RE: Early Notice Letter Regarding the Release of Hazardous Substances

- Site Name: Horse Heaven Hills Travel Plaza
- Site Address: 101 Merlot Drive, Prosser
- Assessor's Parcel No.: 135943011661001
- Facility/Site ID No.: 28995469
- Cleanup Site ID No.: 12353

Dear Mr. Rogers:

Under Chapter 70.105D Revised Code of Washington (RCW), upon receiving a report of a release or threatened release of a hazardous substance that may pose a threat to human health or the environment, the Department of Ecology (Ecology) is required to conduct an Initial Investigation.

Our investigation revealed contamination was discovered around the diesel dispensers during a soil investigation performed as part of a property transaction. Two - 15,000 gallon diesel Underground Storage Tanks (USTs), as well as associated dispensers and piping, were decommissioned and removed in March 2014. Significant petroleum contamination was observed in soil down to the depth of groundwater. The contamination appears to have migrated south of the USTs, and further soil and groundwater investigation is necessary.

Under the Model Toxics Control Act (MTCA), Ecology maintains a statewide database of confirmed or suspected contaminated sites. This database is made available to the public upon request and online at

http://www.ecy.wa.gov/programs/tcp/sites_brochure/SiteLists_CSCSinstr.htm. It is Ecology's decision that the above-referenced property will be added to this database because soil and groundwater are contaminated at the site.

Please note that inclusion in the database does **not** mean that Ecology has made a determination regarding the identification of any potentially liable person(s) under the Model Toxics Control Act (administered under Chapter 173-340 WAC).

It is the policy of the Department of Ecology to work cooperatively with persons to accomplish prompt and effective site cleanups. Ecology prefers to achieve site cleanup cooperatively through independent cleanup actions (WAC 173-340-510). Cooperating with Ecology in planning or conducting remedial actions is not an admission of guilt or liability.

In proceeding with an independent cleanup, please be aware that there are requirements in state law which must be adhered to. In particular, WAC 173-340-300(4) requires a report of independent actions. To the extent known, the report shall include:

1. identification and location of the hazardous substance(s)
2. circumstances of the release and discovery
3. remedial actions planned, completed, or underway

More requirements of independent cleanup actions are discussed in WAC 173-340-120(8)(b). Ecology will use the appropriate requirements contained throughout this chapter in its evaluation of the adequacy of any independent remedial actions performed.

You are encouraged to contact Ecology for limited informal advice and assistance. For technical assistance you are advised to hire an environmental consultant with the appropriate expertise. For a description of the process for cleaning up a site under MTCA, please refer to the enclosed fact sheet.

If you would like Ecology to review the independent cleanup actions conducted and determine if the site warrants no further action, you are encouraged to participate in the Voluntary Cleanup Program (VCP). Information about the Voluntary Cleanup Program is available online at <http://www.ecy.wa.gov/programs/tcp/vcp/Vcpmain.htm>, or you may contact Frosti Smith, CRO VCP Coordinator, at (509) 454-7841.

If you have any questions regarding this letter, please feel free to contact me at (509) 454-7839.

Sincerely,

Jennifer Lind
