JELD-WEN completed a Final Work Plan (dated October 24, 2008) that contains the work scope for completing the Remedial Investigation (RI), Feasibility Study (FS) and draft Cleanup Action Plan (CAP) at the JELD-WEN former Nord Door facility located at 300 West Marine View Drive, Everett, Washington, 98201 (JELD-WEN Site). The Washington State Department of Ecology (Ecology) approved the Work Plan on October 27, 2008. As requested by Ecology, language on how cultural resources would be addressed if encountered during the field investigation should be incorporated into the Final Work Plan for the JELD-WEN Site. This additional comment by Ecology has been addressed (as Section 3.13 of the Final Work Plan) in this addendum to the Final Work Plan.

3.13 CULTURAL RESOURCES

Remedial Investigation field activities will include the collection of soil, groundwater, and sediment samples which will result in a minimal amount of Site disturbance. As such, a professional archaeologist may not be needed on-site during these activities. Cultural Resource review and the need for any on-site archaeologist will be determined by Ecology in communication with the Department of Archaeology and Historic Preservation (DAHP) and the concerned tribal government.

If excavations such as test pits are required for the Site investigation, a separate cultural resources assessment and work plan may be developed in communication with DAHP and the concerned tribal governments pursuant to RCW 27.44 (Indian graves and records) and RCW 27.53 (Archaeological sites and resources) and a professional archaeologist may be on-site to oversee those activities.

If any archaeological resources are discovered during RI field activities, work will be stopped immediately and Ecology, the DAHP, the City of Everett Planning and Community Development Department, and the Tulalip Tribes Cultural Resources Department will be notified by the close of business. A professional archaeologist will arrange an on-site inspection and invite the parties to attend. The professional archaeologist shall document the discovery and provide a professionally documented site form and report to the above listed parties. In the event of an inadvertent discovery of human remains, work will be immediately halted in the discovery area, the remains will be covered and secured against further disturbance, and the Everett Police Department and Snohomish County Medical Examiner will be immediately contacted, along with DAHP and authorized Tribal representatives. A treatment plan by the professional archaeologist shall be developed in consultation with the above listed parties consistent with RCW 27.44 and RCW 27.53 and implemented according to WAC 25-48.
