Re: Notice of Potential Liability under the Model Toxics Control Act for the Release of Hazardous Substances at the following Site:

- Site Name: Roy Farms ASTs
- Site Address: 1040 Desmarais Road, Moxee
- Facility/Site ID No.: 14794
- Cleanup Site ID No.: 11404

Dear Mr. Reeves:

Under the Model Toxics Control Act (MTCA), chapter 70.105D RCW, which governs the cleanup of contaminated sites in Washington State, the Department of Ecology (Ecology) may identify persons that it finds are liable for the release of hazardous substances at a site. Before making such a finding, Ecology must provide persons with notice and an opportunity to comment on the proposed finding. Any person whom Ecology finds, based on credible evidence, to be liable is known as a "potentially liable person" or "PLP".

Proposed Finding of Liability

Based on credible evidence, Ecology is proposing to find Roy Farms, Inc liable under RCW 70.105D.040 for the release of hazardous substances at the Roy Farms ASTs facility (Site). This proposed finding is based on the following evidence:

1. Yakima County Assessor parcel details show Roy Farms, Inc (dba, RD Ranch, LLC) is the owner of parcel 201208-31001 where the release occurred.
2. Report entitled *Aboveground Storage Tank Site Assessment and Remedial Action Report, Parcel # 20120831001* documents the release of hazardous substances.
3. The most recent report *August 2014 Biannual Monitoring Report, Yakima County Parcel #201208-31001, PBS Project No 62357.005*, documents concentrations of hazardous substances in groundwater above levels considered safe for human health.

Opportunity to Respond to Proposed Finding of Liability

In response to Ecology's proposed finding of liability, you may either:

1. Accept your status as a PLP without admitting liability and expedite the process through a voluntary waiver of your right to comment. This may be accomplished by signing and returning the enclosed form or by sending a letter containing similar information to Ecology;
2. Challenge your status as a PLP by submitting written comments to Ecology within thirty (30) calendar days of the date you receive this letter; or
3. Choose not to comment on your status as a PLP.

Please submit your waiver or written comments to the following address:

Jason Shira
Toxics Cleanup Program
Washington Department of Ecology
15 W. Yakima Avenue, Suite 200
Yakima, WA 98902

After reviewing any comments submitted or after 30 days if no response has been received, Ecology will make a final determination regarding your status as a PLP and provide you with written notice of that determination.

Identification of Other Potentially Liable Persons

If you are aware of any other persons who may be liable for the release of hazardous substances at the Site, Ecology encourages you to provide us with their identities and the reason you believe they are liable. Ecology also suggests you contact these other persons to discuss how you can jointly work together to most efficiently clean up the Site.

Responsibility and Scope of Potential Liability

Please note that Ecology may either conduct or require PLPs to conduct remedial actions to investigate and clean up the release of hazardous substances at a site. PLPs are encouraged to initiate discussions and negotiations with Ecology and the Office of the Attorney General that may lead to an agreement on the remedial action to be conducted.

Mr. John Reeves

Page 3

Please also note that each liable person is strictly liable, jointly and severally, for all remedial action costs and for all natural resource damages resulting from the release of hazardous substances at a site. If Ecology incurs remedial action costs in connection with the investigation or cleanup of real property and those costs are not reimbursed, then Ecology has the authority under RCW 70.105D.055 to file a lien against that real property to recover those costs.

Next Steps in Cleanup Process

In response to the release of hazardous substances at the Site, Ecology intends to conduct the following actions under MTCA:

1. A Site Hazard Assessment for ranking Roy Farms ASTs on the Hazardous Sites List.
2. Discuss administrative options for remedial action with Roy Farms, Inc e.g. voluntary cleanup program or agreed order.

For a description of the process for cleaning up a site under MTCA, please refer to the enclosed fact sheet.

Ecology's policy is to work cooperatively with PLPs to accomplish the prompt and effective cleanup of contaminated sites. Please note that your cooperation in planning or conducting remedial actions at the Site is not an admission of guilt or liability.

If you have any questions regarding this letter or if you would like additional information regarding the cleanup of contaminated sites, please call me at 509-454-7834. Thank you for your cooperation.

Sincerely,

Jason Shira
Site Manager
