (Phase I ESA) for the property located at 2500 Beacon Avenue South in Seattle, Washington. The assessment was completed in accordance with ASTM E 1527-05.

The site includes a two-story building (office and grocery space with cooling and freezing units). During this assessment, G-Logics identified the operation of an auto-repair business on the northeast portion of the subject property from approximately 1940 to 1955. This condition is indicative of releases or threatened releases of hazardous substances or petroleum products in soil and/or groundwater at the subject property. Other identified issues included offsite CSCSL, VCP, and LUST sites, as well as the operation of potential dry-cleaners, gas and service stations. In addition to the reviewed Phase I Assessment issues, possible asbestos-containing construction materials and fluorescent-light fixtures were observed.

For this assessment, a review of the AAI-required criteria is presented in Section 8.0. Our findings regarding the identified issues are presented in Section 9.0 of this report. Opinions regarding the subject property are presented in Section 10.0. Additional information regarding the subject property is presented in Section 11.0.

2.0 INTRODUCTION

The following report is a summary of work performed using the guidelines set forth in American Society for Testing and Materials (ASTM) Standard E-1527-05, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, as described in this report. This report generally follows the ASTM Standard's suggested report format, with some format modifications to assist the reader.

This ASTM practice is consistent with the scope of the EPA's "All Appropriate Inquiries" Rule (40 CFR Part 312). Under the 2002 Small Business Liability Relief and Brownfield Revitalization Act, any property purchasers seeking to qualify for CERCLA liability protection must conduct an All Appropriate Inquiry (AAI) prior to taking title. This AAI is required in order to present a defense under the following distinctions.

Copyright 2013 G-Logics, Inc.

- Innocent Landowner
- Bona Fide Prospective Purchaser
- Contiguous Property Owner

The completion of an AAI before property purchase is only one requirement for obtaining relief from CERCLA liability. Each type of property owner also needs to meet additional specific criteria after a property is purchased. For example, an "Innocent Landowner" should meet the following criteria.

- Close data gaps identified to be significant.
- Perform necessary site investigation/explorations.
- Undertake "reasonable steps" to stop any continuing releases, prevent future releases, and limit/prevent exposures.
- Comply with any land use restrictions and institutional controls.
- Provide notification, cooperation, and access to persons authorized to conduct response actions.

The completion of an assessment in accordance with the AAI rule is to include information provided by the environmental professional (EP) and by the person seeking to qualify for CERCLA liability protection (the User). For purposes of this assessment, the EP is G-Logics and the User is Pacific Housing NW LLC.

2.1 Purpose of Assessment

The purpose of this Phase I Environmental Site Assessment is to evaluate the potential for the presence or likely presence of hazardous substances or petroleum products under conditions that indicate an existing release, a past release, or a material threat of a release into the structures of the property or into the ground, groundwater, or surfacewater of the property. Other issues, unless specifically described in Sections 3.0 through 10.0 of this report, were not included.

2.2 Scope of Services

G-Logics work was performed in accordance with our authorized workplan and 01-0860-A, dated March 25, 2013. Our report is subject to the limitations presented below in Section 2.4 of this report.

Copyright 2013 G-Logics, Inc.

2.3 Significant Assumptions

G-Logics discussed the scope of work on this project with PHNW, who subsequently approved our services. Other activities not specifically included in the approved scope of work (e.g. workplan, correspondence, this report) were excluded and are therefore not part of our services or this report.

2.4 Limitations and Exceptions

Phase I Environmental Site Assessments/All Appropriate Inquiries are non-comprehensive by nature and are unlikely to identify all environmental problems or eliminate all risk. This report is a qualitative assessment. G-Logics offers a range of environmental exploration services to suit the needs of our clients, including more quantitative explorations. Although risk can never be eliminated, more detailed and extensive explorations yield more information, which may help to better understand and manage site risks. Since such detailed services involve greater expense, we ask our clients to participate in identifying the level of service that will provide them with an acceptable level of risk (See Section 2.3 above). Please contact the signatories of this report if you would like to discuss this issue of risk further.

Land use, site conditions (both on-site and off-site), and other factors will change over time. Since site activities and regulations beyond our control could change at any time after the completion of this report, our observations, findings, and opinions can be considered valid only as of the date of the site visit. This report should not be considered “valid” if dated 180 days prior to the purchase date of the subject property (or the date of the intended transaction, ASTM 1527-05, Section 4.7).

The property owner is solely responsible for notifying all governmental agencies, and the public at large, of the existence, release, treatment, or disposal of any hazardous materials observed at the project site. G-Logics assumes no responsibility or liability whatsoever for any claim, loss of property value, damage, or injury which results from pre-existing hazardous materials being encountered or present on the project site, or from the discovery of such hazardous materials.

No warranty, either express or implied, is made.

Copyright 2013 G-Logics, Inc.

2.5 Special Terms and Conditions

No special terms and/or conditions apply.

2.6 User Reliance

This report is intended for the sole use of Pacific Housing NW LLC and may not be appropriate for the needs of other users. Re-use of this document or the findings, conclusions, or opinions presented herein, are at the sole risk of said user(s). Any party other than those identified who wish to use this report shall notify G-Logics by executing the "Permission and Conditions for Use and Copying" form that follows this document. Based on the intended use of this report, G-Logics may require that additional work be performed and that an updated report be issued. Non-compliance with any of these requirements by anyone will release G-Logics from any liability resulting from the use of this report by any unauthorized party.

3.0 SITE DESCRIPTION

The following section provides a brief description of the subject property. Additional site-description information was obtained during the site visit and through interviews. Please refer to the appropriate sections of this report that cover this information.

3.1 Location and Legal Descriptions

The subject property is located at 2500 Beacon Avenue South in Seattle, WA (Figure 1). The legal description was obtained from the King County Assessor's Online Records and is provided to G-Logics and is attached in Appendix A. The property boundaries, as understood by G-Logics, are shown on Figure 2 of this report.

3.2 Site and Vicinity General Characteristics

The site and adjacent areas are in the Beacon Hill neighborhood of Seattle, primarily a commercial-use area. Residential, recreational, and industrial properties also are located within several blocks of the subject property.

Copyright 2013 G-Logics, Inc.

3.3 Current Use of the Subject Property

The subject property and on-site structures are currently occupied by ABC Grocery, a money-exchange kiosk, and a deli. The grocery store has multiple coolers and freezers. The property is serviced by municipal, water, sewer, and natural-gas. The property is heated with natural-gas. The coolers and freezers are electric.

3.4 Site Improvements

The property is approximately 0.25 acres in size and is developed with approximately 9,000 square feet of office and retail/grocery space. G-Logics understands the site building was constructed in 1926.

3.5 Adjoining Property Uses

The site is bound to north by S Bayview Street and an apartment complex. It is bound to the east by an alleyway and residential properties. To the south of the property is a warehouse space (2510 Beacon Ave S). The site is bound to the west by the intersection of 15th Ave S and Beacon Ave S. Commercial properties line Beacon Ave to the west. To the northwest of the subject property are two gas stations (Shell and BP).

4.0 USER PROVIDED INFORMATION

Information provided by PHNW, the stated User of this report, is summarized below.

4.1 Title Records

A Chain of Title was not provided by PHNW and therefore was not reviewed. However, a A standard Title Report was provided by PHNW and is included in Appendix A. Schedule B, Special Exceptions of this Title report indicated did not indicate any easements for fuel pipelines, storage tanks, or other similar facilities.

4.2 Environmental Liens or Land Use Restrictions

Based on Schedule B, Special Exceptions of the title report, no environmental liens were shown to be present against the subject property.

Copyright 2013 G-Logics, Inc.

4.3 Commonly Known or Reasonably Ascertainable Information

G-Logics is not aware of commonly known soil or groundwater conditions located in this area of Seattle that could impact the subject property other than the information identified in this report.

4.4 Valuation Reduction for Environmental Issues

G-Logics was informed by PHNW that the subject property has not been devalued.

4.5 Owner, Property Manager, and Occupant Information

G-Logics understands the current property owner is ABC Supermarket Inc. Mr. Ky Ho, a representative of ABC Supermarket, was available during the site visit. The property is currently occupied by ABC Supermarket (a grocery store), a deli, and a money-exchange kiosk.

4.6 Reason for Performing Phase I ESA

G-Logics understands this Phase I Assessment was conducted for PHNW prior to purchase of the property.

4.7 Other Information

PHNW provided no additional information for this assessment.

5.0 RECORDS REVIEW

Public, agency, and company records are sources of information that may be helpful in evaluating activities that may have contributed to contamination of soil and/or groundwater. The following agencies, companies, and individuals were contacted for information regarding the subject property. Please see Figure 3 for a site and vicinity diagram.

- Environmental Data Resources, Inc., Radius Map Report, dated March 28, 2013
- Environmental Data Resources, Inc., Sanborn Map Report
- Environmental Data Resources, Inc., City Directory Abstract
- Environmental Data Resources, Inc., Historic Topographic Maps

Copyright 2013 G-Logics, Inc.

- Puget Sound Regional Archives, Historical Tax Records
- Title Report, dated March 25, 2013 prepared by Chicago Title Insurance Company
- Owner/Occupant Interviews

5.1 Standard Environmental Records Review

As part of a government database search completed by Environmental Data Resources (EDR), federal, state, local, and tribal databases were searched as specified by the ASTM procedure (and as identified in the attached EDR Radius Map report (Appendix B). Database dates also are identified in the EDR report.

> (***Note***: G-Logics observed that the EDR plotted locations of the identified listings were sometimes inaccurate, as would be expected given the current limitations of geo-coding technology. However, as based on our review of the provided information, the data was of suitable quality for purposes of our review. Therefore, G-Logics has used the identified site addresses (not the plotted locations) when considering possible subsurface contamination issues for this site.)

5.1.1 Federal Comprehensive Environmental Response, Compensation, & Liability Act List

The Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) list is a database printout of sites that have come to the Environmental Protection Agency's (EPA) attention as a site with the potential to or having had releases of hazardous substances being addressed under the Superfund program. CERCLIS contains sites that either are proposed or are included on the National Priorities List (NPL). Also included are sites that are in the screening and assessment phase for possible inclusion on the NPL.

> No CERCLIS listed facilities were identified for the subject property or within 0.5 miles of the subject property.

5.1.2 Federal CERCLIS No Further Remedial Action Planned (NFRAP) List

As of February 25, 1995, the CERCLIS database no longer includes sites which the EPA has assessed and designated "No Further Remedial Action Planned" (NFRAP). A NFRAP decision does not necessarily mean that there is no hazard associated with a given site; it means only that based upon available information, the location is not judged to be a potential NPL site. The list identifies those sites that are listed by the EPA as having been

Copyright 2013 G-Logics, Inc.

evaluated by EPA for possible listing on the NPL, but where no further remedial action is planned subsequent to a preliminary assessment.

No NFRAP sites were identified for the subject property or adjoining properties (extending from the subject property to 0.5 mile).

5.1.3 Federal National Priorities List (NPL)

The NPL list is a compilation of CERCLIS properties with the highest priority for cleanup pursuant to EPA's Hazard Ranking System.

No NPL sites were identified for the subject property or within 1.0 miles of the subject property.

The Delisted NPL list identifies sites that the EPA has removed from the NPL as "…no further response is appropriate."

No Delisted NPL sites were identified for the subject property or within 1.0 miles of the subject property.

5.1.4 Federal RCRA Corrective Action Report (CORRACTS) List

The EDR list identifies those sites that are listed by the EPA as hazardous waste handlers with RCRA corrective action activity.

No CORRACTS sites were identified for the subject property. One site was identified or within 1.0 mile of the subject property. G-Logics doesn't believe the property poses a high potential to impact the subject property based on the location, distance, status, and estimated groundwater flow direction.

5.1.5 Federal RCRA TSD List

The EDR list identifies facilities that have obtained identification numbers from the EPA, which designate these businesses as transporters, storers, or disposers of hazardous waste.

No Treatment, Storage, and Disposal (TSD) facilities were identified for the subject property or within 0.5 mile of the subject property.

5.1.6 Federal Resource Conservation and Recovery Act (RCRA) Generators

The RCRA list identifies facilities that have obtained identification numbers from the EPA, which designate these businesses as generators of hazardous waste. Obtaining an

Copyright 2013 G-Logics, Inc.

identification number does not mean that any hazardous materials have been improperly handled at any of these facilities. (Note: Other lists, such as the Washington Department of Ecology's Leaking Underground Storage Tank List, identify hazardous waste problems.)

No RCRA generators were on the subject property or within 0.25 miles of the subject property.

5.1.7 Federal Emergency Response Notification System (ERNS) List

The EDR list identifies those sites that are listed under the EPA's emergency response notification systems list of reported CERCLA hazardous substance releases or spills in quantities greater than the reportable quantity. This list is maintained by the National Response Center. Notification requirements for such releases or spills are codified in Chapter 40 of the Code of Federal Regulations (CFR) parts 302 and 355.

The subject property was not listed as an ERNS site.

5.1.8 Federal Engineering Controls Site (ECS) List

The ECS list identifies sites that have incorporated physical modifications (e.g. slurry walls or liners) to reduce or eliminate possible exposure to hazardous substances or petroleum products in the soil and/or groundwater.

The subject property was not listed on the ECS list.

5.1.9 Federal and State Institutional Controls Site (ICS) List

The ICS list identifies sites that have administrative measures (e.g. groundwater use restrictions or construction restrictions). The controls are intended to reduce exposure from contaminants that may remain on site.

The subject property was not listed as on the ICS list. The EDR report identified institutional controls at the Park 90/5 Property (2203 Airport Way S). This property is not believed to present a high potential to impact the subject property due to location, distance, and expected groundwater flow direction

Copyright 2013 G-Logics, Inc.

5.1.10 Washington's Confirmed and Suspected Contaminated Sites List (CSCSL)

The Washington Department of Ecology (Ecology) CSCS Report did not indicate the subject property was a known or suspected contaminated site. However, five sites were identified within 0.5 mile of the subject property and thirty-seven additional sites were identified within 1.0 mile of the property. Three of these sites (listed below) are believed to present a potential to impact the subject property due to location, distance, cleanup status, and/or expected groundwater flow direction.

> **Shell Station**, 2424 Beacon Ave S, approximately 0.04 miles northwest of the subject property. This property is also listed in the voluntary cleanup program, RCRA, and LUST. The CSCSL designation as of December 31, 2010 is "no further action".
>
> **Former Unocal Station**, 2415 Beacon Ave S, approximately 0.06 miles northwest of the subject property. This property is also listed on the LUST, RCRA, and VCP list. Benzene, halogenated organics, metals and gasoline have been detected in the soil or groundwater at the subject property.
>
> **Kwik Cleaners**, 2701 15th Ave S, approximately 0.1 mile south of the subject property. This property is also listed on the VCP and RCRA lists. Soil and groundwater contamination are confirmed.

5.1.11 Washington's Hazardous Sites List (HSL)

The Washington Department of Ecology (Ecology) HSL List is a subset of the CSCSL Report and includes sites that have been assessed and ranked using the Washington Ranking Method (WARM). See CSCSL, Section 5.1.10 of this Report.

This report did not indicate the subject property was a contaminated site that had been ranked for cleanup priority. However, six sites were identified within 1.0 mile of the subject property. G-Logics doesn't believe the properties pose a high potential to impact the subject property based on the location, distance, status, and estimated groundwater-flow direction.

5.1.12 State Landfill and/or Solid Waste Disposal Site Lists (SWF) is

Ecology's SWF List (these sites are identified as Solid Waste Facilities or State Landfill sites in the EDR report) did not indicate that state landfills and/or solid waste disposal sites were located within 0.5 mile of the subject property.

Copyright 2013 G-Logics, Inc.

5.1.13 Washington's Leaking Underground Storage Tanks (LUST) List

A review of Ecology's Toxic Cleanup Program LUST List indicated that there were no leaking underground storage tanks reported to Ecology for the subject property. However, leaking underground tanks within 0.5 mile from the subject property were reported at nine locations: (Note: Sites determined to be "No Further Action" after review of a final cleanup report by Ecology staff will not appear on the Leaking Underground Storage Tank List.) The Former Unocal Station (2415 Beacon Ave S, See Section 5.1.10) is believed to present a potential to impact the subject property due to location, distance, cleanup status, and/or expected groundwater-flow direction.

5.1.14 Washington's Registered Underground Storage Tank (UST) List

Ecology's UST list indicated no registered underground storage tanks are listed for the subject property. However, underground tanks within 0.25 mile from the subject property were reported at the locations listed below. The first two are believed to present a high potential to impact the subject property due to location, distance, cleanup status, and/or expected groundwater-flow direction.

Beacon Avenue Shell, 2424 Beacon Ave S, 0.04 miles NW of the subject property

Former Unocal Station, 2415 Beacon Ave S, 0.06 miles NW of the subject property

Chin Brothers Inc, 2901 17th Ave S, 0.3 miles SE of the subject property

5.1.15 Washington's Voluntary Cleanup Program (VCP) Sites

Ecology's VCP list identifies sites that have entered the Voluntary Cleanup Program or its predecessor, the Independent Remedial Action Program.

The EDR report did not indicate that the subject property was included on the VCP list. However, the report indicated that seven surrounding properties within 0.5 miles of the subject property were included on the VCP list. The Kwik Cleaners Property (2701 15th Ave S), Shell Station (2424 Beacon Ave S), and Former Unocal Station (2415 Beacon Ave S) are all believed to present a high potential to impact the subject property due to location, distance, cleanup status, and/or expected groundwater flow direction.

Copyright 2013 G-Logics, Inc.

5.1.16 Washington's Brownfield Sites

EPA's US Brownfields list did not indicate that the subject property or surrounding properties within 0.5 miles of the subject property were included on the Brownfield list.

5.1.17 Tribal Records

EDR receives data on leaking/underground storage tanks located on tribal land from the EPA Region 10. As the subject property is not located on tribal land, no data was available for review.

5.2 Additional Environmental Records

Please note that the EDR report includes search results for several additional databases (e.g. dry cleaners, FINDS, & ROD) that are not specified by ASTM (1527-05, Section 8.2.1). G-Logics has reviewed all of the EDR-provided information, discovering no additional and/or relevant site information.

5.2.1 EDR Groundwater Wells

Several groundwater wells were identified in the areas surrounding the subject property. Typical depths were greater than 50 to 400 feet, constructed between 1901 and 1960).

5.3 Additional Environmental Records, Contacted Agencies

In addition to the EDR-provided information, G-Logics reviewed information from the following sources.

5.3.1 Tax Assessor

A G-Logics representative reviewed the available on-line records for the subject property. In summary, the records provided information regarding property owner, parcel numbers, sales records, and abbreviated legal descriptions. Copies of discovered records are available in Appendix A.

5.3.2 Agency File Search

G-Logics did not request a file search at Ecology's Northwest Regional office as the EDR report did not identify the subject property on any Ecology-maintained lists. Additionally, a

Copyright 2013 G-Logics, Inc.

file review for the nearby sites could not be completed in the sufficient time to include the information in this report.

5.4 Physical Setting Information

The Puget Sound area has been glaciated numerous times over the last several hundred thousand years. The most recent of these events was the Vashon Glaciation. A review of local geologic maps indicates that the site and its vicinity are underlain by Vashon Till (Washington State Department of Natural Resources, 1976). Till is typically a very compact, dense, heterogeneous mixture material deposited by glacial ice as it advanced over previously deposited formations and sediments.

5.5 Historical Use Information, Subject Property and Adjoining Properties

The following information was obtained from reviewed sources of historical information and interviews.

5.5.1 Aerial Photograph Review

A review of historical aerial photography may indicate past activities at a property that may not be documented by other means, or observed during a property visit. The effectiveness of this technique depends on the scale and quality of the photographs, the available coverage, and the skill of the reviewer.

Copyright 2013 G-Logics, Inc.

Given these limitations, several years of aerial photographs, provided by EDR, were reviewed at. The following is a tabulation of the aerial photographs reviewed.

Date	Scale	Color
1956	1" = 750'	No
1965	1" = 500'	No
1969	1" = 500'	No
1975	1" = 500'	Yes
1977	1" = 500'	No
1980	1" = 500'	No
1985	1" = 500'	No
1990	1" = 500'	No
2006	1" = 500'	Yes
2009	1" = 500'	Yes
2011	1" = 500'	Yes

The results of our aerial-photography review are presented below.

1956 The subject property is occupied by the current site building. The surrounding properties are developed with commercial and residential properties.

1965 The subject property appears in the same configuration. Two properties northwest of the subject property can be clearly distinguished as gas stations. Other surrounding properties appear to be residential and commercial properties.

1969 This photograph appears similar to the previous photograph. Though it appears the residential properties directly north of the subject property have been replaced with an apartment complex.

1975 This photograph appears similar to the previous photograph.

1977 This photograph appears similar to the previous photograph.

Copyright 2013 G-Logics, Inc.

1980 This photograph appears similar to the previous photograph.

1985 The subject property is in the same configuration as previous photographs. It appears as though the machine room for the coolers and freezers has been placed on the southeast corner of the roof. The cooler and freezer on the northeast corner can also be seen. Surrounding properties remain commercial and residential. The two gas stations remain to the northwest.

1990 This photograph appears similar to the previous photograph.

2006 This photograph appears similar to the previous photograph.

2009 This photograph appears similar to the previous photograph.

2011 This photograph appears similar to the previous photograph.

Copies of these photographs are included in Appendix C of this report.

5.5.2 Sanborn Fire Insurance Maps

Sanborn fire insurance maps for the area, dated 1904, 1916, 1950, and 1969, were reviewed. Copies of the discovered mapping are attached to this report (Appendix D).

1906 The subject property is vacant on the 1904 map. The property to the north has a single family home on it. Beacon Hill School is located to the southeast and other surrounding properties are residential.

1916 The subject property remains vacant. 15th Avenue South now intersects Beacon Avenue. Properties surrounding the subject property are residential except for the Beacon Hill School.

1950 Three stores are located on the subject property in the 1950 map. A portion of the northern building is occupied by “auto repair”. One of the stores on the southern portion of the property is labeled “some paints”. Multiple stores are located south of the subject property as well. Properties to the north and east are residential. Two properties to the northeast are labeled “Gas and Oil” and “Grease”. These properties are located north of Bayview where Beacon Avenue intersects. An auto-repair business is north of these properties. Properties to the west of the subject property are commercial.

1969 The subject property no longer has the auto-repair business. Surrounding properties appear unchanged.

Copyright 2013 G-Logics, Inc.

5.5.3 Kroll Maps/Metsker Maps

Kroll Metsker property ownership maps for the area, dated 1920, 1940 and 1960, were reviewed. The 1920 property did not have any buildings on it. The 1940 map shows two separate buildings. The eastern building was labeled 2500-2516 Beacon Avenue and the western building was labeled 1507 Bayview Street. A service station is located on the property to the northwest. The subject property is in the same configuration in the 1960 map. Two properties to the northwest are labeled as service stations.

5.5.4 Historical Tax Records

A G-Logics representative reviewed the available files for the subject property. Our research identified that a structure was built on the subject property in 1926. An undated photograph shows the subject property. A sign on the front of the building is labeled “Eba’s Mutual Groceries” a sign on the northeast side of the building says “Motor” and “Morrison’s Motor Service”. The south side of the building had a barber shop and “Beacon Hardware”. Heating for the property is labeled as stove heating.

Historic tax records were also reviewed for adjoining properties. The property to the south was a single-story building. It also had stove heating. A photograph shows the sign on the building as “Safeway Stores”. The adjacent property to the north, prior to being an apartment complex, was heated with an oil burner. The apartment complex is electrically heated. The adjacent eastern property is heated by a “Gas Pipeless Furnace”. Please see Appendix E for copies of the records.

5.5.5 Historical Topographic Mapping

Historical topographic mapping showing the subject property is included in Appendix F. Mapping was discovered for 1894, 1895, 1897, 1909, 1949, 1968, 1973, and 1983. The 1894 map shows the subject property lies south of the City of Seattle boundary. Identified site features are consistent with those described in Section 5.5.1 of this report, Aerial Photographic Review and Section 5.5.3, Sanborn Fire Insurance Maps.

5.5.6 Reverse Telephone Directories

G-Logics reviewed the EDR-City Directory Abstract (Appendix G) and city reverse directories from 1920 through 2012 (but not for every year). The following provides a summary of the identified information for the subject property (2500, 2504, and 2506

Copyright 2013 G-Logics, Inc.

Beacon Ave and 1507 Bayview Ave). Listings for surrounding addresses for all years researched were primarily residential. Based on interpretation of business names, the included with the listings for the subject property are listings of properties that may have had underground storage tanks or may have used hazardous materials on-site.

Address	Year	Name
2500 Beacon Ave S (subject property)	2005	Dolex Dollar Express Jazz Promotions
	1996	Far East Imports Wing Wah Barbeque
	1980-2005	Beacon Market Grocery
	1970-1975	Tom Boy Market
	1955-1966	Food City Market (Grocery)
	1951	Stutz Mutual Market
	1940-1951	Tradewell Stores Inc (Grocery)
2504 Beacon Ave S (subject property)	1940-1951	VandeKamps Holland Dutch Bakery
2506 Beacon Ave S (subject property)	1951-1955	Beacon Hardware
	1940	Christian Oberst Hardware
1507 Bayview Ave S (subject property)	1940-1955	Morrison's Motor Service
Northwest of Subject Property		
2364 Beacon Ave S	1940	Stixrud and Grant Gas Station
	1935	Shell Oil Service Station

2705 15th Ave S	1955	Kwik Cleaners
2718 15th Ave S	1951	Astor Cleaners

Copyright 2013 G-Logics, Inc.

Multiple listings for gas stations, service stations, and cleaners were listed in the vicinity of the subject property. The listed sites are believed to present a potential to impact the subject property due to location, distance, and/or expected groundwater flow direction.

5.5.7 Zoning/Land Use Records

According to the King County Assessor parcel records, the subject property type is zoned as "NC2P-65" or commercial (Appendix A).

5.5.8 Other Historical Sources

No additional historic information was obtained from other sources, such as, newspaper archives, internet sites, community organizations and/or museums. In our professional opinion, additional information was not reasonably ascertainable and/or likely to be significantly useful, accurate, or complete in terms of satisfying the objectives of this report.

6.0 INTERVIEWS

Presented below is a summary of information provided by individuals interviewed for this project.

6.1 Interview with Owner

We interviewed Mr. Ky Ho of ABC Supermarket Inc., the current property owner, regarding site history and current operations. He indicated that the property was purchased in 2005. It is currently occupied by a grocery store. Mr. Ho did not know of any other uses at the subject property.

Mr. Ho stated that the subject was heated with natural gas. He is not aware of any tanks ever being located on the subject property. He is not aware of any hazardous waste, spills or any environmental conditions adversely impacting the subject property.

Multiple floor drains are located on the subject property. Mr. Ho stated that these they drain to the municipal sewer system and are mop drains, drains for when the areas are hosed down and cleaned, and for drainage of condensation in the coolers and freezers. Mr. Ho stated that the freezers are electrically operated. He did not know what type of cooling

Copyright 2013 G-Logics, Inc.

system they had. The machines for the coolers and freezers are located on the roof and appeared in good condition at the time of the site visit.

6.2 Interview with Past Owners, Operators, and Occupants

G-Logics was not provided contact information for past owners/operators/occupants. However, King County Tax Assessor Records indicated Khenh Thai and Van My Huynh as the past owner. However, G-Logics was unable to easily ascertain contact data for the past owners/operators/occupants. As such, other historical sources were reviewed to gather historic site-information about the subject property. In G-Logics opinion, interviews would likely be duplicative of information already collected. However, it is our professional opinion that we are unable to know whether or not the information likely to be obtained, from an interview, would be duplicative of information already collected.

6.3 Interview with Neighboring Property Owners

As the subject property was not an abandoned property, G-Logics did not interview neighboring property owners.

6.4 Interview with Local Government Officials

Please see Section 5.3, Additional Environmental Records, Local Agencies.

6.5 Interview with Others

No other interviews were conducted.

7.0 SITE RECONNAISSANCE

Presented below is a summary of information identified by Ms. Halli Hemley, under the supervision of Mr. Rory Galloway, an environmental professional (as described in ASTM 1527-05), during a site reconnaissance on April 4, 2013.

7.1 Methodology and Limiting Conditions

Ms. Hemley was accompanied by Mr. Danial Chhan and Mr. Ky Ho during the site visit. The purpose of the property visit was to look for obvious visual indications of historical or current operations that may have resulted in possible soil and/or groundwater

Copyright 2013 G-Logics, Inc.

contamination. Mr. Ho also provided interview information, as noted in Section 6.1 of this report. Observed conditions are described below.

7.2 Site Reconnaissance Observations

The general site setting is reported in Sections 3.3 and 3.4 of this report. The site visit included a visual review of the property for indications of activities such as waste storage and disposal, disposal of contaminants into storm drains, underground and aboveground storage tanks, and hazardous-material storage or use areas. Photographs were taken during the site visit (locations and directions presented on Figure 2) and are discussed below. Observed conditions also are described below.

7.2.1 Site Diagram of the Property

Please refer to Figure 2 for a schematic diagram of subject property features and locations and directions of representative site-visit photographs.

7.2.2 Interiors

The building is has two stories. Grocery space occupies the first floor and offices occupy the second (Photos 1-4). The first floor also has a money-transfer kiosk and a deli. The deli cooks food and does not use a fryer (Photo 5). Any used-cooking oil is contained in a plastic jug and disposed when full. Fresh seafood is sold on the premises and a tank with live crab is located on the south side of the building. An electric pump recirculates the water (Photo 6).

A number of fluorescent lights were seen in the building. Given the age of the building, PCBs in the light fixtures may be present.

7.2.3 Freezers and Coolers

The subject property had multiple freezers and coolers. Machinery for the coolers was on the rooftop. According to Mr. Ho, the equipment is all electric. Floor drains appeared in these areas that drain to the municipal-sewer system. None of the equipment appeared to be leaking and all appeared to be in good condition (Photos 7-10).

Copyright 2013 G-Logics, Inc.

7.2.4 Floor Drains

Multiple floor drains are located in the building. All of the floor drains are connected to the municipal-sewer system. These drains are used as mop drains and draining condensation from coolers and freezers (Photos 11-12).

7.2.5 Forklift

A forklift is used for moving inventory on the property (Photo 13). It is powered by propane. No charging stations were observed for the forklift. No staining was observed beneath the parked forklift.

7.2.6 Electrical Equipment

No liquid-filled transformers were noted on the property. Although there is a possibility that transformers or other possible PCB containing equipment are present to facilitate the power requirements of the building.

G-Logics observed several liquid filled transformers adjacent to the subject property during the site visit. Although we did not observe labels on these transformers indicating they are PCB-free, their maintenance is the responsibility of Seattle City Light or the local power utility (Photo 14).

7.2.7 Exteriors

One of the coolers/freezers had outdoor access. The garbage for the building was located on the east side of the property. The property was free of debris and trash (Photos 15 and 16).

8.0 DATA GAP REVIEW

A data gap is defined by the ASTM standard as “a lack of or inability to obtain information required by the standards and practices listed in the regulation despite good faith efforts by the environmental professional or prospective landowner to gather such information.” Accordingly, the EP is to identify data gaps, document steps taken to fill them, and comment on their significance. The following table lists the ten AAI-required criteria and identifies if a data gap exists. If a data gap has been identified, our professional opinions are provided to describe why the data gap is or is not significant. In addition to our opinions, data sources consulted and used to assist with our opinion also are identified.

Copyright 2013 G-Logics, Inc.

10 AAI Required Criteria	Data Gap [(1)] and Significance (Opinions and Sources)
Review performed or supervised by environmental professional (EP).	No data gap.
EP conducted interviews with past and present owners, operators, and occupants.	Data gap exists. Interviews with past owners were not conducted as contact information was not available. However, this data gap is not significant, as the auto-repair business associated with the subject property was identified through historical research. Also, G-Logics had access to the entire building to look for indications of current and historical uses.
EP reviewed historical sources back to first developed use.	No data gap.
EP reviewed federal, state, tribal, and local government records concerning contamination at or near the facility.	No data gap.
EP completed site visit to subject property and observed, as appropriate, adjoining properties.	No data gap.
EP review of User-provided information regarding federal, state, tribal, and local environmental cleanup liens.	Data gap exists. An Environmental Lien Report was not reviewed. However, this data gap is not significant, as environmental liens were not identified in the available Title Report.
EP review of User-provided specialized knowledge of the subject property and adjoining properties.	No data gap.
EP review of User-provided information regarding purchase price vs. fair-market value.	No data gap.
EP and User consideration of commonly known information about the property.	No data gap.
EP and User consideration of degree of obviousness of the presence or likely presence of contamination.	No data gap.

Copyright 2013 G-Logics, Inc.

10 AAI Required Criteria	Data Gap [(1)] and Significance (Opinions and Sources)
[1] ASTM 1527-05 identified a data gap and addressed a significant data gap in the following ways: 1 "…a lack of or inability to obtain information required by this practice despite *good faith* efforts by the *environmental professional* to gather such information." "A data gap is only significant if other information and/or professional experience raises reasonable concerns involving the data gap." "The report shall identify and comment on significant data gaps that affect the ability of the EP to identify *recognized environmental conditions* ..."	

9.0 FINDINGS

For the completed Phase I ESA, the following findings are based on G-Logics knowledge of the subject property from our site observations and information gathered during our review. These findings are subject to the limitations presented in this report and may change if additional information becomes available.

9.1 Subject Property

We have performed a Phase I Environmental Site Assessment for the subject property in conformance with the scope and limitations of ASTM Practice E 1527. Any exceptions to, or deletions from, this practice are described in Section 2.0 (and subsections) of this report. This assessment, as qualified above, has revealed no evidence of recognized environmental conditions (REC) in connection with the property, except for the following:

> Our site review identified the former operation of an auto-repair business which may have stored hazardous chemicals or petroleum products on the subject property. This business was identified in photos from historical tax records, Sanborn mapping, and reverse phone directories. This business, Morrison's Auto Repair, operated on the property in the early 1940s. The business was identified on reverse directories in 1940 and 1955.

9.2 Adjoining Properties

For adjoining and adjacent properties, our assessment discovered conditions indicative of releases or threatened releases of hazardous substances to the soil and groundwater that would represent a REC in connection with the subject property, as described below.

Copyright 2013 G-Logics, Inc.

Several properties in the vicinity of the subject property were identified in historic research as being gas stations, service stations, and cleaners (potentially dry-cleaners). Furthermore, our record review revealed several off-site properties with identified environmental issues (LUST, UST, CSCSL, RCRA, or other identified listings) within the ASTM-required search distances. Given the cleanup status (if applicable), locations, and distances relative to the subject property for these identified sites, it is possible that soil or groundwater contamination would occur at the subject property specifically due to these identified sites.

Additionally, contamination at these sites likely does not present a significant liability to the subject property due to the 2007 amendments to Washington's Model Toxics Control Act (MTCA) [specifically, subsection (12)(b)(iv) of RCW 70.105D.020]. This subsection identifies that "any person who has ownership interest in, operates, or exercises control over real property where hazardous substances has come to be located solely as a result of migration of the hazardous substance to the real property through the groundwater from the source off the property" would not meet the definition of an "owner or operator" for purposes of cleanup responsibility.

10.0 OPINIONS

Based on G-Logics current understanding of site conditions, G-Logics recommends soil and/or groundwater-sampling at the subject property. This work would be performed to better evaluate the presence or absence of contamination from former on-site and off-site activities. Sampling locations should include the northeast portion of the building where the former auto-repair business was located. Sampling areas also should include the southern areas of the site building (in areas adjacent to the former cleaners). G-Logics recommends this workscope be prepared with the assistance and concurrence of PHNW upon completion of review of this report.

Although not part of our scope of work, several light ballasts associated with the light fixtures were viewed during the site visit. Fluorescent light ballasts not labeled as "no PCBs" usually contain these compounds. It will be necessary to remove potential PCB-containing electrical equipment and mercury-containing light tubes before building demolition.

Copyright 2013 G-Logics, Inc.

11.0 ADDITIONAL SERVICES

Although not within the scope or budget of the performed site assessment, G-Logics noted several “non-scope” issues. These issues are presented herein to only provide additional site information.

11.1 Radon Information

Regarding the potential for radon, the United States Geological Survey (USGS) and the attached EDR report have identified the area of the subject property as “Zone 3” (<2pCi/liter). Samples were not collected during this assessment to prove or dispute this expectation. Zone 3 is the EPA’s lowest risk level zone.

11.2 Asbestos/Lead Paint

Given the age of the buildings construction, the presence of asbestos or lead paint is expected. Suspect asbestos containing materials were observed, including floor and ceiling tiles. However, samples were not collected during this assessment to confirm this expectation.

If disturbance of possible asbestos containing materials is planned at some future date through either demolition or renovation activities, various regulations regarding the handling of asbestos must be followed. Asbestos removal must be performed by properly trained and certified workers. The Northwest Air Agency Puget Sound Clean Air Agency regulations state that asbestos-containing materials must be removed from a building prior to demolition or their disturbance by renovation activities. If either of these activities are planned for the on-site buildings, G-Logics recommends that representative samples of building construction-materials be collected and analyzed to confirm the presence and location of asbestos containing material. Asbestos Hazardous Emergency Response Act (AHERA) requirements state that at least three samples must be analyzed of certain types of materials to confirm a negative asbestos content.

For lead paint, there are no current regulatory requirements to abate lead paint in commercial buildings, however a few precautions are recommended. If the building is demolished or remodeled, the paint on the debris likely can be disposed in a typical construction-debris landfill. If lead paint is present, and paint is found with lead at any detectable concentration, then the individuals contracted to do this work must be informed, under worker right-to-know laws.

Copyright 2013 G-Logics, Inc.

11.3 Wetlands

The subject property has been a paved commercial development for over fifty years. As such, no wetlands are present on the site.

11.4 Stormwater/Surfacewater

Consideration of stormwater/surfacewater was not part of our scope of work. Therefore water volumes, drainage, quality, turbidity, temperature and/or other aspects were not evaluated as part of this Phase I ESA.

11.5 Lead in Drinking Water

Consideration of the presence of lead in drinking water was not part of our scope of work, and therefore was not evaluated as part of this Phase I ESA.

11.6 Indoor Air Quality and Biological Pollutants

Consistent with our approved scope of services, an evaluation of the indoor air quality, vapor intrusion, and/biological pollutants (including molds, spores, bacteria, viruses, and the byproducts of any such biological organisms) of the on-site structures was not performed in conjunction with this Phase I ESA.

11.7 High Voltage Powerlines

No high-voltage powerlines are located over the subject property. Therefore, potential impacts are not expected from possible electrical and magnetic fields generated by these lines.

11.8 Cultural and Historic Resources

Consistent with our approved scope of services, an evaluation of potential cultural and historic resources that may be present on the subject site was not performed in conjunction with this Phase I ESA.

Copyright 2013 G-Logics, Inc.

12.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

A brief resume of the environmental professional (Mr. Rory Galloway) conducting this environmental site assessment follows:

Mr. Rory Galloway

Mr. Galloway is a licensed Hydrogeologist and Principal with G-Logics. Since 1986, Mr. Galloway has conducted, managed or reviewed more than 1,500 Phase I Environmental Site Assessments throughout the Pacific Northwest, Alaska, and California. In addition, he has performed CERCLA and MTCA Remedial Investigations/Feasibility Studies (RI/FS) and various standard and risk-based cleanups. Mr. Galloway's expertise includes soil and groundwater investigation and cleanup projects. Mr. Galloway has additional expertise identifying relevant site environmental issues and developing workable cleanup solutions.

Often, these solutions include an evaluation of actual site risks, with intent to balance cleanup needs, regulatory requirements, project schedules, and available resources. With many of these projects, Mr. Galloway also has provided remediation estimates, performed forensic reviews, and has testified as an expert.

Mr. Galloway is a member of ASTM Committee E-50, Environmental Assessment, Risk Management and Corrective Action. Mr. Galloway also is a member of ASTM Subcommittee E-50.01, Storage Tanks; E-50.02, Real Estate Assessment and Management; E-50.03, Pollution Prevention/Beneficial Use; E-50.04, Corrective Action; E-50.05, Environmental Risk Management; and E50.06, Forensic Environmental Investigations. Mr. Galloway also is a member of ASTM Working Item WK9354, Standard Practice for Landowner Appropriate Care of a Contaminated Property.

APPENDIX A

Chicago Title Insurance Company

COMMITMENT FOR TITLE INSURANCE

BY

Chicago Title Insurance Company

Chicago Title Insurance Company, a Nebraska corporation ("Company"), for a valuable consideration, commits to issue its policy or policies of title insurance, as identified in Schedule A, in favor of the Proposed Insured named in Schedule A, as owner or mortgagee of the estate or interest in the land described or referred to in Schedule A, upon payment of the premiums and charges and compliance with the Requirements; all subject to the provisions of Schedule A and B and to the Conditions of this Commitment.

This Commitment shall be effective only when the identity of the Proposed Insured and the amount of the policy or policies committed for have been inserted in Schedule A by the Company.

All liability and obligation under this Commitment shall cease and terminate 6 months after the Effective Date or when the policy or policies committed for shall issue, whichever first occurs, provided that the failure to issue the policy or policies is not the fault of the Company.

The Company will provide a sample of the policy form upon request.

IN WITNESS WHEREOF, Chicago Title Insurance Company has caused its corporate name and seal to be affixed by its duly authorized officers on the date shown in Schedule A.

Chicago Title Insurance Company

By: _____

President

ATTEST: _____

Secretary

Chicago Title of Washington
701 5th Avenue, Suite 2300
Seattle, WA 98104

CONDITIONS

1. The term mortgage, when used herein, shall include deed of trust, trust deed, or other security instrument.

2. If the proposed Insured has or acquired actual knowledge of any defect, lien, encumbrance, adverse claim or other matter affecting the estate or interest or mortgage thereon covered by this Commitment other than those shown in Schedule B hereof, and shall fail to disclose such knowledge to the Company in writing, the Company shall be relieved from liability for any loss or damage resulting from any act of reliance hereon to the extent the Company is prejudiced by failure to so disclose such knowledge. If the proposed Insured shall disclose such knowledge to the Company, or if the Company otherwise acquires actual knowledge of any such defect, lien, encumbrance, adverse claim or other matter, the Company at its option may amend Schedule B of this Commitment accordingly, but such amendment shall not relieve the Company from liability previously incurred pursuant to paragraph 3 of these Conditions.

3. Liability of the Company under this Commitment shall be only to the named proposed Insured and such parties included under the definition of Insured in the form of policy or policies committed for and only for actual loss incurred in reliance hereon in undertaking in good faith (a) to comply with the requirements hereof, or (b) to eliminate exceptions shown in Schedule B, or (c) to acquire or create the estate or interest or mortgage thereon covered by this Commitment. In no event shall such liability exceed the amount stated in Schedule A for the policy or policies committed for and such liability is subject to the insuring provisions and Conditions and the Exclusions from Coverage of the form of policy or policies committed for in favor of the proposed Insured which are hereby incorporated by reference and are made a part of this Commitment except as expressly modified herein.

4. This Commitment is a contract to issue one or more title insurance policies and is not an abstract of title or a report of the condition of title. Any action or actions or rights of action that the proposed Insured may have or may bring against the Company arising out of the status of the title to the estate or interest or the status of the mortgage thereon covered by this Commitment must be based on and are subject to the provisions of this Commitment.

5. *The policy to be issued contains an arbitration clause. All arbitrable matters when the Amounts of Insurance is $2,000,000 or less shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. You may review a copy of the arbitration rules at <http://www.alta.org/>.*

LEGAL DESCRIPTION EXHIBIT
(Paragraph 4 of Schedule A continuation)

THE NORTH 78.84 FEET OF THE WEST 100 FEET, AND THE NORTH 80 FEET OF THE EAST 44.5 FEET OF THE WEST 144.5 FEET, ALL IN BLOCK 7, BAYSIDE ADDITION TO THE CITY OF SEATTLE, ACCORDING TO THE PLAT THEREOF, RECORDED IN VOLUME 1 OF PLATS, PAGE 165, IN KING COUNTY, WASHINGTON;

EXCEPT THE EAST 8 FEET OF THE WEST 144.5 FEET THEREOF CONVEYED TO THE CITY OF SEATTLE FOR ALLEY BY DEED RECORDED UNDER RECORDING NUMBER 4394180.

CHICAGO TITLE COMPANY

A.L.T.A. COMMITMENT
SCHEDULE B

Order No.: 1360636
Your No.: BEACON AVENUE SOUTH

Schedule B of the policy or policies to be issued will contain exceptions to the following matters unless the same are disposed of to the satisfaction of the Company.

GENERAL EXCEPTIONS

A. Rights or claims of parties in possession, or claiming possession, not shown by the Public Records.

B. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land.

C. Easements, prescriptive rights, rights-of-way, liens or encumbrances, or claims thereof, not shown by the Public Records.

D. Any lien, or right to a lien, for contributions to employee benefit funds, or for state workers' compensation, or for services, labor, or material heretofore or hereafter furnished, all as imposed by law, and not shown by the Public Records.

E. Taxes or special assessments which are not yet payable or which are not shown as existing liens by the Public Records.

F. Any lien for service, installation, connection, maintenance, tap, capacity, or construction or similar charges for sewer, water, electricity, natural gas or other utilities, or for garbage collection and disposal not shown by the Public Records.

G. Unpatented mining claims, and all rights relating thereto; reservations and exceptions in United States Patents or in Acts authorizing the issuance thereof; Indian tribal codes or regulations, Indian treaty or aboriginal rights, including easements or equitable servitudes.

H. Water rights, claims or title to water.

I. Defects, liens, encumbrances, adverse claims or other matters, if any, created, first appearing in the Public Records, or attaching subsequent to the effective date hereof but prior to the date the proposed Insured acquires of record for value the estate or interest or mortgage thereon covered by this Commitment.

SPECIAL EXCEPTIONS FOLLOW

CHICAGO TITLE COMPANY
A.L.T.A. COMMITMENT
SCHEDULE B
(Continued)

Order No.: 001360636
Your No.: BEACON AVENUE SOUTH

SPECIAL EXCEPTIONS

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 02/05/2013 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
LEE & EASTES TANK LINES INC	2418 AIRPORT WY S	W 1/4 - 1/2 (0.381 mi.)	K64	151

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 02/12/2013 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

State- and tribal - equivalent CERCLIS

CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the CSCSL list, as provided by EDR, and dated 01/22/2013 has revealed that there are 42 CSCSL sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Ecology's Leaking Underground Storage Tanks Site List.

A review of the LUST list, as provided by EDR, and dated 11/19/2012 has revealed that there are 9 LUST sites within approximately 0.5 miles of the target property.

CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the CSCSL NFA list, as provided by EDR, and dated 01/22/2013 has revealed that there are 9 CSCSL NFA sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/12/2013 has revealed that there are 7 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 24 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 14 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Form Comm:	We had A&D Co. NW Inc. remove and transport 171 bags of friable asbestos insulation (ACM TSI insulation) and ACM Tar roofing. They were demolishing our old boiler. I don't know what the proper codes are.Large renovations went underway involving building in 2007: Windows replacement began in January 07. Roofing replacement began end of October 07. Contractors removed own waste. No reports that hazardous waste was generated and/or removed.

RCRA NonGen / NLR:

Date form received by agency:	06/10/1992
Facility name:	UNOCAL SS 5477
Facility address:	2415 BEACON AVE S SEATTLE, WA 98144
EPA ID:	WAD988507554
Mailing address:	PO BOX 399 EDMONDS, WA 98020
Contact:	UNOCAL RRMC UNOCAL RRMC
Contact address:	PO BOX 399 EDMONDS, WA 98020
Contact country:	US
Contact telephone:	(000)000-0000
Contact email:	Not reported
EPA Region:	10
Classification:	Non-Generator
Description:	Handler: Non-Generators do not presently generate hazardous waste

Owner/Operator Summary:

Owner/operator name:	UNOCAL RRMC U
Owner/operator address:	2415 BEACON AVE S SEATTLE, WA 98144
Owner/operator country:	US
Owner/operator telephone:	(000)000-0000
Legal status:	Private
Owner/Operator Type:	Owner
Owner/Op start date:	05/03/1996
Owner/Op end date:	Not reported

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Violation Status: No violations found

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No

KWIK CLEANERS (Continued) **1004793606**

Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Classification:	Non-Generator
Description:	Handler: Non-Generators do not presently generate hazardous waste

Owner/Operator Summary:

Owner/operator name:	WA ECY W
Owner/operator address:	2214 14TH AVE S SEATTLE, WA 98144
Owner/operator country:	US
Owner/operator telephone:	(000)000-0000
Legal status:	Private
Owner/Operator Type:	Owner
Owner/Op start date:	05/02/1996
Owner/Op end date:	Not reported

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Violation Status: No violations found

FINDS:

14TH AVE S DIESEL SPILL (Continued) **1000197756**

Registry ID: 110005353633

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: WSQG
Waste name: A placeholder to allow BR submission to validate. In WA State, Conditionally Exempt Small Quantity Generators (Called SQG in WA) are not required to report waste streams, so no valid State or Fed codes are available for reporting to BR.

Violation Status: No violations found

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No

SOUND TRANSIT CENTRAL MAINTENANCE BASE (Continued) **1007265220**

Used oil transporter: No

Classification: Not a generator, verified

Date form received by agency: 03/31/1994
Facility name: OSTEX INTL INC
Site name: BURLINGTON ENVIRONMENTAL, INC.
Classification: Large Quantity Generator

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF

OSTEX INTL INC (Continued) **1004614073**

DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: U002
Waste name: ACETONE (I)

Waste code: U112
Waste name: ACETIC ACID ETHYL ESTER (I)

Waste code: U117
Waste name: ETHANE, 1,1'-OXYBIS-(I)

Waste code: U154
Waste name: METHANOL (I)

Violation Status: No violations found

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Classification: Not a generator, verified

Hazardous Waste Summary:
Waste code: WSQG
Waste name: A placeholder to allow BR submission to validate. In WA State, Conditionally Exempt Small Quantity Generators (Called SQG in WA) are not required to report waste streams, so no valid State or Fed codes are available for reporting to BR.

Violation Status: No violations found

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

THREE BROTHERS CLEANERS (Continued) **1004794063**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

SDWIS [WS] (Safe Drinking Water Information System (Water System)). Water Systems can have one or more water system facilities. The water system will purchase water from several facilities. Drinking water information is stored in EPA's SDWIS, which contains information about public water systems and their violations of EPA's regulations for safe drinking water. These statutes and accompanying regulations establish maximum contaminant levels (MCL), treatment techniques, and monitoring and reporting requirements to ensure that water provided to customers is safe for human consumption.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Legal status: Private
Owner/Operator Type: Owner
Owner/Op start date: 07/01/1996
Owner/Op end date: Not reported

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 06/23/2000
Facility name: RAINIER BREWERY
Classification: Large Quantity Generator

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

RAINIER BREWERY (Continued) **1000315750**

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Facility Has Received Notices of Violations:
Regulation violated: Not reported
Area of violation: Generators - Pre-transport
Date violation determined: 08/01/2012

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US EPA Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D005
Waste name: BARIUM

Waste code: D006
Waste name: CADMIUM

Waste code: D007
Waste name: CHROMIUM

Waste code: D008
Waste name: LEAD

Waste code: D011
Waste name: SILVER

Waste code: F006
Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Waste code: F008
Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS WHERE CYANIDES ARE USED IN THE PROCESS.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and

INDUSTRIAL PLATING CORP (Continued) **1000428537**

their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Facility name: KING CO DOT METRO TRANSIT POWER DISTRIB
Classification: Small Quantity Generator

Date form received by agency: 12/31/2003
Facility name: KING CO DOT METRO TRANSIT POWER DISTRIB
Site name: METRO KING CO DOT TRANSIT DIV POWER DIST
Classification: Not a generator, verified

Hazardous Waste Summary:
Waste code: WSQG
Waste name: A placeholder to allow BR submission to validate. In WA State, Conditionally Exempt Small Quantity Generators (Called SQG in WA) are not required to report waste streams, so no valid State or Fed codes are available for reporting to BR.

Violation Status: No violations found

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Owner/Op start date: 05/02/1996
Owner/Op end date: Not reported

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Facility Has Received Notices of Violations:
Regulation violated: Not reported
Area of violation: Generators - General
Date violation determined: 11/07/1989
Date achieved compliance: 04/23/1991
Violation lead agency: State
Enforcement action: Not reported
Enforcement action date: Not reported
Enf. disposition status: Not reported
Enf. disp. status date: Not reported
Enforcement lead agency: Not reported
Proposed penalty amount: Not reported
Final penalty amount: Not reported
Paid penalty amount: Not reported

Evaluation Action Summary:
Evaluation date: 11/07/1989
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
Area of violation: Generators - General
Date achieved compliance: 04/23/1991
Evaluation lead agency: State

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT

BARDAHL (Continued) **1000184588**

NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Hazardous Waste Summary:
Waste code: WSQG
Waste name: A placeholder to allow BR submission to validate. In WA State, Conditionally Exempt Small Quantity Generators (Called SQG in WA) are not required to report waste streams, so no valid State or Fed codes are available for reporting to BR.

Violation Status: No violations found

FINDS:

Registry ID: 110000902006

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D004
Waste name: ARSENIC

Waste code: D007
Waste name: CHROMIUM

Waste code: D008
Waste name: LEAD

Waste code: D018
Waste name: BENZENE

Waste code: D039
Waste name: TETRACHLOROETHYLENE

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL

NORTHWEST ENVIROSERVICE (Continued) **1000411056**

ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: WPCB
Waste name: Washington State Dangerous PCB Waste containing polychlorinated biphenyls at concentrations of 2 parts per million or greater from specific sources: discarded transformers, capacitors or bushings containing (except when drained of all free flowing liquid) and the following wastes generated from the salvaging, rebuilding, or discarding of transformers, capacitors or bushings containing polychlorinated biphenyls (PCB) at concentrations of 2 parts per million or greater: Cooling and insulating fluids and cores, including core papers.

Waste code: WT02
Waste name: Washington State Dangerous Toxic Waste with a toxic constituents concentration greater than or equal to 0.001% and less than 1.0%, determined by biological testing methods or a book designation procedure.

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. Corrective Action Summary:

Event date: 09/27/1991
Event: CA Prioritization, Facility or area was assigned a medium corrective action priority.

Event date: 12/18/1991
Event: Stabilization Measures Evaluation,This facility is not amenable to stabilization activity because of a lack of technical data. An evaluation has been completed, but further data is necessary to determine stabilization measures, feasibility or appropriateness. This status should be changed when data becomes available.

Event date: 10/16/1992
Event: RFA Determination Of Need For An RFI, RFI is Necessary;

Event date: 10/16/1992
Event: RFA Completed, Assessment was an RFA.

Event date: 01/13/1993
Event: CA Prioritization, Facility or area was assigned a high corrective action priority.

Event date: 02/08/1994
Event: RFI Imposition

Event date: 06/07/1994
Event: RFI Workplan Received

Event date: 09/26/1997
Event: Current Human Exposures under Control, More information is needed to make a determination.

Event date: 09/26/1997
Event: Igration of Contaminated Groundwater under Control, More information is needed to make a determination.

Event date: 05/01/2000
Event: RFI Workplan Received

Event date: 02/06/2001
Event: RFI Workplan Modification Requested By Agency

Event date: 05/02/2001

Event:	RFI Report Received
Event date:	03/26/2003
Event:	Igration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.
Event date:	03/26/2003
Event:	Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

Environmental Interest/Information System

NORTHWEST ENVIROSERVICE (Continued) **1000411056**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

US EPA RACT/BACT/LAER Clearinghouse (RBLC) database contains case-specific information on the "Best Available" air pollution technologies that have been required to reduce the emission of air pollutants from stationary sources (e.g., power plants, steel mills, chemical plants, etc.). RACT, or Reasonably Available Control Technology, is required on existing sources in areas that are not meeting national ambient air quality standards. BACT, or Best Available Control Technology, is required on major new or modified sources in clean areas. LAER, or Lowest Achievable Emission Rate, is required on major new or modified sources in non-attainment areas.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

MOUNT BAKER CLEANERS (Continued) **1001490337**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 02/01/2013

Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/12/2013
Date Data Arrived at EDR: 02/15/2013

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

State- and tribal - equivalent CERCLIS

CSCSL: Confirmed and Suspected Contaminated Sites List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 01/22/2013

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: Solid Waste Facility Database

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 09/06/2012

State and tribal Brownfields sites

BROWNFIELDS: Brownfields Sites Listing
A listing of brownfields sites included in the Confirmed & Suspected Sites Listing. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

Date of Government Version: 01/22/2013

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

CSCSL NFA: Confirmed and Contaminated Sites - No Further Action
The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead, a No Further Action code is entered based upon the type of NFA determination the site received.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR US Hist Cleaners: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

COUNTY RECORDS

KING COUNTY:

Abandoned Landfill Study in King County

The King County Abandoned Landfill Survey was conducted from October through December 1984 by the Health Department's Environmental Health Division at the request of the King County Council. The primary objective of the survey was to determine if any public health problems existed at the predetermined 24 sites.

Date of Government Version: 04/30/1985
Date Data Arrived at EDR: 11/07/1994
Date Made Active in Reports: N/A
Number of Days to Update: 0

SEATTLE COUNTY:

Abandoned Landfill Study in the City of Seattle

The Seattle Abandoned Landfill Survey was conducted in June and July of 1984 by the Health Department's Environmental Health Division at the request of the Mayor's Office. The primary objective of the survey was to determine if any public health problems existed at the predetermined 12 sites.

Date of Government Version: 07/30/1984

TACOMA/PIERCE COUNTY:

Closed Landfill Survey

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: Rextag Strategies Corp.
Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

USGS TOPOGRAPHIC MAP

Target Property Map:	47122-E3 SEATTLE SOUTH, WA
Most Recent Revision:	1983

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

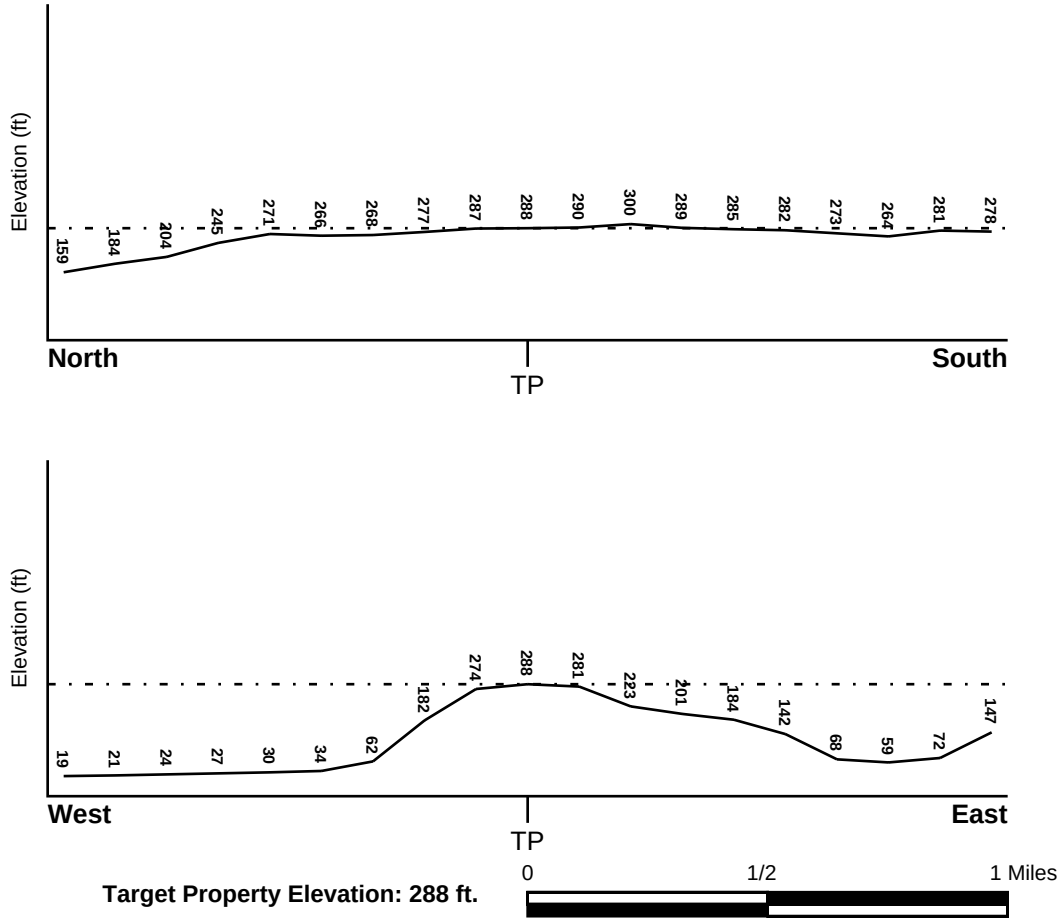

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
KING, WA	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 53033C0635F - FEMA Q3 Flood data

Additional Panels in search area: 53033C0630F - FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
SEATTLE SOUTH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile West
Site Name:	INDUSTRIAL PLATING CORP
Site EPA ID Number:	WAD009491200
Groundwater Flow Direction:	TOWARD PUGET SOUND (ASSUMED)
Measured Depth to Water:	5 feet
Hydraulic Connection:	The site is underlain by approximately 14 feet of fill and a clay layer that is 44 feet thick.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
1	1/4 - 1/2 Mile NE	ENE

A6	1/2 - 1 Mile SW	Varies

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	PILCHUCK
Soil Surface Texture:	loamy sand
Hydrologic Group:	Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.
Soil Drainage Class:	Somewhat excessive. Soils have high hydraulic conductivity and low water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	20 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.30 Min: 6.10
2	20 inches	38 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.30 Min: 5.60
3	38 inches	60 inches	gravelly - sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 20.00 Min: 20.00	Max: 7.30 Min: 6.10
4	60 inches	70 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 2.00	Max: 6.50 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: fine sandy loam
silt loam
gravelly - loam
silty clay loam
muck
gravelly - coarse sand
loam

Surficial Soil Types: fine sandy loam
silt loam

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Wells
Source: Department of Health
Telephone: 360-236-3148
Group A and B well locations.

Water Well Listing
Source: Public Utility District
Telephone: 206-779-7656
A listing of water well locations in Kitsap County.

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Listing
Source: Department of Natural Resources
Telephone: 360-902-1450
Locations that represent oil and gas test well sites in Washington State from 1890 to present.

RADON

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.
