

5-Year Review Report Available for Public Comment

The Department of Ecology invites you to review and provide comment on a 5-year (periodic) review of the Leichner Landfill site. The site is located at 9411 Northeast 94th Avenue in Vancouver.

The periodic review found that the cleanup actions at the site appear to be protective of human health and the environment. Ecology conducts a periodic review at least every five years after cleanup begins at a contaminated site. Ecology does periodic reviews to evaluate site conditions after cleanup is considered complete, and to ensure protection of human health and the environment.

Ecology Wants Your Comments!

Ecology will be accepting comments on this periodic review from February 28 - March 31, 2011. Information about document locations and where to submit comments can be found in the box on the right.

Ecology will review all comments received during the comment period and will then finalize the document.

Site Background

Investigations between 1987 and 1991 found that the landfill had contaminated the shallow aquifer (groundwater) under the site. Leichner Brothers Land Reclamation Corporation investigated the site and did cleanup work from 1987 through 1996. The company placed contaminated soil in the landfill under a cap. The landfill cap eliminated direct exposure to the soil and infiltration of precipitation into the landfill.

Groundwater monitoring has been conducted at the site from 1987 through 2010. Contaminants have been decreasing during this time. Groundwater monitoring will continue for the foreseeable future.

Comments Accepted

February 28 - March 31, 2011

Submit Comments and Technical Questions to:

Mohsen Kourehdar, Site Manager
Toxics Cleanup Program, SWRO
P.O. Box 47775
Olympia, WA 98504-7775
